The Sm. C. and Raghunandana in his Prāyaścittatattva (p. 502) lay down two mantras to be recited at the time of taking a bath in the Ganges[1345] 'O Ganges, daughter of Jahnu! That flowest in three worlds, that art sprung from the lotus-like feet of Visnu, that are far-famed as devoted to (the spread of) dharma, remove my sin; O divine mother, O Bhāgīrathī! purify with your immortal waters me who am full of faith and devotion'. The mantra to be repeated at the time of the bath at the place where the Ganges falls into the ocean according to the same two works is "O god that art the lord of rivers! O goddess that art the best among rivers! Having bathed at the confluence of both I shall cast off my sins"

On pp. 243-244 above it has been stated that the Visnu Dh. S. and other works recommend the casting of the ashes or charred bones of a cremated body in the Ganges at Prayāga, Kāśī or other holy place and the rites accompanying the casting of ashes have been there set out. A few words are added here. The same verse[1346] (with slight variations) about casting

ashes in the Ganges occurs in several works. The Agnipurāṇa observes 'the deceased man benefits if his bones are thrown into the Ganges; a man stays in heaven as long as (even a particle of) his bone remains in the waters of the Ganges. No rites for the dead are performed for those who commit suicide or who are *patita*; but even in their case the fall of their bones in Ganges water is beneficial to them.' The Tīr. C and Tīr. Pr. quote two verses and a half from the Brahmapurāna [1347] which set out a briefer rite of throwing ashes than the one in the Nirnayasindhu. The verses mean: "The man carrying the ashes should take a bath, sprinkle *pañcagavya* over the ashes, should place on them a piece of gold, honey, ghee and sesame; then he should deposit them in an earthen vessel; he should then look in the southern direction, say 'salutation to Dharma,' enter the waters (of the Ganges), utter, 'may he (Dharma or Visnu?) be pleased with me' and then cast the ashes in the water; then he should bathe in the river, come out of it, cast a look at the Sun and then give a present (daksinā) to a brāhmana; if he does so, then the state of the deceased person will be like Indra.' Vide Skanda, Kāśī-khanda 30. 42–46 where a little more elaborate procedure is prescribed. The importance of casting ashes in the Ganges probably owes its origin to the story of king Sagara's sons who were reduced to ashes by the wrath of the sage Kapila and who were saved by the ashes being washed in the waters of the Ganges brought down from heaven by Bhagīratha. Vide Vanaparva chap. 107–109, Visnupurāna II. 8–10 for the story. The Nāradiya makes not only the throwing of calcined bones a source of benefit to the departed but even his nails and hair when cast in the Ganges confer the same benefit. It is stated in the Kāśīkhanda that those who, while standing on the banks of the Ganges, praise another tīrtha or do not think very highly of the Ganges go to hell.[1347a] The Kāsīkhanda further provides that there is special and

TRISTHALĪ

The three great tīrthas of Prayāga, Kāsī and Gayā are referred to as Tristhalī and the great scholar, Nārāyaṇabhaṭṭa (born in 1513 A. D.), wrote (about 1580 A. D.) in Benares a famous work called Tristhalīsetu (a bridge to the Tristhalī) wherein he gives a thorough and exhaustive treatment of the pilgrimage to these three holy places [1348a] alone. Prayāga is assigned pp. 1–72, Kāśī pp. 72–316 and Gayā pp. 316–379 (of the Ānandāśrama edition). Following with all humility the footsteps of such an illustrious and venerable scholar I shall deal with the three tīrthas in the same order.

PRAYĀGA

One of the most ancient reference to the greatness of the confluence of the Ganges and the Yamunā occurs in a khila [1349] verse which is usually placed in Rg. X. 75 and may be rendered as follows: "Those who take a bath at the place where the

The त्रिस्थली० p 3 says it is a supplementary śruti text of the Āśvalāyana school, while the Tir. C p 47 quotes it as a verse of the Ṛgveda. It is quite possible to hold that the verse does not encourage religious suicide but only makes this distinction that by a bath only once a man goes to heaven and that if he dies at Prayāga he attains mokṣa even without correct metaphysical knowledge Vide रघुवंश 13 58 'तत्त्वावबोधेन विनापि भूयस्तनुत्यजां नास्ति शरीरबन्धः' q. by तीर्थम् p 313. The स्कन्द says' श्रुतिभिः परिपठ्यते सितासिते सरिद्वरे। तत्राप्लुताङ्गा ह्यमृतं भवन्तीति विनिश्चितम्। काशी. 7. 54 q by त्रिस्थली० p 11. Vide also काशीखण्ड 7.46 for a similar verse *The verse* no doubt has a vedic ring about it The त्रिस्थली० p 4 notices another reading The waters of the Ganges are whitish while those of the Jumnā are dark Classical Sanskrit poets very often harp on these colours of the waters of the two rivers. two rivers, white and dark, meet together, rise up (fly up) to heaven; those determined men who abandon their body there (i. e. commit suicide by drowning themselves) secure immortality (or *mokṣa*)". This must have been a comparatively early verse. The Skandapurāna referes to it as śruti. The greatness of Prayāga is dwelt upon in the Mahābhārata (Vanaparva 85. 69–97, 87. 18–20, Anuśāsana 25. 36–38)[1350] and in many purānas such as the Matsya (chapters 103–112, in all 260 verses), Kūrma I. 36–39 (verses 121), Padma (I. chap. 40–49), Skanda, Kāśi-Khaṇḍa, chap. 7. 45–65). Only a few out of the hundreds of verses on Prayāga can be cited here by way of sample. One remarkable fact is that the Rāmāyana does not say much about Prayāga. The confluence of the two rivers is no doubt referred to (Rām. II. 54.6) but from the description it appears that there was a forest at what is now Prayāga. Prayāga is called Tīrtharāja (the prince among tīrthas) in the Matsya 109. 15, Skanda (Kāśī 7. 45), Padma VI. 23. 27–35 (where the refrain at the end of each verse is 'sa tīrtharājo jayati prayāgah) and elsewhere. The legend runs that Prajāpati or Pitāmaha (Brahmā) performed a sacrifice here and Prayāga is the middle one of the vedis of Brahmā, the others being Kuruksetra in the north (uttaravedī) and Gayā in the east. It is believed that three rivers meet at Prayāga viz. Gaṅgā, Yamunā and Sarasvatī (underground between the two). It is said in the Matsya[1351], Kūrma and other Purānas that at the very sight of Prayāga, even by taking its name or by applying its clay to one's body a man becomes free from sin. The Kūrmapurāna[1352] proclaims "it is the sacred spot of Prajāpati; those who bathe here go to heaven and those who die here are not born again." That sacred spot is known as tīrtharāja; it is dear to Keśava The same is known as Triveni.

The word Prayāga is employed in the neuter when connected with such words as tīrtha or kṣetra, as in Matsya (111·14 prajāpater-idam kṣetram prayāgam-iti viśrutam), but when employed along with words (in the masculine gender) such as tīrtharāja, it takes the masculine gender.

The word Prayāga is derived in various ways. The Vanaparva[1353] appears to suggest that the word Prayāga is derived from the root 'yaj' when it says 'Brahmā who is the soul of all beings performed formerly a sacrifice here; therefore it became known as Prayāga'. In the Skanda[1354] purāna also it appears to be explained by taking the two parts *pra* and *yāga* separately. "It is mentioned as Prayāga because it is superior to all sacrifices; Prayāga was the name given to it by the gods Hari, Hara and others seeing that it is superior to all sacrifices though the latter be enriched with fees and the like." The Matsyapurāna[1355] appears to lay emphasis on the part 'pra' when it says 'on account of its efficacy (or power) as compared with all other tīrthas it prevails (or is useful) far more'. The Brahmapurāna[1356] affirms "It is called prayāga on account of its eminence and it has the word 'rāja' (in Tīrtharāja) applied to it on account of its being the chief".

We must distinguish between Prayāga-mandala, Prayāga and Veṇī or Triveṇī, each subsequent one being smaller and holier than each preceding one. The Matsya[1357] states that the sphere of Prayāga is five *yojanas* in circumference and that the moment a man enters inside this strip of land, there is an Aśvamedha at every step. This has been explained by the Tristhalisetu (p. 15) as follows: Regarding Brahmayūpa (the sacrificial post of Brahmā) as the spike or peg, if one measures with a rope one and one half yojana long all round, that would be the

Prayāgamandala of five *yojanas* in circumference. The boundaries of Prayāga itself are defined by Vanaparva,[1358] the Matsyapurāna (104 5 and 106. 30) and others. 'Prayāga extends from Pratisthāna up to the pool of Vāsuki and upto the two *nāgas* Kambala and Aśvatara and the nāga Bahumūlaka; this is known in the three worlds as the sacred spot of Prajāpati' (Matsya 104. 5), while Matsya 106. 30 provides that to the east of the Ganges is the Sāmudrakūpa, which is the same as Pratisthāna. This is explained by the Tristhalīsetu as follows. the eastern boundary is the kūpa called Pratisthāna [1359]; the northern one is the Vāsuki pool, the western limit is formed by Kambala and Aśvatara, the southern boundary is Bahumūlaka. This would be a four-cornered space which is included within Prayāga-mandala. According to the Matsyapurāna as quoted by the Kalpataru on tīrtha p. 143 the two Nāgas are on the south bank of Yamunā while the printed text has 'vipule Yamunātate' (106 27) [1360] The printed text of Padma I. 43. 27 supports the Kalpataru reading ('Yamunā-daksine tate) Venī-ksetra is within the limits of Prayāga itself and is twenty bow lengths in extent, as stated in the Padma. There are three *kūpas* viz. Prayāga, Pratisthāna and Alarkapura. The Matsya and Agni say 'there are three fire kundas and the Ganges flows in their midst' It should be noted that except where special reference is made in the Purānas to the sub-tīrthas, the reference to a bath at Prayāga in general means bath in the Venī i. e the confluence of the two rivers, as e. g in Vanaparva 85 81 and 85 and Matsya 104 16-17. The Vanaparva [1362] and some of the Purāṇas represent that the country between the Ganges and the Yamunā is (like) the hips and loins of the earth (i e. it is the most prosperous and plentiful part of the earth) and that Prayāga is like the inmost part of the hips.

The Narasimha-purāṇa says that Viṣnu is in the form of Yogamūrti in Prayāga (65 17). It is said in the Matsya-purāṇa [1363] (111. 4-10) that when Rudra dissolves the world at the end of the Kalpa, the holy place of Prayāga is not destroyed, that Brahmā, Viṣnu and Maheśvara (Śiva) stay in Prayāga, that to the north of Pratisthāna Brahmā stays in it under guise, that Viṣnu stays there as Veṇī-Mādhava, that Śiva stays there as the Vaṭa (banyan tree) and that therefore the gods with the Gandharvas, the Siddhas and great sages always protect the sphere (*maṇḍala*) of Prayāga by guarding it against evil actions. The Matsyapurāṇa, therefore, recommends that a pilgrim should go to Prayāga which is protected by all the gods, stay there for a month, avoid sexual intercourse, worship gods and pitṛs and thereby secure his desired objects (104. 18). The same Purāṇa highly eulogises the gift at Prayāga of a *kapilā* cow properly decked (105. 16-22) with clothes, ornaments and jewels. The Padmapurāṇa (Ādi 42 17-24) has the same verses as the Matsya on this subject Similarly, the marriage of a daughter in the *ārṣa* form at Prayāga is highly spoken of in Matsya (106. 8-9). The Matsya (105. 13-14 and 106. 10) says generally that if a man makes a gift of a cow, of gold, of precious stones, of pearls and of other things that he owns his pilgrimage becomes fruitful (*saphala*) and he collects religious merit (*puṇya*) and that when a man makes gifts according to his ability and wealth, the fruit of his pilgrimage increases and he remains in heaven till the end of the world. The Brahmāṇḍa [1364] assures pilgrims that whatever gifts are made according to one's ability at

Kuruksetra, Prayāga, at the mouth of the Ganges where it falls into the sea, on the Ganges, at Puskara, at Setubandha, at Gangādvāra and in Naimisa tends to confer inexhaustible rewards. In the Vanaparva [1365] it is stated that this sacrificial ground (of Brahmā) is honoured even by the gods, that even a small thing donated here assumes greatness (i. e. produces the rewards of large gifts).

The confluence of the three rivers came to be associated with *omkāra*, [1366] the mystic syllable that stands for *Brahma*. It is said in a purāna passage (probably Brahmapurāna) that the three parts of *om* (a u m) respectively are Sarasvātī, Yamunā and Gangā and that the waters of three rivers represent Pradyumna, Aniruddha and Saṅkarsana Hari.

It may be noted that, in spite of the fact that the Matsya, Kūrma (I. 36-39), Padma (Ādi chapters 41-49), Agni 111 and other Purānas contain several hundred verses on Prayāga, the Kalpataru (on tīrtha), the earliest extant digest on tīrthas, quotes only the Matsya (104. 1–13 and 16–20, 105. 1–22, 106. 1–48, 107. 2–21, 108. 3–5, 8–17 and 23–34, 109. 10–12, 110. 1–11, 111. 8–11, in all about 151 verses) and Vanaparva chap. 85. 79–87 and 97 and does not add a single word of explanation or discussion. But the other digests profusely quoting mostly from Purānas discuss at some length several topics and a few words must be devoted to some of those topics.

One such topic is tonsure at Prayāga It is stated by the Gangāvākyāvalī (p. 298) and the Tīr Pr. (p. 335) that, though the author of the Kalpataru says nothing about tonsure at Prayāga, yet as śistas (respectable and learned people) and the writers of digests accept it as necessary, certain authorities would be set out. The two verses quoted by most [1366a] writers are 'one should tonsure the head at Prayāga, offer pindas at Gayā, make gifts in Kuruksetra and should commit

(religious) suicide at Benares. What is the use (or necessity) of pinda offerings at Gayā or death in Kāśī, or gifts at Kuruksetra, if one has tonsured one's head at Prayāga?". Elaborate discussions are held by all these works about the exact intention of the verses, about the application of the maxim of *rātrisattra*[1367] to them and about the results derived from tonsure. They have to be passed over here from considerations of space. The Tristhalī-setu (p. 17) holds that the verse only praises the rite of tonsure at Prayāga and the fruit thereof is simply the removal of sin. The Tri. S. refutes (p. 17) the application of *rātrisattra-nyāya* to these verses, while Tīr. C (p. 32) applies it. Some of the conclusions drawn by the Tri S. are that in one and the same yātrā at Prayāga (even if a man stays there for some days) ceremonial tonsure takes place only once, that widows have to tonsure their heads, that in the case of women whose husbands are living only two or three finger-breadths of tresses are to be cut and offered at the *Triveṇī*, that even[1367a] boys whose *upanayana* has not been performed have to undergo tonsure provided the *cūḍā* rite has already been performed. The Tristhalisetu (p. 22) notes that certain traditionalists,[1368]

1367. रात्रिसत्रन्याय occurs in जै. IV. 3 17-19. There is a passage in the पञ्चविंशब्राह्मण 23. 2. 4 'प्रतितिष्ठन्ति च एता रात्रीरुपयन्ति' Here in the पञ्चविंश रात्रिसत्र is enjoined but no fruit thereof is expressly promised The question arises whether in the absence of an express reward, heaven should be understood as the reward (because as explained in Jai IV 3. 15-16 *svarga* is the reward of all sacrifices for which no express reward is mentioned) or whether प्रतिष्ठा (stable position) which occurs in the above arthavāda passage should be held to be the reward of रात्रिसत्र. The reply is that here the reward is प्रतिष्ठा and not स्वर्ग i. e. though there is no express mention of the reward in the passage about rātrisattra, the *arthavāda* passage should be construed as laying down the reward In the two verses, there is a vidhi in the words प्रयागे वपनं कुर्यात् and the second verse is an अर्थवाद. The question is what reward is promised in it If रात्रिसत्रन्याय applies, then मुण्डन secures all the fruits of गयापिण्डदान, कुरुक्षेत्रदान and काशीतनुत्याग If it does not apply then the only fruit is पापाभाव

relying on passages that aver that all sins cling to the roots of a person's hair, say that cutting two or three tresses would be merely *kartana* and not *vapana* (tonsure), that even women whose husbands are alive must shave themselves at Prayāga, that such women should make a braid of all their hair, should deck the braid with saffron and other auspicious materials, bow to their husbands and with the husband's permission have the head tonsured, that then they should place the cut hair in their joined hands, place thereon a golden or silver venī and pearls and coral and should cast all these into the confluence (Venī) of the Ganges and Jumnā after repeating the mantra 'May all my sins be destroyed by this offering of my braided hair into the Venī' may my blessedness (the auspicious state of wifehood) always increase in the lives to come' The Tri. S. states that women do not tonsure their head at any tīrtha except at Prayāga and the only reason for this is that it is the practice of śistas. Vide above pp 122–124 for tonsure as expiation for sins. The Nāradīya (Uttara) 63. 106 provides the same rule as Parāśara (in note 278 above) for women. The Prāyascittatattva of Raghunandana prescribes the complete tonsure of the head for women at Prayāga.

It appears probable that the provision for the casting of *venī* (braided hair) on the part of women whose husbands were alive was suggested by the word *Venī* applied to the confluence of the two rivers, where the river Ganges appears to make a bend or curve for some distance.[1369]

One important question that very much exercised the minds of ancient and medieval Indian writers was whether and when suicide, particularly at sacred spots like the confluence of the Ganges and Jumnā or at the foot of the Aksaya Vata at Prayāga, would involve no sin.[1370] This matter has already been

dealt with at length in H. of Dh. vol. II. pp 924–928 and vol. III. pp. 939, 948–949. Only a brief treatment by way of a summary of the pages and a few notes will be added here. The general sentiment of Dharmaśāstra works is to condemn suicide or an attempt to commit suicide as a great sin (vide H of Dh vol II. page 924 for texts). The Āp. Dh. S. (I. 10 28 15–17) mentions the view of Hārita which condemns suicide even as prāyaścitta for committing a mahāpātaka (like incest) and puts killing another or killing oneself on the same footing Manu V. 89 and Yāj. III. 154 condemn suicide by denying after-death rites to those who commit it, but Manu allowed suicide in various ways as prāyaścitta for mahāpātakas (vide Manu XI. 73, 90–91, 103–104). But exceptions to the condemnation of suicide are found in the smrtis, epics and purānas. They may be grouped under several heads. (1) Suicide as an exception in various ways by those guilty of mahāpātakas (viz. brāhmana murder, drinking of *surā*, theft of brāhmana's gold and incest), vide H. of Dh. vol. II. pp. 924–925 for smrti and other texts. (2) Starting on the Great Journey (*mahāprasthāna-gamana* or *mahāpathayātrā*) by a forest hermit (Manu VI. 31, Yāj. III. 55) suffering from incurable diseases and unable to perform the duties of his order (3) An old man or one who cannot observe the rules of bodily purification or who is so ill as to be beyond medical skill may kill himself by throwing himself from a precipice or by fire or by drowning or fasting or start on the Great Journey into the Himālaya or by jumping from the branches of the Vata tree at Prayāga (Aparārka p 877 quoting Adi-purāna and Atri-smrti verses 218–219 q. by Medhātithi on Manu V. 88 and Mit. on Yāj III. 6) (4) Even a householder, otherwise all right, may resort to suicide by the means stated (in No. 3) if his life's work is done, if he has no desire for the pleasures of the world and does not desire to live, or if he is a Vedāntin[1371] and convinced of the ephemeral nature of life and may kill himself by fast in Himālaya. (5) Religious suicide was allowed at the confluence of the two great rivers Gangā and Yamunā, at the Vata there and at some other tīrthas (6) A wife dying by *sahagamana* or *anumarana*. As to *Satī*, the Nāradiya (pūrvārdha 7. 52–53) provides that a woman should not burn herself on the funeral pyre of her husband if she has a

young child or young children, if she is pregnant or if she has not attained puberty, or if she is in her monthly illness at the time. Not only did common men believe in the promise of the Purānas that those who killed themselves at Prayāga (at the *saṅgama* or near Vata) secured moksa (freedom from the everlasting cycle of births and deaths) which was the highest of the four *purusārathas* (goals of human existence), but even great poets like Kālidāsa held the view that, though *moksa* or *kaivalya* or *apavarga* requires correct knowledge and realisation of the Supreme Spirit according to the Vedānta, Sānkhya and Nyāya systems, death at the sacred sangama led to moksa even without 'tattvajñāna.' In H. of Dh. vol. II pp. 925–927, historical examples of kings such as Yaśah-karnadeva, Candella Dhangadev and Cālukya Someśvara committing suicide at Prayāga or the Tuṅgabhadrā have been given. The king Kumāragupta of Magadha is said to have entered the fire of dry cow-dung cakes. This is in accordance with the prescriptions in the Matsya-purāna 107. 9–10 (=Padma, Ādi-khanḍa 44 3) which states[1372] 'the man who, suffering from no diseases, having no deficiency as to his limbs and being in full possession of his five senses, encompasses (his death) in cowdung fire remains honoured in heaven for as many years as there are pores on the whole of his body.'[1373] The Rājatarangiṇī VI. 14 refers to officers entrusted with the duty of supervising suicide by fast (prāyopaveśa).

1372 गङ्गायमुनयोर्मध्ये कर्षाग्निं यस्तु साधयेत्। अहीनाङ्गो ह्यरोगश्च पञ्चेन्द्रियसमन्वितः। यावन्ति रोमकूपाणि तस्य गात्रेषु देहिन ॥ तावद्वर्षसहस्राणि स्वर्गलोके महीयते॥ मत्स्य 107 9, कूर्म I 38. 3–4, नारदीय, उत्तर, 63.154 (reads करीषाग्निं तु धारयेत्), पद्म I 44. 9 (reads पञ्चाग्नि यस्तु) कर्षाग्नि is short for करीषाग्नि for metrical reasons कूर्म I, 38.3 reads 'करीषाग्नि च साधयेत्' Vide Gupta Inscriptions No. 42 p. 200, the Ahsad Stone Inscription of आदित्यसेन of मगध, which states that his fifth ancestor Kumāragupta plunged himself in the slow-burning fire of dried cowdung cakes as if in water at Prayāga. शौर्यसत्यव्रतधरो यः प्रयागगतो धने। अम्भसीव करीषाग्नौ मग्न स सुष्पपूजितः॥ p 203 (of the text). धने means धने सत्यपि. The learned editor was probably unaware of the provisions about suicide at Prayāga by being burnt with dry cowdung cakes in the Matsya and other purānas.

1373. The Ain-i-Akbari (tr. by Gladwin and published in 1800) speaks of the following as the meritorious kinds of suicide (vol I. p. 531 and p. 802 of the Popular edition, edited by J. Mukhopadhyaya). These are five in number viz. (1) starving; (2) covering himself with cowdung and setting it on fire and consuming himself therein, (3) burying himself in snow; (4) to plunge into water at the *Gangāsāgara-sangama*, enumerate one's sins and pray till alligators come and devour the man, (5) cut his throat at Allahabad at the confluence of the Ganges and the Jumnā.

The important verse on which reliance is placed for sanctioning religious suicide at Prayāga may be translated[1374] as follows. 'You should not set aside (pass over) your wish about dying at Prayāga on account of the words of the Veda or the words of the people.' The words of the Veda[1375] are Vāj. S. 40 3 (=Īśāvāsyopanisad 3) which literally translated means 'there are worlds of Asuras enveloped in blinding darkness, those who have killed themselves repair after death to those worlds' This verse does not in the context appear to refer to a person committing suicide, but rather to a person who kills his soul by remaining in ignorance of the true Self. But even learned writers and poets took it to refer to suicide (vide Uttararāmacarita, Act IV after verse 3). Another passage of the Veda on which reliance may be placed is the one in the Śatapatha Brāhmana X. 2. 6. 7 'one ought not to yield to his own desire and pass away before the full extent of life, for it (such shortening of full life) does not make for the (heavenly) world' By 'the words of the people' are meant smrti passages condemning suicide such as Gaut. 14, 12, Vas[1375a] 23. 14-15, Manu V. 88 (which says that no water is to be offered to those who kill themselves), Visnu Dh S 22, 56 (ātmatyāginaḥ patitāś-ca naśaucodakabhājaḥ)

1374. न वेदवचनात्तात न लोकवचनादपि। मतिरुत्क्रमणीया ते प्रयागमरणं प्रति॥ वनपर्व 85.83, नारदीय (उत्तर) 63 129, पद्म (आदि 39.76 reads न देव°), अग्नि 111 8 (reads मतिरुत्क्रमणीयान्ते प्रयागे मरणं प्रति) मत्स्य. 106.22 reads न देववचना॰॰ प्रयागगमनं प्रति) and पद्म, आदि 43.22 reads प्रयागगमनं प्रति. The कूर्मपुराण I. 37.14 is न मातृवचनात्तात न...दपि। मति ॰प्रयागगमन प्रति॥, पद्म, आदिखण्ड 33.64 reads न लोकवचनात् पित्रोर्न चैव गुरुवादत॰। मतिर्न क्रमणीया स्यादविमुक्तगति प्रति॥. This entirely changes the meaning and avers that if one has a desire to go to Kāśī, one should not heed the words of one's parents or elders or of the people (dissuading him from going).

There is no doubt that some of the smṛtis, the Mahābhārata[1376] itself and some purānas do recommend (or at least do not condemn) suicide in certain circumstances. A few purāna passages may be quoted here. Two verses of the Kūrma state 'That goal (or state), which a wise man that is devoted to Yoga and that has become an ascetic (or has forsaken all actions) reaches, is secured by him who gives up life at the confluence of the Gangā and Yamunā. Whoever dies in the Gangā whether wilfully or unintentionally is born after death in heaven and does not see hell'.[1377] The Kūrma is quite clear 'Moksa may be secured or not after a thousand births elsewhere but in Benares moksa can be secured in a single birth' (1. 32. 22) The Padma[1378] is quite emphatic 'a man who, knowingly or unknowingly, wilfully or unintentionally, dies in the Ganges secures on death heaven and *moksa*'. A verse of the Skanda asserts 'He who abandons his life in this sacred place in some way or other does not incur the sin of suicide but secures his desired objects.' The Kūrma (I. 38 3–12) refers to four modes of suicide and promises residence in heaven and various other rewards for thousands of years, viz. by (1) burning oneself in the slow fire of dry cowdung cakes, (2) by entering the water at the confluence of Gaṅgā and Yamunā, (3) by hanging with head down in the stream and feet up and drinking

The Mahābhārata has a *parva* called Mahāprāsthānika in which it is narrated (chap 1. 24) that Yudhiṣṭhira with his four brothers, queen Draupadī and a faithful dog started on the Great Journey towards the Himālaya and that they fell down dead one after another, Draupadī being the first and Bhīma the last.

the waters of the Ganges, (4) by cutting off his own flesh and giving it as food to birds. The famous Chinese traveller Hiouen Thsang (about 629–645 A. D.) clearly refers to this practice of religious suicide (vide Beal's 'Buddhist Records of the Western world,' vol. I. pp. 232–234). The Kalpataru on Tirtha (composed about 1110–1120 A. D.) devotes a special section to Mahāpathayātrā (pp. 258–265). Gradually, the idea of securing heaven and *mokṣa* by committing suicide at Prayāga or Benares appears to have spread to other tirthas. Vanaparva[1379] speaks of suicide at Prthūdaka (Pehova in the Karnal district of Punjab, 14 miles from Thanesar) The Brahmapurāna[1380] calls upon *dvijas* who are intent on securing *mokṣa* to commit suicide at Puruṣottama-kṣetra. The Lingapurāna[1381] says 'if a brāhmaṇa kills himself on Śrīśaila he destroys his sins and attains *mokṣa* as at Avimukta (Benares); there is no doubt about this'. The Padma promises[1382] a similar reward for suicide by fire or by fast at the confluence of Narmadā and Kāverī (a small river, not the great South Indian river).

Gradually there was a revulsion of feeling against suicide at Prayāga or Kāśī or starting on the Great Journey. Among the actions forbidden in the Kali age are included 'starting on the Great Journey' and 'suicide of old people jumping from a precipice or by fire' (vide H. of Dh. vol. III. pp. 939, 958–59). Some of the later medieval writers try very hard to combat the view that religious suicide is permitted[1383]. Nīlakaṇṭha, the commentator of the Mahābhārata, holds that Vanaparva 85. 83 (na vedavacanāt &c) refers to natural death at Prayāga and not to wilful death and that the Khila verse ('Sitāsite' quoted above on p. 596) has the same meaning. Then he propounds two alternative interpretations of Vanaparva 85.

83, viz. that this passage allows those who are suffering from an incurable disease to commit suicide at Prayāga instead of dying by falling from a precipice and the like or that this verse does not apply to brāhmanas but only to the other three varnas.[1384]

Both the Gangāvākyāvalī (pp. 304–310) and the Tīr. C (pp. 47–52) hold that all varnas have the authority to resort to suicide at Prayāga. The Tīr. Pr holds a long, learned and highly polemic discussion on the subject of religious suicide at Prayāga (pp. 346–355). Its own view appears to be that a brāhmana should not commit this suicide at Prayāga on account of the prohibition contained in Kalivarjya verses and that members of the other varnas may do so. The Tristhalisetu also enters upon a long discussion (pp. 47–55) and its conclusions are that in suicide at Prayāga for the attainment of *moksa* or other rewards (such as heaven) there is no sin, that this suicide at Prayāga is not forbidden[1384a] to brāhmanas as some think (since Agni 111 8 reads 'na vedavacanād *vipra*'), that persons whether seriously ill or in good health[1385] may resort to suicide at Prayāga, that no one has authority to commit suicide at Prayāga after abandoning to their fate one's old parents, young wife and children that require support, nor should a woman who is pregnant or who has young children or who has no permission from her husband, commit suicide at Prayāga.[1386] It is refreshing to find Nārāyanabhatta, perhaps

the most learned and renowned Pandit of his age steeped in all the lore of ancient India, make, in spite of the overwhelming weight of śāstric authority in favour of suicide at Prayāga, exceptions that surely appeal to reason, sentiment and common sense.[1387] Nārāyanabhatta probably followed traditions several hundred years older than his times. Alberuni in his work on India composed about 1030 A. D. says about religious suicide that 'it was resorted to by those who are tired of life, who are distressed over some incurable disease, some irremovable bodily defect or old age or infirmity. This however no man of distinction does, but only vaiśyas and śūdras. Burning oneself is forbidden to brāhmaṇas and kṣatriyas by a special law. Therefore these if they want to kill themselves do so at the time of an eclipse in some other manner or they hire somebody to drown them in the Ganges.' (tr. by Sachau, vol. II. p 170). The Tri. S. S. provides that a man desirous of committing religious suicide at Prayāga should first perform a prāyaścitta,

1387. काम्यमत्यत्र मरणम्। अत्र तु सर्ववर्णानामधिकारः। गङ्गावा. p 305 and तीर्थचि. p. 47. It is a most remarkable thing that the treatment of प्रयागमरण in both these works is word for word the same, except that the तीर्थचि. quotes the verses न वेदवचना॰ from the पद्मपुराण while the गङ्गावा quotes them from the मत्स्य. It appears probable that the तीर्थचि॰ borrows from the गङ्गावा. since वाचस्पति appears to have been a younger contemporary of Vidyāpati who helped विश्वासदेवी in composing गङ्गावा. Both were closely connected with the several kings and queens of the कामेश्वर dynasty of Mithilā and it is difficult to assert with confidence who borrows from whom. In New I A. vol VII. at p. 53 Prof. G. C Basu while describing a newly found ms of a work called व्याहिभक्तितरङ्गिणी ascribed in the colophon to विद्यापति states that that work mentions the द्वैतानिर्णय of वाचस्पति. So it is not unlikely that विद्यापति helped विश्वासदेवी by taking a part from the तीर्थचिन्तामणि of वाचस्पति Vide H. of Dh. vol. I pp. 739–740, Journal of Dept. of Letters, Calcutta University, vol. XVI, New I. A. vol. VII pp. 49 ff, I. H. Q vol. XX (1944) pp. 211 ff for the date and works of विद्यापति and H. of Dh vol. I. pp. 404–405 for the date of वाचस्पति

should perform his own śrāddha upto the offering of pinḍa if he has no relative entitled to perform it, should fast that day, should make a saṅkalpa next day preceded by a writing (to inform people of his desire to die in that way) and enter the holy waters contemplating on Viṣṇu. On his death, his relatives have to observe āśauca only for three days (and not for ten) and on the 4th day the śrāddhas of the 11th day are to be performed for him.[1388]

The psychological background behind the religious suicide at Prayāga and other places is not difficult to realise. Centuries of philosophical thought had made a very deep impression on the minds of all people that the soul has to submit to a never-ending cycle of births and deaths. Ancient scriptures had offered a release in two ways viz. by *tattvajñāna* and by suicide at a tīrtha. Death had no great terror for the pilgrim who submitted to various inconveniences and privations ungrudgingly. If one is determined to put an end to *saṁsāra* by taking one's life, what nobler environment could have been imagined or indicated than at Prayāga, where two mighty rivers flowing from the sacred Himālaya unite and carry on unceasingly their work of fertilizing the land and bringing prosperity and solace to millions of needy and anxious people?

While on this topic of religious suicide, it would not be out of place to briefly refer to the discussion in the digests about the meaning of the statement in the purāṇas that those who die at Prayāga are not born again (e.g. Matsya 180. 71 and 74). The answer is foreshadowed in the Matsyapurāṇa itself (182. 22–25) which[1389] says: At the time of death, when the vital

1389 The स्कन्दपुराण, काशी॰ has the following verses which repeat what the Matsya (182 22–25) says viz Śiva whispers into the right ear of a man dying at Kāśī the knowledge of *brahma* that will save his soul ब्रह्मज्ञानेन मुच्यन्ते नान्यथा जन्तव. क्वचित्। ब्रह्मज्ञानमये क्षेत्रे प्रयागे वा तनुत्यजः॥ ब्रह्मज्ञानं तदेवाहं काशीसंस्थितिभागिनाम्। दिशामि तारकं प्रान्ते मुच्यन्ते ते तु तत्क्षणात्॥ chap. 32, verses 115–116. साक्षान्मोक्षो न चतासु पुरीषु प्रियभाषिणि। स्कन्द, काशी॰ 8 3 (अगस्त्य tells लोपामुद्रा). The मत्स्य॰ verses are· अन्तकाले मनुष्याणा छिद्यमानेषु मर्मसु। वायुना प्रेर्यमाणाना स्मृतिर्नैवोपजायते॥ अविमुक्ते क्षान्तकाले भक्तानामीश्वरः स्वयम्। कर्मभिः प्रेर्यमाणाना कर्णजापं प्रयच्छति। मणिकर्ण्यां त्यजन्देहं गतिमिष्टा व्रजेन्नर. । ईश्वरप्रेरितो याति ब्रह्मणामक्षतात्मभि.॥ 182 22–25 The words अन्तकाले .. जायते refer to the general rule The verses अविमुक्ते॰ state the special case of death in Avimukta The त्रिस्थली॰ p. 297 quotes these verses and reads अविमुक्ते क्षान्तकाले

parts of the human body are being shattered, memory must fail a human being that is about to be pushed on (to another body) by the vital breath (when it leaves the mortal coil). But at the time of death in Avimukta (Vārānasī) Lord (Śiva) himself whispers (higher knowledge) in the ears of his devotees that are about to be pushed (into new bodies) by (accumulations of their actions). A man dying near Manikarnikā pool reaches the desired goal; he being guided by the Lord reaches the goal which is difficult of attainment by those whose minds are not pure.' In the Kāśīkhanda it is expressly stated that moksa does not directly result in these cities (viz. Kāśī &c). But in spite of these warnings the popular belief fostered by the literal meaning of hundreds of Purāna passages is that moksa results from dying at Prayāga or in Kāśiksetra.

The practice of religious suicide has a very respectable antiquity. In the 4th century B. C. Kalanos, the Indian Gymnosophist from Taxila who had accompanied Alexander from India, burnt himself alive on a funeral pyre at Sousa, when being over 70 years old, he was afflicted with a malady that made life more and more burdensome. Vide J W McCrindle's 'Invasion of India by Alexander the Great' (New Edition 1896) pp. 46, 301, 386-392. Strabo informs us of a gymnosophist from India named Zarmanochegas of Broach who accompanied an embassy to Augustus Caesar at Athens and consigned himself to flames (vide 'Invasion of India by Alexander' p. 389). Hiouen Thsang (Beal's 'Buddhist Records of the Western World' vol. I. pp. 232-234) refers to suicide at Prayāga. The Jains, while on the one hand they laid the greatest emphasis on 'ahimsā' (non-injury), encouraged religious suicide (called 'Sallekhanā') in certain cases [1390].

Some of the works, viz. the Kāśīmrti-moksa-vicāra of Sureśvara (pp. 2-9), the Tristhalīsetu (pp. 50-55) and the Tirthaprakāsa (pp. 313-318) discuss at some length how mere death (either involuntary or voluntary) in Vārānasī or Prayāga would lead to moksa Considerations of space prevent a complete statement of their views Their arguments are briefly as follows:—Karma is of three kinds, viz *sañcita* (collected in former births), *prārabdha* (that has begun to

operate by giving the soul the present body) and *kriyamāna* (to be done in this body and in future). The Upaniṣads and the Gītā[1391] declare that, just as waters do not stick to a lotus leaf, so evil deeds do not cling to a man who knows this (knowledge of *brahma*), that the fire of knowledge reduces to ashes all *karma* and that *moksa* results from the realization of the Supreme Spirit (Vedānta-sūtra IV. 1. 13). From this it follows that a man who has realized the Highest Reality will not be affected by the acts done by him after realization and his accumulated actions (sañcita) will be destroyed by that realization. The present body in which the soul realizes *brahma* was due to that part of his *karma* which had begun to operate. When the present body perishes in the case of a man who has realized *brahma* he attains final release, since no actions remain for producing effects. To the man who dies a natural death in Benares is given at the time of death the Tāraka (saving) mantra The Matsyapurāna says:[1392] those who enter fire according to the rules in Avimukta (i. e. Benares) enter the mouth of Śiva and so also those determined devotees of Śiva who die by fast in Benares do not return (to this world) even after millions of *kalpas*. Therefore all those who die in any way at[1393] Benares receive Grace from Śiva after their death That leads to *tattvajñāna* (correct spiritual knowledge) which leads to moksa In rare passages it is expressly stated that *moksa* cannot[1394] be immediately secured

(by dying) in these cities. The Tāraka-mantra is variously explained. According to Sureśvara, Tāraka-mantra is the mystic syllable *om* which is a symbol of *brahma* as stated in the Tai. Up. (I. 1.8 *Om-iti* brahma) and the Gītā (8. 13 Om-ityekākṣaram brahma). The Tri. S. gives another explanation besides this. According to Rāmatāpanīya Upaniṣad and[1395] the Padmapurāṇa the mantra is 'śrī-Rāma-Rāma-Rāmeti.'

There are several sub-tīrthas that fall under Prayāga The most important of them is the famous Vaṭa (banyan tree) called Akṣaya-Vaṭa (the imperishable Vaṭa). The Agni (111. 13) states 'if a man dies at the foot of the Vaṭa and in the Saṅgama he goes to the city of Viṣnu'. Special reference is made to abandoning one's life at the foot of the Vaṭa. The Kūrma[1396] says 'He, who abandons life at the foot of the Vaṭa, passes beyond heavenly worlds and goes to the world of Rudra'. The following are the sub-tīrthas of Prayāga and only references are given to the works in which they are described: (1) the two Nāgas called Kambala and Aśvatara which according to some are on the spacious (vipula) bank of the Jumnā and according to others on the southern bank of the Jumnā (Vanaparva 85 77, Matsya 106. 27, Padma, Ādi 39 69, Agni 111. 5, Kūrma I. 37. 19), (2) Pratiṣṭhāna on the eastern side of the Ganges, being the same as the Sāmudra-kūpa (Vanaparva 85. 77, Matsya 106. 30, Kūrma I. 37. 22, Padma, Ādi. 43, 30; Vanaparva 85. 114 appears to suggest that Pratiṣṭhāna is another name of Prayāga; (3) Sandhyāvaṭa (Matsya 106. 43, Kūrma I. 37. 28, Agni 111. 13); (4) Haṃsaprapatana to the north of Pratiṣṭhāna and to the east of the Ganges (Matsya 106. 32, Kūrma I. 37, 24, Agni 111. 10, Padma, Ādi 39. 80 and 43. 32, (5) Koṭitīrtha (Matsya 106. 44, Kūrma I. 37. 29, Agni 111. 14, Padma, Ādi 43. 44; (6) Bhogavatī, the Vedī of Prajāpati to the north of Vāsuki (Vanaparva 85. 77, Matsya 106.46, Agni 111. 5, Padma, Ādi 39. 79 and 43. 46; (7) Daśāśvamedhaka (Matsya 106. 46, Padma, Ādi 39. 80); (8) Urvaśīpulina, suicide at which

The Purānas lay down that if a man starts on a pilgrimage, but dies on the way to Prayāga he reaps great benefits even without reaching it, provided he dies remembering Prayāga. The Matsyapurāna (105. 8-12) asserts:[1400] A man whether in his own country or house or after leaving his country dies in a forest, while remembering Prayāga, he still secures the world of Brahma; he reaches a world where the

1398. It may be noted that the rewards promised for suicide at Urvaśīpulina are sex pleasures and secular benefits like becoming a king or governor. Even suicide at the Saṅgama is promised similar pleasures of the flesh and of kingly power and riches in Matsya 105. 1-12.

1399 In मत्स्य. 108 29 we read तीर्थं निरञ्जनं नाम यत्र देवाः सवासवाः which appears to be a misreading पश्चिमे धर्मराजस्य तीर्थं त्वनरकं स्मृतम्। कूर्म I. 395.; the अग्नि 111 14 mentions a तीर्थ called वानरक (or वासरक acc. to some mss.) but that seems to be a misreading of त्वनरकं (तु + अनरकं). मत्स्य. 108. 27 तीर्थं तु नरकं स्मृतम् seems to be a misreading for त्वनरकं. At most famous tīrthas the pilgrim has to perform śrāddha. The Viṣṇu Dh. S. (chap 85) mentions about fifty-five sacred places which are fittest for śrāddha The Kalpataru (on tīrtha), the Gangāvākyāvalī, Tīr. C. and other digests quote several verses from the Devīpurāṇa, the gist of which is as follows Śrāddha should be performed at tīrthas, but there is no offering of *arghya* and no *āvāhana* (since pitṛs are deemed to be always present at tīrthas, as the Kāsīkhaṇḍa says) nor is the entering of the thumb of the invited brāhmaṇa into the food served done, nor is there the question about the brāhmaṇas being satiated, nor *vikira*[1401] If one is unable to follow the complete procedure of śrāddha one should merely offer piṇḍas made from barley meal or may offer *saṃyāva* (cake of wheat flour fried with ghee and milk), rice boiled in milk, the cake of sesame (after the oil is extracted) or jaggery[1402] It should not be allowed to be seen by dogs, crows and vultures, it may be offered at any time after the pilgrim reaches the holy place A śrāddha performed at a holy place gives great satisfaction to pitṛs. Some of the works such as the Tristhalīsetusārasaṅgraha of Bhaṭṭoji provide that after performing a pārvaṇaśrāddha at a tīrtha and after making offerings of piṇḍas to one's ancestors one should offer a single piṇḍa to one's other relatives with the following mantra 'Here I offer piṇḍa to deceased persons of my father's family, and of my mother's family and to the deceased relatives of my guru and of my father-in-law, to those men of my family

who were devoid of sons or wives and so who would lose the benefit of the pinda (to be offered by the son or wife) and in the case of whom all rites after death have ceased, those who were blind from birth or were cripples, those who were malformed or died in the womb; to all these, whether known or unknown to me, may this (pinda) reach inexhaustively'! (Vāyu 110. 51–52). After this he should offer another pinda for his servants, slaves, friends, dependents, pupils, persons who conferred obligations on him, cattle, trees and those with whom he came in contact in other lives (Vāyu 110. 54–55). If a person is ill or has not the time to go through this elaborate procedure, then he should make a sankalpa that he would perform śrāddha and should offer a single pinda with the mantra (in Vāyu 110 23–24) 'I offer this pinda to my father, grand-father, great-grand-father, to my mother, father's mother, grandfather's mother, to my maternal grandfather and to the latter's father and grandfather. May it reach them inexhaustively'!

The Anuśāsana-parva, the Kūrmapurāna, Nāradīya (uttara) 63. 19–20 and 36–38 and others highly praise bathing at the *sangama* in the month of Māgha [1403]. Men of all castes, women and those born of mixed unions can take this bath; śūdras, women and men of mixed castes should not repeat any mantra but should bathe silently or with the word 'namah' (Tri. S. p 39). Similarly, the Padma, Kūrma, Agni and other Purānas wax eloquent over a bath for three days in Māgha saying that it is equal to the gift of three crores of cows. [1404] There is great divergence as to exactly what three days are meant, as pointed out by the Tri. S. p 33. The various views are the three days are the passage of the sun into Capricornus, Rathasaptamī and the full moon day of Māgha; the three consecutive days including the 10th of the bright half of Māgha, the first three days of Māgha, the three consecutive days from the 13th day of the bright half of Māgha; any three days in Māgha.

CHAPTER XIII

KĀŚĪ

There is hardly any city in the world that can claim greater antiquity, greater continuity and greater popular veneration than Banaras. Banaras has been a holy city for at least thirty centuries. No city in India arouses the religious emotions of Hindus as much as Kāśi does. To the Hindu mind it represents great and unbroken traditions of religious sanctity and learning. It is a miniature of Hindu life through the ages in all its great complexities and contradictions. Not only Hinduism with its numerous sects has flourished here for numberless centuries, but the principles of Buddhism, one of the great religions of the world, were first proclaimed here by Śākyamuni after he received Enlightenment at Bodh-Gayā under the Bodhi tree. Thousands of verses are found in the epics and purānas about Banaras. Several volumes have been written about Banares during the last hundred years.[1405] It would be impossible to do justice here to this vast mass of literature on Banaras I shall briefly deal with the important topics relating to Banaras. In olden times the name was spelt as Benares, but recently as Banaras, which will be retained here (except in quotations).

Before proceeding further, it is necessary to dwell, however briefly, on the ancient history of Banaras The Śatapatha Br. quotes [1406] a Gāthā which states that Satānika, son of Satrājit, carried away the sacred sacrificial horse of the Kāśis, as Bharata did in the case of the Satvats. In Śat. Br. XIV. 3. 1. 22 king Dhrtarāstra Vicitravīrya is called Kāśya. In the Gopatha Br. we have [1407] the combination Kāśi-Kośalāh. The

Cambridge History of India (vol. I. p. 117) remarks that in the Brāhmana period Kāśī, the capital of the Kāśis, was situated on the Varanāvatī. In the Br. Up. (II. 1. 1) and the Kausītaki[1408] Up. (IV. 1) there is the story of the proud Bālāki Gārgya going to Ajātaśatru, king of Kāśī, with the assurance that the former would expound *brahma* to the latter. In Pānini IV. 2. 116 Kāśī heads a *gana* (Kāśyādibhyas-than-ithau'). Under Pānini IV. 2. 113 we get the form 'Kāśīyah.' It is remarkable that in the Sarvānukrama the rsi of Rg. X. 179. 2 is stated to be Pratardana Kāśirāja. In *tarpana*, the Hir. Gr. (II. 8. 19. 6) mentions Kāśīśvara along with Visnu and Rudraskanda (S. B. E. vol 30 p. 244). Divodāsa figures frequently in the Rgveda. In Rg I. 130 7 Indra is said to have conquered ninety cities for Divodāsa, while in Rg. IV. 30. 20 it is stated that Indra gave 100 cities of stone to Divodāsa. From these Vedic references it may be surmised that in later works like the Epics and the Purānas Divodāsa was naturally credited with the founding of the most sacred city in India. In the Mahābhāsya on Vārtika 4 on Pān. IV. 1. 54 (vol II. p 223) we find the illustration 'Kāśi-Kosalīyāh.' The Mahābhāsya (vol. II. p 413) furnishes the interesting information that there is a difference in the price of cloth manufactured at Kāśī and that manufactured at Mathurā, though the length and breadth of the piece of cloth be the same. This shows that even so early as the 2nd century B. C. Kāśī was famous for the fine qualities of its cloth, as now.[1409] From the above passages it is clear that Kāśī was the name of a country long before the Śatapatha Br. was composed and it remained so till the 2nd century B. C. (the date of Patañjali). We have a parallel example. Avanti is the name of a country as shown by Pān IV. 1. 176 (striyām-avanti-kunti-kurubhyaś-ca) and by the Meghadūta (Prāpyāvantīn-udayana—), but Avantī or Avantikā is also the name of Ujjayinī (as in the well-known verse 'Ayodhyā...Avantikā'). Fa Hien (399 to 413 A. D.) is said to have arrived at the city of Vārānasī in the kingdom of Kāśi (Legge's tr. p 94). This shows that about 400 A. D. Kāśī was still the name of the district and Vārānasī was its capital. But from the reference in the Mahābhāsya it appears that Kāśī had then become the name of the city (and was also

the name of the country) In the Anusāsana-parva (chap 30) it is said that Haryaśva, the grand-father of Divodāsa, was king of the Kāśis [1409a] and was harassed and killed by the Vītahavyas in the *Doab* between the Ganges and Jumna. Haryaśva's son was Sudeva who was crowned king of Kāśi (verse 13, Kāśirājos bhyasicyata) and he also met the same fate as his father did. Then Divodāsa, son of Sudeva, became king of the Kāśis and founded Vārānasī thickly populated with men of all varnas on the northern bank of the Gomatī. This legend shows that Kāśī was the ancient name of a kingdom and the ancient belief was that Vārānasī was founded as the capital of the Kāśis by Divodāsa. In the Udyogaparva also Divodāsa is said to be the ruler of Kāsis.[1410]

The Harivaṁśa (I. chap. 29) has a long but rather confused story about Divodāsa and Vārānasī [1411] It deals with the dynasty of Āyus, one of the sons of Aila. One of the descendants of Āyus was Śunahotra who had three sons, Kāśa, Śala and Grtsamada From Kāśa arose a branch called Kāsayah. Dhanvantari, a descendant of Kāsa, was king of the Kāśis (verse 22). Divodāsa was great-grandson of Dhanvantari. He killed 100 sons of Bhadraśrenya, who first was Lord of Vārānasī. Then Śiva sent his *gana* Nikumbha to destroy Vārānasī which had been occupied by Divodāsa. Nikumbha cursed it to be devastated for a thousand years When it became devastated it came to be called Avimukta and Siva resided there It was again re-established (verse 68) by Durdama, a son of Bhadrasrenya, whom, because he was a child, Divodāsa had not killed Then Pratardana, son of Divodāsa, took it from Durdama Alarka, grandson of Divodāsa and king of Kāśis, again established Vārānasī This legend may contain some germs of truth, viz. that Vārānasī had become devastated several times and had often changed hands. The Vāyupurāna (chap. 92) and the Brahmapurāna (chap. 11) also contain the same legends of Dhanvantari, Divodāsa, and Alarka and the vicissitudes of Vārānasī

In the Mahābhāsya Patañjali states (vol. I. p. 380,) that Vārānasī is alongside of Gangā and on Pān. IV. 3. 84 (vol. II. p. 313) he informs us that traders call Vārānasī Jitvarī.

Ancient Buddhist works show that Banaras was, in the times of Buddha (5th Century B C. at the latest), a great and famous city like Campā, Rājagrha, Śrāvastī, Sāketa and Kauśāmbī (vide Mahāparinibbānasutta, S. B. E. vol. XI p 99 and Mahāsudassanasutta, ibid. p. 247). The very fact that Buddha attained Enlightenment at Gayā (which was an out of the way place and on the borders, if at all, of Āryāvarta), thought it necessary to travel hundreds of miles from Gayā and preach his doctrines at Banaras in the Deer-park and set rolling the wheel of the kingdom of Dharma at that place, clearly indicates that Banaras had then become a very holy place and was in the centre of all Aryan activities and culture (vide S. B. E, vol. XI. p. 153 and vol. XIII p 90, Mahāvagga, S. B. E. vol. 17 p. 21). King Brahmadatta of Banaras figures in many *jātaka* stories. Hardly any part of the *jātaka* tales can be placed earlier than the 3rd century B. C. But it may be admitted that Banaras was well-known as the capital of Brahmadatta kings several centuries before Christ. The Matsyapurāna 273, while enumerating hundreds of kings bearing the same surnames, states that there were 100 Brahmadattas and 100 Kāśis and Kuśas[1412] But the very fact that Brahmadattas are separately mentioned from the Kāśis largely reduces the value of this piece of information. The ancient Jain works also speak of Banaras and Kāśī. In the Kalpasūtra it is said that Arhat Pārśva was born in Banaras in the month of Caitra on the 4th day of the dark fortnight (S B. E. vol. XXII p. 271) and that when Mahāvīra died the 18 confederate kings of Kāśi and Kosala along with other kings of the Licchavis and Mallakis instituted an illumination on the day of the New Moon (ibid, p. 266). Aśvaghosa appears to identify Vārānasī with Kāśi when he says in his Buddhacarita 'Having entered Vārāṇasī, the Jina (Buddha) illumining the city with his light filled the minds of all the inhabitants of Kāśī with excessive interest.'[1413] The Buddhacarita further speaks of Buddha as having gone under the shadow of a tree near Vanārā (S. B. E. vol. 49 part 1 p.

169), which is probably the Varanā. It is thus clear that Vārānasī and Kāśī had become synonyms at least sometime about the first century A. D. In the Vāyupurāna 45. 110 *Kāśi-kośalāh* figure among the countries of Madhyadeśa.

In the Visnupurāna we have the story of Paundraka Vāsudeva who challenged Krsna and asked the latter to surrender his *Cakra* and other symbols He was helped by the king of Kāśī. The combined armies of Paundraka and Kāśīrāja attacked Krsna who killed Paundraka and cut off Kāśīrāja's head (with his discus) which fell in the city of Kāśī. His son performed austerities, propitiated Śankara and secured from him a Krtyā (ogress) which entered Vārānasī. Krsna's discus in pursuit of her burnt the whole of Vārānasī together with its king, his servants and citizens In this account from the Visnupurāna (V 34) the names Kāśī, Vārānasī and Avimukta are employed as synonyms (verses 14, 21, 25, 30, 39). The same legend occurs in the same words in Brahmapurāna, chap 207 and is briefly referred to in Śabhāparva, chap. 14 18–20 and chap. 34. 11.

From the above-mentioned accounts in the Epic and Purānas about Kāśī and Mahādeva, various conclusions [1414] have been drawn by writers, viz. that Mahādeva was a god of the non-Aryans, that Banaras was a centre of non-Aryan worship for a long time after the advent of the Aryans and that the people of Banaras, though they ultimately turned to the Aryan religion, were more interested in the philosophic speculations of the Upanisadic age. I dissent from most of these conclusions. We are on most unsafe ground as regards these conclusions. None of the extant Purānas can claim to be older than the 3rd or 4th century A. D Most people in India lived and even now live a humdrum, placid and unattractive life in which there is nothing to satisfy the ordinary man's appetite for the mysterious, the unusual and the horrible. The purānas contain stories that may be divided into several classes and that satisfied the above-mentioned cravings of the common man. Many of the

1414. Vide, for example, Prof. A S Altekar's 'History of Benares,' pp 2–7. The Nāradīya (uttara, chap. 29) states that Banaras was at first the city of Mādhava, but later on became a Saiva-ksetra, is there any real historical basis here? If any historical conclusion is to be drawn from this statement of the Nāradīyapurāna it would be exactly the opposite of what Prof. Altekar has drawn, viz, that the non-Aryans scored a cultural victory over the Aryans at Banaras.

legends contained in the purānas were meant for the entertainment of common people, just as even in these days millions in Western countries read with relish detective stories and crime club fiction. Some *paurāṇic* legends had a serious purpose in view viz emphasizing religious or philosophical dogma or moral values and standards and were clothed in a supernatural garb to make them striking and effective. Only a few legends have some historical basis, but the latter is evidently smothered in a mass of exaggerations and prejudices for or against a hero, or a caste, class, tribe or family. It is hardly fair to draw far-reaching historical conclusions from heterogeneous materials in the purānas about the conditions of things that prevailed several hundreds or thousands of years before they were compiled. The purānas often speak of the quarrels and bickerings among high gods and sages For example, the Visnupurāṇa V. 30. 65 speaks of a fight between Indra and Krsna. Was Krsna a non-Aryan god originally? Ganeśa's left tooth was shattered by the missile of Paraśurāma who comes to fight with Rāma, both being supposed to be *avatāras* of Visnu. The sage Bhrgu curses Visnu, Gautama curses Indra, Māndavya curses Dharma (vide for all these, Brahmānda II. 27. 21–25).

In several purānas Kāśī or Vārānasī has been lauded and described at great length. Vide Matsya 180–185 (411 verses), Kūrma 1.31–35 (verses 226), Lingapurāna (pūrvabhāga, chap. 92, verses 190), Padma (Ādikhanda 33–37, verses 170), Agni 112, Skanda, Kāśikhanda, chap 6 ff, Nāradīya (uttara, chap. 48–51). The Kāśīkhanda alone has about 15000 verses[1415] on Banaras and its sub-tīrthas. In the Padmapurāna the sages are said to have asked Bhrgu five questions, viz what is the greatness of Kāsī, how it is to be understood, who should resort to it, what is its extent (or boundaries) and by what means it (Kāśī) can be secured. In the Skandapurāna,

1415. Dr. Fitz-Edward Hall (Introduction to Sherring's work p. XXXII n. 3) criticizes Dr Wilson for holding that the greater part of the Kāśīkhanda is anterior to the first attack on Banaras by Mahmud of Gazni and holds that it is later than the Gaznivide invader Dr. Hall advances hardly any convincing reasons The work of Alberuni is definite that Sultan Mahmud of Gazni had not spread his depredations as far as Banaras (vide Sachau, vol. 1 p. 22) 'This is the reason why Hindu Sciences ..have fled to places which our hand cannot yet reach, to Kashmir, Benares and other places ' The Kalpataru on Tīrtha quotes about one hundred verses on Vārānasī

(*Continued on the next page*)

Kāśīkhanda[1416] (chap. 26.2-5) the following questions are asked, viz. from what time this holy place Avimukta became highly famous, how it received the name Avimukta, how it became the way to *mokṣa*, how the pool of Manikarnikā became an object of worship to the three worlds, what was there formerly (when) the Ganges was not there, how it came to be called Vārānasī, Kāśī, Rudrāvāsa, how it came to be Ānanda-kānana (the forest of bliss) and then Avimukta and Mahāśmaśāna (the great cemetery).

Banaras has been known for centuries under five different names viz. Vārānasī, Kāśī, Avimukta, Ānandakānana and Śmaśāna or Mahāśmaśāna. The Kāśikhanda states that Śankara first called it Ānandakānana and then Avimukta.[1417]

from the Skandapurāna and holds the latter work to be as authoritative as the Matsyapurāna, Lingapurāna and other Purāṇas The Kalpataru of Lakshmi-dhara was composed about 1110 A D. (vide Prof Aiyangar's Introduction to Tirthakānda pp XVIII-XIX). Therefore a century or two at least before 1100 A D. there existed a Skandapurāna, part of which contained a eulogium of Banaras. Unfortunately the present printed Kāśikhanda of the Skanda does not agree with the quotations from the Skanda given by the Kalpataru. A curious state of things is divulged as regards the quotations from Skanda in the Kalpataru. For example, on pp 36-37 of the Kalpataru on Tirtha, about 19 verses are quoted from Skanda which occur verbatim in the Lingapurāna, chap. 92. 120-142 (with the addition of some half verses) Similarly, on p 44 of the Kalpataru three verses are quoted from Skanda, which are the same as Linga. 92 87-89 On p 42 Kalpataru quotes one verse about Gopreksesvara from Skanda which is quoted from the Lingapurāna by Tri S. p 171. Some of the Purāṇas say that the Skanda has 81101 verses (Matsya 53. 42-43) But the Skanda printed at the Venkateśvara press contains several thousand verses more It appears that there were different recensions of the Skanda. The Tri S. quotes verses from specific chapters of the Kāśikhanda which are generally found in the printed work. Vide p 193 (for chap. 30), 190 (for chap. 32), p. 144 (for chap. 34), p 160 for chap 45, p. 154 for chap. 49, pp 157 and 200 for chap 61 etc

A few words must be said about the derivation and significance of these words as gathered from the Purānas and other works. And first comes Kāśī. It is derived from the root *kāś* 'to shine.' The Skandapurāna [1418] says that the city of Kāśī became famous by that name because it sheds light on (the way to) nirvāna (final release) or because that indescribable refulgence, viz. God Śiva shines forth there. The name Vārānasī is derived in several Purānas from the names of two streams Varanā [1419] (modern Bārnā) and Asi, which are respectively the northern and southern boundaries of the modern city. From the passages quoted below from the Skandapurāna (Kāśī-khanda) it appears that Asi is the correct form of the name of the river. The names most frequently used in the Purānas are Vārānasī and Avimukta. In the Jābālopanisad [1420] the words Avimukta, Varanā and Nāsī are brought together in an esoteric sense. "Atri asked Yājñavalkya: how is one to know the unmanifested Self? Yājñavalkya explained that he was to be worshipped in Avimukta, since the self is centered in Avimukta. Then a question was asked: in what is Avimukta centered or established? The reply is that Avimukta is established in the midst of Varanā and Nāsī. Varanā is so called because it

wards off all faults due to the senses and Nāsī destroys all sins due to the senses. Then a question is asked, what is its location (sthāna)? The reply is that it is the conjunction of the eyebrows and the nose i. e. the upāsanā (contemplation) of Avimukta is to be made as located in the span between the eyebrows and the root of the nose." Here it will be seen that Varanā and Nāsī are the names (and not Varanā and Asi). The Vāmanapurāna employs the form Asi (15.50-53). The same is the case with the Padma.

The name Avimukta has generally been explained as derived from the negative particle 'na' (for which 'a' is substituted) and vimukta (forsaken). Many Purānas say that the holy place is so called because it was never forsaken by Śiva (sometimes both Śiva and his consort) [1421] In the Lingapurāna another derivation is suggested [1422] "avi means 'sin'; that holy place is devoid of sin". The Kāśikhanda (39.74) states that originally the *kṣetra* was called Anandakānana and then Avimukta because though Śiva went to stay on Mandara mountain he did not leave it entirely but left his *liṅga* there

Vārānasī is very dear to Śiva, it gives him joy and therefore it is called Ānandavana or Ānandakānana. [1423] It is also styled Śmaśāna or Mahāśmaśāna for various reasons As a belief was entertained by all people that death in Banaras freed a man from *saṃsāra*, and as the thoughts and aspirations of pious Hindus ran in the direction of dying on the sacred soil of Banaras, the old and decrepit crowded therein and persons seriously ill got themselves removed or were removed to the banks of the Ganges when about to die and were cremated there Cremation of corpses is always seen on the Manikarnikā *ghāt* near the Ganges. A śmaśāna (cemetery) is considered impure but Banaras with the sacred Ganges was purest in spite of being always the cremation ground for thousands in a year.

The Skanda says.[1424] 'sma' means a corpse and 'śāna' means 'lying down'; when the end of the world comes, the great elements lie here as corpses and therefore this place is called Mahāśmaśāna." The Padmapurāna[1425] makes Śiva say: 'Avimukta is a famous cemetery becoming the Destroyer (or the Time Spirit) I being here destroy the world'. Matsya very frequently speaks of Vārānasī as Śmaśāna. The Kāsikhanda states: if a man after reaching the great cemetery dies there by fate he has never again to lie in the cemetery (i. e. he is not born again).

Although generally Kāśī, Vārānasī and Avimukta are used as synonyms in the Purānas, in some passages a distinction is made between these as to extent. The passages quoted above (in note 1419) show that Vārānasī is bounded by the Varanā and Asi on the north and south,[1426] the Ganges on the east and the shrine of Vināyaka in the west. Ain. A. (vol II p. 158) remarks that Benares is a large city situated between the rivers Barnā and Asi and that it is built in the form of a bow of which the Ganges forms the string. The Matsyapurāna[1427] states: 'that ksetra is two *yojanas* and a half east and west and half a *yojana* broad north and south; out of this Vārānasī extends up to the dry river (viz. Asi)'. The first part appears to deal with the entire Kāśīksetra which according to the Padmapurāna[1428] comprised the tract covered by a circle the radius of which was the line joining Madhyameśvara-linga

with the shrine of Dehali-Ganeśa. The Matsyapurāna (in chap. 183.61–62) makes it two yojanas in extent Agni 112 6 also does the same But that is only approximate The actual distance covered by a yojana varied Vide H. of Dh vol III pp. 145–146 n. 185 Rhys Davids in 'Numismata Orientalia' (London, 1877) after examining 30 passages from Pāli texts comes to the conclusion that a yojana was equal to about 7 or 8 miles Avimukta is said to be that part of the holy place which is represented by a radius of 200 *dhanus* (i e. 800 *hastas* or about 1200 feet) in all four directions from the shrine of Viśveśvara.[1429] There was no unanimity on the extent of Avimukta. In Kāśikhanda Avimukta[1429a] is said to be five *krośas* in extent But there Avimukta appears to stand for Kāśī. The innermost[1430] circle in the holy Kāśīksetra is defined as that between Gokarnesvara to the west, the mid stream of the Ganges to the east, Bhārabhūta to the north and Brahmeśvara to the south. A few more passages on the extent of the sacred place of Banaras may be cited here in one place. The Lingapurāna[1431] says 'this ksetra is declared to be four *krośas* (in extent) in the four directions and also one yojana'. The Nāradīyapurāna[1432] puts the extent thus '(The ksetra) extends over two *yojanas* and a half from east to west and is half a yojana wide from north to south, god Sambhu declared the extent of the ksetra between the rivers Varunā and Asi (which latter is) a dried-up stream' In the Padmapurāna[1433]

Brahmā is supposed to have said to Rudra 'I have given you a ksetra of the extent of five krośas; when the best of rivers, Gangā, will flow through this ksetra, the city will be great and holy, the Ganges, as it flows northwards (in Banaras) for two yojanas, will be holy'. If in any texts there be any differences between the extents of Avimukta, it must be supposed that there is an option,[1434] (or, as the Tīr. C. suggests, the differences refer to different *kalpas* i. e. ages). It is clear that Vārānasī was that strip of land, the four boundaries of which were the Ganges to the east, Asi to the south, the shrine of Dehali-Vināyaka to the west and the river Varanā to the north. In the 7th century Hiouen Thsang, the Chinese pilgrim, notes that Banaras was 18 *lis* (about 3½ miles) in length and about 5 or 6 *lis* (a little more than a mile) in breadth. This makes it clear that the city was then bounded as now by the Varanā and Asi. Vide Beal's B R. W. W (vol II p. 44).

Verses laudatory of the greatness and uniqueness of Vārānasī literally run into thousands. All that can be done here is to set out a few characteristic verses. The Vanaparva observes.[1435] a person coming to Avimukta and resorting to the sacred place becomes free from the sin of brāhmana-murder by merely seeing the (image of the) Lord of gods (i e. Viśveśvara) and if he dies there he secures *moksa*. The Matsyapurāna [1436] contains many striking passages about the unique greatness of Banaras "Vārānasī is always my most secret place; it is always the cause of moksa for all beings. Moksa may be effected in Prayāga or in this city because I have taken it under my protection, this place is greater than even Prayāga, the foremost among tīrthas. All the sins [1437] that a man may have

A person,[1438] even though his mind may be addicted to pleasures of sense and though he may have given up devotion to *dharma*, if he dies in this place (Banaras) he does not again enter upon the path of *saṃsāra* (the cycle of births and deaths); a man concentrating his mind for thousands of past lives may secure Yoga; but by dying (in Banaras) he secures the highest mokṣa in this very life. Even if a man be a sinner [1439] or a rogue or irreligious he becomes free from all sins if he goes to Avimukta Other women,[1440] that act as they like and are intently devoted to enjoyments, when they die here by lapse of time secure the highest worlds. In this world mokṣa [1441] cannot be secured by men without the (practice of) Yoga; but in the case of those who reside in Avimukta Yoga and mokṣa are both secured. For planets,[1442] lunar mansions and stars there is the danger of falling (from the sky) in course of time but there is no fall for those who die in Avimukta. ingly—all those are reduced to ashes when he enters Avimukta. Even a *mleccha* resident in Kāśī is better, since his future will be blissful, but not one residing elsewhere, though he may be a dīkṣita, because he will not be a recipient of *mukti*."

In some passages a mystic flavour is imparted to Vārānasī and the rivers. For example, the Kāśīkhanda says that Asi is the Iḍā nādī, Varaṇā is the Piṅgalā nādī, Avimukta is susumnā and Vārānasī is all the three.[1444] The Liṅgapurāna, however, puts the matter somewhat differently. It holds that Asi (the dried-up river), Varaṇā and Matsyodarī (i. e. Ganges) are respectively the Piṅgalā, Idā and Susumnā.

It is time now to turn to the individual sacred spots in Banaras. It is stated in some of the Purāṇas[1445] that at every step in the Kāśīksetra there is a holy place and that there is not even as much space as a sesamum seed in Kāśī which has not a *liṅga* (emblem of Śiva). As a matter of fact the Kāśīkhanda names 64 liṅgas in chap. 10 alone. But one must look to the tīrthas that are specifically named. Hiouen Thsang says that there were one hundred temples at Banaras in his day and he speaks of a temple where the copper image of Deva Maheśvara was a little less than 100 feet high (vide Beal's B R. W. W. vol. II. pp. 44-45). Unfortunately, the fanatical zeal and ruthlessness of Moslem rulers demolished almost all Hindu temples at different times from 1194 to about 1670 A. D. Mosques and mausoleums were erected on their sites, and the materials of the temples thus razed were used in constructing mosques and for serving as breakwaters &c. Kutubdin Aibak destroyed about 1000 temples in 1194 A. D (vide Elliot and Dowson's 'History of India', vol. II p. 222) Alauddin Khilzi boasted that he had destroyed one thousand temples in Banaras alone (vide Sherring p. 31, Havell p. 76). About 1585 A. D. Nārāyaṇabhaṭṭa re-established the temple of Viśvanātha with the help

of Rājā Todarmal[1446]. Even this temple was desecrated. The following passage from the Ma-A'sir-i-A'lamgiri quoted by Elliot and Dowson ('History of India,' vol. VII, p 184) is instructive: "It reached the ears of his Majesty, the protector of the faith, that in the provinces of Thatta, Multan and Benares, but especially in the latter foolish brāhmanas were in the habit of expounding frivolous books in their schools and that students and learners, Musalmans as well as Hindus, went there even from long distances, led by a desire to become acquainted with the wicked sciences they taught. 'The Director of the Faith' consequently issued orders to all the governors of provinces to destroy with a willing hand the schools and temples of the infidels, and they were strictly enjoined to put an entire stop to the teaching and practising of idolatrous forms of worship On the 15th Rabiu-l-ākhir (i. e. December 1669) it was reported to his religious Majesty, leader of the Unitarians, that in obedience to order, the Government officers had destroyed the temple of Bishnath at Benares."

A mosque, which still exists, was built on the site of the Viśveśvara temple by Aurangzeb, who even changed the name of Banaras to Muhammadabad. The result is that, as stated by Sherring (p. 32), it would be difficult to find twenty temples in the whole of Banaras of the age of Aurangzeb (1658–1707 A. D.). Many of the temples were built by the Maratha Chiefs and *Sardars* and during the British occupation many more were built. Prinsep calculated in about 1828 that there were in the Banaras city proper 1000 Hindu temples and 333 mosques; a more recent estimate puts the figures at 1454 temples and 272 mosques (Sherring[1447] pp 41–42).

Visveśvara or Viśvanātha is the tutelary deity of Banaras and the principal and most holy temple in it (vide n 1429 a) It is prescribed that every resident of Kāśī must every day bathe in the Ganges and visit the temple of Viśveśvara (vide Tri S p. 214). After Aurangzeb pulled down the temple of Viśvanātha, there was no shrine of Viśvanātha in Benares for over a hundred years The *linga* was probably removed from place

1446. Vide Altekar pp. 47–48 and Introduction to my edition of the Vyavahāramayūkha p. VIII (Poona, 1926), where I cite a verse from the Dānahīrāvalī-prakāśa of Divākarabhatta, a daughter's son of Nīlakantha, who was the grandson of Nārāyanabhatta

1447 Havell (p. 76) remarks that there are 1500 temples and that smaller shrines or images in niches of walls or the like are countless.

to place as the vicissitudes of the times required and the pilgrims performed parts of the worship (such as *namaskāra* and circumambulation) at the site of the image, but they could not perform other portions of the worship such as bathing the image with Ganges water[1448]. The present temple of Viśvanātha was built in the last quarter of the 18th century by *Devī Ahalyābāi* Holkar (Altekar, p. 57). The Tri. S. p. 183, while on the question of the appearance (*prādurbhāva*) of Viśveśvara, observes that there is no blemish in the case of the Viśveśvara-linga due to the touch of the untouchable, that every day Viśveśvara removes it by a bath in Manikarnikā at dawn and the worship offered by Himself and quotes a verse of the Sanatkumāra-samhitā in support[1449] What the Tri. S. means is: Generally great care is taken about *liṅgas*. All and sundry are not allowed to touch them but in the case of the Viśveśvara-linga any one, even a great sinner, may worship it and pour Ganges water over it. Whether Nārāyanabhatta meant that even the so-called untouchables might touch it is not clear.

It appears that Vācaspati [1449a] holds that Avimukteśvara linga is the same as Viśvanātha, but both the Tristhalī-setu (p 296) and Tīr. Pr. (p. 187) reject this idea. The Skandapurāna (Kāsī. 10. 93) mentions Viśveśvara and Avimukteśvara as separate *lingas*. Besides worshipping Viśvanātha, every pilgrim to Benares has to visit the five tīrthas[1450] (Pañcatīrthī). According to the Matsyapurāna the five essential tīrthas in the Ānandakānana of Viśveśvara are Daśāśvamedha, Lolārka,[1450a]

1450 The Pañcatīrthī has received the highest judicial notice in *Maharani Hemanta Kumari* v. *Gauri Shankar* 68 I A 53 at p 57.

1450 *a* Lolārka is only one of the shrines of the Sun in Kāśī, vide Kāśikhanda 10 83 (Lolārka-mukhya-sūryāmśca pranamya ca punah punah) and 46 45-46, where the shrines of the twelve *Arkas* in Kāśī are enumerated as लोलार्क, उत्तरार्क, साम्बादित्य &c.

Keśava, Bindumādhava and Manikarnikā.[1451] In modern times the five essential tīrthas called Pañcatīrthī are the confluence of the Asi with the Ganges, the Daśāśvamedha *ghāt*, Manikarnikā, the Pañcagangā *ghāt* and the confluence of the river Varaṇā (called Bārnā by the common people) with the Ganges. This is based on the Kāśīkhaṇḍa.[1452] The shrine of Lolārka is situated at the confluence of the Asi (the southern boundary of Banaras) with the Ganges. The Kāśīkhaṇḍa [1453] furnishes a popular etymology for the name Lolārka, viz. that the mind of the Sun on seeing Kāśī became agitated. The Asi is a tolerably wide stream (about 40 feet) in the rainy season, but is dry at other times. The several gigantic ghats with their flights of stone steps are a grand sight at Banaras. The Ganges while passing by Banaras takes a great sweep so that its mighty current flows in a northerly direction (that is towards the Himālaya) and is therefore held to be peculiarly holy here. The Daśāśvamedha-ghāt has been famed for centuries. Jayaswal's interpretation of the epithets applied to the Bhāraśivas in Vākāṭaka grants should be accepted viz. the Bhāraśivas were an imperial dynasty, were crowned with the holy waters of the Ganges and took their ceremonial baths on the Ganges at the end of ten Aśvamedha sacrifices, on account of which the Daśāśvamedha-ghāt [1454] at Banaras was so named (Jayaswal's 'History of India' 150 A. D.–350 A. D p. 5). In order to realize the grandeur of Banaras on the side of the river one must be at

the Daśāśvamedhaghāt at dawn. For the eulogy of Daśāśvamedha, vide Kāśīkhanda 52. 83 ff and Tri. S. p. 159. The Kāśīkhanda says that formerly the tīrtha was called Rudrasaras, but as Brahmā performed ten Aśvamedhas there it came to be called Daśāśvamedha (chap 52. 66–68). The Manikarnikā (also called Mukti-kṣetra) pool is the very centre of the religious life of Banaras and[1455] is the most holy among all the Banaras tīrthas. The Kāśīkhanda gives a phantastic story of its origin (in chapter 26 verses 51–63 quoted in Tri. S. pp. 145–146): Viṣnu dug with his discus a puskariṇī, filled it with the perspiration from his own body and performed severe austerities on its bank for 1050 (or 50000) years. Śiva came there and being pleased shook his head and an ear-ornament studded with jewels fell into the pool, which thenceforward came to be called Manikarnikā. The word is[1456] derived in two ways in the Kāśīkhanda. Śiva who is like the wish-yielding jewel whispers in the ear (karnikā) of good men the Tāraka mantra at the time of death. The extent of Manikarnikā north to south is said to be 105 *hastas* i e. about 160 feet (Kāśīkhanda 99. 54). In modern times the waters of the Manikarnikā pool become foul and fetid because it is shallow (two or three feet deep), because hundreds of pilgrims cast into it flowers and money by way of worship and because the priests stir the waters with their hands and feet to find the coins dropped by pilgrims. Our methods of worship must be changed The flowers and gifts should be placed on the banks of the pool and then taken away by the priests. The Tri S. p. 147 mentions several mantras (two of which are set out below) to be recited when contemplating on Manikarnikā[1457]. Near the Manikarnikā pool is the temple of Tārakeśvara so named from the belief that Śiva will whisper the mantra called *tāraka* in the ear of

the dying man brought to the sacred pool[1457a] (vide Kāśikhanda 7.78, 25. 72–73 and 32. 115–116). The Pañcagangā *ghāt* is so called because it is supposed that five rivers, viz the Kiranā,[1458] Dhūtapāpā, Gangā, Yamunā and Sarasvatī, meet here (though four of them are invisible) This is very highly eulogised and it is said in the Nāradīyapurāna and the Kāśikhanda (59. 118–133) that when a man takes a bath in the Pañcanada he is not born again in a body made up of the five elements. It is said that this confluence of five rivers had different names viz. Dharmanada, Dhūtapātaka, Bindutīrtha and Pañcanada in Krta and the following Yugas respectively The Kāśikhanda in chap. 59 deals with the confluence of five rivers and gives phantastic legends as to why the rivers were called Kiranā (59. 108–113) and Dhūtapāpā (59 101–106). The river Varanā is the northern boundary of Vārānasī and the end of the *ghāts* on the northern side is reached at the confluence of the Varanā with the Ganges. That the ghāts have been there for at least a thousand years can be proved from copperplates and inscriptions. The Gāhadvāla rulers of Kanoj (of whose times at least 55 copperplates and 3 inscriptions on stone were issued during the period 1097 to 1187 A. D), being devotees of Visnu, several times made grants at the Ādi-Keśava *ghāt*. Vide J. The Kāśī-khaṇḍa promises Varuṇa-loka to those charitable people that build stone ghāts on the sacred rivers [1460].

One of the most meritorious of all pilgrimages is the Pañcakrośī by road. Lakṣmīdhara in his section on Tīrthas in the Kṛtyakalpataru apparently takes no notice of it. The length of the Pañcakrośī road is about 50 miles and there are hundreds of shrines on the road Taking Maṇikarṇikā as the centre the whole road describes an irregular semicircle round the city of Banaras with a radius of five krośas (about ten miles) and hence it is called pañcakrośī. The word 'pañcakrośī' occurs very often in the Kāśīkhaṇḍa (as in chap 26, verses 80 and 114, chap 55 44). This pilgrimage may be very briefly described as follows:—The pilgrim starts from the Maṇikarṇikā-ghāt and going along the bank of the Ganges arrives at the confluence of the river Asi with the Ganges and halts for the day at a village called Khāṇḍava about six miles from Maṇikarṇikā. The 2nd day's march (for eight or ten miles) ends at the village called Dhūpacaṇḍī where he offers worship to the goddess of that name. On the 3rd day the pilgrim walks 14 miles to the village Rāmeśvara. On the 4th day he walks eight miles and reaches the village Śivapura. On the 5th day he walks 6 miles and reaches the village Kapiladhārā, where the pilgrim offers oblations to his pitṛs On the 6th day he walks from Kapila-dhārā to Varaṇāsaṅgama and thence to Maṇikarṇikā, a dis-tance of six miles It is the practice for pilgrims to scatter grains of barley from Kapiladhārā to Maṇikarṇikā. The pil-grim bathes, pays *dakṣiṇā* to the priest and then goes to the temple of Sākṣi-Vināyaka who is supposed to bear witness to the pilgrim's having performed the Pañcakrośī-yātrā.

There are numerous other sub-tīrthas in Banaras, some of which may be briefly noticed here. The Jñānavāpī may be mentioned first. The story of its origin is narrated in the Kāśīkhanda, chap. 33. The Tri. S (pp. 148–150) refers to it. It is said that when Śiva (Īśāna) saw the Viśveśvara-linga a desire arose in him to bathe with its cool water. He dug a *kuṇḍa* with his trident to the south of the temple of Viśveśvara and with the water therefrom he bathed Viśveśvara-linga and Viśveśvara granted the boon that the tīrtha would be superior to all tīrthas and that, as Śiva is knowledge (verse 32), the tīrtha would be called Jñānoda or Jñānavāpī. One of the most popular and the most frequented temple is that of Durgā. In chap. 72 (verses 37–65) of the Kāśīkhanda there is a Durgāstotra called Vajra-pañjara which is referred to in Tri. S. p. 161. There is a temple of Bhairavanātha about a mile to the north of the temple of Viśveśvara. He is the *Kotwal* or police Magistrate of Kāśī and wields a stone cudgel (of enormous thickness). His *vāhana* is a dog. Vide Kāśīkhanda, chap. 30, for Bhairava. There are many temples of Ganeśa The Tri. S. (pp. 198–199) names 56 Ganeśas and indicates their locations, following Kāśīkhanda, chap 57 59–115 (*sat-pañcāsad-Gaja-mukhān-etān-yah samsmarisyati*). In Kāśīkhanda (57. 33) the name Dhundhi applied to Ganeśa is derived from the root 'dhudhi' in the sense of 'searching' (anvesane dhudhir-ayam prathitosti dhātuh). Compare the Marathi verb dhundane.

The Tri S. discusses at some length (pp. 98–100) the question whether sins committed in all past lives are destroyed by entering Kāśī or whether it is only the sins committed during the present life that are destroyed. Some hold the view that sins committed in this life only are destroyed by visiting Kāśī and by bath in the various sacred spots the sins of previous lives are destroyed. Others hold that by entering Kāśī the sins of all past lives are destroyed, but bath at various sacred spots brings about only the cessation of the tendency to sin in different lives. Nārāyanabhatta puts forward several other views and says that wise men should hold the view that appears proper.

Many of the purānas lay down rules about how one dwelling in Kāśī should act. The injunction is that in Kāśī one should not commit the slightest sin, since the punishment is far more heavy. The Matsya (chap. 185. 17–45) and Kāśī-khanda, chap. 96, narrate the story of Vyāsa, who while wandering about for alms in Kāśī, did not secure alms and

being hungry and angry was on the point of cursing Kāśī in the words quoted below [1461] when Śiva coming to know his mind assumed the form of a householder, gave him the best of food and ordered Vyāsa not to enter Kāśīksetra as he was an irritable man, but allowed him to do so on the 8th and 14th *tithis* only. The Kāśīkhanda 96. 12–80 and 119–180 speak at great length about how one residing in Kāsī should conduct himself.

Some miscellaneous matters in connection with Banaras may be set out here. Vārānasī being a great tīrtha, śrāddha for the benefit of ancestors should be performed there and if it is not possible to perform a śrāddha with all details, at least offerings of pindas should be made.[1462] The construction of *mathas* for those who practise penance there and endowing them with means for their maintenance are highly eulogized.[1463]

In the 12th century A. D. there was a Kapālamocanaghāt[1464] situated on the Ganges. In a grant published in E. I. vol. IV p. 110 dated *samvat* 1178 (1122 A. D.) the Emperor Govindacandra bestowed a village on a brāhmana named Vyāsa after bathing at the Kapāla-mocanaghatta in Banaras where the Ganges flows to the north. The story of Kapālamocana-tīrtha is narrated in the Matsya-purāna, chap. 183. 84–103 and a reference is made to it in Kāśīkhanda 33. 116.

It may be noted that in the Lingapurāna, pūrvārdha, chap. 92 verses 67–100, in Padma,[1464a] Ādikhanda, chap. 34–37,

Dr Altekar (pp 28–29) notes that at present a *ghāt* and a tank near the Rajaghat station is known by the name Kapālamocanaghāt, that there exists a temple near this tank dedicated to Kapālamocaneśvara and that the god must have been removed from the original place to the present habitation at some time during the last 700 years.

1464 a. Kūrma I. 32 3–29 about Omkāra and other Lingas are the same as Padma I 34 1–25 (with some half verses omitted) and Kūrma I. 33 is taken over bodily in Padma I. 35 and Kūrma I 34. 2–16 are the same as Padma I 37. 1–19 (with a few additions)

Kūrma I. 32. 1–12 and I. 35. 1–15 (tīrthas) and in the Kāśī-khanda, chap. 10. 86–97, chap. 33, chap. 53. 27 ff., chapters 55, 58 and 61 numerous lingas and tīrthas of Banaras are named. The Kāśīkhanda, chap 73. 32–36 (quoted by Tri. S. pp. 264–265) mentions 14 of these as Mahālingas, viz. Omkāra, Trilocana, Mahādeva, Krttivāsas, Ratneśa, Candreśvara, Kedāra, Dharmeśa, Vīreśvara, Kāmeśa, Viśvakarmeśvara, Manikarnīśa, Avimukta, Viśveśvara. It is provided in Kāśī-khanda 73 39 that *yātrās* of these main lingas should be celebrated every month from the 1st tithi onwards In Kāśīkhanda 73. 45–48 there is another series of fourteen great lingas different from those in chap 73. 32–36. Fourteen āyatanas are named in Kāśīkhanda 73. 60–62.[1464b] Twelve out of these are specified as lingas in Lingapurāna I. 92.67–107. In Kāśikhanda chapters 83 and 84 are enumerated about 125 tīrthas of Banaras In chap. 94. 36 of the Kāśīkhanda 36 principal lingas are referred to (14 Omkārādi, 8 Dakṣeśvarādi and 14 Śaileśādi). From considerations of space the other lingas and tīrthas are not mentioned here. But out of all these Viśveśvara is said to give quick results.

It is laid down that every one residing in Kāśī must repair every day to the Ganges, take a bath in the Manikarnikā and visit Viśveśvara.[1465]

What happens if a person commits sins outside Kāśī, comes to Kāśī and then dies, or if a resident of Kāśī commits sins in Kāśī but dies either at Kāśī or outside it? The Tri. S. after quoting several verses from the Kāśīkhanda, Padmapurāna and Brahmavaivarta states the following conclusions (p. 268). Sins committed elsewhere are destroyed by coming to Kāśī.[1466] He who residing in Kāśī is always addicted to sins becomes a *piśāca* (goblin) for thirty thousand years, again dwells in Kāśī, secures highest knowledge and then obtains

moksa. Those who being residents of Kāśī commit sins have not to undergo the tortures of Yama whether they die in Kāśī or elsewhere. Those who after committing sins in Kāśī die there will be punished by Kālabhairava Those who die elsewhere (after committing sins in Kāśī) first undergo torments inflicted by the *ganas* of Śiva called Yāma, then undergo torments inflicted by Kālabhairava for thirty thousand years, are then born as mortal men, then die in Kāśī and secure release (from samsāra) at the end.

It is remarkable that the Kāśīkhanda[1467] states that a little to the north of Kāśī, Visnu assigned a place for his residence called Dharmaksetra and that there Visnu assumed the form of Buddha. This is a clear reference to Sārnath about five miles by road to the north of Banaras, where Buddha delivered his first sermon The general rule for ascetics is that for eight months they must move from place to place and may spend the four months of the rainy season or two months in one place; but this rule is abrogated where ascetics enter Banaras and it is laid down that they should not leave Kāśī at all.[1467a]

The Kāśīkhanda remarks 'For devotees of Śiva who are full of faith there is, even in great calamities, no other remedy except the water of the feet of the image of God Incurable diseases even, whether affecting the body outside or inside, are got rid of by the touch with faith of the water of (washing the image of) the deity.' This reminds one of the miraculous cures believed to have been effected by the water of a pool at Lourdes in the first years of this century[1467b].

It would be far beyond the scope of this section to dilate upon the great traditions of learning associated with the name of Banaras. It is sufficient to refer to Alberuni (vol. I. p. 173) who observed that Banaras and Kashmir were the

CHAPTER XIV

GAYĀ

Gayā occupies a unique place in the hearts of all pious Hindus even in these days. Hundreds of pages have been written about the history, the antiquities, the architectural remains of Gayā, the sacred places in and round about Gayā, the śrāddha rites performed in Gayā and about *Gayāwals* (the priests of Gayā). It is not possible to deal with this vast mass in this work. But it is impossible not to say a few words about the many conflicting views on certain important matters put forward by scholars for about three quarters of a century. Those who are deeply interested in the history and antiquities of Gayā should carefully read the following books and papers; Dr. Rajendralal Mitra's 'Buddha-Gayā' with 51 plates (1878); General Cunningham's 'Mahābodhi' with 31 plates at the end (1892); L. S. S. O'Malley's District Gazetteer of Gayā, vol. XII and J. A. S. B for 1903 LXXII, No. 3, pp 1–11 on 'Gayāśrāddha and Gayāvals;' Indian Antiquary, vol X pp. 339–340 for a Chinese Inscription at Buddha Gayā dated in a Chinese date corresponding to 1033 A. D. and pp. 341–347 for Inscriptions at Gayā, one of which is engraved in a temple of the Sun near a tank 'Dakṣinamānasa' near the Viṣnupada, dated 1813 years after Buddha's Parinirvāṇa; Indian Antiquary, vol. 16 pp 63 ff Inscription of Yakṣapāla, son of Viśvāditya, which records the building of a temple for certain images in the 15th regnal year of the Pāla king Nayapāladeva who died in 1045 A. D., edited by Kielhorn; Dr. Benimadhav Barua's 'Gayā and Buddha-Gayā' in two volumes (1934) with plates; Journal of Bihar and Orissa R. Society, vol. 24 (for 1938) pp. 89–111 where Dr. J. C. Ghose deals with 'the antiquity of Gayā.' Some of the remarks of Dr Ghose are most unwarranted and cannot be accepted, such as holding 'maganda' in 'Pramagandasya' in Ṛg. III. 53. 14 as identical with Magadha and the explanation of 'udantyāḥ' in the Ait. Br. as 'people of sunrise' Among medieval digests Gayā is dealt with in Kalpataru on Tīrthas pp 163–174, Tīrtha-cintāmani of Vācaspati pp. 268–328, Tristhalisetu of Nārāyana-bhaṭṭa pp. 316–379, Tīrthaprakāsa pp. 384–452, Tīrthendu-śekhara pp. 54–59, Tristhalisetu-sāra-sangraha of Bhaṭṭoji pp. 36–38.

The most important work on Gayā relied upon in such works as the Tristhalī-setu and in modern times is the Gayā-māhātmya that occurs at the end of the Vāyupurāna (chapters 105–112 of the Ānandāśrama ed.). Scholars differ about the antiquity of these chapters. Rajendralal Mitra assigned the Gayā-māhātmya to the 3rd or 4th century A. D. O'Malley was inclined to hold that the legend of Gayāsura was invented in the 14th or 15th century, principally on the ground that the Gayāwals profess the Vaisnava faith established by Madhvācārya[1468] and acknowledge as their spiritual head the *mahant* of Hari Narasimhapura; vide J. A. S. B. vol. LXXII (1903) p. 4. To my mind there is hardly anything in this. The Gayāwals are notorious for their indolence, dissoluteness and ignorance and they are a dying race. O'Malley himself notes in the paper mentioned above (at p. 8) that originally the families of Gayāwals were 1484, that in Buchanan Hamilton's time they numbered about 1000, that in 1893 a Gayāwal counted 128 families, that in the census of 1901 there existed only 168 males (as pure Gayāwals) and 153 females. Gayā is a place sacred to Viṣnu and if the Gayāwals had to turn in medieval times for support to some great ācārya they would naturally choose to align themselves with the Vaisnava ācārya Madhva rather than with Śankara. Dr. Barua, after an elaborate examination of the several items of evidence, holds 'that the Gayā-māhātmya is not earlier than the 13th or 14th century A. D. (vol. I, p. 64 of 'Gayā and Buddha Gayā'). From considerations of the space at my disposal I cannot examine in detail his arguments. His conclusion is vitiated mainly for two reasons. He relies too much on the dubious and unconvincing argument from silence. He examines the account of Gayā that appears in the Vanaparva and compares it with the fuller account in the Gayāmāhātmya and arrives at the rather startling conclusion 'The Gayā proper as known to the Epic (the Mahābhārata) is essentially a place sacred to Yama Dharmarāja, Brahmā and Śivaśūlin, and Viṣnu and Vaisnavism has no place in it either as a name or as an idea. Except

1468 There is conflict about the dates of Madhvācārya's birth and death. The Uttarādi-matha records give śake 1040 (1118 A. D.) and śake 1120 (1198 A. D.) as the dates of his birth and death respectively. This is said to conflict with the date given in Madhva's महाभारततात्पर्यनिर्णय viz. that he was born in गतकलि 4300. In a paper published in the Journal of the Annamalai University, vol III for 1934 pp. 245 ff. the correct dates are said to be 1238 A. D.–1317 A. D.

Brahmayūpa, Śivaliṅga and Vṛsabha there is no reference to any structural erection nor any iconic suggestion'. In order to show how this conclusion is not at all justified the references to Gayā in the Epic and other Sanskrit works will have to be set out and compared with each other and with the Gayāmāhātmya. The second reason that vitiates Dr. Barua's conclusion is the wrong interpretation that he puts on verse 12 of the Inscription edited by Kielhorn in I. A. vol 16.

I shall now turn to the name Gayā and references to it or similar names from the Ṛgveda downwards. A Gaya, son of Plati, is the reputed author of two hymns of the Ṛgveda (X. 63 and X. 64). In Ṛg X. 63. 17 and X. 64. 17 we have the words 'astāvi jano divyo Gayena' (the divine host was praised by Gaya). So Gaya was a proper name applied to a composer of Ṛgvedic hymns. In the Ṛg. the word Gaya has several other senses, which are not material here. In the Atharvaveda (I. 14.4) Gaya appears to be a wonder-worker or a sorcerer along with Asita and Kaśyapa. Even in the Vedic Saṃhitās Asuras, Dāsas and Rākṣasas are credited with tricks and magic. Vide Ṛg VII 99.4, VII. 104.24–25 and Atharva IV. 23. 5. It is not difficult to imagine how a sorcerer Gaya could have been transformed into Gayāsura later on. Proceeding further, the Nirukta[1469] while explaining 'idam Viṣnur-vi cakrame tredhā nidadhe padaṃ' (Ṛg. I. 22. 17) gives two very interesting interpretations, one explaining the verse as a natural phenomenon and the other explaining it from geographical or legendary points of view 'He (Viṣnu) puts down his foot in three ways. According to Śākapūni, Viṣnu plants his foot on the earth, in mid air (sky) and heaven; according to Aurnavābha, on Samārohana, on Viṣnupada and on Gayaśiras.' Whatever the Vedic verse may mean, it is clear that two interpretations had arisen several centuries before Christ and if the usual dates about Buddha's *nirvāna* are accepted Aurnavābha and Yāska both flourished before Buddha. Vide S. B. E. vol. XIII pp. XXII–XXIII for Buddha's *nirvāna* being placed at 483 B. C. according to Ceylonese chronicle, while some western scholars would place it between 429–400 B. C [1470] Gayaśiras is named in the Vanaparva (87.

11, 95. 9), in the Visnudharma-sūtra 85.4 (in the form Gayā-śirsa), Vāmanapurāna (22,20 as the eastern *vedi* of Brahmā), Skanda I. 2. 13.21 and even in the Buddhist books such as the Mahāvagga (I. 21. 1, S. B. E. vol. XIII p. 134) in which last it is said that after having dwelt at Uruvelā, Buddha accompanied by a thousand *bhikkhus* went to Gayāsisa (which is the Pali equivalent of Gayāśirsa). Traditions of Gaya as a king of the territories round about Gayā are mentioned in Jaina and Buddhist works. The Uttarādhyayanasūtra (S B E. vol. 45 p. 86 and note 3 there) states that he was son of king Samudravijaya of Rājagrha and became the 11th Cakravartin. The Buddhacarita of Aśvaghosa states that Buddha visited the hermitage called a city of the royal sage Gaya, that the saint (future Buddha) fixed his dwelling on the pure bank of the Nairanjanā river (S. B. E vol. 49 part 1 p. 132, Canto XII. 87-88) and p. 193 (chap XVII. 8 of the same work) and that Buddha went to the hermitage of Kāśyapa at Gayā called Uruvilvā. The same work (S. B E vol. 49 part 1 p 192) speaks of Dharmāṭavī where dwelt 700 ascetics whom Buddha helped to enter *nirvāna* Visnupada occurs in the Visnudharmasūtra 85 40 as a holy place very fit for śrāddha. In my opinion at least Aurnavābha held that in a particular region there were three places on which according to the legends current in his day the foot-prints of Visnu's foot could be seen [1471]. Two of

Sanskrit literature by Winternitz, vol I p. 69(English tr). Scholars are not agreed about the exact location and extent of Gayāśiras, Rajendralal in 'Buddha-gayā' p 19 says 'Gayāśiras is not the Brahmayoni hill but a low spur of it to the north-east about a mile in area forming the site of the old town of Gayā. This Gayāśiras is the most sacred spot in Gayā.' Dr. Barua (vol. I p. 246) 'Gayā proper is still sandwiched between the Phalgu and a small set of hills containing some 25 hill-tops with Gayaśira or Gayāśira (Brahmayoni) in the south-west &c '. Both are, however, agreed that Gayaśiras is part of the ancient Gayā region. Vide S. B E vol. XIII p. 134 n. 1 about Cunningham's view that गयासीस is the ब्रह्मयोनि hill near Gayā.

1471. I am not unmindful of the fact that in the Iron Pillar Inscription of a king called Candra at Meherauli (nine miles south of Delhi) the last verse reads तेनायं प्रणिधाय भूमिपतिना ... भाह्वविष्णुपदे गिरौ भगवतो विष्णोर्ध्वज: स्थापित: (Gupta Inscriptions, No 32 at p. 141). This shows that near Delhi there was a hill called विष्णुपद But there is nothing to show that there was a place called गयशिरस् near it. Hence विष्णुपद and गयशिरस् being taken together point out to Gayā The Inscription is undated but looking to the characters it would not be far wrong to assign it to a period near Samudra-

these, Visnupada and Gayaśiras are well-known; hence it would not be unreasonable to hold that 'Samārohana' is a place and has to be located somewhere near the other two. Samārohana means 'mounting up' or 'ascending'. This word probably refers to the ascent of the hill that rises up from the river Phalgu. It is also possible that it is the same as the Udyanta hill echoing with the warbling (of birds) [1472] I therefore hold that at least 600 years before Christ (and hence even before Buddha) there was a tradition about Visnu's footprints in at least two well-known places viz. Visnupada and Gaya-śiras (both in Gayā). Even if some other work does not mention any one of these it does not follow from mere non-mention that that spot was not so named or did not exist.

Let us now turn to the Vanaparva. Dr. Barua mainly relies on Vanaparva 84. 82–103 and 95. 9–29. But some preliminary remarks must be made before the two passages are examined.

The Nāradīyapurāna (uttara, 46. 16) states that Gayaśiras extends from Krauñcapada to Phalgutīrtha.

Vanaparva chapter 82 sets out Pulastya's replies to Bhīsma's question about tīrthas. First comes Puskara (verses 20–40), then Jambumārga, Tandulikāśrama, Agastyasarah, Mahākāla, Kotitīrtha, Bhadravata (Sthānutīrtha), Narmadā, Prabhāsa and several other tīrthas (not in any particular order but selected at random). In chap. 83 Kuruksetra is described at some length.

Before discussing the most important passage of the Vanaparva (viz. 84. 82–103) we must see what precedes the description of Gayā. Dr. Barua and many of those that have written on this passage have not carefully considered the implications of verses 1–81 of chapter 84 and also of the following chapters. In Vanaparva 84. 1–81 the author makes Dhaumya name

gupta. Therefore Visnu's footprint existed on a hill near Delhi in the 4th century A D. There is no sound reason advanced why it could not have existed at Gayā about the same time or even earlier. Besides in the Rām. II 68 19 a विष्णुपद south of the river विपाशा is mentioned.

1472. Dr Barua regards गीतनादित in Vanaparva 84. 93 as the name of a peak (vol I p. 246). But this appears to be wrong It is an adjective of उद्यन्त (पर्वतं) that immediately precedes. I have not come across any peak called गीतनादित in any other work and Dr. Barua does not cite any other text in support of his view. उद्यन्त would mean 'the hill of sunrise,' not necessarily for the whole of Āryāvarta but in the place where both विष्णुपद and गयशिरस् were situated

about 57 holy places (including such famous ones as Naimisa, Sākambharī, Gangādvāra, Kanakhala, the confluence of Gangā and Yamunā, Kubjāmraka) and then comes to speak of the sacred spots in Gayā[1473] It is therefore clear that the intention of the author is not to speak exhaustively about any tirtha. For this reason some tirthas are described twice in the Vana-parva. For example Naimisa is very highly praised in chap. 84. 59–64 and again in chap. 87. 6–7. The same happens with regard to Gayā in 85.82–103 and 87.8–12. We cannot at all presume

These verses are q. in the तीर्थचि. pp. 275–277 (except three), त्रिस्थलीसेतु pp 321–323. It may be noted that the Padmapurāna, Ādikhanda, chap 38 (verses 2–19) contains verbatim and in the same order the verses about Gayā in the Vanaparva 84, 82–99 except that a word is changed here and there. There is hardly any doubt that one borrows from the other Good grounds have been advanced by Mr M. V. Vaidya in his paper 'Tirthayātrā in the Āranyakaparvan and the Padmapurāna' in the Kane Festschrift pp 530–537 Dr. S. K. Belvalkar in the volume of Indian and Eastern studies presented to Prof F. W Thomas pp. 19–28 in his paper on 'Cosmographical episode in the Mahābhārata and the Padmapurāna' has shown that chapters 80–83 of the Vanaparva are taken over by the author of the Padmapurāna in chapters 10. 5 to chapter 39,120.

from the manner in which tīrthas in Gayā are named and described that the writer of Vanaparva (chap. 84. 82–103) meant to be exhaustive as regards the holy spots in Gayā or the legends about Gayā. This conclusion is very much strengthened by the fact that in the Anuśāsanaparva three sacred spots in Gayā are mentioned which do not occur in Vanaparva 84. 82–103 viz. 'In Gayā a man becomes purified in Aśmaprstha (the same as Pretaśilā), on the hill Niravinda and of even a third brāhmana murder in Krauñcapadī'.[1474] These three, Aśmaprstha, Niravinda and Krauñcapadī, are in addition to those sacred spots that are mentioned in Vanaparva 84. In Vāyu 109. 15 a hill Aravindaka is said to be a peak of the Śilāparvata and Nāradīya (uttara 47. 83), Vāyu 108. 75 and Nāradīya (uttara 46. 16) mention the hill Krauñcapada (Munda-prstha was so called) Therefore it is clear that three important sites in the Gayāmāhātmya are mentioned by the Anuśāsanaparva.

It was unfortunate that Dr. Barua confined his attention on the question of the antiquity of Gayā to merely three works viz. the Vanaparva chapters 84 and 95, the Agnipurāṇa chap. 114–116 and the Vāyupurāna chapters 105–112. He did not care to investigate all the other Purānas nor did it strike him that the explanation of three *padas* of Visnu furnished by Aurnavābha probably referred to spots around Gayā alone. Other Purānas such as Padma (Ādikhanda 38. 2–21), Garuda I chapters 82–86, and the Nāradīya (uttara chap. 44–47) contain much that concerns Gayā and all of them have many verses in common. The critical edition of the Mahābhārata (published by the B O. R. I., Poona) reads 'sāvitram padam' (chap. 82.81) for 'sāvitryāstu padam' of the Bombay edition. The reading of the critical edition is supported by numerous and ancient Mss. Further, the printed Padmapurāna (in Ādikhanda 38. 13) reads 'Sāvitram padam' and thus lends support to the reading adopted in the critical edition. The words 'sāvitram padam' may be taken to mean the foot-print of Visnu (Savitṛ). Dr. Barua goes very much further than the facts warrant when he says that there is no reference in the Vanaparva to any structural erection or iconic suggestion. It is clear that there must have been an image of Dharma, since the Vanaparva speaks of

1474 अश्मपृष्ठे गयाया च निरविन्दे च पर्वते । तृतीयां क्रौञ्चपद्यां च ब्रह्महत्यां विशुध्यते ॥ अनुशासन 25. 42. नीलकण्ठ explains 'अश्मपृष्ठे प्रेतशिलाया एकां ब्रह्महत्यां व्यपोह्य निरविन्दे सुखगन्धहीने द्वितीयां ब्रह्महत्या निरस्य क्रौञ्चपदीति सर्वेषां विष्णुपदादीनामुपलक्षणं तेषु तृतीयां ब्रह्महत्या सकृदया गत एव विशुध्यते पूतो भवति',

the pilgrim to Gayā having to touch Dharma (Dharmam tatrā-bhi-samspṛśya). Besides, there is a reference to the footprints of a cow with a calf and to 'Sāvitra pada'. All these would surely be things that have an 'iconic suggestion'. Moreover, Dr. Barua forgets for the moment that, according to the Chinese traveller Fa Hien who visited India between 399–413 A. D., the Gayā of the Hindu faith was 'all emptiness and desolation' (vide Legge's translation p. 87) It is possible that Gayā might have suffered from earthquakes before 400 A. D. (as it is a region that is liable to severe earthquakes even in modern times) and therefore no structural erection of the ancient city of Gayā (to which ancient Pāli works and the Lalitavistara p 311 refer) might have been left in Fa Hien's day. Gayā appears to have passed through several vicissitudes. Some centuries before the Christian era it was in existence and was a flourishing town. By 400 A. D. it had been reduced to desolation. But in the 7th century the Chinese traveller Hiouen Thsang notes that the Hindu Gayā was a town with 1000 brāhmana families (vide Beal's B R. W. W. vol. II p. 113). Later on when Buddhism waned and vanished, Gayā came to comprehend even Buddhist remnants, since the Vāyupurāṇa speaks of Gayā as extending from Pretaśilā to Mahābodhi tree (a distance of about 13 miles, according to Mitra p 19).

Dr. Barua has also misunderstood verse 12 of the inscription at Gayā edited by Dr. Kielhorn in I. A. vol 16 p. 63 ff. The verse[1475] set out below may be translated as follows That wise (prince Yaksapāla) caused to be constructed a temple for the images of Maunāditya and the other gods (mentioned in it), he *dug up the famous Uttaramānasa* lake and established a sattra (charity house for food) near the Akṣaya (vaṭa)'. This inscription of the reign of Nayapāla was

1475. मौनादित्यसहस्रलिङ्गकमलार्काद्यर्चिनानारूपणाहिमोनेश्वरकल्पनाथविनायकादिदेवता-यानां कृती । स मासादमचीकरद् दिविषदा केदारदेशस्य च स्थानस्थोत्तरमानसस्य खनन सत्रं तथा चाक्षये ॥ verse 12 of the inscription of prince (*Narendra*) यक्षपाल son of विश्वादित्य edited in I A. 16 at p 65. Kielhorn translates 'the wise (prince) caused to be built a temple of the inhabitants of heaven called Maunaditya ..He likewise had the famous Uttaramānasa tank dug and established a sattra (hall of charity) to last forever'. Dr. Kielhorn is wrong in his translation 'to last forever.' Dr. Barua reads मनामाई as one word and connects that one word with दिविषदां (vol I p 63). One fails to understand how दिविषदा (genitive plural) is to be construed with मनामाई which according to Dr Barua's construction is only part of a compound word.

engraved about 1040 A.D. Dr. Barua thought that Uttaramānasa was dug up at that time and therefore Uttaramānasa tank is taken to be not older than 1040 A. D. and that it and many of the sacred spots must have been later and the Gayā-māhātmya which speaks of Uttarmānasa must be much later than the 11th century A. D. But Dr Barua is entirely mistaken in this. If a tank was dug up for *the first time* at the time of the inscription, it is impossible that it should have been called 'khyāta' (famous). The *tank* can become famous some centuries after it was dug. Uttarmānasa tank is mentioned as a sacred spot in Vāyupurāna 77. 108 (which verse is quoted about 1110 A. D. in the Kalpataru on tīrtha at p. 168), Vāyu 82. 21, Agni 115. 10. Therefore Uttaramānasa tank was well known at least in the 8th or 9th century A. D. What the inscription means is either that the famous tank had silted up and so it was dug up or that it was made longer, broader and deeper in about 1040. That is all.

In my opinion the Gayāmāhātmya (Vāyu, chap. 105–112), though possibly later than the main text of the Vāyupurāna, cannot be placed so late as the 13th or 14th century A. D. It is really a patch-work from many sources of earlier times such as the Vanaparva, Anusāsanaparva, Padma I 38, the Nāradiya (uttara) chap. 44–47 Several verses and half verses of it are repetitions (such as the half verse 'Gayāyām akṣayam śrāddham japahomatapāmsi ca' Vāyu 108 35 and Vāyu 82.43 quoted as from Vāyu in Kalpataru on tīrtha p. 167, and Vāyu 110. 29–30 are the same as Vāyu 105.37–38. So also Vāyu 82. 31–33 are the same as Vāyu 110. 51–53. Dr. Barua does not notice that in chap. 82 of the Vāyu (20–24) several sub-tīrthas of Gayā are expressly mentioned viz. Brahmakuṇḍa, Prabhāsa, Pretaparvata, Uttaramānasa, Udīcī, Kanakhala, Dakṣinamānasa, Dharmāranya, Gadādhara, Matanga; so also chap 77. 97–108 mention Grdhrakūta, hermitage of Bharata, Matangapada, Munda-prstha and Uttaramānasa. Many of the verses occurring in the Gayāmāhātmya are found quoted in the Smṛticandrikā [1476]

1476 Vide H. of Dh vol. 1. p, 346 for the date of the Smṛticandrikā. The verses ब्रह्मज्ञान ..चतुर्विधा (vide note 1484) and ब्रह्महत्या...द्विनश्यति (वायु. 105.13) are नारदीय (उत्तर) chap. 44. 20 and 22; Vāyu 110 63–64 are equal to नारदीय, उत्तर, 45 64–66, Vāyu 110. 63–64 are the same as Nāradiya (uttara) 45.64–66, Vāyu 108.13–16 are the same as नारदीय (उत्तर. 45. 2–4. (about 1150–1225 A. D.) on Śrāddha and Āsauca (without name) as briefly exemplified below. I think that the Gayāmāhātmya is to be assigned to some date between the 7th and 10th centuries A. D.

Having disposed of the question of the date of the Gayā-māhātmya and the references to the sacred spots in Gayā in Vanaparva chap. 84, it is necessary to see how Gayā is spoken of in the other parts of the Mahābhārata and the smṛtis. In the Vanaparva itself references to Gayā occur in chap. 87 and chap. 95. Vanaparva, chap. 87, starts by saying that going towards the east (from Kāmyaka-vana where the Pāndavas dwelt for some time) the pilgrim would come to the Naimiṣa forest and the Gomatī river. Thus it is said that in the east there is a holy hill called after Gaya and a holy pool called Brahmasaras; then comes a famous verse[1477] 'one should desire to have many sons if even

85. 2–22) contains most of the verses of Vāyu 110. 34–60. The notes below in this Gayā section will show that the Nāradīya and the Gayāmāhātmya contain scores of verses in common

The स्मृतिचन्द्रिका (University of Mysore edition) on आशौच has towards the end a section on गयाश्राद्धविधि, several verses of which occur in वायु A few verses are cited by way of illustration. The first two verses (स्मृतिच. p 194) though ascribed to आदिपुराण are almost the same as वायु 110 2-3; the verses गोमत्वार ..बभूव (in स्मृतिच on आशौच p. 199) are almost the same as वायु 111. 35 and 37, स्मृतिच० p 197 the verse मक्षरे वर्तमाने तु is the same as वायु 105.48 and स्मृतिच. p 199 the verse या सा वैतरणी नाम is वायु 105 44

The Tīrtha-cintāmaṇi of Vācaspati quotes many verses from the Gayā-māhātmya of the Vāyupurāṇa. Vācaspati's literary activity lies between 1450 to 1480 (or 1500 AD at the latest) He treats the Gayāmāhātmya as on the same level as the other purāṇas. This position could not have been attained by the Gayāmahātmya in a century or two Therefore it must be much earlier than 1300 AD. A few examples of the citations of the Gayāmahātmya by Vacaspati may be indicated here On pp. 285–286 the तीर्थचि. expressly quotes from the वायव्य verses 18, 19, 26 of वायु. 105, वायु 110. 2–3 are quoted as from वायु० in तीर्थचि p. 7, on pp. 280–283 numerous verses are quoted from वायुपुराण which are (with slight variations) the same as वायुपुराण 108. 13–23, 28–30; on pp 284–285 from वायुपुराण are cited वायु० 110 9–15 and 19–20, 56–59, तीर्थचि. pp. 288–293 quote from the वायुपुराण 110. 17, 21–24, 30–32, 34–55, तीर्थचि pp. 298–301 quote वायु. 111. 1–22 (with additions and variant readings); similarly the पृथ्वीचन्द्रोदय on आद्ध and त्रिस्थलीसेतु quote about 300 verses from गयामाहात्म्य and the त्रिस्थली० (pp. 356–359 &c) several times refers to the explanations of verses from गयामाहात्म्य given by his predecessors But space does not allow me to go into this subject at greater length

one (of whom) goes to Gayā, or performs the Aśvamedha sacrifice or lets loose a *nīla* bull' (the pitrs may be gratified). Then Vanaparva chap. 87 goes on to refer to the holy river (mahānadī) Phalgu, the hill Gayaśiras, the Aksayya Vata, where food offered to pitrs becomes inexhaustible. In Vanaparva 95 mention is made of Brahmasaras (where Agastya went to Dharmarāja i. e. Yama, verse 12), of Aksayavata (v. 14) which is an imperishable place of worship and where the fruit (of offerings made) is inexhaustible; it further states that king Gaya, son of Amūrtarayas,[1477a] performed a sacrifice in which food and fees in plenty were distributed (verses 18–19). Vas. (XI. 42) states: when a man goes to Gayā and offers food his ancestors become delighted like agriculturists that rejoice when there is good rain and pitrs become (really) *putrin* (having a son) on account of such a son The Visnudharmasūtra, chapter 85,[1478] mentions by name about 55 holy places that are most proper for śrāddha among which those connected with Gayā are Gayāśīrsa, Aksayavata, Phalgu, Uttaramānasa, Matangavāpī, Visnupada, and winds up by quoting three verses as *gāthās* sung by pitrs. Yāj. I. 261 states that whatever a man gives while in Gayā leads to inexhaustible rewards. Atri-smrti (55–58) refers to a son's going to Gayā for the benefit of the pitrs, to a bath in Phalgu and *tarpana* of pitrs in the river, to seeing Gadādhara (Visnu) at Gayā and to Gayāśīrsā. Śankha (14 27–28) refers[1479] to several tīrthas (one being Gayā) the offerings made at which

1479 It is somewhat strange that Dr. Barua (in 'Gayā and Buddh' gayā' vol. I p 66) read तीर्थे वामरकण्टके in Sankha and thought that Vāmarakantaka was a holy place (instead separating as चा अमरकण्टके).

become inexhaustible. The Likhita-Smrti speaks[1480] of the importance of Gayā as follows: In whosesoever name a pinda is offered at Gayāśiras, whether for oneslf or for another, that person, if in hell, goes to heaven and if in heaven that man secures release (from *saṃsāra*). The Kūrmapurāna remarks that one should desire to have many sons so that if one out of them goes to Gayā on some other business and offers śrāddha, he thereby saves his pitrs and himself reaches the highest goal. The Matsyapurāna (22. 4-6) quoted by the Kalpataru (on tīrtha p. 163) speaks of Gayā as pitrtīrtha and as the best among tīrthas where Brahmā himself dwells and also has the verse 'estavyā bahavah putrāh'.

In the Gayāmāhātmya (Vāyupurāna, chapters 105-112) there are about 560 verses. An attempt will be made here to give a brief summary of it and some of the important verses will be quoted. Chapter 105 is general and briefly indicates some of the main topics dealt with in the following chapters. It states that in Śvetavārāhakalpa Gaya performed a sacrifice and Gayā was named after him[1481], that *pitrs* hanker after sons because the son that goes to Gayā saves the *pitrs* from hell[1482]. At Gayā a man should offer *piṇḍas* to his father and others and even to himself but without sesame; all the five mortal sins like brāhmana-murder are removed by the performance of śrāddha at Gayā. A pinda offered after uttering the name and gotra of the recipient by the son or any other person in Gayā leads that person to the imperishable *brahma*[1483]. Moksa is fourfold (i. e. results in four ways) viz. by knowledge of *brahma*, śrāddha at Gayā, death in (a fight for preventing) the seizure of cows and residence in Kuruksetra and śrāddha at

Gayā renders the others unnecessary[1484]. Śrāddha may be performed at Gayā at all times, even in an intercalary month, on the anniversary of one's birthday, or even when Jupiter and Venus are invisible or when Jupiter is in Leo. One should honour the brāhmanas (of Gayā) that were established there by Brahmā; when they are gratified all deities together with the pitrs are gratified. Tonsure[1485] and fast are to be observed at all tīrthas except in Kuruksetra, Viśālā, Virajā and Gayā. An ascetic[1486] (sannyāsin) should not offer pindas (at Gayā) but should merely exhibit (hold up) his staff and should put it down on Vișnupada The (whole) Gayāksetra is five *krośas* in extent and Gayāśiras is one krośa and all the tīrthas of the three worlds are centered in these two[1487]. At Gayā one may offer (to pitrs) pindas by means of *pāyasa* (rice cooked in milk), boiled rice, barley flour, fruits and roots, the cake of sesame (after oil is extracted), sweetmeats or jaggery with ghee or with curds alone or with invigorating honey. In a śrāddha at Gayā, the procedure consists in preparing[1488] a seat for the pindas, the offering of pindas, the sprinkling of water again (on the kuśa grass), giving fees and declaration of dinner (to brāhmanas); but there is no invocation of pitrs, no curtains for privacy and no blemish due to śrāddha being seen (by undesirable persons or animals) Those who desire to reap the full fruit of śrāddha performed at a tīrtha (like Gayā) must give up passionate longings, anger and

avarice, observe celibacy, eat only one meal a day, should sleep on the ground (and not on a cot), should speak the truth, should be pure and intent on the good of all beings. The famous river Vaitaraṇī has come down to Gayā; one taking a bath in it and donating a cow saves 21 generations in his family. One should go to the Akṣayavaṭa and gratify the (Gayā) brāhmaṇas. There is no spot in Gayā which is not a sacred place.[1459]

Chap. 106 narrates the story of Gayāsura. Gayāsura, a very powerful *asura* 125 *yojanas* in height and 60 yojanas in girth, performed severe austerities for thousands of years on the mountain called Kolāhala. The gods, anxious and tormented by his austerities, went to Brahmā for protection. Brahmā took them to Śiva who proposed to go to Viṣnu. Brahmā, Śiva and the gods praised Viṣnu, who appeared to them and said that they should, riding their respective conveyances, go to Gayāsura. Viṣnu asked him why he practised severe austerities and said that the boon he would ask would be granted. He asked the boon that he should be purer than all the gods, sages, mantras, ascetics &c The gods said 'let it be so' and left for heaven. All people who saw or touched Gayāsura's holy body went to heaven. The capital of Yama became deserted and so he went to Brahmā who took him to Viṣnu who asked Brahmā to request Gayāsura to give his pure body for the purpose of a sacrifice. Gayāsura agreed and fell down on the earth towards the southwest with his head on the north on Kolāhala mountain and feet to the south. Brahmā collected materials and mind-born *ṛtviks* (about 40 are named) and performed a sacrifice on the body of Gayāsura. That body, however, was not stable but moved and hence Brahmā asked Yama to place on Gayāsura's head a *śilā* (stone slab) that was in Yama's house. Yama did so; yet Gayāsura's body together with the *śilā* still moved. Brahmā asked Śiva and other gods to stand immoveable on the śilā. They did so and yet the body moved. Hence Brahmā went to Viṣnu and requested him to make the body and śilā stable. Viṣnu gave his own *mūrti* and though it was placed on the śilā it still moved. Then Viṣnu sat on the śilā in three forms viz Janārdana, Puṇḍarīka and Ādi-Gadādhara, Brahmā in five forms (Prapitāmaha, Pitāmaha, Phalgvīśa, Kedāra and Kanakeśvara), Vināyaka in the form of an elephant, the Sun in three forms, the Goddesses Lakṣmi (as Sītā), Gaurī (as Maṅgalā), Gāyatrī

and Sarasvatī. As Gayāsura was made stable by the first Gadā (mace) wielded by Hari, therefore Hari was called Ādigadādhara.[1490] Gayāsura complained 'why am I deceived? I have given my pure body to Brahmā for the latter's sacrifice. Would I not have become stable at the mere word of Viṣnu (why torment me with the mace?).' Then the gods asked him to choose a boon. He chose 'As long as the earth, mountains, the Sun, Moon and stars last, may Brahmā, Viṣnu and Śiva and the other gods remain on the śilā! Let this sacred spot be known by my name. Let all tīrthas be centered in the midst of Gayā which is five krośas in extent and in Gayāśiras which is one krośa and do good to people. May all the gods remain here in manifest forms (images &c) and unmanifest forms (such as footprints &c)! Those to whom śrāddha with piṇḍas is offered may go to the world of Brahmā and all grave sins like brāhmaṇa-murder be destroyed at once.' The gods said 'Let it be so.' Then Brahmā gave to the brāhmaṇas Gayā (with its extent of five krośas), 55 villages, well-furnished houses, desire-yielding cow and trees, a river flowing with milk, golden wells, heaps of food, but enjoined on them not to beg from any one else. But the brāhmaṇas, greedy as they were, performed a sacrifice for Dharma in Dharmāraṇya and begged him for fees. Then Brahmā came, cursed them and took away everything from them. When the brāhmaṇas bewailed that they had been deprived of everything and their livelihood should be provided for, Brahmā said that they would live on the charity of pilgrims to Gayā and those who would honour them would be honouring Brahmā.

Chap. 107 deals with the story of the *śilā*[1491] that was placed on the head of Gayāsura for making it stable. Dharma had a daughter called Dharmavratā Dharma could not find a bridegroom worthy of her virtues and accomplishments and asked her to perform *tapas* for the purpose. She performed severe austerities (subsisting only on air) for ten thousand years. Marīci, one of the mind-born sons of Brahmā, once saw her and asked her to become his wife. Dharmavratā asked him to request her father Dharma. Marīci approached Dharma who

1490. वायु 105 60 mentions why Viṣnu is called आदिगदाधर 'आद्यया गदया भीतो यस्माद्दैत्य स्थिरीकृत । स्थित इत्येव हरिणा तस्मादादिगदाधर ॥' q. by त्रिस्थली० p. 338 In वायु 109. 13 also a similar derivation is given.

1491. The story of the Śilā is briefly narrated in the Agnipurāṇa also (chap 114. 8-22), often using the very words that occur in the Vāyupurāṇa.

gave her in marriage to Marīci, who took her to his hermitage and had one hundred sons from her. Once Marīci being tired lay down for sleep and asked Dharmavratā to shampoo his feet. While she shampooed his feet Brahmā (her father-in-law) came there. She left off shampooing her husband's feet and got up to receive with honour her husband's father. In the meanwhile Marīci awoke and not seeing his wife cursed her to be a śilā (stone slab) as she disobeyed his order by giving up the shampooing of his feet. She being innocent of any fault got angry and was about to curse Marīci but said 'Mahādeva will curse you'. She, standing in the midst of Gārhapatya fire, performed *tapas* and Marīci also did the same. The gods led by Indra got anxious as usual and went to Viṣṇu who asked her to choose a boon. She prayed that the curse pronounced by her husband be annulled. The gods said that Marīci being a great sage the curse could not be annulled and asked her to choose some other boon. She said that she should be a śilā more holy than all rivers, sages and gods and that all tīrthas should stand in the slab of stone, that those who would bathe in the tīrthas on the śilā and offer piṇḍas and śrāddha should be able to go to *brahmaloka*, that all holy rivers like the Ganges should always remain in her. The gods conceded what she prayed for and said that when she would become stable on the head of Gayāsura, they would all stand on the śilā.

Chap. 108 presents numerous divergences in the Mss In the Ānandāśrama edition its contents briefly are: The śilā was placed on the head of Gayāsura and therefore there was union of two very holy objects, on which Brahmā performed Aśvamedha and when the gods came to receive their share of the sacrificial offerings the śilā said to Viṣṇu and others 'promise that you would remain on the śilā and would bring about the release of pitṛs'. The gods agreed and they stayed on the śilā in the form of images and foot-prints. As the silā was placed on the back of the head of the asura the hill was called Muṇḍaprstha (lit. the back of the head) which gave Brahmaloka to pitṛs. Then the chapter speaks of a hill called Prabhāsa, of Rāmatīrtha near the place where the great river (Phalgu) and Prabhāsa hill meet, the hermitage of Bharata, of Matangapada, of the *bali* to be offered to Yamarāja and Dharmarāja and to the dogs of Yama, viz. Śyāma and Śabala, of the Udyantaka hill near the left of Śilā, of Agastya-kuṇḍa, and numerous other holy places such as Grdhrakūta hill, the her-

mitage of Cyavana, the river Punahpunā, Krauñca-pada, Janārdana on Bhasmakūta.

The story of Gayāsura has puzzled Mitra and subsequent writers. Mitra holds that nothing appears more absurd or stupid than the story of Gayāsura who, he emphasizes, is not a demon or a vicious monster, but a devout Vaisnava ('Bodh-Gaya' pp. 15–16). The story of Gayāsura is not unique. The Purānas abound in stories that appear to modern minds absurd and puerile. Besides, there were several asuras like Prahlāda, Bāna (devotee of Śiva) and Bali (who was an exemplary and pious king and a worshipper of Visnu) that were not monsters but good and devout persons, and yet fought with gods. For example, Kūrmapurāna (I. 16. 59–60 and 91–92) narrates that Prahlāda fought with Nrsimha; the Padma (Bhūmikhaṇḍa 1.8) calls him a Mahābhāgavata but states that he first fought with Visnu and entered Vaisnavītanu; while Vāmanapurāna (chap. 7–8) speaks of his fight with Naranārāyana In Pali works (e. g. Anguttara-nikāya, part IV pp. 197–204) he is called Pahārāda and *asurinda* (asurendra). Vide Anguttara-nikāya (text) vol. IV p. 197. For Bali who was grandson of Prahlāda, a good king and a devotee of Visnu, vide Brahmapurāna, chap. 73, Kūrma I. 17, Vāmana (chapters 77 and 92). For Bāna, son of Bali and the fight of Bāna helped by Śiva with Krsna, vide Brahma chap. 205–206 and Visnupurāna V. 33. 37–38.

According to Dr. Rajendralal Mitra (in 'Bodh-Gayā' pp. 14-18) the story of Gayāsura is an allegory of the vanquishing of Buddhism by Brahmanism. O' Malley thought (J. A. S. B. vol. LXXII part 3 p. 7 for 1904) that the Gayāsura legend represents an amalgamation or compromise of Brahmanism with the popular demonolatry which preceded Brahmanism. Dr. Barua critisizes both theories and appears to hold (vol. I. pp. 40–41) that the idea underlying the legend is to impress on people's minds the high sanctity of the Gayā range of hills along the western bank of the river Phalgu, that Gayā figures nowhere in Buddhism, that Gaya[1492] or Namuci or Vrtra is represented as a demon of darkness and as an enemy of Indra and that the Vedic word Trivikrama and the interpretation of Aurnavābha are the nucleus of the legend of Gayāsura. From considerations of space it is not possible to discuss these

[1492] It is not clear whence Dr Barua derived his information that in the Veda Gaya is represented as a demon like Vrtra. In the Rg. at least Gaya is not a demon like Vrtra.

theories here. To my mind it appears that Gayā had become a famous *pitrtīrtha* centuries before Christ and that the legend of Gayāsura is a *post facto* attempt to account for the sanctity of the place and the numerous shrines and holy places that had sprung up round Gayā.

Chap. 109 deals with the questions how Ādi-Gadādhara abided in manifest and unmanifest forms, how his *gadā* (mace) was produced and how the tīrtha called Gadālola became a destroyer of all sins. There was a powerful Asura called Gada, who, when Brahmā requested, gave up his bones to Brahmā. Viśvakarmā, at the desire of Brahmā, fashioned a wonderful mace out of the bones. In the times of Svāyambhuva Manu an Asura named Heti, son of Brahmā, performed severe austerities for thousands of divine years. He secured from Brahmā and other gods the boon that he could not be killed by gods, *daityas*, men or with such weapons as the discus of Kṛsna and others. Heti conquered the gods and became Indra. The gods went to Hari and requested him to kill Heti. He asked for a powerful weapon and the gods gave him the mace manufactured from the bones of Gada and Viṣnu killed Heti with the Gadā. This story about demon Heti is mentioned in Agni 114 26-27 and Nāradīya (uttara) 47. 9-11. Hari is called Ādi-Gadādhara because[1492a] he was the first to wield that mace and stood on the śilā on the head of Gayāsura, supported by the Gadā, in order to make (the head of Gayāsura) stable. He shows himself in the form of hills viz. the Muṇḍaprstha hill, the Prabhāsa and other hills. These and Akṣayavaṭa, Phalgu and other rivers are the non-manifest forms of Ādigadādhara. The Viṣnupada, Rudrapada, Brahmapada and other padas are the non-manifest and manifest forms of Gadādhara.[1493] The image of Gadādhara is purely a mani-

1493. The principal rivers, hills, padas are enumerated here in one place. Unless otherwise expressly mentioned the chapters and verses in this note refer to the वायुपुराण. The holy rivers are; फल्गु often called महानदी (अग्नि. 115, 25), घृतकुल्या, मधुकुल्या (these two, वायु 109, 17), मधुस्रवा (106. 75), अग्निधारा (from उद्यन्त hill, 108. 59), कपिला (108. 58), वैतरणी (105. 44 and 109, 17), देविका (112. 30), आकाशगङ्गा (अग्नि. 116 5). Some of these are mere streams. The sacred hills and peaks are; गयाशिरः (109,36, अग्नि. 115 26 and 44), सुप्तपृष्ठ (108, 12, 109. 14), प्रभास (108. 13 and 16, 109. 14), उद्यन्त (वनपर्व 84,93, वायु 108. 59, 109. 15), भस्मकूट (109. 15), अरण्यक (109. 15), नागकूट (111 22, अग्नि 115. 25), गृध्रकूट (109. 15), प्रेतकूट (109. 15),

fest form. Asura Heti was killed by Visnu and went to Visnuloka. When the body of Gayāsura was made stable Brahmā sang a hymn of praise to Visnu who asked Brahmā to choose a boon Brahmā said 'we (gods) shall not abide in the śilā without you, but shall remain therein together with you if you have a manifest form.'[1494] Visnu said 'be it so' and Visnu stood on Gayāśiras in the Ādigadādhara form and as Janārdana and Pundarīkāksa. Śiva also praised Visnu (Vāyu 109. 43–50). The Vāyu speaks at several places of 'vyaktāvyakta' symbols of the deity (chap. 109. 20 and 43–45) What is meant is Visnu is non-manifest in Phalgu, vyaktāvyakta in Visnupada and manifest in images and statues (vide Tristhalīsetu p. 365, pratimāsvarūpī vyaktah).

Chap. 110 deals with Gayāyātrā. To the east of Gayā is a great river (Phalgu). (If it is dry) one should dig a pit for water and take a bath, should perform *tarpana* and śrāddha according to one's own recension of the Veda, but without *arghya* (water for showing respect) and āvāhana (invoking) In the after-

The sacred sites are पञ्चलोक, सप्तलोक, वैकुण्ठ, लोहदण्डक (all four, in 109 16), गोप्रचार (111. 35–37 where there were mango trees established by ब्रह्मा), धर्मारण्य (111. 23), ब्रह्मयूप (अग्नि 115. 39 and वनपर्व 84. 86). The sacred trees are, अक्षयवट (वनपर्व 84. 83, 95. 14, वायु 105 45, 111 79–81, अग्नि 115. 70–73), आम्र near गोप्रचार (111 35–37), गृध्रकूटवट (108. 63), महाबोधितरु (111 26–27, अग्नि 115 37). The verse about the mango tree is famous 'एको सुनि. कुम्भकुशाग्रहस्त आम्रस्य मूले सलिलं ददानः। आम्रश्च सिक्तः पितरश्च तृप्ता एका क्रिया द्व्यर्थकरी प्रसिद्धा॥' वायु. 111 37, अग्नि. 115 40, नारदीय (उत्तर) 46. 7, पद्म, सृष्टिखण्ड 11 77 There are several other तीर्थs, such as फल्गुवीडा, फल्गुचण्डी, अङ्गारकेश्वर (all in अग्नि 116. 29) which are not mentioned here.

The पद (stone slabs with foot prints thereon) are. वायु. 111. 46–58 mention 16 by name and refer to others generally अग्नि. 115. 48–53 mentions at least 13. The पदs mentioned by वायु. are विष्णु, रुद्र, ब्रह्म, काश्यप, दक्षिणाग्नि, गार्हपत्य, आहवनीय, सभ्य, आवसथ्य, शक्र, अगस्त्य, कौञ्च, मातङ्ग, सूर्य, कार्तिकेय and गणेश. वायु. 111. 56 states that four out of these are most eminent viz. of काश्यप, विष्णु, रुद्र and ब्रह्मा नारदीय (उत्तर) 46. 27 states that विष्णुपद and ब्रह्मपद are superior, but ब्रह्मपद is superior to all.

1494. Verses 2–3 and 4–5 of Vāyu 110 are quoted above in notes 1295 and 1261 respectively.

noon the pilgrim should go to the Pretaśilā, take a bath in the Brahmakunda, offer tarpana to the gods and perform śrāddha of his sapindas on the Pretaśilā with the mantras set out in Vāyu (110. 10–12) and offer pindas to his ancestors. In Astakās, in Vrddhiśrāddha, at Gayā and on the anniversary of death, one may offer a śrāddha separately to one's mother but on all other occasions with her husband.[1495] To the sapindas other than one's paternal ancestors he should offer śrāddha to the south (of the place where he offers to his father &c.) viz. should spread kuśas and once offer water mixed with sesame and should offer them a pinda made of barley flour and repeat the mantras (Vāyu 110. 21–22). The pindas to be offered at Gayāśiras may be in size as[1496] big as one's closed hand, or an undried āmalaka (myrobalan) fruit or of the size of śamī leaves. By means of these he saves seven gotras viz. that of his father, of his mother, of his wife, sister, daughter, paternal aunt and maternal aunt. Water mixed with sesame and pindas are offered to all persons on the maternal grandfather's side, to all bandhus, to all infants, to persons cremated or not cremated, to persons that were killed by lightning or robbers or that committed suicide in various ways and, to those who may be undergoing torments of Hells of various kinds and those who have become beasts or birds or insects or trees owing to evil deeds (Vāyu 110, verses 30–55). The verses of most comprehensive character about offering water have been cited in n. 1237 p. 550 and on pp. 616–617 above.

Chap. 111 deals with the order in which the several tirthas are to be visited. The full pilgrimage lasts for seven days. In chap. 110 it has been stated as shown above that on entering Gayā, a pilgrim takes a bath in the Phalgu water, performs tarpana and śrāddha, then on the same day he goes to the Pretaśilā (which is a part of the Śilā as stated in Vāyu 108 15) and performs a śrāddha there and offers pindas with boiled rice and ghee (Vāyu 110.15). On doing

The त्रिस्थली p 327 explains 'अत्र मातृगोत्रं मातामहगोत्रम्। भार्यागोत्रं श्वशुरगोत्रम्। भगिनीदुहितृपितृष्वस्-भातृस्त्रसॄणां गोत्राणि यत्कुले सा दत्तास्तदीयानि। एतेषामेव गोत्राणामेकोत्तरं शतं कुल लक्षणया तत्स्थाः पुरुषा. ॥.'

this the persons for whom this is done become free from the position of *preta*. It is stated (in Vāyu 108. 17–22) that one should bathe in the Rāmatīrtha which is near the place where Phalgu meets the Prabhāsa hill. By bath in Rāmatīrtha and offering of śrāddha and pinda there the persons for whom this is done become *pitṛs* (being already free from *pretatva* by the śrāddha on pretaśilā). On a hill on the south of Pretaśilā one should offer a *bali* (food offered with kuśa, sesame and water) to Yamarāja and Dharmarāja and to the two dogs Śyāma and Śabala. On the next day after entering Gayā (i. e. the 2nd day), the pilgrim should proceed to the Pretaparvata[1497] (Vāyu 110.8) and take a bath in the Brahmakunda and perform tarpana, śrāddha and giving of pindas mixed with sesame, ghee, curds and honey to his ancestors (father, grandfather &c.) with the mantras 'pitā pitāmahaścaiva' (Vāyu 110. 23–24). Then the pilgrim should offer on kuśas, water, sesame and pindas to persons related in various ways with the mantras 'asmat-kule mṛtā ye ca &c., (Vāyu 110. 34–55). He should then invoke the gods to be witnesses to the fact of his having come to Gayā and become free from the debt to the ancestors (Vāyu 110. 59–60). It is stated in Vāyu 110.61 that at all sacred spots in Gayā the offering of pindas should be done in the same way as at Pretaparvata[1498].

On the third day of entering Gaya one has to perform Pañcatīrthī rites[1499] (Vāyu 111. 1 ff.). The pilgrim first bathes in Uttaramānasa, offers tarpana to gods, gives water and śrāddha and pindas to his ancestors with the mantras (Vāyu 110. 21–24). The fruit of this rite is the inexhaustible gratification of the *pitṛs*. Then the pilgrim goes to the three tīrthas which constitute Daksinamānasa, viz. Udīcītīrtha (on the north), Kanakhala (in the middle) and Daksinamānasa

1497. On प्रेतपर्वत and ब्रह्मकुण्ड, the त्रिस्थली॰ p. 355 remarks 'प्रेतपर्वतो गयावाय्व्यादिशे गयातो गव्यूत्यधिकदूरस्थ.। ब्रह्मकुण्डे प्रेतपर्वतमूल ईशानभागे।'.

1498. सर्वस्थानेषु चैवं स्यात्पिण्डदान तु नारद। प्रेतपर्वतमारभ्य कुर्यात्तीर्थेषु च क्रमात्॥ वायु. 110 61.

1499. The five तीर्थs are उत्तरमानस, उदीचीतीर्थ, कनखल, दक्षिणमानस and फल्गु. The त्रिस्थली॰ says (p. 360) that one has not to take a bath in each of these i. e there are not five baths on this day. Phalgutīrtha is the same as Gayāśiras and is defined in वायु 111. 22 'नागकूटादुभ्रकूटाद्यूपादुत्तरमानसात्। एतत्त्रयाशिरः प्रोक्तं फल्गुतीर्थं तदुच्यते॥. The अग्नेयु. (115. 25–26) differs 'नागो॰ जनार्दनात्कूपाद्गदाद्योत्तरमानसात्। एत ... च्यते॥. गरुड. I. 83 4 is 'नागाज्जना॰ ... तदुच्यते॥ The त्रिस्थली॰ p. 359 reads शुण्डपृष्ठानगाधस्तात्फल्गुतीर्थमनुत्तमम्।

(on the south). At each of these three there is a śrāddha. Then the pilgrim goes to the Phalgutīrtha, which is the best of all (Gayā) tīrthas. The pilgrim performs tarpana and śrāddha with piṇḍas on Phalgu. This śrāddha at Phalgu results in *mukti* for the performer and also for those for whose benefit it is performed (muktir-bhavati kartṛnām pitṛnām śrāddhatah sadā, Vāyu 110. 13). It is stated that Phalgu is Ādi-Gadādhara himself in a fluid form.[1500] By bath in Phalgu and seeing Gadādhara a man saves himself, ten ancestors and ten descendants. Then he worships Gadādhara by a bath with *pañcāmrta* after bowing[1500a] to Vāsudeva, Sankarsana, Pradyumna, Aniruddha, Visnu, Śrīdhara. On the 2nd day of the Pañcatīrthī rites (i. e. 4th day from entering Gayā) the pilgrim should repair to Dharmāranya which is so-called because Dharma performed a sacrifice there. Then the pilgrim should bathe in the Matangavāpī (which is situated in Dharmāranya), then he should perform *tarpana*, śrāddha and *pinḍadāna* at the well called Brahmatīrtha and also in the space between Brahmatīrtha and Brahmayūpa; then bow to Brahmā and Dharmeśvara.[1501] He should bow to the Mahābodhi tree (i. e. the sacred *pippala*) and perform śrāddha also underneath it. Agni 115. 34–37 and Nāradīya (uttara) 45. 104 refer to these tīrthas. On the third day of the Pañcatīrthī rites (i. e. on 5th day from entering Gayā) the pilgrim should bathe in Brahmasaras and perform śrāddha with pindas between the Brahmakūpa and the Yūpa (sacrificial post) raised by Brahmā when he performed a sacrifice. By this śrāddha the pilgrim saves his pitrs.[1502] He should go round the Brahma-yūpa and bow

1501. Dr. Barua (in 'Gayā and Buddha-Gayā' vol I p 22 note) holds that Dharma and Dharmeśvara refer to Buddha, while O'Malley (in J. A. S B. vol. LXXII for 1904 part 3, p. 5) takes Dharma to mean Yama. I am inclined to agree with O'Malley. Padma, Srstikhanda 11. 73, states that there are three aranyas for pindadāna viz Puskarāranya, Naimisāranya and Dharmāranya.

1502. It may be noted that the three verses (Vāyu 111. 27–29) addressed to महाबोधितरु do not occur in त्रिस्थली० p 361, which gives two other verses instead viz चलहृदलाय वृक्षाय सर्वदा चलविष्णवे। बोधितत्त्वाय यज्ञाय अश्वत्थाय नमो नमः॥ एकादशोसि रुद्राणां वसूनामष्टमस्तथा। नारायणोसि देवाना वृक्षराजोसि पिप्पल॥. The त्रिस्थली० remarks that in some mss. even these two are not to be found.

to Brahmā. There are mango trees near Gopracāra established by Brahmā. By watering a mango with water from the Brahmasaras the pitṛs attain *moksa*. Here follows the verse ('eko munih' &c.) quoted above (n 1493). Then a *balt* should be offered to Yama and Dharmarāja, then to the two dogs of Yama, then he should offer a bali to crows and then bathe (in Brahmasaras). This is briefly a summary of Vāyu 111 30–40. Some of these details are mentioned by Agni 115. 34–40 and Nāradiya (uttara) 46. Then on the 4th day of the Pañcatīrthī rites (i. e. 6th day from entrance into Gayā) the pilgrim should take an ordinary bath in the Phalgu and should then perform śrāddhas at the several *padas* on Gayāśiras which is near Phalgutīrtha. Gayāśiras extends from Krauñcapāda up to Phalgutīrtha. Śrāddha offered here (on Gayāsiras) becomes inexhaustible.[1503] Here Ādi-Gadādhara abides in the form of Visnupada. By performing a śrāddha with pinḍas on Visnupada (which is a footprint on a slab deemed to be of Viṣṇu) the pilgrim saves one thousand families and takes them and himself to the blissful, inexhaustible and never-ending world of Viṣnu. Then Vāyu 111. 47–56 deal with the rewards of śrāddhas performed at Rudrapada, Brahmapada and 14 other padas expressly named by it.[1504] 'For whomsoever by name a pilgrim offers a piṇḍa on Gayāśiras, that man, if in hell, goes to heaven and if in heaven he secures *moksa*.'

On the 5th day of the Pañcatīrthī rites (i. e. the 7th day from entering Gayā), the pilgrim should bathe in the sacred place called Gadālola.[1505] By performing śrāddha with pindas at Gadālola he takes his pitrs and himself to the world of Brahmā. Then at the Aksayavata he should perform a śrāddha

1504. The त्रिस्थली॰ p 366 remarks that there is no separate śrāddha on Gayāśiras apart from the śrāddhas on Visnupada and the other padas गयाशिरसि यः पिण्डान्येषां नाम्ना तु निर्वपेत्। नरकस्था दिवं यान्ति स्वर्गस्था मोक्षमाप्नुयु॥ वायु 111 73. and honour the (Gayā) brāhmanas established by Brahmā with offerings and food When they are gratified gods together with pitrs become gratified.[1506] Then the pilgrim should bow to the Aksayavata and worship it with a mantra and also bow to worship Prapitāmaha. Agni 115. 69–73 and Nāradīya (uttara) chap. 47 also refer to these.

The Tristhalisetu (p 368) remarks that the above are the fixed rites for seven days in Gayā, that other tirthas may be visited according to one's convenience if one stays in Gayā for half a month or a month; that the śrāddha at the Pretaśilā is to be the first and that at the Aksayavata is to be performed at the end,[1507] and that although there is variation between the order in which tīrthas are to be visited on the several days according to the Vāyupurāna, the Agnipurāna and other purānas, yet as the Vāyupurāna is most detailed as regards Gayā rites, the order therein should be followed and that one not knowing the order may visit the tirthas in any order[1508] except Pretaśilā and Aksayavata. Gayāyātrā, chapter 112 of the Vāyupurāna, refers to king Gaya who performed a *yajña* and who got two boons, one about the restoration of the Gayā brāhmanas to favour and the other that Gayāpurī be named after him and who then went to Visnuloka. Then it narrates the story of king Viśāla (verses 7–15) who being sonless performed pindadāna on Gayāśirsa and thereby saved his three ancestors, got a son and also himself went to heaven. Then another story is told (verses 16–20) of a deceased person, who was in the condition of a *preta*, offering one-sixth of his property to a trader and asking him to perform Gayāśrāddha with the rest of his wealth and who on account of śrāddha at Gayā became free from the condition of *preta*.[1509] Then verses 20–60 mention several other tirthas of Gayā such as Gāyatrītīrtha, Prāci-sarasvatītīrtha, Viśālā, Lelihāna, the

hermitage of Bharata, Mundaprstha, Ākāśagangā, Vaitaranī and other rivers and sacred places. It winds up by saying that six Gayās confer *mukti* (by worship and piṇḍadāna at them) viz. Gayāgaja, Gayāditya, Gāyatrī (tīrtha), Gadādhara, Gayā and Gayāśiras.[1509a]

The Agnipurāna (chap 116. 1–34) has a long list of tīrthas at Gayā that is quoted by the Tristhalīsetu pp. 376–378, which are passed over here.

Though the number of tīrthas at Gayā is very large, the majority of pilgrims do not visit them all. Visits to three places are absolutely necessary for every pilgrim to Gayā, viz. Phalgu river, Vishnupada and Aksayavata, at all of which worship has to be done with milk, water, flowers, sandalwood paste, *tāmbūla*, lighted lamp and piṇḍas to ancestors have to be offered. The Vishnupada temple is built over the footprint of Vishnu on the rock to the west of the river Phalgu The old town of Gayā was built round Vishnupada and it is the largest and most important temple in Gayā. The footprint (about 16 inches in length) deemed to be God Vishnu's is inside an octagonal basin plated with silver. Pilgrims of all castes (except untouchables) surround the basin and cast their offerings inside the basin, though for a substantial payment the priests clear out all people, shut the door for a minute or two and allow a very orthodox or a rich person to make his offerings without being disturbed by anyone else There are 45 *vedis* (or sacred places) at which the leisured pilgrim may offer piṇḍas in the Gayākṣetra which extends from about five miles to the north-west of Old Gayā town to about 7 miles south of it. Though the ancient Buddhist works and Fa Hien and Hiouen Thsang make a distinction between Gayā and Uruvilvā or Uruvelā where Buddha attained Enlightenment after six years of severe *tapas*, the Bodhi tree (Mahābodhitaru) was recognized by the Gayāmāhātmya as one of the sacred places which Hindu pilgrims should visit and is so regarded even now. When the Hindus appropriated Buddhist sacred places to themselves it is difficult to say. The Bodhi tree is the oldest historical tree in the world A branch of it is said to have been transplanted to Ceylon in the times of the great Emperor Aśoka (about 250 B.C.)

1509 a गयागजो गयादित्यो गायत्री च गदाधरः । गया गयाशिरश्चैव षड् गया मुक्तिदायिकाः ॥ वायु 112. 60 q. by तीर्थचि p 328 (reads षड्गयं मुक्तिदायकं), त्रिस्थली p 372 This occurs in नारदीय (उत्तर) 47. 39–40 गयागज—probably refers to the pillar with the figure of an elephant near the Gadādhara temple at Gayā.

and at Kandy in Ceylon a *pippala* tree is even now shown as that transplanted tree or the successor of that branch. The Gayāśirsa[1510] is a set of rocky hills such as Gayāśirsa, Mundaprstha, Prabhāsa, Grdhrakūta, Nāgakūta, ranging over one krośa (about two miles).

It has been already stated above (p 666) that the rites at the Akṣayavata are the last in the pilgrimage to Gayā. The Gayāwal priest binds the thumbs or hands of the pilgrim with a garland of flowers and receives his fees He gives sweetmeats to the pilgrim as *prasāda*, applies *tilaka* to the pilgrim's forehead, touches the pilgrim on his back, pronounces the word '*suphala*' (the pilgrimage has been fruitful or successful), declares that the pilgrim's ancestors have gone to heaven and blesses the pilgrim. It must be noted that there is a special class of priests called Dhāmin who alone (and not the ordinary Gayāwals) have the right of officiating at five *vedis* viz. at Pretaśilā, Rāmaśilā, Rāmakunda, Brahmakunda and Kākabali, that are situated on or about the two hills Rāmaśilā and Pretaśilā (vide Bengal District Gazetteers, vol 12 for Gayā p. 66) They are regarded as inferior in status to the regular Gayāwals.

One important question on which there is great divergence of views among the medieval digests is about the ancestors to whom śrāddha is to be offered at Gayā. In the Vāyu and other Purāṇas it is frequently said that he who performs śrāddha at Gayā becomes free from the debt due to the pitṛs[1511] or that what is offered to the pitṛs at Gayā, Dharmaprstha, Brahmasaras, or on the Gayāśirsa and under the imperishable Vata tree becomes inexhaustible. In most of these passages the plural of the word 'pitṛ' is used. Therefore it follows that śrāddha is to be offered in Gayā to three paternal ancestors. And on account of a verse attributed to Gautama,[1512] the three male maternal ancestors also are to be offered śrāddha. The difference arises with

1510. Gayāśiras and Gayā were according to Buddhist works well-known places in Buddha's days. Vide the Mahāvagga I. 21. 1 (S. B. E. vol 13 p. 134) cited above (on p. 646) and Anguttara Nikāya (*text*) vol IV. p 302 'एक समयं भगवा गयायां विहरति गयासीसे'.

reference to the wives of these six male paternal and maternal ancestors. The Agnipurāna proposes an option (115 10) that the *devatās* in Gayāśrāddha are nine or twelve. When they are to be nine, the śrāddha is for three paternal ancestors, three male ancestors of the mother and the wives of the latter three male ancestors, while there is a separate śrāddha for the mother, paternal grand-mother and paternal great-grandmother. If there are to be twelve devatās in Gayāśrāddha, then all the wives of the paternal ancestors and of maternal ancestors would be included in one śrāddha. Aparārka allowed an option (as in Agni) in Gayā-śrāddha.[1513] According to the Smṛtyarthasāra[1514] and Hemādri the Anvastakā-śrāddha and Gayāśrāddha for the paternal ancestors and that for the wives of these (i. e. mother, paternal grandmother &c.) must always be separate, but the śrāddha for the mother's paternal ancestors and their wives should be one (and therefore the *devatās* will be nine). Yama (verse 80) appears to hold that the mother, paternal grandmother and paternal great-grandmother are always to be associated with their respective husbands in śrāddha. Some held that the devatās of Gayāśrāddha were only six viz the three male paternal ancestors and three male maternal ancestors.[1515] The Tri. S ultimately remarks that the usage of the country should be the deciding principle The Prajāpati-smṛti (183–184) has some rather contradictory views as to when there would be 12 or 9 or 6 devatās in a srāddha. When there are twelve *devatās*, the *saṅkalpa* at the Pretaśilā-śrāddha which is the model of all the śrāddhas at the other sacred spots in Gayā (with suitable modifications) will be as noted below.[1516]

It should be noted that there are certain special characteristics of Gayāśrāddha. There is no tonsure (Vāyu 83. 18

and note 1485 above). One must honour the Gayāwals alone, and not other brāhmanas, however learned they may be; one should not consider the family or character or learning of Gayā brāhmanas (vide p. 579 above and note 1313). But it has to be remembered that Nārāyanabhatta[1517] did not accept this for all śrāddhas t Gayā, but only as to the śrāddha under the Aksayavata, since the Vāyu (111. 79-80) again refers under Aksayavata to the worship of Gayā brāhmanas and since following the maxim of 'caturdhākarana' laid down in Jai. III. 1 26-27 the later specific provision narrows down the wide words used in the earlier passage. At Gayā one could offer pinda to oneself but without sesame.[1518] The Tri S. (p 350) observes (relying on Vāyu) that when a man offers a pinda to himself, it should be in the hands of the image of Janārdana on Bhasmakūta[1519] and that the pilgrim to Gayā can offer a pinda to himself only when it is certain that he has no son or other *adhikārin* for offering śrāddha. Further, any one related or unrelated, could offer a pinda[1520] to anybody, as laid down in Vāyu 'Whether it is one's own son or the son of another (who offers), in whosesoever name a pinda is let fall at Gayā, that man attains everlasting *Brahma* It is desired that anyone may offer a pinda to anybody after uttering that person's name and gotra and the latter reaches the highest goal'

There are several works, printed and in mss, that deal with the procedure of Gayāśrāddha. There is the Gayāśrāddha-paddhati of Vācaspati printed at the Chandraprabha press, Benares city, the Tirtha-yātrā-tattva of Raghunandana (which contains a Gayā-

paddhati) published in Bengali characters. Then I consulted two mss. viz the Gayā-śrāddha-paddhati of Raghunātha son of Mādhava (D. C. ms. No. 93 of 1891–95) and the Gayāśrāddha-vidhi of Vācaspati (D. C No 245 of 1887–91). The procedure in the Tīrthayātrā-tattva of Raghunandana is set out here briefly without actually citing in full the Vāyupurāṇa passages which it quotes profusely. Raghunandana appears to follow the Tīrthacintāmaṇi closely as some of the notes will show. After the pilgrim enters Gayā he should first make an appropriate saṅkalpa[1521] for a bath in Phalgu, take the clay from the river, apply it to his body and bathe Then he should perform *tarpaṇa*[1522] to the twelve male and female ancestors (specified in note 1516 above) Then he should declare a saṅkalpa that he would perform Gayāśrāddha with the words 'Om! adyetyādi Gayātīrthaprāpti-nimittaka-śrāddhamaham karisye'. Then he should perform a *pārvaṇa-śrāddha* (described above pp. 485–505) excepting the *āvāhana* and *arghya* rites If the pilgrim be unable to perform all the details of śrāddha, he may offer only piṇḍas. Then on the same day he should go to the Pretaśilā which adjoins the west bank of the river Phalgu and is to the north of Gayā and perform srāddha there as follows: he should perform the purification of the ground, sit down on it, perform *ācamana*, face the south, wear the sacred thread in the *apasavya* form, recite the verses (Vāyu 110 10–12 'Kavyavālo...śrāddhenānena śāśvatīm), contemplate on his pitṛs, perform prāṇāyāma, sprinkle water on the materials for srāddha after remembering Puṇḍarīkāksa (Viṣnu), make the saṅkalpa (set out in note 1516). He should go through the whole procedure of srāddha up to the payment of dakṣinā to brāhmaṇas. After this he should sit to the south of the altar (where he performed the śrāddha), should wear the sacred thread in the *apasavya* form, face the south, place on the ground three kuśas and after reciting the *mantra* (Vāyu 110. 10–12) should make an invocation once in the form of offering an *añjali* of water mixed with sesame, then honour the father with *pādya* (water for washing the feet), recite the two verses

(Vāyu 110. 20–21 'ā brahma.. tilodakam' with *om* prefixed), perform invocation as before of the father and others with water in folded hands and should offer a pinda to his father of *pāyasa* or other material mixed with sesame, water and honey with the words 'Om, adya amuka-gotra pitar-amukadevaśarman, esa te piṇḍah svadhā'. In this way he should offer pinda to the remaining eleven devatās, viz. paternal grandfather and others (or eight or five according to usage). He should donate a fee according to his means. Then he should sit to the south of the place he so far occupied, spread on the ground kuśas having roots but with tips turned to the south, should repeat the mantras (Vāyu 110 10–12), perform on those kuśas once an invocation in the form of an añjali of water mixed with sesame, repeat the two verses (Vāyu 110. 22–23 'Pitā pitāmaha...mupatisthatām' with om prefixed [1522a]) and should offer one pinda made of one handful of barley flour mixed with sesame, kuśas, ghee, curds, water and honey to all the twelve devatās (ancestors) together. Then follows what is called *Ṣoḍaśīkarma*, which is as follows. Nineteen spots for pindas should be made (each to the south of the preceding) and should be smeared with *pañcagavya* one after another; then he should spread over each kuśas with their tips to the south, should invoke on the kuśas the persons intended with the mantras (Vāyu 110. 30–32 'asmat-kule mṛtā... tilodakaih'), should worship them by offering sandalwood paste and the rest, (and if he is performing the rite of sodaśī on a spot sacred to a specific deity then worship that deity also with an appropriate mantra), should then offer once as before an *añjali* of water mixed with sesame and offer pindas beginning from the first spot, each pinda being offered after reciting each of the 19 mantras (Vāyu 110. 34–55, omitting 110.44 'asipatra o', 110. 46 'anekayātanā-samsthāh ye nītā o', and treating 52–53 as one mantra and 54–55 as one mantra)[1522b]. He should offer 19 pindas

---

1522 a. It should be noted that *om* is to be recited before each verse intended as mantra here and below.

1522 b. The Tīr. C. (pp 290–292) slightly differs. It does include Vāyu 110. 46 and treats the three verses (Vāyu 110 51–53) as one mantra. It is difficult to understand why the writers of digests did not say that the śrāddhasodaśī should be performed with only 18 mantras from out of the 21 or 22 verses with option to the reciter. Where the mantras exceed the number required, Jaimini X. 5 14 states 'अपूर्वासु तु सङ्ख्यासु विकल्प स्यात्सर्वसामर्थ्यत्वात्.' Raghunandana reads the five verses (51–55) somewhat differently from the printed Vāyupurāna, though the sense is not much affected.

of the size already stated and made of the material already mentioned with the sacred thread in the *apasavya* form. Raghunandana explains that although there are nineteen pindas still this is called śrāddhasoḍaśī as a technical term.[1523] It would be noticed that all the mantras refer to males in the words 'ye', 'te', 'tebhyaḥ'. So this is 'Puṁ-soḍaśī.' There is a 'strī-soḍaśī' also which only involves changing the words of the mantras in the masculine to words in the feminine gender as indicated in the Vāyupurāna itself.[1524] Otherwise there is no difference between the two (pumsodaśī and strīsodaśī). The note below states the mode in which both males and females are to be invoked and gratified.

Water should be sprinkled over all pindas three times with a vessel full of water mixed with sesame. The mantras repeated at the time are quoted below in the note.[1525] Then he prostrates himself on the ground and should dismiss (send away) them (the persons invoked) with the words 'O father and others! forgive me.' Then wearing the sacred thread in the *savya* form, he should sip water (perform *ācamana*) and recite with his face to the east the two mantras (Vāyu 110. 59–60 'sāksinaḥ santu,' and 'āgatosmi Gayām'). If a pilgrim is unable to carry out all this lengthy procedure, he should at least offer pindas on Pretaśilā, by making a saṅkalpa (like the one in note 1516 saying 'pindadānam' for śrāddham'). He should wear the sacred thread in the *apasavya* mode and repeat the verses in Vāyu (110. 10–12 and 110. 59–60) and should perform according to his *sūtra* the various items such as drawing lines on the altar meant for placing pindas, spreading kuśas, sprinkling down water on the pindas, the offering of pindas, re-sprinkling

water, holding one's breath, loosening the knot of one's garment, offering a thread and sandalwood paste.

Then the pilgrim should descend from the hill (Pretaśilā) to the ground below and should bathe in the deep pool well-known as Rāmatīrtha [1526] (which is in the form of Prabhāsa-hrada) at the meeting place of the great river (Phalgu) with the Prabhāsa hill after making a sankalpa (as given in the foot-note) and after repeating the mantra 'janmāntarasatam' (Vāyu 108 18). He should then perform *tarpana* and perform śrāddha or (if unable to offer śrāddha) offer only pindas according to the procedure of his own grhyasūtra. He should offer as done in the Pretaśilā śrāddha twelve pindas to the father and the others, the single inexhaustible pinda and the sodaśi-pindas If he cannot go through all these, he may perform any one of them. Then he should make a sankalpa and should offer obeisance to Rāma with the mantra 'Rāma Rāma' (Vāyu 108.20). When a pilgrim performs this bath, śrāddha and pindadāna his pitrs become free from the condition of being *preta* (Vāyu 108. 21). Then he should perform obeisance to the refulgent Prabhāseśa (Śiva). He should offer obeisance to both Rāma and Prabhāseśa with the mantra 'āpastvamasi' (Vāyu 108. 22) Then he should offer a *bali* of boiled rice to Yama with the words 'this is a bali, om! bow to Yama.' Then on a hill called Naga situated to the south of Prabhāsa hill and on the middle of Pretaśilā he should recite the verse 'dvau śvānau' (Vāyu 108. 30) and offer a bali made up of some kind of cooked food with the words 'this is a bali to Yamarāja and Bhramarāja (Dharmarāja?); salutation' This offering of bali is obligatory (on every pilgrim); the rest may be done according to one's ability. This finishes the rites on the first day (i. e. the day of entering Gayā).

On the 2nd day of entering Gayā the pilgrim should bathe in Phalgu, perform his daily duty of tarpana and worship of gods and then in the afternoon bathe in Brahmakunda [1527] situated in the north-east corner which touches the root of Pretaparvata, that is at the distance of a gavyūti from Gayā and that (Brahmakunda) is situated to the north-west of Gayā.

The śrāddha performed here is believed to be performed on the altar of Brahmā (i. e. where Brahmā performed his Asvamedha). Then he should with the face to the south throw on Pretaparvata barley grains mixed with sesame with the mantra 'ye kecit' (Vāyu 110 63 q both by Tīr. C. p. 297 and by Raghunandana) and offer an añjali of water mixed with sesame with the mantra 'ā-brahma' (Vāyu 110.64).[1528]

On the third day after entering Gayā come the rites of Pañcatīrthī described above (pp. 663–666). The pilgrim bathes[1529] in the Uttaramānasa with the mantra 'uttare mānase snānam' (Vāyu 111. 2–3). He should offer one añjali with the verses (Vāyu 110. 20–21) and perform śrāddha. After this śrāddha he sits to the south of Uttara-mānasa, spreads *kusas* with tips towards the south, offers water with sesame and offers to all together one pinda of one handful of barley flour mixed with sesame, kuśas, honey, curds and water Then he bows to and worships the Sun's image on Uttaramānasa with the mantra 'namostu bhānave' (Vāyu 111 5). Then he repairs to Daksinamānasa in silence and there takes a bath in Udīcī tīrtha, in Kanakhala and then in Daksinamānasa with the mantra (Vāyu 111 9–10) and then performs salutation and worship to Daksinārka, then makes a bow to Maunārka, then goes to Phalgu tīrtha situated to the east of Gadādhara and takes a bath and performs tarpana and śrāddha there; then he worships Pitāmaha (with Vāyu 111. 19), visits Gadādhara and worships (with Vāyu 111.21), then again goes to the five tīrthas, at each of which he bathes and performs tarpana Then he bathes the image of Gadādhara with pañcāmrta. Raghunandana notes that the bathing of Gadādhara with pañcāmrta is obligatory, while the rest may be done according to one's ability. This finishes the rites of pañcatīrthī.

The various tīrthas to be visited after Pañcatīrthī have been mentioned above It is not necessary to repeat them here. The special mantras from the Vāyupurāna cited by Raghu-

1528 It may be stated once for all that there is a saṅkalpa appropriate to each bath, that a bath in a sacred place is followed by tarpana, that śrāddha is performed as on *Prctaśilā with all details beginning from* invocation and ending with making the gods bear witness Therefore these items will not be repeated hereafter and only the special provisions in each case will be pointed out

nandana will alone be specified here. After bath and śrāddha at Matangavāpī, the pilgrim should go to Matangeśa to the north of Matangavāpī and recite Vāyu 111. 25 (pramānam devatāh santu &c). When pouring water at the root of the mango tree established by Brahmā the pilgrim repeats Vāyu 111. 36 (āmram brahma-sarodbhūtam &c.). When bowing to Brahmā, the mantra is Vāyu 111. 34 (namo brahmane &c.). The bali to Yama is offered with Vāyu 111. 38 (Yamarājadharmarājau &c.). The bali to the two dogs is to be given with the mantra (Vāyu 111. 39) and that to the crows with Vāyu 111. 40 (Aindra-vāruna-vāyavya &c). As regards the *padas* the pilgrim should begin with Rudrapada and perform śrāddha there and then proceed to Visnupada and worship Visnu with five upacāras[1530] with the mantra 'Idam Visnur-vi cakrame' (Rg. I. 22. 17). To the south of the vedī of Visnupada he should perform the śrāddhasodaśī (described above pp 672-673) up to Vāyu 110. 60 (anrnosham-rnatrayāt). About an ascetic, vide above p. 655.

Then Raghunandana briefly touches upon the śrāddhas to be performed at the several padas and remarks that the last śrāddha at the *padas* is that at Kāśyapapada. He prescribes Vāyu 111. 76 as the mantra for bath in Gadālola-tīrtha. Then he states that the śrāddha at the Aksayavata is to be performed on the north side of the Vata near its bottom. He prescribes Vāyu 111. 82-83 (ekārnave &c) as the mantras for bowing to the Aksayavata Further, he speaks of śrāddhas to be performed at several sub-tīrthas, such as Gāyatrī, Sarasvatī, Viśālā, the hermitage of Bharata, Mundaprstha. Then he prescribes that the pilgrim should cross the Vaitaranī (situated to the east of the Devanadī which is near Bhasmakūta) with the mantra (Vāyu 105. 44, yāsau Vaitaranī nāma &c). After referring to several other tīrthas such as Gopracāra, Ghrtakulyā, Madhukulyā, Raghunandana recommends that the pilgrim should visit Pāndusīlā (which is in Campakavana near Pitāmaha) and perform śrāddha there He notes that the four rivers and streams called Ghrtakulyā, Madhukulyā, Devikā and Mahānadī[1531] (Phalgu) are called Madhusravā when they meet the Śilā (Vāyu

112.30) and a bath, tarpana and śrāddha thereon yield immense results. Then are mentioned several other tīrthas such as Daśāśvamedha, Matangapada, Makha-kunda (near Udyanta parvata), Gayākūta. Raghunandana winds up by providing that on Bhasmakūta the pilgrim should place with his right hand in the hand of Janārdana a pinda mixed with curds (but without sesame) and on doing so recite five verses (Vāyu 108. 86-90,[1532] 'eṣa piṇḍo mayā' &c.). Then Raghunandana quotes sixteen verses about Mātṛsoḍaśī (which do not occur in Vāyu-purāna and are passed over here).

We have to distinguish between Gayāksetra, Gayā and Gayāśiras or Gayāśīrsa. The Vāyu, Agni and Nāradīya all assert that Gayāksetra is five krośas[1533] (in extent) and Gayā-śiras is one krośa. It had become the fashion to speak of famous tīrthas like Kāśī and Prayāga as pañcakrośa. But so far as the Vāyupurāna is concerned the Gayāksetra is about 13 miles in length from Pretaśilā to Mahābodhi tree as shown above Gayā is said to be two krośas and a half in extent in all directions from Mundaprstha[1534]. Gayāśiras is smaller than Gayā and is identified with Phalgutīrtha (vide note 1499). Gayā and Gayasīsa (Pāli for Gayāśīrsa) are well known to ancient Buddhist texts (Mahāvagga I. 21. 1 in S. B. E. XIII p. 136, Anguttaranikāya, text vol IV. p. 302). Vide n. 1510

Four of the most important and holy tīrthas have been dealt with at some length so far. It is not possible in the space allotted to the section on tīrthas to pursue the same procedure as regards other famous tīrthas. It is proposed to devote a few pages to each of half a dozen or more tīrthas and then to give a somewhat comprehensive list of tīrthas with a few references in the case of each. But before proceeding further reference must be made to certain popular groupings of tīrthas. There is a group of seven cities that are deemed to be very holy and

CHAPTER XV

KURUKṢETRA AND SOME OTHER FAMOUS TĪRTHAS

KURUKṢETRA (25 miles east of Ambala) is a very sacred tract, the history of which is lost in the mists of antiquity. In the Ṛgveda X. 33. 4 there is a reference to a king Kuruśravaṇa, son of Trasadasyu.[1538] The Atharva-veda mentions a Kauravya husband (probably a king) who had a talk with his wife [1539] In the times of the Brāhmaṇas Kuruksetra had become a very holy land. The Śat. Br. (IV. 1. 5. 13) narrates the legend that the gods performed a sacrifice in Kuruksetra and at first excluded the two Aśvins from any share in it (S. B. E vol. 26 p. 275). The Maitrāyaṇī Saṃhitā (II. 1. 4., devā vai sattramāsata Kuruksetre) and the Tai. Br. (V. 1. 1., devā vai sattram-āsata tesām Kuruksetram vedir-āsīt) also say that the Gods performed *a sattra* in Kuruksetra. The idea underlying these passages appears to be this. The Vedic people of the Brāhmaṇa period held *yajñas* to be the dharma *par excellence*, as stated in Ṛg. X. 90. 16 (yajñena yajñam-ayajanta devāstāni dharmāni prathamānyāsan). Kuruksetra was the centre of Vedic culture in the Brāhmaṇa period and sacrifices must have been performed there on a large scale. Hence it was called dharmakṣetra and as gods were supposed to have attained their position by what men believed to be dharma (*yajña, tapas* &c.) it is stated that gods performed sattras in Kuruksetra. The same Brāhmaṇa mentions a Kauravya king Bahlika Prātipiya (XII. 9. 3. 3, S. B, E. vol. 44 p. 269). The Tai. Br. (I. 8. 4. 1) informs us that the Kuru-Pañcālas went towards the east in winter (*śiśira*) and to the west in summer which was the worst season. The references in the Ait. Br. are far more instructive. The legend about Kavasa in which Sarasvatī helps the sage has already been referred to above (p. 559 n. 1254). The Ait. Br. (8. 1 or II 19) calls that place, where Sarasvatī came rushing, 'Parisaraka'. In another place the Ait. Br. tells us that in its time Nyagrodha (Ficus India) was called Nyubja in Kuru-

ksetra.[1540] Elsewhere the Ait. Br. speaks of the countries of the Kurus and Pañcālas together with the Vaśa-Uśīnaras (38. 3 = VIII. 14). The Tai Ā. narrates [1541] that the gods performed a *sattra* and Kuruksetra was their altar (for the sattra). The southern side of that Vedi (i. e. Kuruksetra) was Khāṇḍava, the northern side was Tūrghna, the hinder part was Parīnah, and the country of Maru (desert) was the rubbish pit. This shows that Khāndava, Tūrghna and Parīnah were border parts of Kuruksetra and the Maru district was somewhat away from Kuruksetra. The Śrautasūtras of Āśv. XII 6, Lātyāyana X. 15 ff and Kātyāyana [1542] 24 6 5 ff closely follow Tāndya and other Brāhmanas and mention several holy places at which parts of the Sārasvata sattras were performed such as Plaksa Prasravana where Sarasvatī starts, the Vaitandhava-hrada of Sarasvatī, the tract called Parīnah in Kuruksetra, Yamunā flowing through the country of Kārapacava and the country of Triplaksāvaharana.

In the Chāndogya Upanisad (I. 10. 1 ff) occurs the story of Usasti Cākrāyana who, when the Kuru country was struck by hailstorms, lived with his very young wife in Ibhyagrāma and went begging for food.

The Nirukta (II. 10) explains that [1543] Devāpi and Śantanu mentioned in Rgveda X. 98. 5 and 7 were historical persons and were brothers, sons of Rstisena, a king of Kuru. Pānini (IV. 1. 151 and IV. 1 172) explains the formation of the word Kauravya from 'Kuru', the first in the sense of '*apatya*', the second in the sense of 'king.'[1544]

1544 कुर्वादिभ्यो ण्यः । कुरुनादिभ्यो ण्य.। पा. IV, 1. 151 and 172,

The Mahābhārata frequently speaks of the high sanctifying virtues of Kuruksetra. It appears that the territory to the south of Sarasvatī and to the north of Drsadvatī was included in Kuruksetra and [1545] that those who resided therein were as if residents of paradise. Kuruksetra appears to be called Brahmāvarta in Vanaparva 86.6. According to the Vāmanapurāna, Kurujāngala is [1546] the country between the Sarasvatī and Drsadvatī, while Manu (II. 17, 18) defines Brahmāvarta as the country created by God between the two divine rivers Sarasvatī and Drsadvatī, states that Brahmarsideśa which is slightly less (in holiness) than Brahmāvarta comprises Kuruksetra, the countries of Matsya, Pañcāla and Śūrasena. From these passages it is clear that Brahmāvarta is the holiest country in Āryāvarta and that Kuruksetra was almost like it; we have seen that in the times of the Brāhmanas the most sacred Sarasvatī flowed through Kuruksetra and that the place where Sarasvatī disappeared in the desert was called Vinaśana and was itself a very holy place. Originally the land called Kuruksetra is said to have been the *Vedi* (sacrificial altar)[1547] of Brahmā, then it came to be called Samantapañcaka (or syamanta-in some passages) when Paraśurāma made five pools of the blood of ksatriyas in revenge for his father's murder, which were subsequently turned into holy pools of water by the blessings of his pitrs and lastly it came to be called Kuruksetra when king Kuru, son of Samvarana[1548], ploughed the land with a golden plough for seven *krośas* all round. Kuruksetra is so called after king Kuru. Kuru is said

The extent of countries varied from age to age. पञ्चाल was divided into North and South. At the time of Buddha the capital of Pañcāla was Kanoj. Śūrasena is the country of which Mathurā was the capital. अनन्तर may mean 'slightly less than' or 'not inferior to or not different from.' The verse सरस्वतीदृषद्वत्योः occurs in नारदीय (उत्तर) chap. 64 6.

1547. आद्यैषा ब्रह्मणो वेदिस्ततो रामह्रदः स्मृता। कृष्णा च यतः कृष्टं कुरुक्षेत्रं ततः स्मृतम्॥ वामन 22 59-60. According to वामन 22. 18-20 there are five vedis of Brahmā viz. समन्तपञ्चक (उत्तरा), प्रयाग (मध्यमा), गयाशिरः (पूर्वा), विरजा (दक्षिणा), पुष्कर (प्रतीची). Vide वामन 22.20 and पद्म IV. 17.7 for the form दृषन्तपञ्चक

1548. According to the विष्णुपुराण the genealogy is अजमीढ-ऋक्ष-संवरण-कुरु, about whom it says 'य इदं धर्मक्षेत्रं कुरुक्षेत्रं चकार' (IV 19 74-77).

to have asked of Indra the boon that the territory he ploughed might be 'Dharmakṣetra' (domain of righteousness) and that those who may bathe or die there may reap a rich harvest of merit[1549]. The war between Kurus and Pāṇḍavas was fought there. It is spoken of as 'Dharmaksetra' in the opening verse of the Bhagavad-gītā. Kurujāngala is said to be a very fit country for śrāddha in Vāyu (77. 93) and Kūrma II. 20. 33 and 37. 36-37. In the 7th century the Chinese traveller Hiouen Thsang speaks of the country, the capital of which was Sthānvisvara (modern Thanesar which is the heart of Kuruksetra) as the 'land of religious merit' (Beal's B. R. W. W. vol. I p. 184).

The extent of Kuruksetra is said to be five *yojanas* in radius (in Vanaparva and the Vāmana Purāna)[1550]. A somewhat corrupt verse occurs in the Mahābhārata and some purānas[1551] about the limits of Kuruksetra viz. the territory between Tarantu and Kārantuka and between Macakruka (image of a *yaksa*) and the Rāma-hradas (pools made by Paraśurāma)—this is Kuruksetra, Samantapañcaka and the northern vedi of Brahmā. The result is that Kuruksetra is referred to under various names viz. Brahmasaras, Rāmahrada, Samantapañcaka, Vinaśana, Sannihatī (vide T. Pr. p. 463). For the boundaries of Kuruksetra, vide Cunningham's A S. R. of India, vol. XIV pp 86-106 where he notes that Kuruksetra was 30 miles to the south of Ambala and 40 miles to the north of Panipat. In the remote past Kuruksetra was the centre of

I, 27 92 (reads तरण्डकारण्डकयोः), q. by कल्पतरु (on तीर्थ) p. 179 (from the महाभारत). वनपर्व 83 9-15 and 200 show that मचक्रुक was a यक्ष appointed as one of the द्वारपाल of कुरुक्षेत्र by God Vișnu Should we not separate the first word as तरन्तुक and अरन्तुक? In the नारदीय (उत्तर chap 65. 24) we have रन्तुक as a sub-Tirtha under कुरुक्षेत्र. Vide तीर्थप्रकाश pp 464-465 for explanation of this verse. A G p 334 quotes this verse. In Archaeological Survey Reports for India vol. II p. 215 Cunningham quotes the verse as तद्रन्तुकारन्तुकयोर्यदन्तरं and remarks that Ratnuka is the Ratan *Jaksha* (यक्ष) at the north-east corner of the circuit of Kuruksetra, four miles to the east of Thanesar

all the activities and the culture of the Vedic people. Gradually the Vedic people spread towards the east and south and the country between the Ganges and Jumnā and later on Videha (or Mithilā) became the centres of Indian culture.

For reasons of space it is not possible to dwell at length on the greatness and sanctity of Kuruksetra as described in the Mahābhārata and the Purānas Vanaparva 83 starts by saying that all beings that are in Kuruksetra are freed from all sins and that he also who always says 'I shall go to Kuruksetra, and I shall reside in Kuruksetra' is freed from sins[1552]. 'In this world there is no place holier than this. Even the particles of dust driven from Kuruksetra by the wind take a great sinner to the highest goal'[1553] Even the Ganges is compared to Kuruksetra (vide note 1324 'Kurukṣetrasamā Gangā'). The Nāradiya avers[1554] that planets, constellations and stars are subject to the danger of falling down (from the sky) in course of time, but in the case of those that die in Kuruksetra there is no falling on the earth again (i e. they would not be born again).

It is a remarkable fact that though the Vanaparva in chap. 83 enumerates several tirthas on the Sarasvatī and in Kuruksetra, they do not at all tally with the tirthas mentioned in the Brāhmanas and the Śrautasūtras (except Vinaśana which is mentioned in Vanaparva 83.11 and probably Saraka which may be identified with Parisaraka of the Ait. Br.). This means that the Vanaparva account of Sarasvatī and Kuruksetra is later by some centuries than that in the Śrautasūtras. The Nāradiya (uttara, chap. 65) names about one hundred tirthas in Kuruksetra. It is not possible to set out all of them. But a few words may be said about some of them. First comes the lake called Brahmasaras or Pavana-hrada (Vanaparva 83. 85, Vāmana 49. 38-41, Nāradiya, uttara 65 95) on

which Kuru stayed as an ascetic. A. G (pp. 334–335) remarks that the lake is 3546 feet long east to west and 1900 feet wide north to south. The Vāmanapurāna (22. 50–55) describes it at some length and says that it was half a *yojana* in extent. Cakratīrtha (mentioned by Vāmanapurāna 42. 5, 57. 89 and 81. 3) is popularly supposed to be the place where Krsna took up the discus for attacking Bhīsma. Vyāsasthalī[1555] (named in Vanaparva 84 96, Nāradīya, uttarārdha 65. 83 and Padma I. 26. 90–91) is the same as modern Basthali, 17 miles to the south-west of Thanesar where Vyāsa resolved to die on the loss of his son. Asthipura (Padma, Ādi 27. 62) is on the west of Thanesar and south of Aujasaghāt where the bodies of the warriors killed in the Great Bhārata war were cremated. Cunningham in Archaeological Survey Reports of India vol. II. p. 219 states that Cakratīrtha is the same as Asthipura and that in Alberuni's time it was the most famous shrine in Kuruksetra. Prthūdaka on ths Sarasvatī is very highly spoken of in Vanaparva 83. 142–149. 'They say[1556] that Kuruksetra is holy, that Sarasvatī is holier than Kuruksetra, that the sacred spots (on Sarasvatī) are holier than the river Sarasvatī and that Prthūdaka is holier than all the other tīrthas on Sarasvatī. There is no tīrtha that is better than Prthūdaka'. The Śalyaparva[1557] remarks that whoever, while intently engaged in repeating holy texts, abandons his life at Prthūdaka on the northern bank of the Sarasvatī would not be troubled by death next day (i. e. he would be free from birth and death) The Vāmanapurāna (39. 20 and 23) calls it Brahmayonitīrtha. Prthūdaka is modern Pehova in the Karnal District in Panjab, 14 miles to the west of Thanesar. Vide E. I. vol. I. p. 184 for the Pehova inscription from the temple of Garibnath dated in *samvat* 276 (of the Harsa Era) i e. 882–883 A. D., which records the agreement of certain pious horse-dealers to impose on themselves and their customers certain

taxes and tithes for the benefit of some priests and temples, one of which was the temple of Visnu in his Yajñavarāha *avatāra* built at Prthūdaka.

The Vāmanapurāna (34. 3 ff) and Nāradiya (uttarārdha 65. 4–7) enumerate seven forests existing in Kuruksetra as very holy and as destroyers of all sins, viz. Kāmyaka, Aditivana, Vyāsavana, Phalakivana, Sūryavana, Madhuvana and Sītāvana. Vide A. S. R. for India, vol. 14 pp. 90–91 for the *vanas*. In the Śalyaparva (chap. 38) it is said that the world is encompassed by seven Sarasvatīs, then they are enumerated and their locations are specified viz. Suprabhā (in Puskara, where Brahmā engaged in a great sacrifice remembered her, verse 13), Kāñcanāksī (in the Naimisa forest, v. 19), Viśālā (invoked by Gaya in the Gayā country, verses 20–21), Manoramā (in Auddālaka's yajña in Uttarakosala, verses 22–25), Surenu (in Rsabhadvīpa in Kuru's yajña, verses 26–27), Oghavatī (called by Vasistha in Kuruksetra, verses 27–28), Vimalodā (when Brahmā again performed a yajña in the Himālaya). In the Vāmanapurāna 34. 6–8 seven rivers in connection with Sarasvatī are said to be very holy (but nine are actually enumerated) viz. Sarasvatī, Vaitaranī, Āpagā, Gangā-Mandākinī, Madhusravā, Ambunadī, Kausikī, Drsadvatī and Hiranvatī.

Kuruksetra was also called Sannihatī or Sannihatyā. Vide those words in the list of tīrthas. The Vāmanapurāna (32. 3–4) says that Sarasvatī springs from a plaksa tree, that after piercing many hills it enters Dvaitavana. Vāmana (32. 6–22) contains a eulogy of Sarasvatī by Mārkandeya. Alberuni (Sachau, vol. I. p. 261) states that the river Sarasvatī falls into the sea at the distance of a bowshot east of Somnāth. There is a small but holy stream called Sarasvatī, that rises in the Mahikantha hills and after crossing the south-east corner of Palanpur Agency passes by Siddhapura and Pātan, flows underground for some miles and then enters the Runn of Cutch (Bom. G. vol. V. p. 283).[1557a]

MATHURA

Till now it has not been possible to trace an express Vedic reference to Mathurā, the chief city of the country of Śūrasena. But its existence from at least the 5th century B C. appears

1557a. Vide A. S. R of India, vol 14 pp 97–106 for an exhaustive list of tīrthas in Kuruksetra.

to rest on firm ground. It is stated in the Anguttaranikāya (I. 167, ekam samayam āyasmā Mahākaccāno Madhurāyam viharati Gundāvane) and Majjhima (II. 84 same words) that Mahākaccāyana, a famous disciple of Buddha, assiduously preached in Mathurā the principles of his Master. Megasthenes appears to have known Mathurā and its connection with Heracles[1558] (Hari-Krsna?). The word 'Māthura' (meaning a resident of Mathurā, or born in or coming from Mathurā) occurs in Jaimini's Pūrva-mīmānsā-sūtra.[1559] Though Pānini's sūtras do not expressly mention Mathurā, the latter is included in the Varanādi-gana (Pān. IV. 2. 82). Pānini is, however, aware of Vāsudeva and Arjuna (IV. 3. 98), the Andhaka and Vrsni clans of Yādavas to which Krsna belonged (IV. 1. 114) and probably knew the name Govinda (III. 1. 138 and vārtika 'gavi ca vindeh sañjñāyām'). Mathurā is several times mentioned by the Mahābhāsya of Patañjali who[1560] in a famous passage refers to dramatic representations, paintings and stories which depict the destruction of Kamsa by Vāsudeva. He also cites a quarter of a verse about the killing of Kamsa by Vāsudeva as a well-known past event. Whether the town Śaurya mentioned in the Mahābhāsya on Vārtika 2 on Pānini II. 4.7 (Śauryam ca Ketavatā ca Śaurya-Ketavate) is the same as Mathurā is doubtful, even though the Uttarādhyayanasūtra speaks of Mathurā as Śauryapura (S. B. E. vol. 45 p. 112). The Ādiparva (221. 46) indicates that Mathurā was famed for excellent cows

in those days. When Hamsa and Dimbhaka, brave commanders of Jarāsandha, drowned themselves in the Jumnā and when Jarāsandha sorrowfully went to Magadha Krsna says 'we shall again joyfully reside in Mathurā' (Sabhāparva 14. 41–45). Ultimately Krsna is said to have left Mathurā owing to the constant attacks of Jarāsandha and established the Yādavas in Dvārakā[1561] (Sabhāparva, 14. 49–50 and 67). The Brahmapurāna, on the other hand, states that the Vrsnis and Andhakas on the advice of Krsna left Mathurā through the fear of Kālayavana. Vide also Vi. V. 23. 8–15. The Vāyu (88. 185) states that Śatrughna, the brother of Rāma, killed the demon Lavaṇa, son of Madhu and established Mathurā in Madhuvana while the Rāmāyana (Uttara-kānda 70. 6–9) informs us that Śatrughna took twelve years to make Mathurā a fine and prosperous city. In the Ghata-jātaka (Fausböll, vol. IV. pp. 79–89 No. 454) Mathurā is called Uttara Madhurā (to distinguish it from Madhurā of the Pāndyas in the south) and the story of Kamsa and Vāsudeva is narrated, which differs in some material points from the Mahābhārata and the Purānas. In the Raghuvamśa XV.28 it is mentioned as Madhurā and as founded by Śatrughna. Hiouen Thsang states that in Mathurā there existed in his day three *stūpas* built by Aśokarāja, that there were in Mathurā five Deva temples, 20 *sanghārāmas* (Buddhist convents) with 2000 Buddhist priests (Beal's B. R. W. W. vol. I p 179). James Allan (in 'Catalogue of the coins of Ancient India' 1936, p. CXVI) states that the coins of the Hindu kings of Mathurā cover the period from the beginning of the 2nd century B. C to the middle of the first century B. C. For some ancient coins from Mathurā, the Cambridge History of India, vol. I. p. 538 and plate V (No. 5–10) may be referred to. An interesting and informative work is 'Mathurā' by F S. Growse (2nd ed. 1880). Inscriptions contribute important evidence about the history and antiquity of Mathurā.[1562] The famous inscription of Khāravela (E. I. vol. XX. at p. 79) includes among the exploits of that king of Kalinga the retreat of the Yavana king Dimita to Madhurā (i. e. Mathurā). Several

Inscriptions of such Kuṣāna rulers as Kaniska, Huviska and others relating to Mathurā have been published of which the following may be mentioned: Inscription on a Nāga image at Mathurā of 'Mahārāja-rājātirāja Kanikkha' in *saṁvat* 8 (E I. vol. 17. p. 10) [1563]; the Mathurā pedestal Inscription of Kaniska in the 14th year (E. I. vol. 19 p. 96); inscription on the pedestal of the image of a seated Bodhisattva at Mathurā in the reign of Huviska in *saṁvat* 33 (E I. vol. 8 pp. 181–182); Inscription of a king Vāsu (rest of the name lost) of the year 74 (E. I. vol. 9 p. 241) and of the time of Śondāsa (E. I. vol. 9 p. 246); seven Brāhmī inscriptions from Mathurā and its vicinity (E. I. vol. 24 pp. 194–210) There is further an interesting inscription recording the dedication of a stone slab in the temple of Nāgendra Dadhikarna by Nandibala and other sons of some actor (Śailālaka) brothers of Mathurā (E. I. vol. I. at p. 390). From the Visnu-purāna VI. 8. 31 it follows that an image of Hari had been installed in Mathurā before that purāna was composed. The Vāyupurāna [1564] informs us in a prophetic vein that seven Nāga kings will rule over Mathurā, Prayāga, Sāketa and Magadha before the Guptas. Alberuni's India (vol. II. p. 147) states that Māhurā (Mathurā) is crowded with brāhmanas.

From the above brief historical sketch it would appear that Mathurā was, five or six centuries before Christ, a flourishing city where the epic Hinduism prevailed, that later on Buddhism and Jainism dominated it, that there must have been a revival of Hinduism under the Nāga and Gupta emperors, that in the 7th century A. D., when Hiouen Thsang wrote, Hinduism and Buddhism were equally prominent and that in the 11th century A. D. it was completely dominated by the Brahmanic faith.

The Agnipurāna furnishes the strange information that Bharata at the command of Rāma killed three crores of the sons of Śailūsa in the city of Mathurā [1565]. Mathurā has been

the centre of Krsna worship and of Bhāgavatism for over two thousand years. The Varāha-purāna devotes about one thousand verses to the greatness of Mathurā and its sub-tirthas (chap. 152–178). The Brhan-nāradiya, chapters 79–80, Bhāgavata X and Visnu-purāna V–VI devote much space to Krsna, Rādhā, Mathurā, Vrndāvana, Govardhana and Krsna's exploits there.

For want of space only a few verses about Mathurā will be set out here. The Padma (Ādikhanda 29. 46–47) says 'Yamunā gives moksa when united with Mathurā; Yamunā gives rise to great merit in Mathurā and when united to Mathurā it bestows devotion to Visnu'. In the Varāhapurāna (152. 8, 11) Visnu says 'There is no place either in the nether regions or on the earth or in mid air as dear to me as Mathurā. Mathurā is a famous ksetra of mine that confers *mukti*; no place is to me higher than it. It is my birth-place and it is lovely, commendable and dear to me'. The Padma says 'Māthuraka is a name extremely dear to Visnu'. The Harivamśa contains a fine description of Mathurā, one verse from which may be quoted here 'Mathurā is the hump (i. e. the most eminent spot) of Madhyadeśa, it is simply the abode of the goddess of wealth, it is the horn (i. e. the most prominent part) of the earth, there is nothing like it and it is endowed with abundant wealth and agricultural produce'.[1566]

The tract round about Mathurā is said to be 20 yojanas in extent and the city of Mathurā was in its midst[1567]. The Varāhapurāna and the Nāradiya (uttarārdha) chapters 79–80 mention numerous tirthas in and about Mathurā. It is not possible to enumerate them here. A few important ones will be noticed briefly. Both Varāha (chap. 153 and 161 6–10) and Nāradiya (uttarārdha 79. 10–18) mention twelve forests near Mathurā viz. Madhu, Tāla, Kumuda, Kāmya, Bahula, Bhadra,

actor Has this anything to do with a dispute between the followers of Bharata, the reputed author of the Nātyaśāstra, and other actors? The Nātyaśāstra chap. 17. 47 (G.O.S.) prefers the dialect of Sūrasena for dramas. Vide my 'History of of Sanskrit Poetics' p 40 (1951).

Khādira, Mahāvana, Lohajangha, Bilva, Bhāndīra and Vrndāvana. There are also 24 upavanas enumerated by Growse on 'Mathurā' (p. 76) which are not mentioned by the Purānas but only by later works. Vrndāvana [1568] was to the north-west of Mathurā on the Yamunā and was five yojanas in extent (Visnupurāna V. 6. 28–40, Nāradīya, uttarārdha 80. 6, 8 and 77). It was the scene of Krsna's adventures and love-making The Padma IV. 69 9 speaks of it as a portion of Vaikuntha on the earth. The Matsya (13. 38) identifies Rādhā in Vrndāvana as Devī Dāksāyanī.[1569] In Kālidāsa's day it had great fame. In Raghuvamśa VI, while describing Susena of the Nīpa family, king of Śūrasena, Vrndāvana is said to be no less charming than Caitraratha, the park of Kubera (verse 50). Then there is the Govardhana [1570] hill, which Krsna lifted up on his little finger to afford shelter for seven days to the cowherds and their cattle against the heavy rains sent down by Indra (Visnupurāna V. 11. 15–25). It is stated in the Varāhapurāna (164 1) that Govardhana is about two yojanas from Mathurā to its west. This appears to be tolerably correct as at present it is 18 miles from Vrndāvana. The Kūrma (I. 14 18) says that the very ancient king Prthu performed austerities here. The details given in the Hari-vamśa and the Purānas are sometimes confused and misleading. For example, in the Harivamśa (Visnuparva 13. 3) it is stated that Tālavana is to the north of Govardhana on the Yamunā, while it is south-east of Govardhana Kālidāsa refers to the caverns of Govardhana (Raghuvamsa 6. 51). Gokula is the same as Vraja or Mahāvana, where

1568 The पद्म (पाताल 75 8–14) puts an esoteric interpretation on कृष्ण, गोपीs and कालिन्दी. The गोपस्त्रय. are योगिनीs, कालिन्दी is सुषुम्ना, कृष्ण is सर्वव्यापक and so on

1569. Dey (p. 42) regards the identity of the modern Vrndāvana which is only 6 miles from Mathurā (in the opposite direction to Gokula) with the ancient Vrndāvana described in the Purānas as extremely doubtful on several grounds, the most cogent being that ancient Vrndāvana and Mathurā appear to have been situated on opposite sides of the Yamunā, while modern Vrndāvana and Mathurā are on the same side of the river But the references he gives for this last statement viz Visnupurāna 5 18 33 and Bhāgavatapurāna X. 39. 34 do not in my opinion bear out what he says. The Nāradīya (II. 80 6–7) appears to say that Vrndāvana is near Govardhana and along the Yamunā and Nandigrāma

1570. यमी पुण्या नदी यत्र पुण्यो गोवर्धनो गिरिः। तत्किं वृन्दावनात्पुण्यमरण्यं भुवि विद्यते॥ कलिकल्मषभीतानां विषयासक्तचेतसाम्। नान्यद् वृन्दावनात्सेव्यमस्ति लोकेष्वपि त्रिषु॥ नारदीय (उत्तर) 80. 104–105.

Krsna was brought up in his early childhood by Nand-gopa who removed his habitation from Gokula to Vrndāvana out of fear of what Kamsa might do. The great Vaisnavite saint Caitanya visited Vrndāvana (Caitanya-caritāmrta canto 19 and 9th Act of the drama Caitanyacandrodaya, both by Kavikarnapūra or Paramānandadāsa). In the 16th century Vrndāvana became a centre of Caitanya's *bhakti* movement owing to the strenuous efforts and learned writings of the *Gosvāmins* of Vrndāvana, particularly Sanātana, Rūpa and Jīva. Vide Prof. S. K. De's 'Vaisnava faith and movement in Bengal' (1942) pp. 83–122. Vallabhācārya, who was a contemporary of Caitanya founded new Gokula, one mile to the south of Mahāvana in imitation of the ancient Gokula. Caitanya and Vallabhācārya met at Vrndāvana (vide Manilal C. Parekh's work on Vallabhācārya p. 161). The old temples of Mathurā met the same fate at the orders of Aurangzeb as the temples of Banaras.[1571]

The Sabhāparva (319. 23–25) narrates that Jarāsandha threw his mace from Girivraja (Rājgir in Bihar, the ancient capital of Magadha) and it fell in Mathurā at the distance of 99 yojanas before Krsna and the place where it fell was thence called *Gadāvasāna*. I have not come across this name anywhere else.

Growse describes in chap. IX pp. 222 ff. the temples of Vrndāvana and in chap. XI Govardhana, Barsān, the birthplace of Rādhā, and Nandgaon. Vide also 'Picturesque India' by W. S Caine pp. 253 ff. for Mathurā and neighbouring holy places.

PURUṢOTTAMATĪRTHA (JAGANNĀTHA)

Much has been written about Purusottamatirtha or Jagannātha, both in Sanskrit and in English. The following works in English may be consulted by those who desire to make a thorough study of the sacred place; W. W. Hunter's 'Orissa'

1571. Vide Elliott and Dowson's 'History of India as told by its own historians' vol. VII p. 184, where a passage from the 'Ma-Asir i-Ālamgirī' is translated to the effect that "Aurangzeb commanded the destruction of the Hindu temple at Mathurā known by the name of 'Dehra Kesu Rai' (which according to that work had been built at a cost of 33 lakhs of rupees) and soon that stronghold of falsehood was levelled with the ground and on the same spot was laid the foundation of a vast mosque."

vol. I. pp. 81–167, Rajendralal Mitra's 'Antiquities of Orissa' vol II. pp. 99–144, R. D Banerji's 'History of Orissa' (in two volumes, 1930), Gazetteer on Puri, vol. XX pp. 409–412.

There are four most important tīrthas in Orissa, viz. Bhuvaneśvara (or Cakratīrtha), Jagannātha (or Śankha-kṣetra), Konārka (or Padma-kṣetra), Yajpura or Jajpur (Gadākṣetra). The first two are still held in high esteem, while the last two are altogether neglected.

Among the Purānas, Purushottama-tīrtha is extensively dealt with in the Brahma (chap. 41–70, about 1600 verses), in the Brhannāradīya (uttarārdha chap. 52–61, 825 verses). Among digests, the Tīrtha-cintāmani of Vācaspati that devotes nearly one-third of the work to Purusottama-tīrtha (pp. 53–175) and that quotes about 800 verses from the Brahmapurāṇa on Purusottama, Raghunandana's Purusottama-tattva (which is brief and mostly based on the Brahmapurāna) and the Tīrthaprakāśa (pp. 561–594) may be mentioned. It is worthy of note that the Kalpataru (composed about 1110–1120 A. D.) does not describe Purusottama-tīrtha in its Tīrthakānda, though it speaks of a few little known tīrthas like Lohārgala, Stutasvāmin and Kokāmukha.

Raghunandana in his Purusottama-tattva quotes a verse[1572] (which as printed is corrupt) from the Rgveda that from the context appears to be addressed to some evil spirit (*alakṣmī*) and means 'O evil spirit with a wicked looking chin (or that art difficult to be killed)! Have recourse to that far-off wood in the sea, that has no connection with human beings and go to distant lands with it'. Then he states that the Atharva-veda has a similar verse. Probably following Sāyana's inter-

1572. तथा 'आदौ यदारु प्लवते सिन्धोः पारे अपूरुषम्। तदालभस्व दुर्हणो तेन याहि परं स्थलम्।' अस्य व्याख्या सायणभाष्ये। आदौ विप्रकृष्टदेशे वर्तमानं . अपूरुषं निर्मानुषरहितत्वेन तदालभस्व दुर्हणो हे होत. ।अथर्ववेदेपि। आदौ सिन्धोर्मध्ये अपूरुषम्। तदा ...स्थलम्। अत्रापि तथैवार्थ.। मध्ये तीरे। पुरुषोत्तमतत्त्व (Jiv vol, II p 563). The first verse is really Rg. X 155 3 आदो .अपूरुषम्। तदा रभस्व दुर्हणो तेन गच्छ परस्तरम्॥' सायण takes this vedic verse as referring to पुरुषोत्तम in the words यदारु दारुमय पुरुषोत्तमाख्यं देवताशरीरं . हे दुर्हणो दुःखेन हननीय केनापि हन्तुमशक्य हे स्तोतः आरभस्व अवलम्बस्व उपास्स्वेत्यर्थ ». सायण mentions a predecessor's interpretation of this verse viz. that it is addressed to an evil spirit (alakṣmī) and asks it to resort to a boat or a log of wood (as a scapegoat) and to go to a far-off region where there are no human beings. This interpretation is natural and suits the context very well I could not trace the verse in the Atharvaveda

pretation, Raghunandana connects this Rgveda verse with Purusottama, the image of which is made of wood.

It would be proper to set out as briefly as possible the story of Jagannātha contained in the Brahmapurāna. In Bharatavarsa there is a country called Ondra situated on the shores of the southern ocean, which extends northwards from the sea up to Viraja-mandala[1573] (chap. 28. 1-2). In that country there is a holy place, destroyer of sins and bestower of *mukti*, surrounded on all sides by sand and ten yojanas in extent (chap. 42. 13-14). There is the famous shrine of Purusottama in the country of Utkala the whole of which is very holy owing to the favour of the all-pervading Jagannātha (chap. 42. 35-37). Men who reside in Utkala are blessed like gods since Purusottama resides there. Chapters 43 and 44 narrate the story of Indradyumna who ruled at Avanti (Ujjayini) in Mālava (modern Mālvā). He was a very pious, learned and good king who after reading all Vedas, śāstras, epics, purānas and Dharmaśāstras came to the conclusion that Vāsudeva was the highest Deity, started from his capital Ujjayini with a vast army, servants, priests and artisans and came to the shores of the southern sea, saw the ksetra of Vāsudeva, ten yojanas in breadth and five yojanas in length and encamped there. Formerly there was a Vata tree on the shores of the southern sea near which there was an image of Purusottama or[1574] Jagannātha made of sapphire, which became embedded in sand and was concealed by creepers and plants. King Indradyumna performed Aśvamedha there, erected a great temple (prāsāda) and was anxious to establish a suitable image of Vāsudeva in the temple. In a dream the king saw Vāsudeva who told him to go alone to the shore in the morning and cut the Vata tree growing just on the water line with an axe. The king did so in the morning and then two brāhmanas (who were really Visnu and Viśvakarmā) appeared. Visnu told the king that his associate (Viśvakarmā) will manufacture the image. Three images of Krsna, Balarāma and Subhadrā were made and given to the king and Visnu further conferred the boon that the pool called

1573. Virajākṣetra extends a little beyond Jājpur on the river Vaitarani in Orissa. On 'Kaliṅga, Odra and Utkala' vide R. D. Banerji's 'History of Orissa' vol. I, pp. 42-58.

1574 उत्तमः पुरुषो यस्मात्तस्मात्स पुरुषोत्तमः॥ ब्रह्म 45.52; अस्मिन्क्षेत्रे तने पुण्ये विख्याते पुरुषोत्तमे। इन्द्रनीलमयीं श्रेष्ठां प्रतिमां सार्वकामिकीं॥ 45.71; इन्द्रनीलमयो विष्णुर्यत्राऽऽस्ते वालुकावृतः। अन्तर्धानगतं मत्वा ततो विष्णुपुरं व्रजेत्॥ ब्रह्म 58.3.

Indradyumna (where the king bathed at the end of his Aśvamedha) will be known by the king's name, that whoever took a bath once in it would go to Indraloka, and that whoever offered piṇḍas on the bank of the pool would save 21 ancestors of his family. Then the king established the three images in the temple built by him.[1575] The Skandapurāna contains a Puruṣottamamāhātmya in a sub-section called Utkala-khaṇḍa in its section Vaisnava-khanda, where the story of Indradyumna is given with some variations.

Stripping this story of the supernatural, it appears probable that the holy place Purusottama was called Nīlācala in very ancient times, that Kṛsna worship was introduced from Northern India at that place, and that three images of wood were established in comparatively early times. It may be stated here that in the Maitrāyanī Upanisad[1576] an Indradyumna is named among a host of cakravartins. The Kūrmapurāna (II. 35. 27) makes a brief and colourless reference to Purusottama (tīrtham Nārāyanasyānyat-nāmnā tu Purusottamam). Rajendralal Mitra ('Antiquities of Orissa') surmises that there were three periods in the history of the Purusottama-ksetra, viz. early Hindu period, the Buddhist period and the Vaisnava period (after the 5th century A. D. when Buddhism began to wane). He notices that from about the 7th century A. D. considerable temple records on palm leaves exist, but that the temple records for the Buddhist period are untrustworthy (p. 104) and that there are indications that Purī was probably a place of Buddhist sanctuary (p. 107). The indications of the existence

1575. Vide Hunter's Orissa vol. I. pp. 89–94 for a somewhat different account based on Kapilasamhitā, the most important points of which are that Viṣnu shows to Indradyumna as His image a log of wood thrown up by the ocean, that the images were being fashioned by the divine carpenter, that it was ordered that no one was to see them till they were ready and that in spite of this, the queen insisted on seeing them when they had been chiselled only up to the waist and when only stems stood in the place of the arms for the images of Kṛṣṇa and Balarāma, while the image of Subhadrā had no arms at all. The present images are to this day in the same condition. The images are described by Rajendralal Mitra in 'Antiquities of Orissa' II. pp 122–123. The story of इन्द्रद्युम्न occurs in नारदीयपुराण, उत्तरार्ध 52 41–93, 53–57, 58. 1–21, 60–61. नारदीय agrees very closely with the Brahmapurāṇa and seems to have borrowed its text from the latter.

of Buddhism in Orissa are the existence of Aśoka's rock edicts on the Dhauli Hill (C. I. I. vol. I. pp. 84–100), the existence of many caves of the Buddhist period on the Khandagiri range about five miles to the west of Bhuvaneśvara, the procession of the car of Jagannātha which resembles the procession of Buddha's Tooth relic as described by Fa Hien (Hunter's Orissa, vol. I. p. 131–132) and the three crude wooden images of Kṛṣṇa, Subhadrā and Balarāma which are hardly found anywhere else and which correspond to the three peculiarities of Buddhism viz. Buddha, Dharma and Sangha. Vide Mitra's 'Antiquities of Orissa,' vol. II. pp. 122–126 (where he gives wood-cuts showing the figures of the images and comparing them with Buddhist symbols and Cunningham's 'Ancient Geography of India' pp. 510–511 (the remarks in which appear to me far-fetched). In J. R. A. S. vol. 18 at p. 402 (new series) Sewell thinks that the celebrated image of Jagannātha was originally one of the Triśūlas or developed Taurus symbols.

At present the sacred enclosure of Jagannātha is a square surrounded by a massive stone wall 20 feet high, 652 feet long and 630 feet broad with 120 temples containing various forms of God, 13 being temples of Śiva, some more of Pārvatī and a temple of the Sun. This clearly shows the catholicity of Jagannātha. Almost every form of Hindu faith is represented here. Even the Brahmapurāna gives expression to this tolerant view when it says that the holy Purusottama-kṣetra forbids all the wranglings between Śaivas and the devotees of Viṣṇu.[1576a] The great Pagoda of Jagannātha has four chambers, the first being the Hall of Offerings (*bhoga-mandira*), the 2nd the pillared hall for music and dance (the *nata* mandira), the third the audience hall where pilgrims assemble (the Jaganmohana mandira) and the 4th the inner sanctuary. The great Pagoda of Jagannātha has a conical tower 192 feet high surmounted by a *cakra*[1577] and a flag. The

The *cakra* surmounting the temple is mentioned in the Brahmapurāna itself 'यात्रा करोति कृष्णस्य श्रद्धया यः समाहित। सर्वपापविनिर्मुक्तो विष्णुलोकं व्रजेन्नरः॥ चक्रं दृष्ट्वा हरेर्दूरात् प्रासादोपरि संस्थितम्। सहसा मुच्यते पापान्नरो भक्त्या प्रणम्य तत्॥ chap. 51 70–71 = नारदीय (उ) 55. 10–11.

temple is situated at the distance of about seven furlongs from the sea shore and stands on a mound about 20 feet above the level of the surrounding ground, the mound being dignified by being called Nīlagiri (the blue hill). There is a large gate-way on each side of the enclosure, that on the east being the most magnificent On each side of the entrance there is a colossal crouching lion and hence the door-way is called simha-dvāra (lion gate).

There are certain peculiar features of the great shrine of Jagannātha. In the first place, in the court of Jagannātha and outside the Lion Gate no distinction of caste[1578] is observed Jagannātha is the god of all people. The second special feature is that the holy rice cooked as offering to Jagannātha is regarded as so sanctified that all barriers of caste are transcended, so much so that a Purī priest will receive the holy food even from a low caste Hindu. The feeling is that cooked rice when once placed before Jagannātha never ceases to be pure. Hence the *Mahāprasāda* is dried, is taken to all parts of India and at the periodical śrāddhas among Vaisnavas a grain of this holy rice is invariably put on the cake as the most sacred article that can be offered to the Manes (vide Mitra's 'Antiquities of Orissa', vol. II p 199). The third special feature of Jagannātha is the car festival (*rathayātrā*) which is the most important of the 24 high[1578a] festivals at Purī. The festival is described at length by Hunter in his 'Orissa', vol I. pp. 131–134. The car festival starts on the 2nd day of the bright half of Āsādha. The car of Jagannātha is about 45 feet in height, 35 feet square and is supported on 16 wheels of 7 feet diameter with 16 spokes and has Garuda as a crest; the 2nd car is that of Subhadrā, which is a little smaller than Jagannātha's car, resting on 12 wheels with 12 spokes in each and having a *padma* (lotus) as a crest, the 3rd car is that of Balarāma resting on 14 wheels with 14 spokes in each wheel and has Hanūmān for crest. The cars are drawn by pilgrims and hired labourers from the temple to

1578 Hunter in 'Orissa' (vol. I. pp 135–136) notes that only 21 classes and castes (including Christians and Mahomedans) are excluded, they being mostly flesh-eating and animal-life destroying castes Even the washerman and the potter whom Hunter includes in the list are allowed to enter the outer court.

1578a विद्यानिवास (in the middle of 15th century A.D. in Bengal) wrote a work called द्वादशयात्रामयोगप्रमाण on 12 festivals in 12 months connected with जगन्नाथ (vide No. 2429 in MM Haraprasad Sastri's Cat. of mss. vol. III.)

the country-house of Jagannātha (which is about two miles away) amidst the shouts and emotional songs of thousands of pilgrims. Owing to the references in English literature to the car of Jagannātha it is supposed by many that pilgrims used to throw themselves before the car in a religious frenzy and were killed. But there is hardly any truth in these suppositions. There might have been a few accidental deaths. Hunter in 'Orissa' (vol. I. pp. 133–34) scouts this idea of suicide under the car and Rajendralal observes (in 'Antiquities of Orissa', vol. II. p 99) 'No Indian divinity has a more unenviable notoriety in English Literature than Jagannātha. It is certain, nevertheless, that human conception has never realized a more innocent and gentle divinity than Jagannātha and the tenets of his votaries are the very reverse of sanguinary or revolting. Never was opprobrium more unjustly cast on an inoffensive object than in this instance and none merited it less'. On the 10th day of the bright half begins the return of the car from the country house.

According to Rajendralal Mitra the oldest temple in Puri is that of Alābukeśvara built by Lalātendu Kesarī (623–677 A. D.), the builder of the tower of Bhuvaneśvara; the next oldest is Mārkandeśvara and next comes the great temple of Jagannātha (vol. II. p. 112). Manmohan Chakravarti in his paper on the 'date of Jagannātha temple in Puri' (J. A. S B., vol. 67 for 1898, part 1 pp. 328–331) quotes two verses from the Gangavaṁśa copper plates of Orissa which state that Gangeśvara alias Codaganga built the great temple of Purusottama[1579]. As Codaganga's coronation took place in śake 999 (i e. 1078 A. D.) according to M. M. Chakravarti, he put forward the view that the *prāsāda* of Jagannātha was built about 1085–1090 A. D. Dr. D. C. Sirkar (in 'God Purusottama at Puri' J. O. R., Madras vol. 17 pp. 209–215) points out that the celebrated Oriya Chronicle *Mādalā-pāñji* attributes the construction of Purusottama Jagannātha not to Codaganga but to his great-grandson -Ananga-bhīma III, who also installed an image of Purusottama in a temple at Vārānasī-Kataka (modern Cuttack)

1579. प्रासाद पुरुषोत्तमस्य नृपति को नाम कर्तुं क्षमस्तस्येत्थाद्यपरैरुपेक्षितमयं चक्रेऽथ गङ्गेश्वरः ॥. These verses establish that the shrine of Purusottama existed long before the date of the inscription and that the kings who preceded Codaganga did not care to build a befitting temple It appears that Codaganga built only the minor sanctum and the Jagannmohana i. e. the first maṇḍapa (vide R. D. Banerji's 'History of Orissa' vol. I. p. 251).

which was desecrated by Sultan Firuz Shah (vide Elliot and Dowson's 'History of India', vol III pp 312–315). These Ganga kings built magnificent temples at Bhuvaneśvara (ancient Ekāmra), Konārka and Purī, which are the finest surviving specimens of North Indian Hindu Architecture. Mitra ('Antiquities of Orissa' vol. II. pp. 109–110) and Hunter ('Orissa' vol. I pp. 100–102) note that Ananga-bhīma wanted to eclipse the grand tower of Bhuvaneśvara and renovated the temple of Jagannātha in *śake* 1119 (i. e. 1198 A. D).[1580]

The temple of Jagannātha has an army of attendants They are divided into 36 orders and 97 classes. At the head was the Raja of Khurdha who called himself the 'sweeper of Jagannātha' (vide Hunter's 'Orissa', vol I p 128).

As in Banaras, so here also there are five important tīrthas,[1581] viz. the pool of Mārkandeya, the Vata tree (identified with Krsna), Balarāma, the sea and Indradyumna pool A few words may be said here about each. The story of Mārkandeya is narrated in Brahmapurāna, chapters 52–56 and in Nrsimha-purāna 10.21 ff (briefly). In chap. 56. 72–73 Visnu asks Mārkandeya to build a temple of Śiva to the north of Jagannātha and to construct a sacred pool which thenceforward was to become known as 'Mārkandeya's pool'. The Brahmapurāna provides that the pilgrim should bathe in Mārkandeya's pool, dip his head thrice, utter a mantra (chap. 57. 3–4), then he should perform *tarpana*, go to the temple of Śiva (called Mārkandeyeśvara) and worship him with the Mūlamantra[1582] viz. 'Om namah Śivāya', then with another mantra called Aghora and a Paurānic mantra. The pilgrim should, after a bath in Mārkandeya's pool and visit to the temple of Siva, repair to the sacred Vata, circum-ambulate it

The ती चि p 88 states, that the अघोरमन्त्र is 'ओं अघोरेभ्यो घोरेभ्यो घोरतरेभ्यः, सर्वेभ्य. सर्वसर्वेभ्यो नमस्तेऽस्तु रुद्ररूपेभ्यः'.

thrice, worship it with the mantra [1583] noted below. It may be noted that the Brahmapurāna 157 17 expressly states that the Vata is Visnu Himself in that form (nygrodhākrtikam Visnum pranipatya). The Vata is also styled Kalpavrksa (Brahma 57. 12, 60. 18). The pilgrim should bow to Garuda standing in front of Krsna and then worship Krsna, Sankarsana and Subhadrā with mantras. The mantras for Sankarsana are verses 22–23 of Brahmapurāna chap. 57 and that for Subhadrā is chap. 57. 58 [1584] The mantra to be used in the worship of Krsna is either of 12 syllables (om namo bhagavate Vāsudevāya) or of eight syllables (om namo Nārāyanāya). Brahmapurāna chap. 57 verses 42–51 specify the various rewards of seeing Krsna with devotion and wind up by promising moksa [1585] A bath in the sea at Purī is always commendable, but particularly on the Full Moon day (Brahma 60. 10). Brahma chap. 62 deals at length with the bath in the sea (the whole of it except one verse being quoted by Tīr. C. pp. 126–128). The Indradyumna pool has been mentioned above (pp. 694–95). The pilgrim has to bathe in the Indradyumna pool, perform *tarpana* for gods, sages and *pitrs* and offer pindas to his ancestors (chap 63. 2–5).

In the Govindapur stone Inscription of the poet Gangādhara (E. I. vol. II. p. 330) of *śake* 1059 i e. (1137–38 A. D.) there is a clear reference to Purusottama [1586]

The Brahmapurāna chap 66 speaks of the Gundicāyātrā for seven days on the bank of the Indradyumna pool in a *mandapa* where reside (temporarily) Krsna, Sankarsana and Subhadrā. The Tīr. C. which quotes the whole of that chapter (pp. 157–159), calls it Gundikā, while in the drama Caitanya-

candrodaya[1587] it is styled Gundicā at the very beginning. It appears that Gundicā is the summer house of Jagannātha about two miles from the great Temple. The word is probably derived from *gundi*, which means a thick log of wood in Bengali and Uriya (vide Mitra's 'Antiquities of Orissa', vol. II. pp. 138–139) and has reference to the legend of a log of wood that Indradyumna found floating in the sea.

It may be noted that religious suicide at Purusottama is referred to in Brahmapurāna[1588] 'those who give up their body (life) in Purusottama-ksetra after mounting up the Vata tree or do so between the Vata and the ocean reach without doubt moksa. A man abandoning life, either intentionally or unintentionally, either on his way to Purusottama or in the cemetery or in the country house (of Jagannātha) or in the streets (of Jagannātha) or even anywhere else there secures moksa. Therefore men desiring moksa should by all means give up life at that holy place'.

The Brahmapurāna winds up by saying 'it is thrice[1589] true that that ksetra (Purusottama) is the greatest and highest

tīrtha. A person has not to lie again in the womb after once visiting Purusottama which is laved by the waters of the sea or by once attaining the knowledge of *brahma*.

The great Vaisnava saint, Caitanya, settled permanently at Purī in 1515 A. D. at the age of thirty and spent eighteen years there till 1533 (when he died). He appears to have made a great impression on the Gajapati king Pratāparudradeva, ruler of Orissa (1497–1540 A. D.). In the drama Caitanyacandrodaya of Kavikarnapūra the king is shown to be so anxious for meeting the saint that he declares that he would die if the gracious glance of the saint did not fall on him.[1590] This should be attributed to the inveterate habit of gross exaggeration rampant in most Sanskrit writers, particularly amongst devotees and followers of great saints. Caitanya came to be worshipped along with Visnu as a deity in Purī and Orissa (vide Hunter's 'Orissa' vol. I. p. 109). Kavikarnapūra in his drama (8th Act) makes Sārvabhauma say that there is no distinction between God Jagannātha and Caitanya, the only difference being that Jagannātha is 'dārubrahma' (Godhead manifested in a wooden image) and Caitanya is 'narabrahma' (Godhead in human form).[1591] The Caitanyacaritāmrta (a poem) of Kavikarnapūra in cantos 14–18 deals with the devotional and ecstatic life of Caitanya at Purī and presents a vivid picture of Ratha and other festivals of Jagannātha in which Caitanya took a prominent part. I agree with Dr. S. K. De that there is no satisfactory evidence to show that Pratāparudra was actually converted into the new faith ('Vaisnava faith and movement in Bengal' p. 67).

One regrettable feature of the great temple of Jagannātha is the existence of some obscene and lascivious sculptures that disfigure the walls of the temple and the presence of dancing girls with rolling eyes, to which pointed reference is made by all writers, particularly European ones (vide, for example, Indian Antiquary vol. I. p. 322, Hunter's 'Orissa', vol. I pp. 111, 135). The presence of dancing girls is a legacy from the past. The Brahmapurāna (chap. 65) in describing the special *snāna* (bath) festival of Jagannātha on the full moon day of

Jyestha mentions, along with the beating of drums and the music of the flute and the lute and the chanting of holy Vedic mantras, handsome veśyas as *chowrie*-bearers in front of the images of Balarāma and Krsna.[1592]

NARMADĀ

Next to the Ganges the most sacred rivers of India are the Narmadā and the Godāvarī. A few words about each of these may be said here.

An express reference to the Narmadā has not so far been traced in the Vedic Literature. The Śatapatha Br. (XII 9 3. 1) refers to one Revottaras who was a Pātava Cākra and sthapati (a chief) and whom the Srñjayas expelled (SBE vol. 44 p. 269)[1593]. Revā is another name for Narmadā[1594] and it is possible to say that Revottaras was named after Revā A *vārtika* on Pān. IV. 2. 87 derives the word Mahismat (as the name of a country) from 'Mahisa'. This is generally identified with Māhismatī (on the Narmadā). So the name Narmadā was probably known to the author of the Vārtikas (about the middle of the 4th century B. C) The Raghuvaṁśa VI. 43 speaks of Māhismatī as the capital of Anūpa on the bank of the Revā (i e. Narmadā).

The Narmadā is frequently mentioned in the Mahābhārata and some of the Purāṇas. The Matsya (chapters 186–194, 554 verses), Kūrma (Uttarārdha, chapters 40–42 verses 189), Padma Ādikhanda (chap 13–23, 739 verses, most of which are the same as in the Matsya) deal with greatness of Narmadā and the tīrthas thereon[1594a]. The Matsya (194. 45) and Padma (Ādikhanḍa 21. 44) state that from the place where the Narmadā falls into the sea up to the Amara-kanṭaka mountain (where it rises) there are ten crores of sacred places, while the Agnipurāna (113. 2) and Kūrma II. 40. 13 raise the number to 60 crores and 60 thousand The Nāradīya (uttarārdha chap 77)

1594 a It may be noted that the earliest extant digest, viz Kalpataru on tīrthas (pp. 198–205) quotes verses only from the Matsyapurāṇa, chapter 186–189 (in all about 70 verses on Narmadā) and from no other source.

says (verse 1) that there are 400 principal tīrthas on both banks of the Narmadā, but from Amara-kantaka three crores and a half (verses 4 and 27–28).[1595] The Vanaparva (in chap 188 103 and chap. 222.24) mentions the Narmadā along with the Godāvarī and other rivers of the south. In the same parva (chap. 89. 1–3) it is stated that the holy Narmadā is in the Ānarta country[1596], that it is endowed with *priyaṅgu* creepers and mango groves, that it has strings of Vānīra fruit, that it flows to the west and that all the holy places in the three worlds come for a bath to the Narmadā. The Matsya and Padma declare[1597] that the Ganges is holy in Kanakhala, the Sarasvatī in Kuruksetra, but the Narmadā is holy everywhere whether in a village or in a forest and that the Narmadā purifies the sinner by its very sight while the waters of the Sarasvatī do so by three baths (on three days), of the Yamunā (by baths) in seven days and of the Ganges by a single bath. The Viṣnu-dharmasūtra (85.8) in enumerating a list of tīrthas that are eminently fit for śrāddha includes the banks of the Narmadā throughout the whole length among them. The Narmadā is said[1598] to have started from the body of Rudra which is a poetic way of saying that it rises from Amarakantaka that is said to be the abode of God Maheśvara and his spouse (Matsya 188 91). The Vāyupurāna declares that the holy Narmadā, the best of rivers, is the daughter of the pitṛs and the śrāddhas offered on it become inexhaustible[1599]. The Matsya and Kūrma both say

1595. Though रेवा and नर्मदा are generally used as synonyms it is found that the भागवतपुराण in V 19 18 enumerates them separately (तापी रेवा सुरसा नर्मदा) and the वामनपुराण (13. 25 and 29–30) states that the Revā springs from विन्ध्य and नर्मदा from ऋक्षपाद सार्धत्रिकोटितीर्थानि गदेतानीह वायुना। दिवि भुव्यन्तरिक्षे च रेवाया तानि सन्ति च। नारदीय (उ) 77, 27–28, vide note 1268 above for similar eulogy of the Ganges.

1596. Ānarta appears to be the ancient name of Gujarat and Kathiawar together. In the Udyogaparva Dvārakā is called Ānarta-nagarī (7. 6) As Narmadā is said to flow through Ānarta it must be supposed that in the times of the Great Epic Ānarta included both southern Gujarat and Kathiawar.

that the river Narmadā has a course of complete 100 yojanas and its breadth is two yojanas[1600]. Prof. K. V. Rangaswami Aiyangar seizes upon the length of 100 yojanas and says (on p. 199 note 4 of his edition of Kalpataru on Tīrtha in G. O. S.) that the Matsya is very accurate, since the length of the Narmadā is now found to be about 800 miles. But he forgets that the breadth is said to be two yojanas (i. e. 16 miles on the scale for a yojana adopted by him). It is not shown how and where (except at the mouth if at all) the Narmadā is 16 miles in breadth in its long course. Both Matsya and Kūrma state that the Narmadā is (rises) from Amarakantaka which is to the western side of the country of Kalinga.[1601]

The Viṣnupurāna provides that if a man repeats day and night and whenever he has to go inside a dark place the mantra 'Salutation to Narmadā in the morning! salutation to Narmadā at night! O Narmadā! salutation to you; save me from poisonous serpents'[1602] he has no danger from serpents.

It is stated in the Kūrma and the Matsya that a man who commits suicide by entering fire or water or by fasting (on some of the tīrthas on the Narmadā or on Amarakantaka) does not return (to this samsāra).[1603]

The Narmadā is mentioned as Namados by Ptolemy (p. 102). One of the earliest inscriptional references to it occurs in the Eran stone pillar Inscription of Budhagupta in 165 of Gupta era i. e. 484-85 A. D. Vide C. I. I. vol. III. at p. 89.

Several rivers are mentioned as falling into the Narmadā such as Kapilā (on the south bank, Matsya 186. 40, Padma I. 13. 35), Viśalyā (Matsya 186. 46 = Padma II. 13. 35-39), Erandī (Matsya 191. 42-43, Padma I. 18. 44), Ikṣu-nādī (Matsya 191. 49, Padma I. 18. 47), Kāverī (Matsya 189. 12-13,[1604] Padma I. 16. 6).

1604. The northern branch of the Narmadā where the island Omkāra is situated is called Kāverī (Bom G vol. 9 p. 295). Vide in the list under Omkāra

Many sub-tīrthas are enumerated, out of which two or three may be mentioned here. One is Maheśvara-tīrtha (i. e. Omkāra) from where Rudra is said to have burnt down with an arrow the three cities of Bānāsura (Matsya 188. 2 ff, Padma I. 15 2 ff), Śukla-tīrtha (highly praised in Matsya 192. 3 ff about which it is said that the *rājarṣi* Cānakya [1605] attained perfection there), Bhrgutīrtha (at the very [1606] sight of which a man becomes free from sin, a bath in which leads to heaven and death at which ensures non-return to *saṃsāra*), the Jāmadagnya-tīrtha (where the Narmadā [1607] falls into the sea and where Lord Janārdana secured perfection). The mountain Amarakantaka is a tīrtha that dispels all sins including brāhmana-murder and it is one yojana all round in extent (Matsya 189. 89, 98). The most important place on the Narmadā is, however, Māhismatī, about the exact location of which scholars have differed. The general consensus of opinion is that Māhismatī is to be identified with Omkāra Māndhātā, an island in the Narmadā about 40 miles south of Indore. It has a long history. Moggaliputta Tissa is said in Buddhist works to have sent missionaries to several countries in the reign of Aśoka (about 247 B C.), one of which was sent to *Mahisamandala*. Dr. Fleet in his paper 'Mahisamandala and Māhismatī' (in J. R. A. S. for 1910 pp. 425–447) assigns cogent reasons for identifying Mahisamandala and Māhismatī. Māhismatī was well-known to the Mahābhasya, [1608] from a passage in which it follows that by a forced march a person starting from Ujjayinī could reach Māhismatī the next morning. Kālidāsa describes it as surrounded by Revā (Raghuvamśa VI 43). Māhismatī is mentioned as being on

Another ancient city is Bharukaccha or Bhṛgukaccha (modern Broach) for which the entry in the list may be consulted.

GODĀVARĪ

No mention of Godāvarī has so far been found in the Vedic Literature. In Buddhist works there are traditions about Bāvarī, who was a purohita of Mahākosala and then of Pasenadi, who resided in Assaka's territory in the vicinity of Alaka on the Godāvarī and who is said to have sent several disciples to Buddha at Śrāvastī (vide Suttanipāta, S. B. E. vol. X part 2 pp. 184 and 187). The *Vārtika* 'Sankhyāyā nadī-godāvarī-bhyām ca' on Pān. V. 4 75, expressly mentions Godāvarī and has in view 'Saptagodāvara'. The two Epics and Purānas contain numerous references to it. The Vanaparva[1609] mentions it as a holy river in the south, abounding in gardens and full of water and resorted to by hermits performing austerities. The Aranyakānda of the Rāmāyana (13.13 and 21) speaks of the country well-known as 'Pañcavatī' frequented by herds of deer which is near the Godāvarī and about two yojanas from Agastya's hermitage. It is in the Brahmapurāna that the Godāvarī and the subsidiary tīrthas on it have been lauded at great length in chapters 70–175. The Tīrthasāra (a part of Nrsimhaprasāda) quotes about 60 verses from chapters 89, 91, 106, 107, 116–118, 121, 122, 128, 131, 144, 154, 159, 172 of the Brahmapurāna, which fact shows that the chapters on Gautamī in the present Brahmapurāna were part of the Brahmapurāna at least some centuries before 1500 A. D. Vide my paper in J.B.B.R.A.S for 1917 p 27–28. The Brahmapurāna generally refers to the Godāvarī as Gautamī.[1610] It is stated by the Brahmapurāna that the Ganges to the south of the Vindhya mountain is called Gautamī and to its north Bhāgīrathī. The Godāvarī is said to be 200 yojanas long and there are three crores and a half of

tīrthas on it.[1611] Dandakāranya is said to be the seed (source or cause) of dharma and *mukti* and the country embraced by the Gautamī is specially the holiest[1612] A verse occurring in several purānas states 'These countries (of Madhyadeśa) are immediately next to the mountain Sahya: thereon is Godāvarī and that country is the most charming in the whole world. There is Govardhana there which is (like) Mandara and Gandhamādana'.[1613] Brahmapurāna (chapters 74–76) narrates how Gautama brought the Ganges from the matted hair of Siva to Brahmagiri where he had his hermitage and how Ganeśa helped in the task by means of a ruse. The Nāradapurāna (uttarārdha 72) narrates that no rain fell for 12 years while Gautama practised *tapas*, that owing to famine all sages came to Gautama's hermitage, that he brought Gangā to his hermitage, that he sowed śāli grains in the morning and reaped the crop by midday, that this went on till there was plenty of rain and crops, that Śiva appeared to him, that Gautama prayed that Śiva should stay near his hermitage and that hence the hill on which Gautama had his hermitage came to be called Tryambaka (verse 24). Varāha (71. 37–44) also says that Gautama brought Jāhnavī to Dandaka and the river became Godāvarī. The Kūrma (II. 20. 29–35) mentions a long list of rivers and other sacred places and winds up by saying that the Godāvarī is pre-eminently a place for performing śrāddha. It is stated in the Brahmapurāna that for the removal of all kinds of distress two alone are declared (as the means) viz. the holy river Gautamī or Śiva who is full of compassion.[1614] The Brahmapurāna describes about a hundred tīrthas on the Godāvarī, such as Tryambaka (79. 6), Kuśāvarta (80, 1–3), Janasthāna (88. 1), Govardhana (chap. 91), Pravarāsangama

(106) and Nivāsapura[1615] (106. 55), Vañjarāsangama (159) but they have to be passed over from considerations of space. A few words must, however, be said about Nasik, Govardhana, Pañcavaṭī and Janasthāna. Nasik must have existed at least 200 years before Christ. An Inscription on one pillar of the railing at Bharhut *stūpa* (about 200 B. C.) records the gift of Goraksitā of Nasik, the wife of Vasuka.[1616] This is the earliest certain historical reference to Nasik discovered so far. The Mahābhāsya[1617] speaks of Nāsikya as a city. The Vāyupurāna (45.130) mentions Nāsikya as a country. The Nasik Inscriptions in the Paṇḍulenā caves (Bombay Gazetteer vol. 16 pp. 544–639 and E. I. vol. VIII pp. 59–96 edited by Senart) establish that Nasik was a prosperous place in the centuries before and after Christ. Ptolemy (about 150 A. D.) mentions Nasika (Ptolemy p. 156). It is not possible for reasons of space to go into the detailed history of Nasik, its bathing places and pools, its temples, pilgrimages and rites of worship. For these one may consult the Bombay Gazetteer, vol. 16 (for Nasik District). That volume states that there are about 60 temples in Nasik (pp. 503–512) and 16 in Pañcavaṭī and one the left bank of the Godāvarī (pp. 512 ff). But hardly any really old temple has survived. In 1680 A. D. twenty-five temples at Nasik were destroyed by the Deccan Viceroy of Aurangzeb Almost all the large temples that adorn Nasik were built during the times of the Peshwas of Poona (1750–1818). Three temples are specially worthy of mention, viz. the the Rāmji temple in Pañcavaṭī and Nāro Shankar's temple (or Bell temple) on the left bank of the Godāvarī near the first crossing and that of Sundara-nārāyana in Āditwar Peth at Nasik (p. 503). The Sītā-gumphā (Sītā cave) in Pañcavaṭī close to some very old and tall Banyan trees that are believed to have sprung from the five trees that gave the name to the

place is a much frequented place. Not far from the Sītā-gumphā is the temple of Kālā Rāma, one of the finest modern temples in Western India. There are numerous bathing places and sacred pools (*kuṇḍas*) between Govardhana (6 miles to the west of Nasik) and Tapovana (1½ miles to south-east of Nasik). Vide Bombay Gazetteer vol. 16 pp. 522-526 The holiest spot in Nasik is the Rāmakunda near the left bank of the Godāvarī where it takes its first bend to the south For the Kālārāma daily services and the rites pilgrims have to perform at Nasik, vide Bombay Gazetteer vol 16 pp 517-518 and 529-531 respectively. Rāmanavamī is one of the great religious festivals at Nasik.

Govardhana town occurs several times in the long and famous Nasik Inscription of Uṣavadāta (No. 10 in Bombay Gazetteer vol. 16 p. 569-70).[1618] As regards Pañcavaṭī the place still goes by the same name. It is to be noted that in the Rāmāyaṇa III. 13. 13 Pañcavaṭī is styled a *deśa* (country). Janasthāna was in Daṇḍakāraṇya according to the Śalyaparva 39. 9-10, Rām. III. 21. 19-20, Nāradīya-purāṇa II. 75. 30 and Agni 7. 2-3[1619] and Pañcavaṭī was part of Janasthāna. Janasthāna is said to be four yojanas in extent, and it is further stated that it was so called because kings of the Janaka line secured *mukti* there through the favour of the Godāvarī.[1620]

meritorious.[1621] The Brahmapurāna says that three crores and a half of tīrthas that exist in the three worlds come for a bath in the Gangā when Jupiter is in Leo and that bathing in the Bhāgīrathī (every day) for sixty thousand years (is equal) to bathing only once in the Godāvarī when Jupiter is in the Zodical sign Leo.[1622] It is stated in the Varāhapurāna that when a man repairs to the sacred Godāvarī in *simhastha* year, takes a bath and offers *tarpana* (and śrāddha) to his pitṛs the latter go to heaven if they are in hell and they attain final release if they are already denizens of heaven. Jupiter is in Leo for one year once in twelve years. Crowds of pilgrims throng at Nasik in their thousands from all parts of India in the *simhastha* year.

KĀÑCĪ (modern Conjeeveram).

Kāñcī is one of the seven holy cities of India (vide p. 678 n. 1535 above) and one of the most ancient towns in southern India If we rely on the tradition recorded by Hiouen Thsang who stayed in Kāñcī about 640 A. D. it would follow that Buddha frequented the region around Kāñcīpura and that Kāñcī had a *stūpa* about 100 feet high built by Aśokarāja (Beal's B. R. W. W. vol. II. p. 230). Hiouen Thsang informs us that Kāñcī was 30 *li* (or about 5½ miles) in circuit, that in his day there were eighty Deva temples and that there were many heretics called Nirgranthas (Beal's B. R. W. W. vol. II. pp. 228–229). The next important datum is the mention of Kāñcī-puraka (resident of Kāñcīpura) in the Mahābhāsya on Vārtika 26 to Pān. IV. 2 104 (Kielhorn, vol II. p. 298). Several early records relating to the ancient history of the Pallavas of Kāñcī (of about 250 to 350 A. D.) have been published, such as the Mayidavolu plates of Yuvamahārāja Śiva-skandavarman (E. I. vol. VI p. 84), the Hirahadagalli Inscription of the 8th year (E. I. vol. 1. p. 2), and the Talgunda Pillar Inscription of Kadamba Kākusthavarman (E. I. vol. VIII p. 24). The

Allahabad Praśasti of Samudragupta (Gupta Inscriptions ed. by Fleet p. 7) states that Samudragupta vanquished Visnugopa, king of Kāñcī (Kāñceyaka), in the first half of the 4th century A. D. In the 'Maṇimekhalai' there is an elaborate description of the town of Kāñcī where Manimekhalai ultimately attained to enlightenment (vide S. Krishnaswami Aiyangar's 'Manimekhalai in its historical setting' p. 20). It is not necessary for the present purpose to refer to the numerous inscriptions about the Pallavas and Kāñcī and the large number of papers contributed to learned Journals. Reference may, however, be made to the careful and scholarly work 'History of the Pallavas of Kāñcī' by R. Gopalan (1928), which brings together all relevant data published up to the date of its composition.

Let us now turn to some passages from the Purānas about Kāñcī. The Brahmānda asserts.[1623] 'The two cities of Kāśī and Kāñcī are the two eyes of Lord Śiva; Kāñcī is a famous Vaisnava *kṣetra* but it also brings about the presence of Śiva'. It is stated in the Bārhaspatya-sūtra (III. 124) that Kāñcī is a Sākta-kṣetra and in the Devībhāgavata (VII. 38. 8) it is said to be a Devīsthāna called Annapūrnā. The Vāmana-purāna[1624] observes: the Jāti is the best among flowers, Kāñcī the best among towns, Rambhā among women, the householder among persons of (the four) āśramas, Kuśasthalī is the best among cities and Madhyadeśa among all countries.

Kāñcī is full of temples and shrines. The most famous are the Vaikuntha Perumal temple of Visnu and the Śaiva temple of Kailāsanātha built by Pallava Rājasimha. This latter has a large hall supposed to contain 1000 columns.[1625] There is an old Jaina temple also.

every year. The Bombay Gazetteer vol. 20 (for Sholapur District) devotes pp. 415–482 to Pandharpur. This sacred place cannot claim very great antiquity. On the materials so far available it is difficult to decide when the shrine of Vithobā was established, but there is sufficient evidence to enable one to say that it was certainly in existence in the middle of the thirteenth century A. D.[1626] The Padmapurāna (Uttara-khaṇḍa 176. 56–58) mentions the image of Vitthala Viṣṇu on the bank of the Bhīmarathī which has only two arms and is called Bindu-mādhava. The difficulty is about the date of this part of the Padmapurāna. In my opinion it is a late addition and cannot be placed earlier than about 1000 A. D. The modern town of Pandharpur lies along the right bank of the Bhīmā river. The chief temple in Pandharpur is that of Vithobā in the centre of that part of the town which is considered holy. The Bombay Gazetteer vol. 20 describes at some length (pp. 417–424) the main temple of Vithobā and its adjoining parts. Behind the temple of Vithobā is the temple of Rakhumāī, the consort of Vithobā. There is a large staff of priests and attendants in the temple of Viṭhobā, the chief of whom are those called Badves (who are the most numerous body of the staff and who once claimed to be owners of the temple, but who are now held to be the trustees and guardians of the temple property and of the god's jewels under a scheme of management framed by the High Court of Bombay).[1627] Except the Badves all

1626 Vide Dr. R. G. Bhandarkar's 'Vaiṣnavism, Saivism' pp. 87–89.

1627. In *Gangaram Babaji Badve* v. *Baji Shankar and others*, Printed Judgments of the Bombay High Court for 1891 p 182 at p. 186 the High Court declared that the Badves are not owners of the temple, idol and property and that they are the chief priests, managers, overseers and guardians of the idol, the temple and the property belonging thereto and that they are bound to keep order and to bid the *Sevādhārīs* perform the duties which belong hereditarily to those priests. In *Sakharam Bhimaji Benare and others* versus *Gangaram Babaji Badve and others*, Printed Judgments of the Bombay High Court for 1896 p. 644, the position set out above was accepted by both sides and a scheme of management was framed by the High Court (pp. 649–651) which provided for the creation of a Vithobā Fund, for the appointment of a committee of management consisting of five Badves to be elected every year, for the keeping of accounts by the Badves, and for the auditing of these accounts by a Devasthan committee and declared that any cash offering exceeding Rs. 500 was not to be appropriated by the Badves for their own use, but was to be expended for ornaments for the image and to be added to the Vithobā fund, if not so required.

other attendants are called *sevādhāris* and they are of various grades, viz. the *pujāris* (who take the principal part in the worship of the God), *Benaris*[1628] (who repeat mantras and hymns at different services), *paricārakas* (who bring in a large silver dish the water with which the pujāri washes the image of the God and brings the lamp for waving it before the image at the evening and night services), *haridās* (who sings generally five verses in honour of the god at the morning, evening and night services), the *dingres* (who hold a mirror before the God at the early morning service after the god has been dressed and before the lights are waved), the *divtes* (the torch-bearers) who hold a lighted torch when the last night ceremonies are over and carry the slippers of the god in torch-light processions three times a year on the Full Moon days of Āsādha and Kārtika and on the *Dasarā* night), the *dange* (who stands with a silver or gold-plated mace outside the ante-chamber at the morning, evening and night services). The goddess Rakhumāī has only one set of priests known as *Utpāts*, of whom there are over a hundred families.

The Bombay Gazetteer describes at length (pp. 427–430) the ordinary and special services in the temple of Vithobā which are passed over here. Their essence is that the god is treated as if he were some high human person requiring bath, dress, songs, sleep against fatigue and so on. One thing, however, may be noticed that no women singers or dancers are connected with this temple of Vithobā in contradistinction to many temples in the Deccan and South India.

The image of Vitthal or Vithobā in the temple is about three feet and nine inches high and together with its base seems to be cut out of one block of trap. Its rough appearance is probably due to the effect of time. The image is standing with its arms *akambo* and hands resting on the hips; the left hand holds a conch and the right a *cakra* (discus). On the image are carved but so slightly as to be hardly noticeable except on close examination a waist cloth and round the waist a waist-band the end of which hangs on the right thigh. The ornaments consist of a necklace and in the long ears are ear-rings which touch the shoulders. On the head is a long round-topped cap. Mr.

1628. In *Gangaram Babaji and others* v *Narayan Annaji*, Printed Judgments of the Bombay High Court for 1891 p. 148 the High Court laid down with minuteness the rights, privileges and duties of the Benaris (the hymnists).

Kantak, the writer of the note on Pandharpur in the Bombay Gazetteer vol. 20, remarks (p. 424): "The dress and ornament of the image belong to a (time) little later than the Guptas, probably not later than the 5th or 6th century after Christ. As far as is known no other existing Vaisnava temple in India has an image of Visnu like the Pandharpur image, but there are two similar images of the third century after Christ in the Udayagiri brahmanical caves near Bhilsā ..... Like the Pandharpur image these are both standing figures with arms *akimbo* and hands resting on the hips and a conch and discus in the hands". Formerly pilgrims used to embrace the image and also touched the feet of the image. But since about 1873 the feet alone are allowed to be touched.

The Bombay Gazetteer (vol. 20 p. 431, note 2) states that the image of Vithobā was removed to various places at different times to save it from sacrilege by fanatic Moslem invaders and rulers. About 500 yards east of Vithobā's temple in the bed of the Bhīmā river is the temple of Puṇḍlik, one of the most favourite places of worship in Pandharpur. This last temple is not that of a god. It only marks the spot where Pundlik, a great devotee of Vitthal, spent his last days and died. Pundlik was probably a brāhmana from Pandharpur, originally an undutiful son who ill-treated his parents, but who later repented on seeing the dutiful cobbler Rohidās, changed his ways and became a very dutiful son, so much so that tradition says that god Viṭhobā came to visit him. Vithobā and Puṇḍlik have become so much coupled together that all pilgrims before beginning to dine and on other occasions shout the cry 'Pundalika varade Hari Vitthal'[1629]. The Bom. G. vol 20 (pp. 432–434) describes the temple of Puṇḍlik and narrates the traditional story about him

1629. The writer in Bom G. vol 20 translates the words पुण्डलीकवरदे हरि विठ्ठल as 'O' Pundalika, grant us a boon, Hari Vithal!". This translation does not appear to me to be correct. The cry is also in the form 'पुण्डलीकवरदा हरि विठ्ठल' (which is the correct one) In my opinion हरि विठ्ठल is only a vocative and the correct form is पुण्डलीकवरदा (for °वरद) and the whole cry means 'O Hari Vithal' that didst grant a boon to Pundalika'. Mr A K. Priyolkar kindly pointed out to me an *abhanga* from श्री ज्ञानेश्वरमहाराजांची गाथा (ed by Śrī Vināyakbuwā Sākhare, 1927) which runs as follows 'रखुमादेवीवरु तो। पुण्डलीकवरद तो मे बाई॥' (p 48) and another of Kānhopātrā (from 'Śrī-santa-gāthā' edited by Śrī Nānāmahārāja Sākhare, śake 1831) 'अगा पुण्डलीकवरदा। अगा विष्णु तूं गोविंदा॥' (p. 142)

Pages 434–468 of Bom. G. vol. 20 describe the several temples and shrines at Pandharpur such as those of Visnupada, Trimbakeśvara, Candrabhāgā, Janābai's cell, which are all passed over here. The river Bhīmā is styled Candrabhāgā within Pandharpur limits and its water is believed to possess sin-purifying power.

Several important and controversial questions arise in relation to Vithobā's temple at Pandharpur; viz. the date when the image of Vithobā was installed in the temple at Pandharpur, whether the present image is an old one or a substitute, what the ancient name of Pandharpur was, the derivation of the word 'Viṭṭhal'. As regards the first question it may be stated that there is not enough evidence to establish with certainty the time when the image was established[1630] But some of the items of evidence may be briefly set out here. In I A. vol. 14 pp. 68-75 Prof. K. B. Pathak published an inscription on a copper-plate found at Bendigere (about eleven miles south-east from Belgaum), the inscription being dated in *śake* 1171 (1249 A. D), in which Pandharpur is called Paundarikaksetra on the Bhīmarathī (at p. 74) and Vithobā is called Visnu and which records the grant of a village in Venugrāma district (Belgaum) to a number of brāhmanas by a minister of Yādava king Krsna (or Kanhara in the inscription) in the presence of god Visnu (p. 74) i. e. before the image of Visnu or Vitthala. Dr. R. G Bhandarkar in 'Vaisnavism, Śaivism &c', (p. 88) and in 'History of the Deccan' (2nd ed. p. 115-6) refers to an inscription on stone dated *śake* 1192 (1270 A. D.) in Pandharpur itself, in which Bhānu, son of Keśava, is represented as having performed the Aptoryāma sacrifice in Pāṇḍurangapura 'on account of which crowds and Vitthala were greatly pleased'. There is another earlier inscription in the temple of Vithobā on three sides of a stone beam in a *sopā* beyond the *mandapa* (porch) of 16 pillars, the script being Devanāgarī and the language being partly Sanskrit and partly Canarese. It was issued in *śake* 1159 (1237 A. D) by Hoysala king Someśvara and records the grant of an agrahāra to God Vitthaladeva who resides in a great village called Pandarage situated on the Bhīmarathī river and who

1630. Besides the Sholapur Gazetteer (Bom. G vol. 20) the following may be consulted. I. H. Q. vol. 11 pp. 771–778 (paper by Prof. B. A. Saletore on 'the Antiquity of Pandharpur'), Mr. G. H. Khare's monograph in Marāthi on 'श्रीविठ्ठल आणि पंढरपूर'), and Dr. Krishna's Archaeological Survey Reports of Mysore for 1929 pp. 197–210

made the heart of sage (*muni*) Puṇḍarīka expand (with devotion). Vide Bom. G. vol. 20 pp. 419–420 and pp. 4–6 of Mr Khare's monograph (on medieval references). The Mysore Archaeological Survey Report for 1929 (pp. 197–210) publishes a copper-plate inscription issued by the Rāstrakūta king Avidheya which records a grant of Pāṇḍaranga-palli and four other villages situated to the east of Mahādeva hill to a brāhmana named Jayad-vittha. This grant was confirmed about 820 A. D. by Rāstrakūta king Śarvarasa (i. e. Amoghavarsa I). The editor Dr. Krishna is of opinion that the date of the inscription must be 516 A D. (*ibid.* p 203). Therefore the important conclusion follows that Pandharpur was known to Canarese people as Pandarage and was also called Pāṇḍarangapallī. This inscription does not expressly refer to god Vitthala, but the donee's name Jayad-vittha contains the part Vittha which is most probably an early form of Vitthala.

In a work called 'Vitthalabhūsana' [1631] by one Gopālācārya about eleven verses are quoted from Hemādri on Tīrtha which are quoted below [1632]. Briefly they state an excellent tīrtha ex-

I am highly obliged to Pandit Balacharya Khuperkar of Kolhapur for sending to me these verses from the copy in his possession In the T S p 7 the verse पुण्डरीकं महातीर्थं is quoted from the Kūrmapurāna , on p 9 of T S. verses भैम्याश्चैव ..तत्फलम् are quoted from the Skandapurāna, as also verses अष्टा-विंशतिमे ...संयुत occur on pp 12–13 of the Tirthasāra with a few variant read-ings such as वेत्रोद्वेल्लितकङ्कण (which is a very good variant, for छत्रो.. कङ्कणम् and शक्तिमौलिविराजित for शिक्य० and दिव्यवस्त्रीति सौम्येन for दिग्वासाश्चातिसौम्येन. ists on the southern bank of the river Bhaimī and there is also a rare but fine image there; it is called Paundarīka-kṣetra and the greatest of gods viz. Pāṇḍuraṅga worshipped by the whole kṣetra resides there. It is three times holier than Puṣkara, six and ten times holier than Kedāra and Vārāṇasī respectively. Pundarīka practised severe austerities at the end of Dvāparayuga in the 28th Kalpa and always devotedly attended upon his parents. God Kṛṣṇa who was making a herd of cows graze on Govardhana hill became pleased with him for his devotion to his parents, Kṛṣṇa who wields a stick for driving cows, who has bracelets rendered bright by (the colour) of the umbrella[1633] (shade), who is adorned with a head-gear (*mukuta*) and a *śikya* (a loop) scintilating with the lustre of many jewels, who was very charming and had armlets studded with jewels, who does not (appear to) wear any *dhoti*, but has his loins covered with nickers, who is set off by a girdle of three strings tied on his waist and who stands with arms akimbo and appears possessed of three lines on his belly. Though a ms. of the Tīrtha portion of Hemādri's work has not yet been recovered, there is no reason to doubt that the verses were taken by Gopālācārya from Hemādri's work, particularly when almost all those verses are quoted by the T. S. (about 1500 A. D.) from the Skandapurāṇa and Kūrmapurāṇa. As Hemādri composed his work about 1260 to 1270 A. D. and as the verses quoted by him are cited from the Skandapurāṇa, it follows that several centuries before 1260 A. D. Pandharpur was known as a tīrtha, that the devotee and saint Puṇḍarīka (Marāthī 'Puṇḍlīk') also was so known then and that the image of Vithobā was essentially the same in appearance as it is now. That Pandharpur had risen in sanctity and importance in the 15th century follows from the fact that both the great Vaiṣṇava saints, Caitanya and Vallabha, visited it Vide Prof. S. K. De's 'Vaiṣṇava faith and movement in Bengal' p. 71 for

reads अन्तःसूत्रेण for गुह्यसूत्रेण, त्रिवृद्वलीकृतेनेशः कटिबन्धेन राजितः and शुद्धःनाशित्रय-नद्धाभ्यामूरुभ्या चातिशोभितः. त्रिवृतेनाऽकालेन—makes no sense. It has to be noted that गुह्यसूत्रेण or अन्तःसूत्रेण is mentioned separately from कटिबन्धेन and therefore गुह्यसूत्र or अन्तःसूत्र was something different from कटिबन्ध (waist-band). Probably the original reading was द्विन्वासाश्चातिसूक्ष्मेण गुह्यसूत्रेण for दिग्वासाश्चातिसौम्येन, where सौम्य conveys very little sense.

1633. This probably is a reference to the silver shade under which the image of Vithobā stood (Bom. G vol. 20 p 423).

Caitanya's visit and 'Śrī Vallabhāchārya' by Manilal C. Parekh (pp. 56–59) for Vallabhācārya's visit.

It has been already shown from the Bombay Gazetteer that there is a tradition about the image having been removed several times and brought back. On pp. 16–25 of his work Mr. Khare cites various passages from medieval writers in Sanskrit, Marathi and Canarese and comes to the conclusion that the present image is not only not the ancient one but that it was not there in the 17th century, since the characteristics of the present image do not tally with the description contained in the poems of saint Tukārām. I do not agree with his conclusions. He has overlooked several weighty considerations. He has relied upon inferences drawn from the presence of Afzulkhan and the bigoted emperor Aurangzeb in the Deccan. I have cited above (pp. 632, 692) references to the demolition of North Indian temples and images on the orders of Aurangzeb, but Mr. Khare has been unable to show any direct reference to the demolition of the temple or the image of Vithobā on the orders of any Moslem king or officer.[1634] We cannot rely on mere inferences or not properly authenticated letters or verses. Besides, the present image is so much worn that unless one very carefully

1634. It may, however, be stated that there is some evidence that efforts were made to demolish the *temple* of Vithobā by some Moslem king of Bidar and that the Badves (the guardians of the Pandhari temple) fearing destruction of the image removed it and concealed it somewhere else. In a Marāthi work called 'महाराष्ट्रमहोदयाचा पूर्वरङ्ग' by Mr. Narayan Krishna Gadre (1905) p 168 verses are cited from a life (completed in śake 1667 i e 1745 A D) of one Chāngā Mudheśa (who died in śake 1427 i e 1505 A.D.) written by his descendant Shamji Gosāvi Vañjarkhede (who was 11th in descent from Chānga Mudheśa) The Marāthi verses are: वेदरीचा राजा वामणी पातशहा। ब्राह्मणासी बहु छळियेलें॥ हिंदुधर्म जितुके तितके वर्जियेले॥ राऊळ विध्वसिलें पढरीचे॥ केलीसे मशीद महाद्वार मोडून। सातमास पूर्ण झाले यासी॥ मूर्ती सिंहासनाहूनि आच्छादिली। सुख हो देविली बहुयानी॥ verses 52–55 of the 7th chapter of the life. This was written two hundred and forty years after the alleged vandalism. Besides the same work mentions in verse 94 (chap 7) that Chāngadeva thought that the mosque should be demolished and a new temple (a complete replica of the old one) should be built Similarly, in शिवचरित्रसाहित्य part I p 68 (published by the Bhārata-itihāsa-samśodhaka-mandala of Poona) there is a letter dated in 1581 śake (i e 1659–60 A D.) in Marāthi which states that Shivaji killed Afzalakhan who had removed the image of Vitthal at Pandharpur and that at Tuljāpur. The letter is not properly authenticated and is not a reliable piece of evidence. I am obliged to Mr G H Khare of Poona for drawing my attention to these two pieces of evidence.

scrutinizes, it would be difficult to pronounce what articles it holds or what dress it wears. Therefore, there is great scope for differences of opinion on the characteristic features of the present image. Conceding for argument that the tradition about the removal of the idol is true, that does not establish that the present image is different from the one that existed in the 13th century or before. The present image has an elongated head dress which some may construe as a simple *mukuṭa* (crown) with a rim: but the pujāris and common people regard it as a Śivaliṅga and the rim as the rope of the *sīkya* that is carried on the back (by cowherds) The present image has ear-rings (as Mr. Khare admits) but they are so long that they rest on the shoulders The present image has *aṅgadas* (armlets) on the upper arms (and that is the description in the Skanda-purāṇa quoted by Hemādri) The present image has ornaments on the wrists (which the passage from the Skandapurāṇa also mentions). There is a girdle with three strings on the waist of the present image (in Sk. also we have 'trivṛtenānukāṭena kaṭibaddhena or kaṭibandhena rājitaḥ'). The present image [1633] does not clearly show that a *dhoti* was worn (and therefore one reading of the Skanda says that it is 'digvāsāḥ') but the Skanda adds that the image has arms akimbo. In my opinion the description in the Skanda-purāṇa (which must be held to be at least not later than about 1000 A. D.) tallies in essential particulars with the present image; therefore it follows that sufficient evidence has not been adduced to show that it is comparatively a new image and the proposition of Mr. Khare that it is a different one from the original should be held *not proved*. In the descriptions given by Tukārām and others (p 92 of Mr. Khare's book) actual, legendary and ideal elements are mixed up For example, Tukārām states that the god has 16000 wives (Mr. Khare's book

1633. Persons not familiar with ancient images or statues in stone might think that an image or statue is naked (*digvāsāḥ*) when as a matter of fact the sculpture itself shows that the image wears a *dhoti* and vais band and yet its private parts are shown as visible, probably because it was the intention of the sculptor to indicate that the garment was made of the finest texture and was transparent. For example, in 'History of Fine Art in India and Ceylon' by Vincent Smith, there is a figure of a Bodhisattva (on p. 143 No. 94) which is clearly draped in a dhoti and waistband and the private parts of which are yet visible. The Viṣṇu image from Mathurā (Plate VI) in a paper on Gupta Art in Journal of U. P Historical Society, vol. 18 pp 101–134 shows similar characteristics

p. 22 'Bailā soḷā hajāra' &c.). But Tukārām does mention the facts that the arms are akimbo, that there is no dhoti (*digambara*), and mentions the existence of a *śikya*, a stick, also a girdle and ornaments. Lastly, Mr. Khare does not attach sufficient importance to two facts, one being that about 1873 two Gosavis damaged the image which was later re-installed and pilgrims were forbidden from embracing it. It is quite possible that some of the features already indistinct were lost in these happenings (vide Bom. G. vol. 20 p. 430). Besides, for hundreds of years the image has been washed with pañcāmṛta (milk, curds, ghee, honey and sugar) and water at least once every day and sometimes several times a day. It is not difficult to imagine that the characteristic marks became blurred by these continual baths.

Some other matters require to be dealt with. The image is variously called viz. Pāṇḍuranga, Paṇḍhari, Vitthal, Vitthalanātha and Viṭhobā.

Visnu assumes in Prakrit the forms Vinhu, Vinnu, Venhu, Vetha and others. In Canarese Visnu becomes Bitti, Bittiga, Vitta &c. The changes in names do not necessarily follow the rules laid down in Prakrit or Canarese grammars, which rules themselves are often based on meagre data and Mr. A. K. Priyolkar in his learned paper on 'Bhagat Namdeo of the Sikhs' in the Journal of the University of Bombay vol. VII part 2 (1938) points out (p. 24) that in the Ādi Granth of the Sikhs, in the hymns of Namdeo, God is addressed as 'Bīthal' or 'Biṭhalu' (p. 24), that, in the Gujarati poems of Narsinh Mehta and Mirabai, God is addressed as Vitthala (p 35) and Viṭṭhala is employed by these saints meaning only Visnu and not the deity at Pandharpur. The learned Kāśīnātha Upādhyāya, author of Vitthala-rn-mantrasāra-bhāsya, derives the word Vitthala as (*Vit*+*tha*+*la*)[1636].

As regards the name of the ksetra it appears that originally it was called in Canarese Pandarage, of which Pāṇḍuranga is a sanskritized form. When Puṇḍlik, the devotee of Vitthal, became famous the sacred place came to be called Puṇḍarīkapura (as in Kūrma) and Pāuṇḍarīkapura (as in Skanda). Vide note 1632 above

The pilgrims to Pandharpur may be divided into two classes, regular visitors and occasional visitors. The first class comprise those called *Vārkarīs* (lit those who keep the fixed times). The *Vārkarīs* are of two sorts viz those who attend every month and those who attend twice a year (on the 11th of Āsādha-śukla and Kārtika-śukla). This cult of vārkarīs has been a great leveller. In theory and to a large extent in practice it ignores caste exclusiveness A brāhmaṇa vārkarī falls at the feet of a śūdra vārkarī. There are certain observances binding on all vārkarīs (for which, vide Bom. G. vol. 20 p. 471). The vārkarī carries a rosary of Tulasī (basil) beads, foregoes flesh-eating, observes a fast on *ekādaśī*, carries an ochre-coloured patākā (swallow-tailed banner) and is to speak the truth (and not to cheat) when engaged in his daily occupations.

Some people think that the image of Vithobā is really Buddhist or Jain. There is hardly any evidence for this. When such Marāthi poets and saints as Ekanātha, and Tukārām speak of Vithobā as Bauddhāvatāra they have Viṣṇu in mind,[1637] whose 9th avatāra was Buddha according to the Purāṇas and medieval writers.

The question of the attitude that modern Hindus should adopt towards holy places and pilgrimages will be briefly dealt with at the end of the next chapter on the list of *tīrthas*.

CHAPTER XVI

LIST OF TĪRTHAS

This is merely a list of tīrthas from the point of view of Dharmaśāstra and *not* a treatise on the Ancient Geography of India. The result is that many countries and towns that have no importance or claims as tīrthas have been altogether omitted. Bauddha and Jain works on tīrthas have only rarely been referred to Many of the Purānas enumerate the mountains and rivers of *dvīpas* and *varsas* other than those of Jambudvīpa and Bhārata-varsa such as Harivarsa, Ramyakavarsa, Krauñcadvīpa, Śālmalidvīpa, but they have been excluded from this list. The Brahmapurāna (chap. 26 verses 8–83) contains a string of over 520 tīrthas without hardly any certain indication of their location and the Bhīsmaparva in chap. 9 mentions about 160 rivers with practically no indication about their location in most cases Similarly, the Garuda (I. 81. 1–31) enumerates about 200 and Padma (VI. 129) contains 108 tīrtha names. In Banaras alone I have listed about 350 sub-tīrthas. But there are about 1500 shrines and temples in Banaras alone. These have not been included. Each great tīrtha has numerous sub-tīrthas as in the Varāha-purāna under Mathurā, in Brahma-purāna under Gautamī, in Vāyu-purāna under Gayā. Through sheer weariness or inadvertence some of these must have been left out by me and some were left out purposely on account of the absence of any importance Besides, several tīrthas that are regarded as sacred by modern people are not so treated in the Epics or purānas and are not even mentioned in them; many of these have been omitted in this list Our authorities are often very vague about the location or extent of tīrthas Moreover, a number of tīrthas scattered in different parts of India bear the same name (e. g. vide under Agnitīrtha, Kotitīrtha, Cakratīrtha, Varāhatīrtha, Somatīrtha) I am under great obligations to Cunningham's 'Ancient Geography of India' (ed. of 1872) and to Nundo Lal Dey's 'The Geographical Dictionary of Ancient and Medieval India' (1927). I have had occasions to differ from both, particularly from the latter. But, the space at my disposal being very limited, I could not enter into even brief discussions

in support of my views. It would look ungrateful to find fault with the work of Dey; but it must be said that he relies too much on rather old and antiquated authorities and has not cast his net over a wide area. Often times he mentions no original authorities (vide, for example, Cakratīrtha on p. 43). He is very vague in his references. He hardly ever cites the number of the verse on which he relies and often omits to specify even the part or section of the work relied upon. For example, at p. 13 as regards Avanti he mentions Pāṇini IV. 176, which should be IV. 1. 176. Further, he has omitted several well-known tīrthas (e. g. Daśāśvamedhika). He is sometimes wrong in what he says. On p. 54 he states that Kiskindhā-kāṇḍa 43 refers to Devadāruvana as a proper name, but there the context ('lodhrapadmaka-sandesu devadāruvanesu ca' in verse 15) shows that what is meant is 'forests of Deodar trees'). On p. 73 he says Bharatavarsa was first called Haimavata-varsa, but the passage of the Liṅgapurāṇa (I. 49. 7) on which he relies (idam haimavatam varsam Bhāratam nāma viśrutam) does not bear that out. There is no reference to a prior account here and all that is meant is that Bhāratavarsa is connected with Himavat, as a previous passage (I. 47. 23 Himādrer-dakṣinam varsam Bharatāya nyavedayat) expressly states that Bhāratāvarsa is to the south of Himālaya. In Śalya 44. 52 Sarasvatī is called Haimavatī, but that does not mean that Haimavatī was the name of Sarasvatī in far-off ages It simply means that it 'rises in Himavat range.' Only a comparison of the list prepared by me with Dey's work will show the difference in details between the two. I should not undertake that task and leave it to scholarly readers.

I have carefully read the two Epics and most of the Purāṇas. But I do not cite exhaustive references to all the texts where a particular tīrtha is mentioned. I feel satisfied with mentioning two or three. Owing to the several restrictions imposed upon myself this list cannot claim to be thoroughly exhaustive. But I hope that it is comprehensive enough and far larger and more informative than any list of *tīrthas* presented by any scholar so far. There is ample scope for industrious scholars to improve upon and to add to this list. I have included important tīrthas from Kashmir and given copious references to the Nīlamata-purāṇa, the Rāja-taraṅginī and the Hara-carita-cintāmaṇi. I am highly obliged to the Kashmir Report of Dr. Buhler (published as a special number for 1877

by the B B R A S), to Stein's notes in his translation of the Rāja-taraṅginī and his memoir on the Ancient Geography of Kashmir published separately (and also embodied in the 2nd volume of the translation of Kalhaṇa's work). All the names of tīrthas are transliterated into the English alphabet and arranged according to the English mode of spelling. For the Mahābhārata references are given to the oblong Bombay edition and by citing names of *parvans*, but in the case of the Rāmāyaṇa Roman figures I to VII are employed for the Bāla, Ayodhyā, Araṇya, Kiṣkindhā, Sundara, Yuddha and Uttara kāṇḍas respectively. For the Rāmāyaṇa I have used the edition brought out by the Madras Law Journal Press in 1933. Among Purāṇas the Ānandāśrama editions of the Agni, Brahma, Brahmavaivarta, Matsya, Vāyu and Padma have been relied upon and as to the rest of the Mahāpurāṇas the Veṅkateśvara Press editions have been used (except in the case of the Nrasiṃhapurāṇa of which the edition of Messrs. Gopal Narayan & Co. and the Bhāgavatapurāṇa, of which the Nirṇayasāgara edition of the bare text have been referred to). The Skandapurāṇa has been a source of great trouble and labour. Owing to the limited time at my disposal I have not been able to digest thoroughly the ninety thousand and odd verses of that purāṇa, though I have very carefully gone into the Kāśīkhaṇḍa and some other khaṇḍas. Besides, there are two separate recensions of the Skanda and large portions of it appear to be apocryphal and later additions. The seven big sections of the Skanda viz Maheśvarakhaṇḍa, Vaiṣṇava, Brāhma, Kāśī, Āvantya, Nāgara, Prabhāsa are indicated by Roman figures from I to VII and the sub-sections by Arabic figures. Some of these sub-sections have further sub-divisions into Pūrvārdha and Uttarārdha.

I have made endeavours to locate the tīrthas as far as possible. Inscriptions have been drawn upon in several cases for locating the tīrthas and for their antiquities and history. The principal Sanskrit authorities (except Kalhaṇa) are often very vague as compared with even foreign writers like Hiouen Thsang, Alberuni and Abul Fazal. Where I was not myself sure I have given references to the texts alone, and in some cases to the views of Cunningham, Dey, Pargiter and others. If the same name happens to be given to different tīrthas located at different places, I have indicated the several different places bearing the same name by employing the capital letters

A, B, C and so on. I may state that I have hardly ever remained content by borrowing references to Sanskrit authorities given by my predecessors, but have seen personally each reference to Sanskrit works except where I expressly state from whom I borrow a particular reference. Sorensen's Index of the Mahābhārata and the Vedic Index of Macdonell and Keith have been used in several places. I have also derived material help from the volumes of the Imperial Gazetteer and from the several volumes of the Bombay Gazetteer. The same may be said about Wilson's translation of Viṣṇupurāṇa (ed. by Hall, 1864-1877), Pargiter's notes to his translation of the Mārkaṇḍeyapurāṇa, Dr. B. C. Law's paper on the 'mountains and rivers of India' in the Journal of the Department of Letters, Calcutta University, vol. 28 and Dr. Hemchandra Raychaudhuri's 'Studies in Indian Antiquities' (1932), and the paper on 'Ancient towns and cities in Gujarat and Kathiawad' in I.A. vol. 54. I have consulted only a few Māhātmyas of tīrthas. Recently, Prof. V. R. Ramchandra Dikshitar of Madras has published a useful work 'The Purāṇa Index' (volumes I and II covering over 1400 pages) which collects material from five Purāṇas only viz. the Bhāgavata, Brahmāṇḍa, Matsya, Vāyu and Viṣṇu. The two volumes reach up to the Sanskrit letter 'ma' only. I, for my part, do not agree with much that he says about the age of the Purāṇas in general and of the five Purāṇas (which he has digested) in particular, but this is not the place to go into that question. Besides, his work has to be used with some caution. In several places the work is misleading. To take only a few examples. On p. 547 he lists 'Godhūma', makes the remark 'fit for śrāddha' and cites four references from the Viṣṇupurāṇa alone. One may *prima facie* think that Godhūma is here some place fit for śrāddha. As a matter of fact in all the references from the Viṣṇupurāṇa 'Godhūma' means 'wheat' and nothing more, which no doubt is fit *food* for śrāddha. But other fit things such as 'ikṣu' (declared to be fit for śrāddha by Vāyu 78. 7-8) are not included at all. On p. 123 Aśokavana is not a proper name, but only a forest of Asoka trees, as the preceding word 'drākṣāvana' (in Vāyu 38. 68) indicates. So also Kamalaprabhava (not 'prabhavā' as printed on p. 316 of vol. I) is not a river (in Matsya 163. 62, Ānandāśrama ed.) but is only an adjective of the word Śona that follows. On p. 316 of vol. II he states that the river Pārā rises from Ṛśyavān, but the Matsya 114. 24 on which he relies says it springs from Pāriyātra. On the same page he gives the entry 'Pārāvārātata sacred to

Matā'. This makes no sense. Pārāvāratata would mean 'the shore of the sea'. What is really meant is that Devī is styled or worshipped as Pārā on the bank of the Pārā river (Pārā Pārātate matā). He does not compare the readings of the several printed editions of the five purānas. Besides, the information furnished is very meagre. If the whole had been printed in a compact form far more information could have been given in the same number of pages.

In some places I have indicated the rewards promised for bathing in the tīrthas; but I have not done so in every case. The purānas promise one or more of the following rewards viz, the same merit as the performance of Aśvamedha or Vājapeya or other solemn Vedic sacrifices or reaching the highest worlds such as those of Brahmā, Visnu or Śiva, the destruction of the gravest sins such as brāhmana murder, the same merit as arises from gifts of a thousand cows &c.

Many of the doubts and difficulties about the identification of several tīrthas can, if at all, be solved only by means of actual journeys to various places and investigations on the spot. That is a task which would require for its proper accomplishment a team of workers. A single individual can hardly attempt such a task with his own resources.

This list will, it is hoped, be of some use in elucidating several problems such as the questions about the relative antiquity of the purānas, the dates of several Sanskrit works which mention the tīrthas and the questions about borrowing on the part of purānas among themselves and from the Mahābhārata.

Daśārṇa is a word meaning a country having ten forts or 'a river (Daśārṇā) having ten waters' The Vārtikas are 'pra-vat-satara-kambalavasaṇāṇām carne' and 'rnadaśābhyām ca'. Meghadūta I. 23-24 show that the capital of the Daśārṇa country was Vidiśā (modern Bhilsā) and the Vetravatī (Betwa river) was near it It is the Dosaron of Ptolemy (p. 71) Br. NM 152–153 say that it is holy like Iṛāvatī, is identified with Umā and located in Madra i e. between Rāvī and Chenab Pāṇ (VII.3 1) expressly mentions the river Devikā and the Mbh thereon gives the illustration, 'Dāvikāḥ śālayaḥ' (paddy grown on the banks of the Devikā is so called). Pāṇini probably mentions some river in the Panjab. Dey p 55 says that the southern portion of Sarayū is called Devikā or Devā. Vām 84. 12 refers to Devikātīrtha brāhmaṇas. SK VII Prabhāsa-māhātmya, chap. 278 66–67 speak of Mūlasthāna (modern Multan) as situated on the Devikā, P I. 25 9–14 (5 yojanas long and ½ yojana wide). In Vi. II 15 6 the city called Vīranagara is said to be situated on the bank of the Devikā and as founded by Pulastya Devikā is not Sarayū, as in the Anu 165. 19 and 21 they two are separately named. Br. S. 11 35 says that a certain malignant Ketu would strike down even Devikā in the north. Pargiter (tr of Mār, p. 492) identified it with the river Deeg or Degh in the Punjab, Dr. V. S. Agrawala with the Vular lake in Kashmir (J. U P. H. S. vol. 16 pp 21–22) and Mr. Jagannātha (in J. U. P H.S vol 17 part 2 p. 78 supports Pargiter With respect I agree with Mr. Jagannātha

Dvārakā—A-the name of this holy city does not occur in the Vedic Literature but the references to it in the Mahābhārata and the Purāṇas are plentiful. It is one of the seven holy cities Vide p 678 It appears that there were two Dvārakās, one more ancient than the other The ancient Dvāralā was situated near Kodinar. A little mound which rises on the sea-shore between the mouths of the rivers Somat and Singāvra

three miles from Kodinar is surrounded by the ruins of a temple which popular Hindu belief declares to be the original Dvārakā, where Kṛṣṇa resided and whence transferred himself to Dvārakā in Okhamandala. Vide Bombay Gazetteer, vol. VIII. (on Kathiawar) pp. 518–520 for Kodinar and p 552 for Mūla Dvārakā. It was founded by Krsna (with Raivataka as a park and Gomanta as a hill) owing to constant invasions and harassment by Jarāsandha; it was two yojanas long and one yojana broad. Vide Sabhāparva 14. 49–55. The Var. (149. 7–8) makes it 10 yojanas long and 5 broad Vide p 688 above under Mathurā. B (14. 54–56) says that the Vṛṣṇis and Andhakas left Mathurā through fear of Kālayavana, took counsel with Kṛṣṇa, ran to Kuśasthalī and built up Dvārakā: Vi V. 23. 13–15. B 196 13–15 say that Krsna begged of the ocean a strip of twelve yojanas, built Dvārakā with large parks, mansions and strong walls and established the people of Mathurā there. When Krsna passed away, the city was flooded by the sea and swept away, as stated in a prophetic vein by Mausala-parva 6.23–24 and 7. 41–42, B 210. 55 and 212. 9. Vide also Vi. V. 38 9 (the whole of Dvārakā except Krsna's palace was swept by the sea) and BV IV. 129. 44 (except Rukmiṇī's palace). It is called the capital of Ānarta (Udyoga 7. 6) and was first called Kuśasthalī (Sabhā 14. 50) Vide M 69. 9 = P. V. 23. 10, B. 7.29–32 and Ag 273. 12 (Kuśasthalī being the earlier name of the capital). The present Dvārakā is near Okhā in Kathiawar. The *Harivaṃśa* II (Viṣṇuparva) chapters 58 and 98 deal with the founding of Dvārakā Some ancient Jain works like the Uttarādhyayanasūtra (SBE. vol. 45 p.115) mention Dvārakā and Raivataka park (Girnar). The Jātakas also refer to Dvārakā. Vide Dr. B C. Law's work on 'India as described in early texts of Buddhism and Jainism' pp. 102,239. The Prabhāsakhaṇḍa of the SK has a sub-section on Dvārakā in 44 chapters and over 2000 verses for the glorification of Dvārakā. It says 'the reward that is secured by (pilgrimage to) Vārāṇasī, Kurukṣetra and Narmadā can be secured at Dvārakā in half a twinkle (4. 52)'; "Pilgrimage to Dvārakā is the 4th means of *mukti*. Man secures mukti by acquiring correct knowledge about Brahman or by dying at Prayāga or by mere bath in Gomatī near Kṛṣṇa" (SK. VII. 4. 4. 97–98). The BV. (Kṛṣṇajanmakhaṇḍa, Uttarārdha chap. 103) has a hyperbolical description of the creation of Dvārakā, which is said to have been one hundred yojanas in extent. There is a work called Dvārakā-pattalaka compiled by Bīnābāyī (the only Ms. of which is the one at B O. R I. in Poona) which has been published by Dr. J B. Chaudhuri (1940). The Ms is dated *saṁvat* 1574 (1518 A. D). It summarises the Dvārakāmāhātmya in SK. A pilgrim on reaching Dvārakā first worships Gaṇeśa, then Balarāma and then Kṛṣṇa; he visits Rukmiṇī's temple on the 8th, 9th or 14th *tithi*, then visits Cakratīrtha, then Dvārakā Gaṅgā, then Saṅkhoddhāra, then bathes in the Gomatī. The temple of Dvārakānātha is on the north bank of the Gomatī creek. The main temple has five stories, is about 100 feet high from the ground and is surmounted by a conical spire rising to about 150 feet. Vide Dr. A. D. Pusalkar's paper in the Dr. B. C. Law presentation volume I pp. 218 ff. for further information on Dvārakā:

Dvāravatī—Same as Dvārakā It contained the temple of Nāgeśa, one of the twelve Jyotirliṅgas The Kāśikhaṇḍa (7. 104-105) states: 'since in this city there are entrance gates for all the four varṇas it was named Dvāravatī by the learned Where even the bones of beings are marked with the sign of the wheel (discus), what wonder is there if the hands (of men) are marked with the figures of a conch or wheel?' In a Dvārakā-māhātmya stated to be taken from the Skānda-purāṇa (D C. Ms. No. 49 of 82-83, copied in *saṁvat* 1529 i. e. 1472-73 A. D.) it is stated that Mathurā, Kāśī and Avantī are easy of access (sulabha), but Ayodhyā, Māyā and Dvārakā are difficult of approach in the Kali age and in Ms D. C. No. 63 of 1875-76 it is said that the end that the city is called Dvāravatī because it is the way to mokṣa. It is identified by Yule and others with Barake of the Periplus (Ptolemy pp. 187-188.)

Ekāmraka—(in Utkala, Orissa, about 20 miles from Cuttack) This is Rudra-tīrtha Ekāmraka is the ancient name, the modern one being Bhuvaneśvara. It was also called Kṛttivāsa B (chap 41. 10-93) describes and glorifies this tīrtha, all those verses being quoted in T C pp 176-180 It is said to be the destroyer of sin, equal to Benares, and as having eight sub-tīrthas and it was so called because in former ages there was one mango tree (B. 34 6 and 41 10-93) Vide Hunter's 'Orissa' vol. I p 231-241 and Mitra's 'Antiquities of Orissa' vol. II pp. 56-98 for history, description, daily services and festivals &c. The chief temple is 160 feet high from the base to the top of the *kalaśa*. In the Bhuvaneśvara Inscription (edited by Dr L. D Barnett) in E I, XIII p 150 it is stated that Candrikā, daughter of the Ganga king Anaṅga-Bhīma and widow of Haihaya prince Paramardin, built a temple of Viṣnu at Ekāmra In that inscription among other matters there is a laudation of Utkala, of the sanctuary of Ekāmra and of the lake *Bindusaras* (mentioned in B 41. 53-54). The date of the inscription is doubtful. But it is between śake 1101-1200. There is a vast number of temples and shrines here. Haridvāra—(same as Gangādvāra and Māyāpurī) It is in the modern Saharanpur District in U. P and on the right bank of the Ganges. It is one of the seven holy cities (vide pp 501 and 678) P. IV 17 66, VI 21.1, VI 22 18, VI 135.37 (Māndavya practised penance here) See Beal's BRWW vol I p. 197, where Hiouen Thsang states that men of the five Indies call it the Gate of Gangā and that hundreds and thousands of people gather to bathe and wash. I do not agree with Cunningham (A G. p. 353) that Haridvāra is a comparatively modern name, since Alberuni mentions only Gangādvāra Both SK IV and P IV mention Haridvāra and it cannot be said that they both are later than Alberuni (i. e 1030 A D.). Probably Gangādvāra was a more popular name in the 11th century than Haridvāra. Al (vol. I p 199) tells us that the source of the Ganges is called Gangādvāra

In V. 158.19, Udyoga 11.12 and Pān. IV. 4 112 Himavat is mentioned and in K. II, 37 46-49 its length is given as 1080 yojanas. It is the Varsaparvata of Bharatavarsa and the other seven chief mountains mentioned in note 1260 are 'Kulaparvatas'. M 117-118 contain fine descriptions of trees, flowers, birds and beasts on it Himālaya occurs in non-vedic works, e. g. Gītā X. 25 Himavat meant the whole mountain range stretching from Assam in the east to the mountains west of Panjab. Mār 51.24 states that Kailāsa and Himavat stretch from east to west and are situated between two seas and that Himavat is to the north of Bharatavarsa (which has seas on south, west, and east) like the string of a bow (Mār 54.59)

Kāśmīra-mandala—The ancient name seems to have been Kaśmīra. The Mbh (vol II p. 119) on Pān III. 2 114 employs this form (ābhijānāsi Devadatta Kaśmīrān gamisyāmah) Kaśmīra as the name of a country occurs in the Sindhvādigaṇa (Pān. IV. 3. 93). In NM the country is called Kaśmīra in many verses such as 5, 11, 43, 50, but sometimes Kāśmira also Later works also like H. C 14 45 employ the form Kaśmīra, the Vik (18 1 and 18) uses the form Kāśmīra. NM (292–93) derives the name from *ka* meaning water (kam vāri Hariṇā yasmād-deśād-asmād-apākrtam | Kaśmīrākhyam tato hyasya nāma loke bhavisyati ||) Ptolemy speaks of it as Kaspeiria and states that the country was situated below the sources of Bidaspes (Vitastā), Sandabal (Candrabhāgā) and Adris (Irāvatī) Vide Ptolemy pp 108–109 and NM 43. The Vanaparva speaks of the whole country of Kāśmīra as holy (130 10) Ain. A. (vol II p. 354 notes that the whole of Kāśmīra is regarded as holy ground Vide also V 82. 90, S 27 17, Anu 25. 8 According to a treaty in 1846 with the Maharaja of Kashmir and Jammu the territories of the Maharaja are 'situated to the eastward of the river Indus and westward of the river Rāvi' I G I vol. XV p 72. The Kashmir valley is approximately 84 miles in length and 20 to 25 miles in breadth (I. G I vol XV p 74) Stein (SM p 63) says that its extent is confined to the great valley drained

' by the head waters of the Vitastā and to the minor slopes of mountains that surround it. Hiouen Thsang (Beal's B R W W vol 1. p 148) states that 'Kāśmīra kingdom is about 7000 *li* (one *li* being equal to about $5\frac{1}{7}$ miles), that as the country is protected by a dragon it has always assumed superiority among neighbouring people, that they love learning and are well instructed and that (p. 149) the country was once a dragon lake and that afterwards it became dry' The words of Hiouen Thsang refer to an ancient legend according to which Kashmīr was originally a lake (called Satīsaras) 6 yojanas long and 3 yojanas wide and later became Satīdeśa (NM 64–66), that Umā herself is the country of Kāśmīra (NM 31), that the divine Vitastā rising in the Himālayas is like the *sīmanta* (line parting the hair) of this holy land (NM 45) The legend runs that Viṣnu conferred a boon on Vāsuki-nāga who prayed to Viṣnu when Garuda began to devour all nāgas that he should stay in the Satīdeśa along with the other nāgas, that no enemy would kill any nāga (NM 105–107) and that Nīla was made king of nāgas in the Satīdeśa (NM 110). The residence of *Nīla* is the famous fountain near the village of Vernāg in the Shahabad *pargana*. A certain demon called Jalodbhava grew in the Satī lake and killed men (NM 111–123 and Vām. 81 30–33) Nīla approached the sage Kaśyapa the father of all Nāgas, at whose intercession Viṣnu asked Anantanāga to pierce the hills and make the lake dry and then killed the demon Jalodbhava (R I 25) Then Viṣnu asked the Nāgas to live in peace and harmony with men Satī became the river Vitastā Vide Kūrma II. 43 4 Nāga in Kashmīr means the tutelary deity presiding over the several holy springs, pools and lakes in which Kāśmīra abounds. Both NM (1130–31) and R (I 38) state that there is not a spot in Kāśmīra even as small as a grain of sesamum which is not a tīrtha and has not a nāga as its presiding deity In Ain A (vol II p 354) Abul Fazl notes that there were in his day 45 shrines of Mahādeva, 64 of Viṣnu, 3 of Brahmā and 22 of Durgā and that in 700 places there were graven images of snakes which were worshipped and about which wonderful stories were told. R (I 72) and NM (313–314) say that the country of Kāśmīra is Pārvatī, that the king thereof should be deemed to be a part of Śiva and that none who desires prosperity should disobey (or disrespect) the king R (I. 42) summarises in one verse the peculiar features of Kāśmīra viz 'learning, lofty dwellings, saffron, water containing ice and grapes, these are common here, although rare in the three worlds'

Kokāmukha—(or Varāhaksetra, on the Triveni above Nāthapura in Purnea District) V 84 158, Anu. 25 52, Var. 122 (is Kokāmukha-māhātmya), 123 2, 140 10-13 (q by T. K pp 213-214), B 219 8-10 (gods asked a damsel '*Kāsi bhadre prabhuh Ko vā bhavatyāh*'), K. I. 31 47, II. 35 36

(it is a Viṣṇutīrtha), P. I. 38.65; Var. (140.60-84) says that the kṣetra is five yojanas in extent and that there is an image of Viṣṇu in the Boar incarnation Vide E I vol. 15 pp. 138-139 for an Inscription of Budhagupta recording the installation of Kokāmukhasvāmin, and Dr B. Kolāhala—(a m.) Vā. 45 90, 106. 45, Br. II 16 21, Mār. 54 12, Vi. III 18. 73; same as Brahmayoni hill according to Dr. Mitra. Vide pp. 646. 656 above. According to the Ādi. 63. 35 it is in Cedi country and barred the flow of river Śuktimatī

Kolāpura—(modern Kolhāpur, one of the Devīsthānas) Devī-Bh. VII 38. 5, P. VI. 176. 42 (where there is a shrine of Lakṣmī), 182. 1 (asti Kolhāpuram nāma nagaram Dakṣiṇāpathe) and 11. Acc. to Br. IV. 44. 97, it is sacred to Lalitā. In a grant of Śilāhāra Vijayāditya of *śake* 1065 (1143 A.D.) occurs the word Ksullakāpura, which is another name of Kolhapur; E. I. vol. III. p. 207 at pp. 209-210. The grantor is described as 'one who has obtained the favour of a boon from goddess Mahālakṣmī'. In the Sanjan plates of Amoghavarsa I of *śake* 793 (871 A. D) it is stated that the king, in order to ward off some public calamity, cut off his left finger and dedicated it to goddess Mahālakṣmī (E I vol. 18. p. 235 at p. 241). This Mahālaksmī appears to be the same as that of Kolhāpur. Vide I. A. vol. 29 p. 280 for Kollāpura.

Kollagiri—Ag. 110 21, Bh. V. 19. 16

Konārka or Konāditya—(in Odra i. e. Orissa, about 24 miles north-west of Jagannātha Purī). It means 'the sun of Kona'. Konākona appears to have been the ancient name. It is a most exquisite memorial of sun-worship. It contains magnificent ruins of a temple of the Sun, which was built by the Gaṅga king Narasimhadeva (1238-1264 A.D.). It is a glorious and most beautiful example of north Indian Hindu architecture ever erected. It had a tower over 180 feet in height and a porch (*maṇḍapa*) in front of 140 feet high. See Mitra's 'Antiquities of Orissa' vol II pp. 145-156 and Hunter's 'Orissa' vol I p. 288 and 'Sungod of Konārka unearthed' (with illustrations) in *Modern Review* for 1945 pp 67-72 The Sun temple shows some of the finest animal sculptures executed in India. Vide B. 28, verses 2, 9. 11, 47, 65 and 29.1 and T. C. pp. 180 ff. It is probably the Kannagara of Ptolemy (vide Ptolemy p 70)

Kośalā—(r. near Ayodhyā) P. I. 39. 11, VI 205 13, 207. 35-36, 208. 27. In a grant of Vākāṭaka king Narendrasena he is praised as honoured by the kings of Kosalā (Kosala), Mekala and Mālava. Vide E. I vol. IX p. 271.

VI. 113 25, Vām. 13 30, B Vām 78. 7, 90. 2 (Viṣnu as Hayaśīrṣa on the river); compared to its length and modern importance the river Kṛṣṇā is rarely mentioned as Kṛṣṇā, but generally as Kṛṣṇa-Venyā or-Venā It is the third largest river of the Deccan and southern India, the other two being the Godāvarī and the Kāverī In the Mahābaleśvara *mahātmya* (JBBRAS vol. X. at p. 16 five rivers called Gangā are said to rise from the top of Sahya near Mahābaleśvara viz. Kṛṣṇā, Venī, Kaḷudmatī (Koynā), Sāvitrī (that falls into the Arabian sea near Bānkot) and Gāyatrī (supposed to combine with Sāvitrī).

In the Alas plate of Rāṣtrakūṭa Govind II dated *śake* 692 (769 A D.) the confluence of Kṛṣnaverṇā and Musī is referred to (E I vol. VI. 205).

Kṛṣṇā-Venyā—(as one river and same as above) P. VI. 108, 27 (confluence of Kṛṣnā and Venyā), VI. 113 3 and 25 (Kṛṣnā is the body of Kṛṣṇa), Sm. C I p 132 gives a mantra for the bath in Kṛṣnā-Venyā Vide, *TS pp.* 67-83, of which p. 70 states that all

rivers rising from Sahya destroy sins the moment they are remembered and that Kṛsna-Venyā is the best of all such rivers. Māhuli about four miles from Satara is at the confluence of Kṛsnā and Yennā (which stands for Venyā).

Kṛsna-Venī—(same as above two) M. 114. 29, Rām V 41. 9 In T S. pp. 67–83 there is a *māhātmya* of Kṛsnaveni from SK.

Kṛtamāla—(r. rising in Malaya) Vā 45 105, B 27 36, M 114 30, Br. III. 35 17, Bh VIII 24 12, X 79. 16, XI 5. 39, Vi II 3. 13. Dey p. 104 says that it is the river Vaiga on which Madurā is situated. Kṣiprā—(r. rising in Vindhya m.) M. 114 27, Vām, 83 18–19 Some printed works write it as Śiprā (Vāyu 45. 98) or Siprā The printed Matsya says that Kṣiprā rises from Vindhya, while in 114.24 it mentions Śiprā as rising from Pāriyātra m. The printed Brahma (chap. 27) mentions Siprā twice, one rising from Pāriyātra (verse 29) and the other rising from Vindhya (verse 33). It is doubtful whether there were two rivers of the same name The Brahmānda II 16 29 and 32 (Kṣiprā in both places) is just like the Brahma

I. 81. 10 hold it a very eminent place for śrāddha Var 125. 101 and 132 and 126. 33 appear to identify it with Māyātīrtha (i. e Haridvāra) Var. 126 contains a māhātmya of this place and 23 verses of it are quoted in T.K pp. 206–208 without a single word by way of comment Chap. 126. 10–12 explain why it is so called (a mango tree was seen by sage Raibhya as informed by God and he became bent in reverence). There is doubt about its exact

location. Var. 179. 26–31 aver that Mathurā is superior to Saukara-tīrtha, which again is superior to Kubjāmraka. Var 140.60–64 explain how the holy place Hṛsīkeśa came to be so called. On the whole it is better to take Kubjāmraka as a sacred spot in Haridvāra itself or very near it.

Naimisa or Naimiśa—(a forest) A country round Nimsār on the Gomatī, 45 miles from Lucknow In hāthaka Sambitā X. 6 we have 'Naimisyā vai sattram-āsata'; while in Pañcavimśa Br 25. 6, 4 occurs Naimisīya and Kausītaki Br 26 5 has Naimisiyānām' and 28 4 also In the great Epic and Purānas it is mentioned very often, vide V 84 59–64 (all tīrthas on the earth are centred in Naimisa), V 87. 5–7 (on Gomatī in east), M 109 3 (most holy on the earth), K. II 20 34, K II. 43 1–16 (very dear to Mahādeva), Vā 2 8, Br. I 2 8 (bo'h derive it as 'bhramato dharmacakrasya yatra nemir-aśīryata' from 'nemi' rim of a wheel and śr 'to be shattered'), B 1. 3–10 (fine description), Vāyu (I 14–15) makes it clear that the great sattra of the sages of Naimiśāranya was in Kuruksetra on the Drsadvatī But Vā 2,9 and Br I. 2 9 say that it was on the Gomatī. It is possible that Gomatī is only an adjective. It was here that enmity between Vasistha and Viśvāmitra flourished, Kalmāsapāda was cursed by Śakti and Parāśara was born. Vi. III. 14 18 states that by a bath in Gangā, Yamunā, Naimiśa-gomatī and other rivers and by honouring pitrs one destroys all sins B—Br S XI. 60 says that a malignant Ketu in Uttarā-Bhādrapadā destroys king of Naimisa,

Sārasvatatīrtha — Śal 50 (story of Asita Devala and Jaigīṣavya), 51 (birth of Sārasvata from Sarasvatī, who taught the Vedas to sages in a drought for twelve years)

Sarasvatī—(modern Sarsuti) A—The river starts from Brahmasaras, acc to Śalya 51 19, from Badarikāśrama acc. to Vām. 2 42–43 and from Plakṣa tree acc. to Vām 32 3–4, P. V 18 159–160 (say that Sarasvatī was asked to cast the Vāḍava fire into the sea in the west) This is probably an allusion to volcanic action whereby Sarasvatī disappeared Vām. 3 8 says that as Śaṅkara guilty of Brahmahatyā plunged into it, it disappeared, while elsewhere (e g in V. 130 3–4) it is said that it disappeared through fear of the touch of śūdras, Niṣādas and Ābhīras and Anu. (155 25–27) states that Sarasvatī went to Marudeśa owing to curse by Utathya and became dry and unholy. After disappearing it becomes visible at Camasodbheda, Śivodbheda and Nāgodbheda The Sarasvatī in Kuruksetra was called prāci Sarasvatī (P V 18. 181–182). See Dey pp. 180–181 for several Sarasvatīs V 130 1–2 state that those who die on the Sarasvatī go to heaven and this was the blessing conferred by Dakṣa when he performed a sacrifice there Vide Oldham's paper in JRAS for 1893 pp 49–76, B—There is another holy river of the same name rising in the south-west end of Aravalī hills and flowing south-west through the districts of Palanpur, Mahikantha and Baroda and past the ancient cities of Anhilvād and Siddhapur and falling into the lesser Runn of Cutch Vide under Prabhāsa

Sarāvatī—(Probably Rāpti in Oudh) Bhī 9 20, Pāṇ VI 3 120 (Śarādīnāṁ ca) knew the river Śarāvatī, Kṣīrasvāmin (in com. on Amara 'Śarāvatyāstu yoṣvadheḥ') quotes a verse 'prāgudañcan vibhajate hamsaḥ kṣīrodake yathā | viduṣāṁ śabdasiddhyarthaṁ sā naḥ pātu Śarāvatī ||.' Dr. Agrawala in (J.U.P H.R S. vol. 16 p 15 surmises that it is the Ghaggbar flowing through Ambala District I have grave doubts about

this. It is possible that when the Sarasvatī became dried and only a marshy bed was left it was called Śarāvatī, but that in the times of the Amarakośa, Śarāvatī is probably the river Śarāvatī which falls into the sea near Honavar (North Kanara District) on which are the famous Gersappa falls. In the Raghuvaṃśa (XV. 97) Śarāvatī is said to have been the capital of Lava, son of Rāma

Sarayū—(r) Rg IV. 30 18, V. 33. 9, X 64 9 (Sarasvatī, Sarayu and Sindhu are mentioned together), In all these places the word is Sarayu, while in classical Sanskrit it is Śarayū or Sarayū (M 22. 19, Vā 45 94, N II. 75. 71, Raghuvaṃśa 15 95 and 100). M. 121 16-17 and Br II. 18 70 show that Sarayū springs from the Mānasa lake situated at the foot of the Vaidyutagiri Ayodhyā was situated on the Sarayū (Rām II. 49. 15) Sarayū rises from Himālaya (Vā 45 94, M 114. 21) According to Pān VI. 4 174 (Dāṇḍināyana—) the water of Sarayū was called Sārava (Kāśikā says 'Sarayvām bhavam sāravam udakam') In the Cullavagga (SBE vol XX p 302) it is one of the five great rivers of India and in 'Questions of Milinda' (SBE vol 35 p 171) it is one of ten great rivers, but in both places it is written as Sarabhū. Vide T P pp 500, 501 where it is stated that it rises from the left toe of Viṣnu and is joined by Ghargara It is the Sarabos of Ptolemy (p 99). It is also called the Ghogra or Gharghara

CONCLUDING REMARKS ON TĪRTHAS

At the end of this long list of tīrthas a few words, as promised on p. 722 above, must be said about the attitude that we Indians of the 20th century should adopt towards the mountains, rivers and other holy places in Bhārata. Modern secular education and the prevailing economic conditions, stresses and trends leave hardly any room for moral and spiritual uplift. We are surrounded on all sides by anxiety, want, misery, hardness of heart and crime. Therefore, the endeavour of all those who have the good of our country at heart must be to cherish all such institutions as tend to lift the mind out of narrowness and to make it concentrate for some time at least on noble thoughts and aspirations and on detachment from the all-engrossing pursuit of money. Pilgrimage is one of such institutions. Those who have faith in pilgrimages as enabling a pilgrim to attain heaven, to collect merit and reach release from saṃsāra should give pilgrimages a new orientation, should see that their charity is not wasted on indolent, ignorant and vicious priests, should improve the methods of worship at holy places in such a way as will satisfy all hygienic requirements. The priestly class at holy places should remember that in the coming generations they are likely to find their occupation gone, unless they improve themselves, unless they try to be less ignorant and indolent than they are at present and really serve as honest business agents or Travellers' Guides The number of people visiting holy places in the belief of accumulating merit is sure to become less and less, as modern secular education spreads. But it would be a calamity for the moral and spiritual greatness of India if pilgrimages to holy mountains and rivers came to be stopped altogether. I would very strongly recommend to all men, however highly educated, the undertaking of pilgrimages to certain hallowed spots. Our country has recently secured independence and it now rests entirely with us to make or mar the character of the teeming millions of this our land. All things that tend to create in Indians the deep feeling that amidst diversities of physical features, food, dress and habits, all of them are one people, that there is no part or district of this vast land which cannot claim to have made some substantial contribution in religious and philosophical thought, in abiding literature, in works of art and in holy places, that the destinies of the Indians

of one part of Bhārata are bound up with the destinies of all others. Frequent visits to distant places in Bhārata, mixing up among people of other parts and understanding their peculiar good points, needs and failings is absolutely necessary if we are to keep our freedom. India is thrice blest in the mountain ranges of the Himālaya, which contains the highest peaks in the world and is full of large and life-giving rivers and of numerous shrines associated with the names of the greatest sages and heroes of antiquity. Every Indian who is proud of the great religious and spiritual heritage of our country must make it a point to devote some part of his time to frequenting holy mountains, rivers and other places of pilgrimage. When we see even from a distance the purity, the whiteness and the serenity of the snow-capped peaks of the Himālaya, the play of delicate and exquisite hues and tints of blue, mauve, and pink when the sun begins to shine on them, a sense of wonder, joy and elevation comes upon us. The glorious view of a peak like Kinchinjunga, which is an unforgettable experience, lifts up the whole life of the onlooker to a higher plane for long. Similarly, the sight of the holy Ganges at night or at sunrise in Haridvāra or on the majestic Ghats in Banaras surely empties our minds of meanness and for the moment at least fills our hearts with a sense of nature's beauty and with purity, and brings us in tune with the Infinite. I may state here that the talk of the conquest of Everest in which some members of European expeditions indulge jars on my ears. This great peak has so far vanquished (physically) all those who attempted the conquest § But in a figurative sense Everest and other high peaks have been for ages conquering the hearts of men. Even the members of these expeditions will admit that Everest and its brethren have drawn men to themselves from all parts of the world, made them give up their usual uneventful and placid activities, have evoked in those who attempt the climbing of these giants unbelievable courage, endurance, resourcefulness and self-abnegation and have been instrumental in exhibiting to the world what unknown powers the human spirit possesses. Therefore, these silent but awe-inspiring peaks should be looked upon as teachers of mankind and not as material things to be conquered and dealt with by human beings as they please

§ While these pages were passing through the Press, news was broadcast on the very morning of the coronation of Queen Elizabeth II that Sherpa Tensing Norkay and Mr Edmund Hillary, two members of Col. Hunt's British Expedition, had successfully climbed to the top of Mount Everest.

APPENDIX—of long Sanskrit Passages

Page 118 Note 267. On pp. 117–118 above reference has been made to the re-admission into the Hindu fold of those that had been converted to Christianity or Islam by force or fraud or even voluntarily. Not only was there re-admission of those that were converted, but non-Hindus, such as Yavanas, Kirātas, Śakas, were absorbed into the Hindu fold and were induced to adopt the practices of Hindus (such as śrāddhas and gifts to brāhmanas) Vide Śāntiparva chap. 65. 13–21 quoted above in note 830 (p. 364). A Greek ambassador of king Antalikita (Antialkidas) named Heliodora, son of Diya (Dion), was accredited to the court of king Bhāgabhadra, called himself Bhāgavata and raised a column in honour of Vāsudeva in the 2nd century B. C. (JRAS 1909, pp. 1053 and 1087 and JBBRAS vol. 23 p 104). Usavadāta, son of Dinika and son-in-law of Ksatrapa Nahapāna, is described in one of the Nasik inscriptions (No. 14a in E. I vol. VIII at p. 85) as a *śaka*, but made very extensive donations to brāhmanas at Broach, Prabhāsa and other places. Part of one of his inscriptions is cited on p. 710 note 1618 above. Though the name Usavadāta (Ṛsabhadatta) is a Sanskritized one the two names Dinika and Nahapāna of the Ksaharāta race appear to be non-Indian. Abhiras, Hūnas and Gurjaras became absorbed into the Hindu community. People, after being made Moslems, returned to their original communities and gods. Moslem writers make this clear. Vide Elliot and Dowsons' 'History of India' vol. I. p. 126 ('the people of India had returned to idolatry, excepting those of Kasa') and Alberuni's India (tr. by Sachau) vol. II. pp. 162–163 where he refers to the return of Hindu slaves in Moslem countries to their country and religion. Prof. D. R. Bhandarkar in 'Some aspects of Ancient Indian Culture' (1940) pp. 59–65 presents a very lucid and informing summary of the evidence on this point of the re-admission of those that were converted and of the absorption of non-Hindus. But it is not known what procedure was followed for this purpose. Therefore, a model rite for the return of a convert is set out here.

The text of the आशौचदशक here printed is based on three mss. from the Deccan College collection (now at the Bhandarkar Oriental Institute, Poona), viz. No. 216 of 1879-80 copied in *samvat* 1539 (1482 A D.), No. 196 of 1884-1887 copied in *samvat* 1578 (1521 A D.) and No 85 of 1895-1902 copied in *samvat* 1780. All these mss. contain the *bhāṣya* of Harihara, which ascribes the work to विज्ञानेश्वर In the first ms the commentary on the first three verses is wanting. I intended at first to give explanations in Sanskrit of these verses (as p 308 will indicate) but owing to considerations of space I omitted the Sanskrit explanations.

GENERAL INDEX
OF
Vol. IV (of the History of Dharmaśāstra)

(N. B. This Index deals with pages 1–727 only. As the list of tīrthas from p 730 onwards is arranged alphabetically, no entries from these pages are included in this Index, except in very rare cases for special reasons. When the name of a person or work occurs both in the body of the book as well as in the foot-notes on the same page, only the page is entered and nothing else).

Āśauca, vide under 'adopted son', 'death,' 'food', 'kāyasthas', 'men,' 'pratiloma', 'sapindas', 'śuddhi' 'sūtaka', 'wife', 'women', 'yati'; *agha* is used often as a synonym for ā. 267–268, *atikrāntāśauca* 282–284, birth and death are causes of ā only when they become known to the person to be affected 276, brāhmana who has studied the vedas and kept vedic fires becomes free from impurity in one day, one who has only mastered the veda in three days, one devoid of both in ten days 270, defined by Mitākṣarā 268, derivation from the word 'śuci' 267, differing views in ancient times as to explanation of the origin of ā for ten days on birth and death 309; explanation of varying provisions on ā 288, impurity on birth 275, exceptions to rules about atikrāntāśauca 284, five classes of cases in which rules about ā do not operate 296, for adopted son in case natural father or adoptive father dies or for natural father and adoptive father when the adopted son dies and for sapindas 280–281, for carrying a dead body for money 289, for father and sapindas on abortion, still-birth or after the birth of a child 275, for mother when there is abortion in the first four months of pregnancy or in later months of pregnancy or on still-birth or after birth 275, for slaves when masters die 292, form 'āśauca' is found in Devala and other smṛtis 267, general rules about ā 276–277, great divergence of views on question about the periods of ā, if a sapinda's death comes to one's ears more than ten days after death 283, Haradatta's definition of ā 268, in the case of an *āhitāgni* or non-āhitāgni dying in a different country whose bones even are not found and whose effigy is cremated 286, intensity of impurity was arranged on a descending scale in the following order viz a sūtikā (a freshly delivered woman), *rajasvalā* (a woman in monthly illness), death and birth 274, king's death required the residents of the country to observe ā up till the advent of the day or night next after the king's death 281–282, Manu and others mention several optional periods of impurity 270–271, 307, Manu and others urge men not to increase through laziness the number of days for which ā is to be observed 271, meaning of *āśaucasamkṣaya* 292 ff, meaning of life-long impurity 274; medieval brāhmanas attached exaggerated importance to ceremonial purity after ā 273, Mitākṣarā says that dictum of Parāśara on periods of impurity should be discarded as opposed to several smṛtis and popular usage 272, most important subject under the head of *suddhi* is ā 267, atikrāntāśauca for sapindas birth 283, no periods of ā prescri-

for pratiloma castes, but some say that they are like śūdras 288, no unanimity among smṛtis as to periods of ā on death 277ff, on birth ā lasted ten days even in the Vedic period 274, on death of a child for parents and sapiṇḍas before ten days from birth or before the striking of teeth, before *cūḍā* or *upanayana* or after upanayana 277–278, on death of a person after upanayana all sapiṇḍas had to undergo ā for ten days and all samānodakas for three days 277, on death of a girl after three years of age and before betrothal or after betrothal but before marriage and after marriage 278, period of ā. depended on several circumstances, such as the varṇa or on whether deceased was an infant or a male or a female or whether death was before or after upanayana or on the vicinity or otherwise of the deceased, the degree of relationship, the time that elapsed after birth or death 271–273, 286–287, periods of ā. for relatives in the case of *anuloma* or *pratiloma* marriages 488, periods of ā for four varṇas were respectively fixed at 10, 12, 15 days and a month 271, periods of 10 days of ā were fixed for men of all varṇas by some smṛtikāras such as Aṅgiras and Śātātapa and the reason for such fixation 271, 307, period of ā, for less than ten days on the ground of vedic learning was included among Kalivarjya 271, rules about ā on death of *bandhus* such as maternal grand-father, grand-mother or maternal uncle, daughter's son and father-in-law, mother-in-law, son-in-law, wife's brother 279–280, rules about ā on the death of an ācārya, his wife or son or of a guru or pupil 281, rules about ā. apply only when times are easy and peaceful 306, rules about the period of ā when the knowledge of birth or death comes to a man after the periods fixed 282–284; sannipāta or sampāta of ā (another āśauca supervening while one is being undergone), rules of 292–294; several printed works and mss on ā are in verse 272–273, ten varieties of impurity, according to Dakṣa 274, things that could be taken without taint from the house of one undergoing ā though not from his hand 291–92, two characteristics of ā. viz taking away the privilege of performing religious acts and rendering a person untouchable to others for some time, 268–269, two kinds of ā viz jananāśauca or sūtaka (arising on birth) and śavāśauca or mṛtakāśauca (arising on death) 269, two varieties in each kind of ā viz for a short period and for a long period 269, two views as to the day from which period of ā is to be calculated, if a man died at night or news reached at night 287–288, usage of the country the most important in matters of ā 306, when calculating the period of ā, the day of cremation in the case of an āhitāgni and the day of death in the case of a non-āhitāgni is the first day 276, when a solemn sacrifice (like Somayāga) is begun or a marriage rite or festival in honour of mātṛs has started or the foundation or dedication of a temple or image is begun, supervening cause of ā does not matter 291, why birth and death should cause impurity to relations has not been discussed by most writers 269–270; woman's delivery or death at her father's or brother's house and at her husband's makes a difference as to ā 276, 278, women of all varṇas become touchable after ten days from delivery but they are not fit to take part in religious rites 30 or 40 days from birth according as a son or daughter is born 276; words like 'ahaḥ' and 'rātriḥ'

Suicide, 604–613, see under 'sati', Alberuni's remarks on religious s. 610, by starting on the Great Journey (mahāprasthānagamana) or by falling in fire or from a precipice forbidden in Kali age 302, 308, Dharmaśāstra writers generally condemn s. as a great sin 604, divergent views of Hārita and Manu as to allowing s as a prāyaścitta for grave sins like incest 604, every kind of s. was not condemned by the ancient smrtis 525, exceptions to the condemnation of suicide are found in the epics, smrtis and purānas 302, 525, 604-605, five meritorious kinds of suicide mentioned in Ain-i-Akbari 605n, gradually there was a revulsion of feeling against suicide at Prayāga or other tirthas and against starting on the Great Journey in the Himālaya 608; great poets like Kālidāsa believed that those who killed themselves at Prayāga or Vata became free from the cycle of births and deaths even though they had not correct knowledge of the Supreme Reality 605, historical examples of kings committing religious suicide at holy places 605, householder was allowed to commit s. even if all right, by fall, or fire or drowning if his life's work was done, or if he does not desire the pleasures of life and is a Vedāntin 604, important verse found in Vanaparva and some purānas relied upon for the approval of religious suicide at Prayāga 605, kūrma purāna recommends four modes of religious s. and promises residence in heaven for thousands of years 607, an old man or a man unable to observe rules of bodily purification or a man so ill as to be beyond medical skill was allowed by some smrtis to kill himself by jumping from a

precipice or by fire or by drowning or fasting or jumping from Vata tree at Prayāga 604, one who, knowingly or unknowingly, wilfully or unintentionally, dies in the Ganges, secures on death heaven and mokṣa (according to Padma) 607, psychology behind religious s 611, religious suicide at Purusottama is referred to in Brahmapurāṇa 701, religious suicide was allowed at Prayāga or at the Vata there or at some other tīrthas 604, 608, some medieval digests allowed religious s to all varnas while Tīrthaprakāśa restricts it to members of castes other than the first 609, some smṛtis, the Mahābhārata and some Purāṇas do recommend religious s. at Prayāga and other holy places 607–608, some writers of medieval times combat the view that religious s is permitted 608–609, Tristhalisetu refuses authority to commit s. at Prayāga to any person abandoning his old parents, young wife and children and to women who are pregnant or have young children or have no permission from husband 609, wife was allowed to die on her husband's death by *sahagamana* or *anumarana* 604

Tīrthayātrā (pilgrimage to holy places) 552-722; see 'Gayā', 'tīrtha', 'woman', 'tonsure', advantages of t to the community and to the individual pilgrim 553, all religions lay great emphasis on the sanctity of certain places and enjoin pilgrimages to them 552; ancient Dharmaśāstra works lay emphasis on visits to tīrtha because of the benefits derived therefrom 553; as a means of removing the consequences of sins, 55–56; brāhmana born and bred at a tīrtha like Mathurā or Gayā should be preferred to a stranger, though the latter may have mastered all the Vedas 579, brāhmana should wander about tirthas acc to Brahmapurāna after his capacity to perform yajñas has come to an end 570, classification of tīrthas into four, viz daiva, (established by gods), āsura (associated with asuras like Gaya), ārsa (established by sages such as Prabhāsa) and Mānusa (established by kings like Manu, Kuru) 567,

dharmas common to all men include truthfulness, restraint of mind, charity, ahiṃsā and t. 553–554; digests on tīrthas follow a process of selection, i. e. each describes only a few tīrthas known to it 565; digests have a tendency to make every religious act more elaborate and harder 573, fast at a tīrtha is optional according to Kalpataru but if observed it confers special rewards 473, 584; five classes of people do not reap the rewards of pilgrimage 563; four places of pilgrimage for Buddhists 552; fourteen acts which a pilgrim had to give up after reaching the Ganges or other tīrtha 578; held superior to Vedic sacrifices in several respects by the Mahābhārata and Purāṇas 561–562; honouring the pitṛs at the time of starting on t. is specially obligatory on rich men 574; house-holder whose wife is chaste must go on a pilgrimage with her, otherwise he would not reap the fruit of t. 568; idea in the Mahābhārata and some Purāṇas was that t. may help those who have no high moral qualities in removing their sins while those that possess moral qualities gain a great store of merit by t. 562–563, kīrpati-vesa on t. 573; large rivers, mountains and forests have always been venerated in India as sacred and as the abodes of gods 552; literature on, is more extensive than on any other single topic of Dharmaśāstra 580–582; Mahābhārata lays the greatest emphasis on the cultivation of high moral and spiritual qualities if the full reward of t. is to be reaped 562; Mahābhārata and some purāṇas emphasize that a pure mind is the real tīrtha and that it is better to stay at home and perform one's duties including performance of vedic sacrifices than undertaking t. 570; Mahābhārata and Purāṇas contain at least 40000 verses on t. 582; meaning of *tīrtha* in the Rgveda and other vedas is either 'road' or 'ford' and rarely a holy place 554; meaning of tīrtha in this section 555; meaning of tīrtha is sometimes extended to places where Agnihotra and śrāddha are performed, to temples, to house where Veda is being studied, to cowpens, parks, where an *aśvattha* tree exists, where a teacher stands or a chaste woman dwells 564; mode of travel, use of conveyances, horses, bullock carts, wearing of shoes, rules about these in Purāṇas and digests 576–577; *snāna dāna* and *kṣaura* distinguished 575; not only men of all varṇas but also women and even caṇḍālas have adhikāra for t. 567–568; number of tīrthas declared by Vāyu, according to Matsya, Padma, Nāradīya and other Purāṇas, is 35 millions in the sky, the aerial regions and the earth 564; number of tīrthas, acc. to Varāhapurāṇa, is 60 thousand crores 565–a; one should not enter upon an examination of the worth of brāhmaṇas at a tīrtha 578–579; one who wants to undertake t. should pay off his three debts, should provide means of maintenance for his sons and consign his wife to their care 571; rewards promised for baths at tīrthas 727; rites to be performed when a person undertakes a t. 572–73, 583; rivers in general, certain named rivers and waters are referred to with great veneration as early as Rgveda 555; sacred places for Moslems 552; *sarhalpa* to be made at starting on t. 577, Shah Jehan, emperor, remitted the tax levied on pilgrims at Prayāga and Kāśī owing to eloquent pleading of Kavīndrācārya 571; six rivers having their sources in the Himālaya and six to the south of Vindhya are declared

to be most holy devatīrthas by Brahmapurāna 567, some digests state that a pilgrim has to wear the *kārpaṭī* dress at all tīrthas when he is actually travelling, while others say that he has to do so only at Gayā 573, some purānas say that some virtues may be called mental tīrthas and purity of mind is the highest tīrtha 563, some say that tonsure and fast are necessary at all tīrthas except at Kurukṣetra, Viśālā, Virajā and Gayā 574; śrāddha has to be performed at most famous tīrthas, but from the procedure of śrāddha are omitted arghya, āvāhana, entering the thumb of the invited brāhmana in the food served, the question about being satiated and vikira 616, śrāddha may be performed at any time after a pilgrim reaches the tīrtha 616, śrāddha at tīrthas consists, if the whole procedure cannot be followed, in offering pindas of barley meal or rice cooked in milk, cake of sesame or jaggery and one should offer a single pinda to all relatives after pārvanaśrāddha and another pinda for servants, slaves, cattle, trees etc, 616-617, tended to foster the idea of the fundamental unity of India and Indian culture 553, tended to level up all men by bringing them together to the same holy rivers and shrines 553; three grounds on which tīrthas are said to be holy 554–555, tonsure and fast are not obligatory but only kāmya according to kalpataru but otherwise according to others 573–575, t, sacrifices and various gifts are the means of cleansing the mind 563, t yields full fruit only if performed bare-footed 576, t yields fruit to men of all varnas and āśramas 563, use of bullock-cart condemned in Matsyapurāna as leading to hell and of other conveyances (not drawn by bulls) as fruitless, but Kūrma recommends to those who are unable to walk conveyances drawn by mules, horses or men 576, use of a conveyance is according to Kalpataru condemned only in pilgrimage to Prayāga 576, use of a vessel allowed 577, view that the institution of t was first started by Buddhists and Jains is wrong 558; was deemed very early to be a way of redemption of sins for men and women 569, was favoured by writers on Dharmaśāstra by prescribing that no money was to be demanded by a ferryman or a toll officer from a pilgrim, from a pregnant woman, from a vedic student, forest hermit or ascetic, but this was not followed even by Hindu kings 571, whether tonsure at the time of starting on a pilgrimage is obligatory 573, who are eligible for or have adhikāra for t 567–571, widows, ascetics and śūdras have to cut all hair on pilgrimage 575, women could not undertake t without husband's permission 569, works on, repel by their over-statements and exaggerations, when they state that pilgrimage to a particular tīrtha will yield all one's desires in this world and the next, that even gods secured perfection at Puskara, that Prthūdaka is the holiest of tīrthas etc. 565–566

Publisher's Note

The Bhandarkar Oriental Research Institute has great pleasure in publishing the first part of the fifth and last volume of Mahāmahopādhyāya Dr. P. V. Kane's monumental *History of Dharmaśāstra* This part comprises two sections The first section deals at length with many important vratas and utsavas such as Krsnajanmāstamī, Durgotsava, Diwāli, Sankrānti. Mahāśivarātrī, Holikā, and also includes brief notices of about 1100 vratas, pūjās and utsavas with references, the second section deals with Kāla (Time), and its philosophic conceptions from Vedic times downwards; Indian Astronomy and Astrology and the theories of Western scholars about them; naksatras and astrology based on them; *muhūrtas* and their employment in religious rites; the Zodiacal signs; planets and week-days, principles laid down in Indian astrological works, calendar, eras and intercalary month; Yuga, Manvantara and Kalpa; Yoga and Karana; and reform of our calendar.

The second part of this volume will treat of such topics as śāntis-Vedic and post-Vedic; Purānas and their influence on Dharmaśāstra, society and Buddhism; Tantras and Dharmaśāstra'; Pūrvamīmāmsā and other darśanas in relation to Dharmaśāstra, cosmology; the theory of *punarjanma*; the essential characteristics of our culture through the ages, and future trends.

All prefatory matter, including list of abbreviations, brief synopsis of the contents, list of works consulted, etc., as also General Index for the whole volume, will be given in the second part, which we hope to publish before long.

CHAPTER I

VRATA IN THE RGVEDA

Vrata is one of many Sanskrit words, the use and history of which extend over several thousand years The derivation and semantic development of the word vrata have been the subject of great controversies. These questions have been dealt with by me at some length in the JBBRAS, vol 29 (1954) pp. 1–28. I shall here summarise the discussion contained therein.

In the great St. Petersburg Dictionary the word vrata is derived from the root 'vr' (to choose) and the important senses of the word given in that Dictionary are: (1) will, command, law, prescribed order; (2) subservience, obedience, service; (3) domain; (4) order, regulated succession, realm; (5) calling, office, customary activity, carrying on, custom; (6) religious duty, worship, obligation; (7) any undertaking, religious or ascetic performance or observance, vow, sacred work; (8) vow in general, fixed purpose; (9) other specialized senses Max Muller derived it from *vr* 'to protect' and held that it meant originally what is enclosed, protected, set apart, then what is settled or determined, law, ordinance and then 'sway or power'. Whitney, in a note on this word in the Proceedings published in J. A O. S. vol. XI pp. 29–31, after setting out the treatment of the word in the St Petersburg Dictionary, brushed aside Max Muller's etymology as unsatisfactory and as possessing little plausibility and declared that he did not accept the derivation of the word from *vr* 'to choose', that 'vr' did not signify willing or command, but only choice or preference, though he admitted that there is a relationship between 'choose' and 'command'. He objected that '*ta*' as an affix (except in the formation of past passive participles) was very rare and that the only analogous word he could think of would be 'marta' from 'mr' to die. He preferred to derive the word from 'vrt' 'to proceed' and, though he admitted that the form vrata from 'vrt' with affix *a* would be exceptional, he thought that the words 'vraja' and 'trada' supported the derivation and put forward the ground that the word 'vrata' occurs

frequently in the Rgveda with verbs of motion such as '*car*', '*saśc*' or '*sac*'.

Prof. V. M Apte contributed a long article on vrata to the 3rd volume of the Bulletin of the Deccan College Research Institute at Poona (pp. 407–488) Prof Apte agreed with Whitney in deriving the word vrata from 'vṛt', boldly asserted that the derivation of the word from 'vṛ' to choose or 'vṛ' to guard or enclose is impossible (p 410), that there *is not a single vrata passage* in the Rgveda which favours the meaning 'will, command, obedience or fixed purpose', that 'vṛt' not only means 'to proceed' (as Whitney holds) but also 'to turn, to turn oneself, turn round, revolve, move on' and that therefore 'vrata' means not only procedure, course of action, conduct, but also 'circular movement' and then 'route or circular path' (pp. 411–412).

My own view is that both Whitney and Prof Apte are wrong in deriving the word *vrata* from 'vṛt'. I further hold that passages in which 'vṛt' occurs with *upasargas* such as *abhi*, *ā*, *ni*, *pari*, *pra* or *vi*, would not be helpful in determining the *original meaning of* 'vṛt' by itself, since *upasargas often* totally change the meaning of the root[1], that it is doubtful whether the root 'vṛt' standing by itself means in the Rgveda 'to proceed' (as Whitney thought) and I deny that 'vṛt' occurring by itself without *upasargas* in the Rgveda ever means 'to turn round, move on' (as Prof Apte asserts) In my opinion the root 'vṛt' by itself (and not used in a causal or frequentative sense) means simply 'to be, to remain, to abide' Occurrences of the root 'vṛt' without any upasarga before or after it are few in the Rgveda. Some typical examples may be given 'When, O Indra, thou didst strike down the wiles of Svarbhānu (the demon Rāhu) that remained below the sky[2]' (Rg V 40. 6), 'the wheel does not affect (jolt) your chariot (O Aśvins!) that is followed by songs one after another and that remains possessed of food' (Rg VIII. 5. 34); 'they (the dice) remain downwards (lie down on the board or ground) but they throb or strike above (i. e they shake or terrify the hearts of gamblers), though they have no hands yet they defeat those that are endowed with hands' (Rg X. 34 9). Vide also Rg X. 27 19, X 107 11 for other verses where 'vṛt'

occurs without an *upasarga* and means 'to remain or abide'. Even with an upasarga like 'sam' *vṛt* means simply 'to be or to abide' and not 'revolve or turn' or 'move on'. Vide Rg. VI. 41. 2, X. 90. 14, X. 121. 1 and 7, X. 129 4, in which 'sam-vartatām' or 'samavartata' simply means 'let it remain' or 'it was or existed'. Simply because 'vṛt' with '*abhi*' means 'to turn towards or attack' (as in Rg. IV. 43 5 or V. 31. 5) or with '*ni*' means 'come down or return' (as in Rg X. 19. 1, 3, 5, X. 95. 17) or with '*pari*' means 'roam over or round' (as in Rg. I. 164. 11 and IV. 36 1), or with '*pra*' means 'to proceed' (as in Rg. V. 30. 8 or X. 89. 12), or with *vi* means 'roll or revolve' (as in Rg I. 185. 1, V. 30. 8, V. 53 7, VI 9. 1) it does not at all follow that the original sense of 'vṛt' is, as Prof Apte asserts (p. 411 end), 'to revolve or roll on'. Besides, the last two senses are somewhat contradictory.

Prof. Apte complains that scholars were content as to *vrata* with the meanings 'law, statute, command, sacrifice, vow, fixed purpose, duty' and did not take enough notice of the important part that the sense of 'route or circular path' plays in the Ṛgveda. He opines that the divine vratas often mentioned in the Ṛgveda rather mean 'the heavenly routes, the divine rounds, the periodical movements round the sky closely adhered to by the gods themselves' rather than 'holy laws' laid down by a particular deity. Adopting a suggestion of Tilak in 'Orion' (p. 154) that the path of ṛta sometimes mentioned in the Ṛgveda is the broad belt of the Zodiac which the luminaries never transgress, Prof. Apte sets out to prove that the word 'ṛta' in the Ṛgveda primarily means the belt of the Zodiac (vide his paper in the Silver Jubilee volume of the Annals of the B O. R I., pp 55–56). This theory has failed to appeal to eminent Vedic scholars In my humble way I endeavoured to show in the 4th vol of the H. of Dh. (pp 2-5) that 'ṛta' has three senses in the Ṛgveda, one of which is 'the course of nature or the regular general order in the cosmos'. 'The path by which the group of Ādityas reaches ṛta' in Ṛg. I. 41. 4[3] or the statement in Ṛg I. 164 11 'the wheel of ṛta, that has twelve spokes (12 constellations or months), continually goes round the sky without being worn out' are only illustrations of the first meaning of ṛta But this meaning of ṛta by itself sheds hardly any light on the meaning of vrata Ṛta and vrata are

3. सुगः पन्था अनृक्षर आदित्यास ऋतं यते। ऋ. I. 41. 4, द्वादशारं नहि तज्जराय वर्वर्ति चक्रं परि द्यामृतस्य। ऋ. I. 164. 11.

not synonyms and it is difficult to see how, conceding for argument that 'rta' is the belt of the Zodiac, vrata means, as Prof. Apte obviously thinks, the same thing Ṛta is an Indo-European word but so far as I know 'vrata' is not even shown to be Indo-Iranian, much less Indo-European

Prof. Apte advances the theory that there are two parallel phases of the semantic evolution of the word 'vrata' viz a 'divine phase' and a 'human' phase I feel no hesitation in denying the existence of any such distinction in the meaning of the word 'vrata' Prof Apte arranges (pp 414–415) the so-called divine phase of the meaning of vrata into six groups, viz. (I) turning round, passage, procedure, physical activity, (II) circular path, settled or beaten route, (III) sphere or region of movement or influence, (IV) routine, laws of movement; periodic appearance or visit, customary activity, recurring march, (V) victorious advance or strength, (VI) ordinance, law, rule or code of conduct. In the so-called 'human phase' of semantic development he sets out four groups of senses, viz (1) physical activity (as distinguished from mental), duty, profession; (II) the sum total of those peculiar ethical and religious duties and practices which made up the culture pattern of the Aryans; (III) the specific social and religious duties of the three classes of Aryan society; (IV) devotion to duty in general on the part of men and women.

I have summarised Prof Apte's long list of meanings in ten groups The very fact that Prof Apte had to marshall over sixty English equivalents for the meaning of the word 'vrata', which occurs in the Ṛgveda only about 220 times by itself or in combination with other words is enough to make scholars suspicious about the correctness of the entire scheme Though he had the hardihood to assert in one place (p 410)[4] that no passage in the Ṛgveda favours the meaning 'will or command' he admits (on pp. 476–477) that in three passages (Ṛg II. 38 7, X. 10 5, X. 33 9) the meaning of vrata as 'ordinances laid down by a divinity for devotees or human beings' is quite acceptable to him and further that in about 25 passages (which come under groups II to IV of the so-called human phase of Prof. Apte) vrata either means 'ethical or religious code of practices of the three classes of Aryans' or 'beneficent sway or devotion'

4 Hereafter up to note 23 wherever only pages are mentioned and no work, the reference is to the pages of the 3rd vol. of the Bulletin of the Deccan College Research Institute

I shall now state my own views on the derivation and the meanings of the word vrata in the Ṛgveda. I derive the word from the root 'vṛ' (to choose). From this root comes the word 'vara' (bridegroom who is chosen from among several men by a maiden or her guardian), which occurs in Ṛg IX. 101. 14 and X. 85. 8 and 9. Choosing involves willing or volition on the part of the person choosing. Hence 'vṛ' also means 'to will'. Therefore, when the word vrata is derived from 'vṛ' with the suffix 'ta', the meaning of vrata can be 'what is willed' or simply 'will'. The will of a person in power or authority is a command or law unto others Devotees believe that gods have laid down certain commands to be followed by themselves as well as by all beings. Thus comes the sense of 'law or ordinance'. A command of a superior imposes and implies a corresponding duty to obey. When commands are obeyed or duties are performed in the same way for long, they become the patterns of obligations i. e. customs or practices When persons believe or feel that they must perform certain acts as ordained by gods, then arises the sense of religious worship or duty. If a man imposes upon himself certain restrictions as to his behaviour or food to win the favour of gods that becomes a sacred vow or religious observance. Thus the several meanings of the word 'vrata', which I derive from the root 'vṛ', are command or law, obedience or duty, religious or moral practices, religious worship or observance, sacred or solemn vow or undertaking, then any vow or pattern of conduct. It should not be supposed that these several meanings followed one another in a time sequence Two or more meanings might have been simultaneously in vogue such as 'ordinance, duty or obedience'. These meanings of vrata set out by me are quite sufficient for the interpretation of almost all Ṛgveda passages in which the word occurs.

When Whitney derived the word 'vrata' from 'vṛt' with affix 'a', he could cite only two words 'vraja' and 'trada' as parallel. But it is quite possible to argue that 'vraja' is not analogous to vrata (if derived from 'vṛt'). *Vraja* (cowpen) occurs in the Ṛgveda in II. 38. 8, IV. 1. 15, IV. 16. 6, V. 6. 7, V. 33 10, can very well be derived from 'vraj' to go and Pāṇini III. 3 119 appears to derive[5] it from 'vraj' in the sense of 'karaṇa' or adhikaraṇa. The root 'vraj' occurs in the Ṛgveda[6] If *vraja* is derived from

5. गोचरसञ्चरवहव्रजव्यजापणनिगमाश्च । पा. III. 3 119 on which सि. कौ. explains 'घान्ता निपात्यन्ते'.

6. आपश्चिदस्मा अरमन्त देवीः पृथग् व्रजन्तीः पति षीमशुजन् ॥ ऋ III. 56. 4.

the root 'vraj', it is not on all fours with vrata derived from 'vṛt'. Whitney probably derived 'vraja' from 'vṛj'. But the meaning of 'vraja' (cowpen) can hardly arise from the root 'vṛj' (to give up, abandon). The word 'trada' occurs only once in the Ṛgveda (VIII. 45 28)[7] and is applied to Indra It is difficult to say from what root, if any, it is derived. Whitney probably derived it from 'trd' to injure or pierce. The word 'trdilāh' (crushing) is applied to the stones (grāvānah) which crush *soma* stalks[8] (Ṛg. X. 94 11) Whitney says he knows only one word 'marta' derived from 'mṛ' (to die) with the affix 'ta' which is analogous to vrata if the latter be derived from 'vṛ' But Whitney failed to notice other words with the affix 'ta' (not past passive participles) such as 'karta' (deep hole, cavern) (in Ṛg. I. 121. 13, II 29 6, IX. 73. 8 and 9) and 'garta' (cavity or seat in a war chariot) (in Ṛg. II. 33 11, V. 62. 5 and 8, VI. 20 9, VII. 64. 4), vāta (wind) from 'vā' (Ṛg. V 31. 10, X 168. 1 &c.), dhūrta and several others.

Prof Apte cites the word *vartani* (which means 'way' in Ṛg I. 23 9, V 61 9, VII 8 16, VIII. 23. 19, VIII 63 8) as analogous to vrata (from vṛt) But that word lends very little help. In 'vartani' there is *guna* (vṛt becomes vart), besides vartani cannot be derived from 'vṛt' meaning 'turn round or revolve' (which Prof Apte gives as the original meaning), but from the meaning 'to abide' or at the most 'to proceed' and further 'vartani' has practically only one meaning in the Ṛgveda, while vrata has to be paraphrased by sixty different words in English by Prof Apte

Prof Apte following Whitney relies on the fact (p 409) that vrata is frequently employed in the Ṛgveda with verbs of motion such as *anu-i, anu-car, anu-gā, anu-vṛt.* But these roots take on another meaning (viz 'to follow or observe') owing to the presence of 'anu' and in almost all the passages where the forms of these roots with *anu* occur there is no indication whatever of physical motion, but only that of 'obeying or observing' Besides, the root 'car' itself is not used in the sense of physical motion in several passages of the Ṛgveda, but in the sense of 'performing' and

'observing'. Vide[9] Rg. I. 52. 6, III. 54.2, VI. 9.6, VII. 89. 5. Moreover, in words like *brahmacārī* (Rg X. 109.5) and *vratacārinah* (Rg VII. 103.1) the meaning of a physical motion, if it was the original one at all, is totally absent and the meaning 'performing' or 'observing' is the only one possible. Some occurrences of the roots 'saśc' and 'sac' in which the meaning of physical motion is inapplicable but the meaning 'resort to, accept or be united to' appears to be intended are found in Rg. II 1 13, VII. 28. 4 (for forms of '*saśc*') and IV. 12. 2., VII. 85. 5, VIII. 4 9, IX. 95. 4 (for forms of 'sac').

It is now necessary to examine the contention of Prof. Apte that *vrata* means in the Rgveda the tracks or routes that the various luminaries trace in the heavens Vratas are spoken of not only in relation to Agni, Indra, Mitra, Soma, Usas, Savitr and Adityas but also in relation to Varuna (in Rg I. 25.1, III. 54.18, V. 69 4, VII 83.9), Brhaspati (in II 23.6), Indra and Brahmanaspati (II. 24. 12), Aditi (I.144.12, VII 87 9), Parjanya (V. 83. 5) and Aśvins (I 183 3) Conceding for a moment that by some stretch of imagination or some linguistic acrobatics one can speak of the vratas of Agni, Adityas, Mitra, Indra, Savitr and Usas as referring to the tracks of luminaries in the heavens, the mid regions and on the earth, one should like to know whether Aditi, Aśvins, Varuna, Brhaspati or Brahmanaspati are luminaries and what tracks they were supposed to trace in the heavens or elsewhere. Scholars are not agreed as to the meaning of Aditi or as to the physical or celestial phenomena Varuna or the Aśvins were supposed to represent. Aditi is a riddle, being identified with the heaven and the mid regions and also spoken of as the father, mother or the son or as the mother of Daksa and also his daughter; vide Rg. I. 89. 10, II 27.1, X 72. 4–5 and Nirukta XI 23 as to Aditi and Rg. II 1 11 where Agni is identified with Aditi Long before the times of the Nirukta there was difference on the question of the nature of Asvins, some identifying them with Heaven and Earth, or day and night, or the Sun and the Moon or two meritorious kings (Nirukta XII 1), while some Western scholars hold them to be the Morning and the Evening star or Castor and Pollux The endeavour of interpreters of the Rgveda should be to assign such

9. पर्शी घृणा चरति तित्विषे शवोऽपो वृत्वी रजसो बुध्नमाशयत्। ऋ. I 52 6, महि महे दिवे अर्चा पृथिव्यै कामो म इच्छञ्चरति प्रजानन्। ऋ. III. 54. 2; वि मे मनश्चरति दूरआधीः किंस्विद्वक्ष्यामि किमु नू मनिष्ये। ऋ. VI. 9 6.

a derivation and meaning to the word vrata as would be appropriate in all cases where the word vrata is brought in relation to some gods. In my opinion the only meanings that can be well construed with all passages in which the vratas of the several gods mentioned above are referred to is 'commands or ordinances, religious or moral practices or worship or vows' One does not understand what Prof. Apte means when he remarks at (p. 442) in a tone of ridicule that observing or obeying the 'ordinances or religious worship of gods' is a soft job and looking after the paths or the tracks of luminaries is a strenuous one If anything, the reverse of this should be true

The word 'samrāj' appears to be applied to a human king in Rg[10] VII. 58 4 'the sovereign, protected by you, O Maruts! kills the enemy', and in Rg. X. 85 46 the newly married girl has the blessing 'be you a queen' (samrājñī). Varuna, Mitra, Indra, Agni, Viśve-devāh and Ādityas are called kings (*rājan*) and emperors (samrāj) in Rg. II. 41. 6, III 10 1, III. 54 10, V. 85 1, VII. 38. 4, VIII 27 22, X. 63. 5. Varuna (who is praised in about 12 hymns) is called *samrāj* oftener than even Indra praised in about 200 hymns What is more natural than to suppose that the gods called kings and emperors were believed to have laid down commands or ordinances to be obeyed by all. Though Rgvedic sages extol several gods they had already arrived at the conception that there was only one Supreme Being that was addressed under different names such as Indra, Mitra, Varuna, Agni and assumed several forms (Rg I 164. 46, VI. 47 18, X. 121. 1, X 129. 1–2) Vratas are spoken of as *dhruva* (immutably fixed) as in II. 5 4, III 56 1, V. 69 4 and as *adabdha* (unharmed, unassailable) as in I. 24 10, II. 9 1, III 54 18, VII. 66. 6 and *daivya* (divine) as in Rg I 70 1, I 92 12, VII 75 3. One must carefully remember these facts when ascertaining the exact meaning of *vrata* mentioned in connection with almost all the prominent gods of the Rgveda It is often stated in the Rgveda that the vratas of the god whom the sage for the moment praises are not violated by other gods Some striking examples[11]

may, be given here: Rg. III. 7. 7 'the gods observe the vratas of gods' (devā devānām-anu hi vratā guḥ); II. 38 9 'I invoke for my welfare with salutations god Savitr whose vrata is not violated by Indra, Varuna, Mitra, Aryaman, or Rudra or by the (god's) enemies'; III. 56. 1 'the primeval and immutably fixed vratas are not destroyed by the wily (demons), nor by the wise (sages), nor by the well-disposed Heaven and Earth and the firmly fixed mountains are not there for being bent down'; VIII. 42. 1 'the all-knowing and powerful (Varuna) made Heaven firm, he measured (created) the expanse of the earth; the great king sits over (rules) all the worlds; all these are the vratas of Varuna'. Vide also Rg. I. 101. 3, II. 24. 12, II 38. 2, III. 30. 4, V. 69. 4.

The above mentioned passages clearly show that the Vedic sages believed that not only did the several gods observe or carry out the immutably fixed ordinances laid down by themselves or by any one of them but that even wily demons had to observe them and that waters or rivers flow as ordained by gods We have to take into account along with these beliefs that the Rgveda often adverts to the fact that human beings also break (or violate) the *vratas* of gods, are liable to be punished therefor and pray to the gods to pity them and to withhold the punishment. For example,[12] Rg I. 25. 1–2 'Whatever ordinance (vrata) of thine, O Varuna! we may break day to day as people (subjects) do (i. e. break the king's law) do not reduce us to death &c.'; X. 25. 3 'O Soma! if I transgress your perfect (lit well-baked) vratas, then in thy exhilaration (at our sacrifices) take pity on us as a father does towards his son'. Vide also VII. 89. 5, VIII. 48 9.

वरुणस्य व्रतानि॥ VIII. 42 1, the word vrata occurs five times in II 38 (verses 2, 3, 6, 7, 9) and should be construed according to the general rules of interpretation in the same sense in all verses of the same hymn at least Prof. Apte admits (on p 476) that the meaning 'ordinances' would be appropriate in Rg. II. 38. 7 (नकिरस्य तानि व्रता देवस्य सवितुर्मिनन्ति) and accepts that meaning in that verse, but on II. 38. 9 (p. 468) his obsession about the original meaning being 'tracks' leads him to say "that in that verse the word vrata means 'Savitr's fixed movements in the heavens."

12. यच्चिद्धि ते विशो यथा प्र देव वरुण व्रतं मिनीमसि द्यविद्यवि। मा नो वधाय हत्नवे जिहीळानस्य रीरधः। ऋ. I 25 1–2, उत व्रतानि सोम ते मार्ड मिनामि पाक्या। अधा पितेव सूनवे वि वो मदे सुळा नो अभि चिह्वधाह्विवक्षसे॥ X 25. 3. At the end of all verses in X. 21 and X. 25 and in X. 24. 1–3 the word विवक्षसे occurs and is explained as महान् भवसि by सायण. But this is unsatisfactory. वि वो मदे and विवक्षसे appear to be refrains with some recondite meaning.

It would have been noticed that in some of the passages quoted above (in note 11) on vrata, verbal forms of the root 'mi' or 'mī' occur For the correct understanding of these passages the exact meaning of the root 'mī' is very important The Nighantu (II 19) includes 'mināti' among verbs meaning 'vadha' (killing or harming) In the Dhātupātha the meaning of the root 'mī' is himsā' (killing, annihilating, breaking) Vide Pāṇini VII 3 81 (mīnāter-nigame) The forms of 'mi' or 'mī' with or without the preposition 'ā' or 'pra' occur more than 50 times in the Ṛgveda and often in connection with *vrata* Whitney felt that the occurrences of the forms of 'mi' or 'mī' presented some difficulty about his theory of the derivation of vrata and its meanings, but Prof. Apte, who derived his inspiration from Whitney, feels no such misgivings as Whitney felt, holds, relying on his own interpretation of Ṛg I 124 3, that 'mi' or 'mī' is a verb of *motion* and has the primary sense of 'miss, deviate, wander or stray from' (p 411) Over a dozen verses at least will clearly show that Prof. Apte has been led astray by his preconceived theory about vrata meaning 'tracks of luminaries' and that 'mi' or 'mī' cannot at all be construed in the sense of 'miss' or 'deviate' in the Ṛgveda Ṛg I. 71. 10 'old age destroys me as (the dark or clouded) sky destroys (distinctness of) forms' (nabho na rūpam jarimā mināti'); I. 124 2[13] '(the dawn) which does not violate divine laws but destroys the spans of human life', I. 179. 1 (Lopāmudrā says to Agastya) 'old age destroys the beauty of limbs' (mināti sriyam jarimā tanūnām); VII 84 4 (Varuna) who is an Āditya, who destroys the false ones and who, the valiant one, imparts immeasurable wealth'. Vide also Ṛg I 92 11, I. 117 3, III. 32 8, IV. 30 23, V 7. 4, V 82. 2 for other examples where forms of 'mi' or 'mī' occur It is unnecessary to adduce more examples about 'mi'. It is impossible, if Prof Apte is to be followed, that old age misses or deviates from beauty or that Aśvins miss or deviate from the wiles of the demon or that Varuna misses falsehood (or false men) Prof Apte relies (p 411)

13. अमिनती दैव्यानि व्रतानि प्र मिनती मनुष्या युगानि। ऋ I 124. 2, प्र च आदित्यो अद्रुहा मिनात्यमिना ध्रुवो दयते वसूनि। VII 84 4 One may compare with I 124 2, मर्तस्य देवी जरयन्त्यायु in ऋ. I 92. 10 The contrast between अमिनती दैव्यानि व्रतानि and प्रमिनती मनुष्या युगानि is most striking and places the sense of 'mi' in a clear light and beyond dispute.

on Rg. I. 124. 3.[14] as decisively establishing that originally 'mi' was a verb of motion. In the first place, one verse cannot demolish what many verses quoted above convey. Besides, there is nothing in Rg. I. 124. 3 that establishes what Prof. Apte thinks it does That verse says 'Here this daughter of heaven wearing a garment of light is seen in the east (by us) simultaneously; she (Dawn) well follows the path of rta (cosmic order), she like (a woman) knowing well does not annihilate the several quarters'.

The sense of 'command or law' is quite appropriate in more than half the Rgvedic passages in which the word vrata occurs. In some passages the sense of 'religious practices or modes of sacred worship' is suitable. For example, Rg. X. 65. 11 says '(the Viśve-devas) that are good donors make the sun rise in heaven and spread about the Ārya vratas over the earth'. Vide also Rg. VI. 14. 3.

There are several places in the Rgveda in which the words 'avrata' (11 times), 'apavrata' (in Rg. I. 51. 9, V. 42. 9, V. 40. 6), 'anyavrata' (in V. 20. 2, VIII. 70. 11, X. 22. 8) occur and in almost all of which *vrata* must be taken to mean 'mode of worship or ethical and religious practices of the Vedic worshippers'. Prof. Apte has to admit this (pp. 479, 483). It will not do to ignore these passages in finding out the derivation and meanings of the word vrata or to clap them in a separate group (as Prof. Apte does on p. 413) and distinguish them from other passages supposed to indicate the divine phase. There is nothing to show that Vedic sages distinguished between divine vratas and other vratas meant to be followed by Heaven and Earth, rivers, mountains and human beings. Some of these passages in which the word 'avrata' occurs strongly militate against the theory of Prof Apte. For example,[15] in Rg. I. 101. 2 Indra is

14. एषा दिवो दुहिता प्रत्यदर्शि ज्योतिर्वसाना समना पुरस्तात्। ऋतस्य पन्थामन्वेति साधु प्रजानतीव न दिशो मिनाति॥ ऋ I. 124. 3. The meaning of the last quarter is that Usas always rises in the east and that she does not annihilate the separateness of the four quarters by sometimes rising in a direction other than the east. In this the dawn simply follows the law laid down for her in the order of nature (rtasya panthām). The idea about the confusion of quarters is well expressed in Rg V. 40. 5 Vide also X. 32 7.

15. Rg I. 101. 2 is यो ध्यसे जाहुषाणेन मन्युना यः शम्बर यो अहन् पिप्रुमव्रतम्; while I. 101. 3 is यस्य द्यावापृथिवी पौंस्यं महद् यस्य व्रते वरुणो यस्य सूर्यः। यस्येन्द्रस्य सिन्धवः सश्चति व्रत &c.

said to have killed Pipru who was *avrata* and in the very next verse it is said that Varuna and Sūrya abide in the vrata of Indra and the rivers also accept his vrata. Therefore, vrata in this hymn must mean something akin to the meaning of vrata in *avrata* and not akin to 'tracks of luminaries'. Compare IX. 73. 5 and 8 where avrata occurs with 'rakṣati vratam' in IX.73.3 (both being verses about Soma).

There are seven passages in the Rgveda where the word 'vivrata' occurs. In six of them 'vivrata' is applied to the horses of Indra. According to Prof. Apte, the only natural meaning is 'moving or wandering along diverse paths' (p. 419). But this is arguing in a circle. They can be explained if vrata is taken to mean 'ordinance, duty or practice', when applied to horses 'vivrata' may be held to mean no more than this that two horses are yoked on two sides of the chariot and obey the various orders indicated through the pulling of the reins. The 7th passage X. 55. 3 in which 'vivrata' occurs as an adjective of 'jyotiḥ' is difficult to construe and Prof. Apte has not succeeded in satisfactorily explaining it.

In several passages of the Rgveda phrases like 'tava vrate' occur. Whitney (p. 409) stated that the phrase should rather mean 'in thy established or approved course, following thy lead or example', than 'under thy control or protection' or 'in thy service' as some scholars hold. Prof. Apte thinks that the translation of 'tava vrate' as 'abiding in thy ordinance' (by Macdonell) misses the point and avers that the proper meaning is 'dominion, authority, region or sphere'. Some of the passages containing the words 'tava vrate' are Rg. VI. 54. 9, IX. 102. 5, X. 36. 13, X. 57. 6. In my opinion 'tava vrate' means 'while we abide by your ordinances'. In X. 36. 13 the first half[16] is a relative clause without a verb and we have to supply a form of the root 'as' (to be) or of 'bhū'. In some verses such a form of 'as' does occur with the words as in Rg. I. 124. 15[17]. Therefore wherever the words 'tava vrate' occur, we should generally understand that the meaning is 'while abiding by your ordinances'. This is further supported by the fact that there are passages where the word 'vrata' and other words

like 'sumati' in the locative are used with the forms of the root 'as' to be or of verbs meaning to abide or dwell Vide Rg. I. 83 3 ('vrate te kṣeti', 'abides in thy vrata'), II 27. 13 ('ya ādityānām bhavati praṇītau', 'who is within or under the lead of Ādityas); X. 14. 6[18] 'may we be in the good will of them (the *pitṛs*) that deserve to have sacrifices offered to them and also in their beneficent grace'. Vide also Rg III 1. 21 and III 59 4, VI 47. 13, X. 131. 7 (tasya vayam sumatau ..syāma)

There are eight passages in the Ṛgveda in which the word 'śucivrata' occurs and is always applied to some god or gods In three passages VIII. 43. 16, VIII. 44 21, X. 118 1 'śucivrata' is an attribute of Agni and Prof Apte renders it as '(Agni) with a blazing trail, track or sphere' (p 421) He says 'śuci' is derived from 'śuc' (to shine or flame up), that the word 'śuci' can only mean 'brilliant or flaming', that the meaning 'pure' is purely figurative and secondary and is found only in about *six* or *seven* out of a total of over a *hundred* or more in the Ṛgveda when it is an epithet of '*manīṣā, stoma, matī* or *gīrah*'. These remarks are mis-statements; 'śuci' in the sense of 'pure' is not so rare as Prof. Apte tries to make out (6 or 7 times out of 100). In one verse alone addressed to the Maruts (Rg. VII. 56. 12) the word[19] 'śuci' occurs six times and should ordinarily be taken only in one sense in those six and can only mean 'pure', since 'śuci' is there applied to offerings (havya) and sacrifice In VIII. 44. 21 Agni is styled 'śucir-viprah' and 'śucih' and 'kavih'. The word 'śuci' occurs in that verse four times out of which 'śuci' as applied to 'vipra' and 'kavi' can only mean 'pure or holy'. Vide II 27 13, where the *yajamāna* (sacrificer) is called 'śuci', I 142. 9 where the three goddesses Bhāratī, Ilā and Sarasvatī are said to be 'śuci'. Conceding for argument that the root 'śuc' originally meant 'to shine or blaze', the distinction of two meanings (primary and secondary) in 'śuci' had disappeared long before the Ṛgvedic hymns were composed, as Rg. VII. 56. 12 and other verses establish Vide Rg. III. 62. 5 (where Bṛhaspati is called śuci), I 181 2 (where the horses of the Aśvins are styled 'śuci'), II 33. 13 (where the herbs or drugs of Maruts are spoken of as śuci), VII 49. 2 and 3 where waters are called 'śuci' and

19 शुची वो हव्या मरुत. शुचीना शुचिं हिनोम्यध्वरं शुचिभ्य. । ऋतेन सत्यमृतसाप आयञ्छुचिजन्मान. शुचय. पावका ॥ ऋ. VII. 56. 12 The word शुचि thrice applied to the Maruts may mean 'pure' or 'brilliant.' अग्निः शुचिव्रततमः शुचिर्विप्रः शुचिः कविः । शुची रोचत आहुत. ॥ VIII. 44. 21.

VII 89. 3 (where Varuna is addressed as 'śuci') In the above passages the word śuci in at least a dozen cases is clearly used in the sense of 'pure', is applied to offerings, sacrifices, drugs, horses, waters or rivers and is not restricted to *manīsā*, *stoma*, *matı* and *gırah* as Prof Apte wrongly asserts Prof Apte minimises the number of times that 'śuci' means 'pure', and observes a discreet silence about its being an attribute of the physical objects mentioned above Therefore, there is no difficulty in holding 'śucivrata' as applied to gods meaning 'whose ordinances are pure or holy' In I 15 11 and I. 182 1 the word 'sucivrata' is an attribute of the Aśvins, in III 62 17 and VI 16 24 of Mitra and Varuna and in VI 70 2 of Heaven and Earth. Besides, we have the analogous word 'sucikranda' (the loud laud addressed to whom is pure) applied to Brhaspati in VII. 97 5.

The word 'mahivrata' occurs five times and is applied to Soma (IX. 97 7, IX 100. 9), to Agni (I 45. 3, X. 115. 3) and to Varuna (VI 68 9) and the word 'mahāmahıvrata' to Soma (IX. 48 2). In all these cases the meaning 'whose commands or laws are great or many' would be quite appropriate The word 'mahi' by itself occurs in over 110 passages in the Rgveda, in all of which 'mahi' stands for 'mahat' and qualifies words like 'sravas' (food or fame), ksatra ('prowess' as in I. 54 8 and 11), namah, śarma (in I. 93 8), dātra ('gift', as in I. 116 6), enas (in II 12. 10), karma (II. 22 1), Mahıtvana (in II 23 4), varūtha, dravina (III. 1 22), raksas (IV 3 14) Prof Apte (p 475) quite unnecessarily suggests three separate meanings of 'mahivrata', the first of which is 'of great dominion', 'of great tracks', 'of great exploits' and expands that meaning by interpolating the words 'mighty or resplendent sway or sphere'. 'Mahi' hardly ever means 'resplendent' by itself

The word 'priyavrata' occurs only once in the Rgveda (in X. 150 3), is applied to gods and means 'to whom the ordinances laid down by them are dear' Prof Apte (p 472) criticizes people who explain the word as 'whose laws we love'; but he names no one who does so Similarly, the word 'puruvrata' occurs once only in Rg IX 3 10, is applied to Soma and means 'whose ordinances are many'. Both these words do not at all help Prof. Apte in his interpretation and are rather against his pet theory (of tracks of luminaries &c)

The word 'dhunivrata' occurs twice (in Rg V 58 2 and V. 87 1) and is applied to Marut or the band of Maruts Prof Apte (p. 435

section 47) takes 'dhuni' as an adjective, and as meaning 'roaring, storming' and translates 'dhunivrata' as 'whose paths are characterised by roaring or raging'. The word 'dhuni' occurs about ten times in the Rgveda and when an adjective means 'one that shakes his enemies or clouds' or is a noun meaning 'river' (as in II. 15. 5). Dhuni is also the name of a *demon* (in Rg. VI. 18. 8, VII. 19. 4, X. 113. 9). In I. 174. 9, V. 34 5 and 8, VI. 20. 12 'dhuni' is an attribute of Indra and in I. 79. 1 of Agni The Nirukta (V. 12) while explaining Rg. X. 89. 5 (in which both Soma and Indra are praised) explains 'dhuni' as derived from 'dhū' to shake Therefore 'dhunivrata' should mean 'whose ordinances are such as make others (breakers) tremble'.

It is not necessary to examine separately each of the verses in which the word 'vrata' occurs and Prof Apte's interpretations thereof. The preceding discussion is sufficient to show what vrata means in almost all passages in the Rgveda In his zeal to buttress up his theory, Prof. Apte commits mistakes in the construction and translation of some verses On p. 420 (section 29) he renders Rg. VIII. 94. 2[20] as 'she (Prśni) in whose lap all the gods maintain their vratas, the Sun and the Moon also, in order that they may be seen', explains that the Sun and the Moon are seen only when they keep their vratas and concludes that vratas must mean tracks followed by the Sun. Prof. Apte takes 'sūryāmāsā' as the subject of 'Dhārayante' along with 'Viśve-devāh', but 'Sūryāmāsā' is in the objective case in relation to 'drśe', the proper translation being 'in the lap of whom (i. e. of Prśni, the mother of Maruts), all the gods uphold their laws in order that (people) may see the Sun and the Moon'. What is meant is that the Sun and the Moon rise at the proper times because the gods uphold their ordinances If we compare VIII. 94.2 with I 23.21 (=X.9.7), I. 50.1, I. 52.8, X. 57 4, X. 60 5 it would be clear that my translation is the only correct one and if that be so no question of 'tracks of light' will arise.

Misinterpretations of words like 'ksitīh' in III. 3. 9 as meaning dwellings (rather it means "the common mass of people" as in III. 14. 4, VI. 65. 1, VII. 65. 2, VII. 75. 4, VII 79. 1

20. यस्या देवा उपस्थे व्रता विश्वे धारयन्ते। सूर्यामासा दृशे कम्॥ VIII. 94. 2. Compare आपः पृणीत भेषजं वरूथं तन्वे मम। ज्योक् च सूर्यं दृशे॥ I. 23. 21 (=X. 9 7), दृशे विश्वाय सूर्यम् in I. 50. 1, दिवीव सूर्यं दृशे in X 60 5. In all these cases सूर्यं is the object of दृशे and in VIII. 94. 2 the dual सूर्यामासा is used with दृशे.

&c) and of 'śrusṭim' (on p 450) are passed over here On VI. 70 5 Prof. Apte remarks (p 420, Sec 17) that to take 'vrata' in 'madhuvrata' applied to the deities Heaven and Earth as meaning 'law, duty or will' is almost absurd One fails to see why it would be absurd to hold, when heaven and earth are spoken of as 'dropping[21] *madhu*' (*madhuścutā*) and 'yielding madhu' (madhudughe), that the Vedic poet thinks that the laws of Heaven and Earth as deities are sweet (and not harsh).

We have next to turn to the word 'dhrtavrata' which occurs eighteen times in the Ṛgveda Out of these Varuna is certainly called dhrtavrata in seven passages viz in I. 25 8 and 10, I 44. 14, I. 141 9, II 1. 4,[22] VIII 27 3 and X 66 5 Both Mitra and Varuna are styled 'dhrtavrata' in I 15 6, VIII 25 2 and 8 (and also 'ksatriyā' in verse 8), Indra and Varuna are said to be dhrtavrata in VI. 68 10, Indra alone in VI 19. 5 and VIII 97 11, the Ādityas in II 29. 1, Viśvedevāh in X 66. 8 (and also 'ksatriyāh'), Agni in VIII. 44 25 and Savitr in IV. 53 4 Prof. Apte (p 430 para 37) avers that Varuna is pre-eminently called dhrtavrata (this is not quite accurate as more than half the passages in which the word 'dhrtavrata' occurs refer to gods other than Varuna), because he maintains intact the paths he has excavated for the luminaries or he sees that the fixed laws of the movements of luminaries are properly observed Unless one has made up one's mind that vrata signifies tracks of luminaries or their fixed movements, these 'dhrtavrata' passages are of no help in settling the original meanings of vrata They can all be well construed by taking 'dhrtavrata' in the sense of 'one who upholds or supports his ordinances' Supposing that Prof Apte is right in thinking that the epithet pre-eminently applies to Varuna it is quite arguable that what is mainly aimed at in calling Varuna 'dhrtavrata' is the high moral level Varuna is held by the Ṛgvedic sages to maintain by punishing sinners, by looking into the truth and falsehood of men (VII 49 3 'satyānrte avapaśyan janānām'), by the fact that he is styled 'ksatriya', 'rājan' and 'samrāj' (who exacts obedience to his laws) as shown above Therefore, the view that *vrata* means ordinances in connection with Varuna is far more appropriate than the theory about his seeing that the luminaries follow their tracks In this connection the word 'dhrtavrata'[23] in I 25 6

21. मधु नो द्यावापृथिवी मिमिक्षता मधुश्चुता मधुदुघे मधुव्रते। ऋ VI 70. 5

22 त्वमग्ने राजा वरुणो धृतव्रतस्त्व मित्रो भवसि दस्म ईड्य । ऋ II. 1 4.

23. तविद्त्समानमाशाते वेनन्ता न प्र युच्छतः। धृतव्रताय दाशुषे॥ ऋ. I. 25. 6.

becomes very important. Almost all scholars hold that that verse means '(Mitra and Varuna) fond of the donor who observes the laws of religious worship partake of the same offering (made by the donor) and they are not heedless about it (or do not miss it)'. Scholars hold that in this verse the word 'dhrtavrata' applies to a human worshipper and not to a god as in all other passages. Prof. Apte (p 430 para 37) explains that the words 'dhrtavratāya dāśuse', mean 'donor who makes a gift to (Varuna) that is dhrtavrata.' This construction is objectionable for several reasons There are two deities referred to in the principal sentence (the verb is 'āśāte), while dhrtavratāya, being singular, can only be construed with one deity. Prof. Apte further relies on VIII. 94. 2 of which he gives an interpretation which as shown above is wrong. Constructions parallel to 'dhrtavratāya dāśuse' and containing an adjective of the word 'dāśuse' are found in other Rgveda passages. For example, in I 142 1 we have[24] 'O Agni! spread the ancient thread (i. e. sacrifice) for the worshipper who has extracted Soma juice'. Here the words 'sutasomāya dāśuse' do not mean 'to the worshipper who gives offerings to the god who extracts soma'. Similarly, in VIII. 5. 6 the words 'sudevāya dāśuse' mean 'to or for the worshipper (or donor) who worships god' (or for donor to whom gods are beneficent). These several considerations make it highly probable that 'dhrtavratāya' is an attribute of a human being in I. 25. 6 and not necessarily of Varuna. If that be so, vrata in 'dhrtavrata' must mean 'ordinances or mode of religious worship' and not 'tracks of luminaries'. We have the word 'dhrtadaksa' (who upholds strength i. e. who is strong or constant) applied to a priest in X. 41. 3. It is worthy of note that the Śatapatha Br in explaining[25] 'nisasāda dhrtavrato Varunah' in Rg. I. 25. 10 (= Vāj. S. X. 27) remarks that the king and a brāhmana deeply learned in the Veda are both 'dhrtavrata'. It is probable that even in the times of the Rgveda people had come to assign the same meaning to the word 'dhrtavrata' that the Śat. Br. ascribes to it. Conceding for argument that dhrtavratāya in I. 25. 6 refers to Varuna, that does not at all solve the problem of the derivation and meaning of vrata. The word 'vratanīh' occurs only once in Rgveda X.

65. 6 and probably means '(the cow) that is the carrier of vrata' i e. of the milk on which a sacrificer has to subsist In T. S. VI. 2. 5 2-3 it is said that milk is the Brāhmana's vrata On p 442 Prof Apte refers to Sūrya being called 'vratapā' very aptly. Vratapa occurs nine times in the Rgveda, but the Sun is called 'vratapā' only once in I. 83. 5. Vratapā means nothing more than vratapati, which word occurs in T S I 6 6 3[26], I 6 7. 2 and Vāj. S I 5 and is applied to Agni In these passages 'vrata' means a religious vow such as that of a Vedic student who undertakes to study Veda after Upanayana There is no reason why the word 'vratapā' in the Rgveda should not be deemed to have been used in the sense in which 'vratapati' is employed in the T S and Vāj S Similarly, in Rg VII 103 1[27] it is said that the frogs lying silent for a year (in crevices), like brāhmanas observing a vrata, send forth their croaking inspired by the rains Here 'vrata' has the meaning 'a sacred vow or observance' which is the sense in which the word is used in mediæval times and is so used even upto this day.

There is one more word viz vrsavrata, which is analogous to 'dhrtavrata' and which remains to be considered That word occurs only twice (i e in Rg. IX. 62 11[28] and IX. 64 1) and is an attribute of Soma Prof Apte (p. 485, section 48) tries to fit this word in his scheme by referring to the description of Soma as bellowing like a bull, as a bull among cows and as brandishing and sharpening his horns One must not forget the twofold character of Soma as a very pre-eminent deity (the whole of Rg IX. is a glorification of Soma) and as a beverage produced from the twigs and tendrils of the Soma plant and that these two characters become mixed up. In the process of producing Soma beverage, four sounding holes called uparavas are employed[29] (vide H of Dh. vol II. pp 1154-55

for 'uparavas'): This is described as the bellowing of Soma, when Soma is called a vrsa (bull) or vrsabha. Most of the great Vedic gods (Indra, Agni, Soma and others), their chariots, their weapons and even the exhilaration on drinking Soma are spoken of as bulls[30] When Soma twigs are being pressed with stones (grāvan) the tendrils of Soma look like horns All these descriptions about bellowing &c. apply strictly to the soma plant and are poetically transferred to the deity Soma. Prof. Apte translates 'vrsavrata' as 'whose behaviour or deportment is like that of a bull' On the other theory also we can easily explain the word as meaning '(Soma) whose ordinances are powerful like a bull'. Vrsavrata is an attribute of god Soma and cannot be easily construed with god Soma, if vrata primarily means some physical activity and its implications are rather against Prof. Apte's theory.

The result of this long discussion is that Prof. Apte's theory of the derivation of vrata from the root 'vrt' and his long scheme of meanings is not proved and that the derivation from the root 'vr' expressly stated by Yāska at least twenty-five centuries ago and accepted by most scholars has not been at all shaken. Prof Apte probably did not anticipate that the meaning he assigned to 'vrt' would be challenged, but I dispute that meaning also.

There are three passages of the Ṛgveda in which the words 'vrttam na cakram' (like a round wheel) occur, viz I. 155 6 (addressed to Visnu), IV. 31 4, V. 36. 3 (both addressed to Indra). Prof. Apte did not mention them and they have no bearing on the derivation of vrata At the most those might have been relied upon for the meaning of the root 'vrt'. In this discussion we have restricted ourselves to verbal forms or present participles and omitted past passive participles which sometimes depart very much from the root-meaning as in the case of 'krta' in Ṛgveda X. 43. 5 (krtam na śvaghnī vi cinoti devane). 'Vrtta' cannot mean revolving even if vrt meant 'to revolve', it is *vartamāna* that might have that meaning if 'vrt' originally meant 'to revolve' Besides, Ṛg I 155 6 is obscure. It probably refers to the belt of the zodiac that goes round the sky.

It is necessary to clarify the meanings and mutual relations of the three words *rta*, *vrata* and *dharman*. The meanings (three)

30 Only one verse need be quoted to illustrate the above Ṛg. II, 16 6 is वृषा ते वज्र उत ते वृषा रथो वृषणा हरी वृषभाण्यायुधा। वृष्णो मदस्य त्वमीशिष इन्द्र सोमस्य वृषभस्य तृप्णुहि॥

of 'rta' have been specified in H of Dh vol IV pp 2–5 and the meanings of vrata have been discussed in what precedes (vide pp 5–8) In the Rgveda the word is *dharman* and not *dharma*. For a brief discussion of *dharman* vide H of Dh vol I p 1 In the Rgveda sometimes dharman is masculine and often an adjective, meaning 'upholder or sustainer' as in Rg I. 187 1, X. 92 2 In X. 21 3 (tve dharmāna āsate) the word is masculine In other cases it is obviously in the neuter gender as in I. 22 18 (ato dharmāni dhārayan), V 26 6, IX 64 1. In these passages the meaning seems to be 'religious rites or sacrifices', thus approaching vrata in one of its senses In I 164 43 and 50 (= X. 90 16) sacrifices are said to be the primeval dharmans Vide also 'prathamā dharmā' in Rg III 17 1 and 'sanatā dharmāni' in Rg III 3 1 In some cases this sense of dharman would not do, as in IV 53 3, V. 63. 7. where the meaning seems to be 'fixed principles or rules of conduct'. In some cases dharman appears to mean almost the same thing as 'vrata'. For example, in VII 89. 5[31] the sage says 'when we destroy (or violate) your *dharmans* through heedlessness (or infatuation), do not harm us, O Varuna, on account of that sin', which is just the same as Rg I 25 1, where we have 'vratam' for dharmāni In VI. 70 1[32] it is said 'heaven and earth, never decaying and endowed with plenty of seed, are held firmly apart by the *dharman* of Varuna'. In VIII 42 1 (cited above) making the Heaven firmly fixed is described as one of the vratas of Varuna

Though in this way in some passages even of the Rgveda the senses of 'vrata' and 'dharman' appear to have coalesced, there are verses where *all the three words or two of the three* occur It may be noted that even in what are regarded by Western scholars to be later portions of the Atharvaveda (e g. 18. 2 7, 14 1. 51) the word is dharman All three words occur in Rg V. 63. 7[33] 'O wise Mitra and Varuna! You naturally (or according to your fixed rule of conduct) guard your ordinances with the wonderful power of an *asura*; you rule over (or shine over) the whole world according to the principle of cosmic order, you establish in the heaven the Sun that is (like) a brilliant

chariot'. Vrata and dharman occur in V. 72. 2 and VI. 70. 3[34]; rta and vrata occur in I. 65 2, II. 27. 8, III. 4 7, X. 65. 8. Speaking generally, 'rta' is the cosmic order that has been there from the most ancient times Vrata means the laws or ordinances supposed to be laid down by all gods or by individual gods. Dharman meant religious rites or sacrifices or fixed principles Gradually the conception 'rta' became faint and receded into the background and 'satya' took its place. Dharman became an all-embracing conception and vrata came to be restricted to sacred vows and rules of conduct to be observed by a person as a member of a community or as an individual

CHAPTER II

VRATA in Vedic Literature, Sūtras and Smṛtis; definition and importance of Vratas.

After dealing with the etymology and semantic development of the word 'vrata' from the passages of the Ṛgveda in which the word occurs, it is now time to turn to the other Vedic Saṃhitās and the Brāhmaṇas for finding out how that word is dealt with in them Some of the Ṛgvedic verses occur in other Vedic Saṃhitās In several such passages vrata appears to mean 'divine ordinances' or 'ethical patterns of conduct'. For example, the verse[35] Ṛg I. 22 19 'Mark the deeds of Viṣṇu, the helpful friend of Indra, whereby he watches over his ordinances' occurs also in T S I. 3 6 2, Atharva VII. 26 6, Vāj S VI. 4; Ṛg VIII. 11 1[36] 'O Agni! thou art a God that protects ordinances among (gods and) men, thou art to be praised in sacrifices' is also found in Atharva 19 59 1, Vāj S IV 16, T. S. I. 1 14 4-5 and I 2 3 1; Ṛg. I. 24. 15 is found in Vāj S. XII 12 and Atharva VII. 83 (88) 3 and XVIII. 4 69; Ṛg X. 191. 3 is almost the same as Atharva[37] VI. 64 2, the latter substituting the word 'vratam' for 'manaḥ' in the former and thereby indicating that 'vrata' means 'resolve to undertake a religious observance'; Ṛg VII. 103 1, in which frogs that lie down silent for a year and begin to croak at the advent of the rains are compared to brāhmaṇas observing a religious vow, occurs in the Atharvaveda IV. 15 13; Ṛg X. 12 5 is the same as Atharva XVIII. 1 33; Ṛg X. 24 is almost the same as Atharva XIX. 59 2; Ṛg I. 84. 12 is equal to Atharva XX. 109 3, in all of which the words *vratam* and *vratāni* occur. Agni is frequently called 'vratapāḥ' in the Ṛgveda (V. 2. 8, VI 8 2, VIII. 11 1, X. 32 6) and also Sūrya is so called (Ṛg I. 83 5) In the other Saṃhitās Agni is styled 'vratapā' as well as 'vratapati' (protector or lord of vratas) Atharva XX. 25. 5 (Sūryo vratapā) is the same as Ṛg I. 83. 5, Atharva XIX. 59 1 (tvam-Agne vratapā asi) is same as

Rg VIII. 11. 1; Vāj S I. 5.[38] says 'O Agni, lord of vratas! I shall undertake a religious observance (or obligation). May I be able to carry it out, may that (undertaking) of mine succeed; here do I approach truth from untruth'. The T. S I. 3 4. 3 also styles Agni 'vratapati'. Here and there Vedic Saṁhitās other than the Rgveda do employ the word 'vrata' in the sense of 'ordinances of a god or of gods' as in T. S. IV. 3 11. 1, 2, 3 or Atharva VII. 40 (41) 1, VII. 68 (70). 1 ('Sarasvati vratesu te'). But in many places in all the Saṁhitās (other than the Rgveda) and in the Brāhmaṇas and Upaniṣads generally the ordinary senses of vrata are two, viz (1) religious observance or vow, or restrictions as to food and behaviour when one has undertaken a religious vow, or (2) the special food, that is prescribed for sustenance when a person is engaged in a religious rite or undertaking, such as cow's milk, *yavāgū* (barley gruel) or the mixture of hot milk and curds (called *āmikṣā*) Both meanings of vrata are given by Yāska in his Nirukta[39] A few passages from the Saṁhitās and Brāhmaṇas are cited below to illustrate both meanings. For the first meaning, vide the following: T. S II. 5. 5. 6 'this[40] is his vrata (vow); he should not speak what is untrue, should not eat flesh, should not approach a woman (for sexual intercourse), nor should his apparel be washed with water impregnated with cleansing salt; for, all these things the gods do not do'; T S. V 7. 6. 1[41] 'birds are indeed fire; when one who has performed Agnicayana eats the (flesh of) birds, he would be eating fire and would meet with disaster (or distress); (therefore) he should observe this vrata (not to eat bird's flesh) for a year,

for vrata does not extend beyond a year'. The Śāṅkhāyana[42] Br VI 6 prescribes 'He has to observe the vrata, viz that he should not see the rising sun nor the setting sun'. The Tai Ā. I. 26 6 states 'this is the vrata for him (for him who has performed Ārunaketuka-cayana), viz he should not run while it is raining, should not urinate or void ordure in water, should not spit, should not bathe naked, should not step over lotus leaves or gold, should not eat (the flesh) of a tortoise'

The Brhadāranyakopanisad (I 5 21–23) remarks "now begins the consideration about vrata, Prajāpati indeed created the organs, which when created, vied with each other, speech stood fast (by the view) 'I shall only speak' (and do nothing else)' ..Therefore one should perform only one vrata, viz one should only breathe in and should emit breath, for fear that otherwise (*if one were to engage in the activities of the other organs*) wicked Death may seize him ".[43] It is stated in the Tai. Up III 7–10 'one should not speak ill of food, that is the vrata. ...one should not shun food, that is the vrata . one should prepare much food ..one should not refuse residence to a man whatever (when he comes as a stranger seeking shelter), that is the vrata; therefore one should secure plenty of food by some method or other.'[44] In the Chāndogyopanisad (adhyāya II, khandas 13–21) the words 'tad vratam' occur several times in relation to the injunctions *when* one is engaged in the *upāsanā* of several *Sāmans* not to complain about the hot sun, raining cloud, seasons, *lokas* (worlds), domestic animals, brāhmanas and the injunction not to eat marrow for a year (or not to eat it at all)

A few passages from the Vedic Literature may be cited for the second meaning of vrata (food for sustenance &c) men-

tioned above. The T. S. (VI. 2 5. 1.) remarks[45] 'he (dīksita) observes the vrata taking the milk from one udder, then from two udders, then from three, then from four; this is called *ksurapavi* (razor-edge) vrata; barley gruel is the vrata of a ksatriya (when dīksita), āmiksā (hot milk and curds mixed) of a vaiśya' The Śatapatha Br. provides[46] that a dīksita (one who has undergone the consecration ceremony for a vedic sacrifice) should subsist on milk. In another place the Śatapatha says 'for him he heats *vrata*' (i e. the food or milk). The Ait Br. also provides[47] that the dīksita first takes (the milk) from four udders as vrata on the Upasad days, then from three &c Vide T Ā. II 8[48] 'milk is the vrata of a brāhmana (sacrificer); *yavāgū* of a ksatriya and āmiksā of a vaiśya

It appears that in the times of the Brāhmanas the word 'vrata' had come to have two secondary senses derived from the sense of 'religious observance or obligation'; viz 'a proper course or pattern of conduct for a person', and 'an upavāsa' i e. the sacrificer's staying at night near Gārhapatya fire or fasting. As illustrative of the first may be cited a passage that occurs towards the end of the Ait. Br viz 'this is the *vrata* for him (for the king who has performed what is called 'brahmanah parimarah') that he should not sit down before his enemy sits down (but should do so after), if he thinks (from information received) that his enemy is standing the king should also stand up; he should not lie down before his enemy (does so); if the king thinks that (the enemy) has sat down he may then himself sit down, he should never sleep before his enemy sleeps; if he thinks that the enemy is awake he should himself keep awake;

even if the enemy has his head as hard as a stone (or has a stone helmet on his head), he (the king who performs the *parimara*) quickly overthrows him' [49]

The other secondary meaning of *vrata* seems to be *upavāsa* (i e Yajamāna's passing the night in the Darśa-isti and the Pūrnamāsa-isti near the Gārhapatya and other fires, or reducing his intake of food or fasting) "that he performs *upavāsa* in Darśa and Pūrnamāsa istis is so because the gods do not partake of the offering made by one who has not undergone *vrata*, therefore he undergoes upavāsa with the thought 'the gods may partake of my offering'" (*Ait Br.* VII II)[50]

Coming to the Śrautasūtras,[51] the two principal meanings of vrata mentioned above often figure in them For example, the Āp. Śr S IV 2 5–7, IV. 16 11, V 7 6 and 16, V 8. 1, V. 25. 2–20, IX 3 15, XI 1. 7 and IX. 18 9, Āśv Śr S II 2 7, III. 13. 1–2, Śān Śr. S II 3 26 may be referred to for the first meaning and Āp Śr S X 12 4, X. 17 6, XI 15 3 and 6 for the second (viz. food or milk &c) The Grhyasūtras and Dharmasūtras also present the same meaning of vrata For sample, the Āsv. Gr III. 10 5–7 states· these are the vratas for him, viz he should not bathe at night, nor bathe naked, nor run while it is raining

&c.; the Pār. Gr. II 8 says that the *snātaka* has to follow for three days after *samāvartana* certain observances such as not eating flesh, not using earthen vessels for drinking water, not seeing women, śūdras, corpses and crows, not speaking with śūdras, not urinating nor voiding ordure nor spitting in front of the sun, or he should simply speak the truth (instead of observing the other requirements of this passage). Gautama (VIII. 15), Śānkhāyana-grhya (II 11–12), Gobhila-grhya (III 1. 26–31) and others mention certain *vratas* (now obsolete) which every Vedic student was to undergo. Vide H. of Dh. vol II pp 370–373 for descriptions of these. The Āp Dh. S. II 1. 1. 1 ff' specifies[52] the observances to be followed by the husband and wife from the day of their marriage such as eating only twice in the day, not eating to satiety, fasting on *parvan* days Similarly, the Āp. Dh S. (I. 11. 30 6, I 11 31) sets out the observances for *snātakas* (atha snātaka-vratāni) Pāninı has a special sūtra 'vrate' (III. 2. 80) for explaining the formation of words from *vrata* with the affix *in* (ninı) preceded by a substantive such as 'sthandilaśāyin' and 'aśrāddha-bhojı' (one who has taken the vow of not partaking of śrāddha food) Pānini (III. 1. 21)[53] also teaches the formation of a denominative verb from vrata in the sense of 'doing' (*vratayati vratam karoti*). It is the Kāśikā that adds a *vārtika* (absent in the Mahābhāsya) that the verb so derived expresses both the eating of food and the eschewing of it.

As prāyaścittas (expiations) involved the observance of several strict rules they came to be called vratas in Manu (XI. 117, 170, 176, 181), Yājñavalkya (III. 251, 252, 254, 258), Śankha (17. 6, 22, 42, 61, 62) and other smrtis. In the Mahābhārata the word *vrata* is mainly used in the sense of a religious undertaking or vow in which one has to observe certain restrictions about food or one's general behaviour. Vide Vanaparva 296 3, Udyoga 39. 71–72, Śānti 35 39, Anuśāsana 103 34. It was also applied in the epic to a course or pattern of conduct or behaviour not necessarily religious. For example, in the Sabhāparva 58 16 Yudhisthira says that it has been his constant vow that he would not refuse dice-play when he was challenged to it[54] Apart from

the secondary applications of the word vrata, its principal meaning from at least the first centuries of the Christian era onwards has been that of a religious undertaking or vow, observed on a certain tithi, week day, month or other period, for securing some desired object by the worship of a deity, usually accompanied by restrictions as to food and behaviour This is the sense in which the word *vrata* will be used in this section Vratas may be expiatory (*i e* they will be prāyaścittas) or obligatory (such as the vratas of a brahmacārin or snātaka or householder) or they may be voluntary and self-imposed for securing some specific end Expiatory vratas have already been dealt with in the 4th volume of the H of Dh under Prāyaścittas The vratas of a brahmacārin, of snātaka and of the householder have been treated of in volume II of the H of Dh. Vratas or vows that are more or less self-imposed will be discussed in this section of the 5th volume

Vows are found in all religions The Old Testament and the New Testament both bear witness to the sacredness of vows, vide Isaiah 19. 21, Job 22 27, Psalms 22 25, Acts 21 23 The Jainas have five great vows and the Buddhists have the pañca-śīlas.

A great deal of discussion is found in the mediæval digests on a comprehensive definition of vrata Śabara[55] on Jai. VI 2. 20 arrives at the conclusion that by vrata is meant a mental activity, which is a resolve in the form "I shall not do this" and gives as an illustration the sentence 'one should not see the rising or setting sun'. Medhātithi on Manu IV. 13 seems to accept this The Agnipurāna[56] provides 'a restrictive rule declared by the śāstras is called vrata, which is also regarded as *tapas*; restraint of senses and other rules are but special incidents of vrata, vrata is called *tapas* because it causes hardship to the performer (of the vrata) and it is also called *niyama* since therein one has to restrain the several organs of sense'. declares[57] 'resolve is the root of desires, of sacrifices, of vratas and the characteristics called *yamas*—all are known to spring from resolve' But every *sankalpa* entertained by any person whatever is not and cannot be called vrata It may be noted that the Amarakośa holds[58] that the words 'niyama' and 'vrata' are synonyms and that the latter consists of fast and the like that produce merit (*punya*), while the Āp. Dh S I 2, 57 remarks that the word *tapas* is applied to the rules of conduct prescribed for a brahmacārin ('niyamesu tapahśabdah') The Mitākṣarā[59] on Yāj I. 129 appears to indicate that vrata is a mental resolve to do something or refrain from doing something, both being enjoined as duties It is therefore that Śridatta (probably taking his cue from Śabara and the Mit) in his Samaya-pradīpa defines vrata as 'a definite resolve relating to a certain matter held as obligatory' and proceeds to lay down that it may be positive (being in the form 'I must do it') or negative ('I must not do this') He further holds that a resolve[60] made with the addition of a condition not enjoined by śāstras is not a vrata: e g. if a man were to declare that he would observe a fast if his father would not forbid it and that otherwise he would not, this would not be a vrata and that, since *sankalpa* is the principal matter in a vrata, if a man of weak intellect or an ignorant man observes a fast without sankalpa, it would be simply so

much physical hardship but no vrata. The Kṛtyaratnākara[61] mentions several definitions of vrata given by its predecessors, one of which by Deveśvara was that 'a vrata is that which is included in the vratakāṇḍa' This last is a desperate effort at definition and leaves the inquirer hardly wiser than before That sankalpa is closely connected with vrata cannot be gainsaid and follows from a verse of Laghu-Viṣnu[62] 'the choosing of *ṛtviks* is the starting point of a sacrifice, *sankalpa* that of *vrata* and of a *japa* of mantras (in honour of a deity)'. Śūlapāni defined vrata on almost the same lines as Śrīdatta Lakṣmīdhara in his Kṛtyakalpataru on vrata does not define vrata but begins his treatment of vrata with vrataprasaṃsā. Prof K V Rangaswami Aiyangar in his Introduction to the Vratakāṇḍa of the Kṛtyakalpataru remarks (p XXIII) 'Raghunandana in his Vrata-tattva also avoids any attempt to define vrata' Prof Aiyangar did not notice that Raghunandana discusses the question of the definition of vrata in his Ekādaśītattva (Jiv vol II p 7) and therefore he did not repeat the definition in the Vratatattva Raghunandana mentions[63] the definitions of vrata given by Nārāyana and Śrīdatta, does not agree that vrata is a sankalpa but holds that vrata means various rites about which a resolve is made and also that vrata is a *niyama* (a restrictive rule) enjoined by the śāstra, characterised by *upavāsa* and the like and not every niyama such as 'ṛtukālābhigāmī syāt' (Yāj I 79, Manu III. 45) The Vrataprakāśa (a part of Vīramitrodaya) defines vrata as 'a special sankalpa concerning what is well known to the learned as vrata,' just as *mantras* are those that are well-known among the learned as mantras[64] The Dharmasindhu (p 9) defines vrata as a kind

of religious rite consisting of *pūjā* and the like. Although at the root of every vrata and as an urge for it, there must be a sankalpa it appears to me that Raghunandana and the Dharmasindhu properly represent the popular meaning of vrata A vrata comprehends several items such as snāna (bath), the morning prayer (prātah-sandhyā), *sankalpa*, *homa*, *pūjā* of the deity or deities in whose honour or for securing whose favour the vrata is undertaken, upavāsa, feeding of brāhmanas, maidens or married women or the poor and helpless (according to the nature of the vrata), gifts (of cows, money, apparel, sweetmeats &c) and the observance of certain rules of conduct during the period of the vrata. Some of these matters will be dealt with in detail later on, but a few may be disposed off here. Some writers relying on Śātātapa said that before a vrata was undertaken a Vrddhi-śrāddha must be performed[65] The Agnipurāna (175 12) states[66] that one who undertakes a vrata must always take a bath (every day), should subsist on a limited quantity of food, should worship and honour his *guru*, gods and brāhmanas and should eschew ksāra, ksaudra, lavana, honey and meat. Devala states[67] 'without partaking of food (the previous night), after bathing and concentrating one's mind, one should, after invoking the Sun and other deities to be present, commence a vrata in the morning'. The general tendency of medieval writers to go on adding details to what was originally brief is seen at work here also The Vratakālaviveka says that before sankalpa, there

should be remembrance of Nārāyana and namaskāra to him, as laid down by Yogiyājñavalkya There is difference of opinion about the worship of Ganeśa[68] The Vratakālaviveka quotes the Padmapurāna for the order in which the several deities are to be worshipped and honoured after *sankalpa* and refutes the idea that the worship of Ganesa should always precede the worship of other deities. Though the general rule is that[69] the *sankalpa* of a vrata is to be made in the morning, still there are some passages to the contrary. For example, the Bhavisyapurāna[70] (Uttara 11 6-8) provides that on the evening of Āsādha Full Moon one should declare a resolve as follows 'from tomorrow for one month in Śrāvana, I shall take a bath, observe *brahmacarya*, take one meal only after evening, sleep on the ground, will be compassionate to all living beings'.

There is a difference between *homa* and *pūjā* A homa with Vedic mantras, according to ancient authorities, cannot be performed by women and sūdras Though theoretically the three varnas were entitled to perform homa with Vedic mantras some learned brāhmanas held the view that in the *Kaliyuga* no proper ksatriyas and vaisyas existed[71] Even as to Śūdra[72] some writers like Kamalākarabhatta went so far that a śūdra could not read and study even purānas but should only listen to their

recital by brāhmanas. The result was that most people performed only *pūjā* and not homa in Agni. According to most writers the homa was to be performed in honour of that deity for whose favour the vrata was performed. According to Vardhamāna and a few others the homa in a vrata may be in honour of the deity of the vrata or may be a vyāhrtihoma[73] It is stated by the Agnipurāna[74] that there is *japa*, homa and also gifts at the end of all vratas in general and the Visnudharmottara observes that those who perform upavāsavrata should inaudibly mutter the mantras of that deity, should meditate on that deity, should listen to stories about that deity, should worship the image of that deity, should take the names of that deity and listen to others singing the names Pūrvamīmāmsā writers made a distinction between *homa, yāga* and *dāna*. Śabara[75] on Jai. IV. 2. 28 puts the distinction in a nutshell by saying that 'giving up what belongs to one is common to all the three, but *yāga* means simply giving up something intending it for a deity and accompanying it with a mantra; in *homa* there is in addition the throwing of a thing in fire; dāna consists in abandoning a thing that belongs to one and creating the ownership of another in that thing.' In another place (on Jai IX. 1. 6), Śabara refers to the argument that yāga is nothing but the worship of a deity (api ca yāgo nāma devatāpūjā).

Manu II. 176 and Yāj. I. 99, 100, 102 show that *Devapūjā* is different from[76] *homa* and was performed after the latter according to Marīci and Hārīta quoted in the Smrticandrikā, Smrti-muktā-

phala and other digests Certain matters connected with devapūjā such as the questions whether images of gods were worshipped in the times of the Ṛgveda and the Saṃhitās, whether the worship of images arose spontaneously among the Vedic Aryans or whether it was derived from some other race or sectarians or from śūdras and Dravidian tribes, have already been dealt with at some length in H of Dh vol II pp 705–712 Similarly, descriptions of devapūjā and the several items and stages in the procedure of devapūjā have been set out in H of Dh. vol. II pp 726–735 A few matters either not set out there at all or briefly set out may be spoken of here It should be noted that ordinarily there are 16 upacāras[77] (items of showing honour) in the procedure of devapūjā, but they may be increased to 36 or 38 or reduced to 14, 12, 10 or 5 and there is no complete unanimity on the question of the names of the 16 upacāras and their order. The Brahmavaivartapurāna sets out what the sixteen, twelve and five upacāras are The Vratārka quotes verses enumerating 38, 16, 10 or 5 upacāras. If a person is unable to offer even five upacāras then he should offer two, viz sandalwood paste and flowers and if he cannot do even that, then he may offer only devotion. So says the Kālikāpurāna quoted in Varsakriyā-kaumudī p 157. From Śabara's *bhāṣya* on Jai. V. 1. 4 it follows that long before his day (not later than 4th century A. D.) the order (*krama*) of the upacāras had been settled[78] Mediæval works like the Vratārka (folio 23 b ff) and V. K K pp 200–201

(quoting Nrsimhapurāna 62 8–14) prescribe for all vratas in general the recital of each of the sixteen verses of the Purusasūkta (Rg. X. 90) with each of the sixteen upacāras in order (viz. āvāhana, āsana, pādya, arghya, ācamanīyaka, snāna, vastra, yajñopavīta, anulepana (or gandha), puspa, dhūpa, dīpa, naivedya, tāmbūla, daksinā, pradaksinā), while some works associate with each of these one or more Paurānika mantras also It should not be supposed that these upacāras (particularly puspa, gandha, dhūpa, dīpa and naivedya) were absent in the Vedic age and came into prominence at a very late stage by being borrowed from non-Aryan people. The Aśvins are described as wearing wreaths of blue lotuses (puskarasrajā) in Rg X. 184. 2 and Atharva III. 22. 4; the Maruts also are spoken of as wearing wreaths (Rg. V 53. 4). In numerous passages the Rgveda refers to the casting of offerings (*havya*) mixed with clarified butter in Agni (e g. Rg. III 59 1 and 5)[79] The gods are even asked to *eat* apūpa, purodāśa, dhānā, milk, curds, honey &c. in Rg. III 53 8, III 52 1–7, IV. 32. 16, VIII. 91. 2, in Atharva XVIII 4. 16–26. The underlying conception in these passages is the same as that involved in offering *naivedya* to an image. In the Śatapatha Br[80] the word *upacāra* appears to have been used in the sense of 'honour' or 'mode of showing honour' In the Tai. Ā X. 40[81] occurs a mantra called 'Medhā-janana' which was recited in the ear of a child in the *jātakarma* 'may god Savitr, goddess Sarasvatī and the gods Aśvins wearing wreaths of blue lotuses produce in you intelligence'. There is evidence that long before the time of the grhyasūtras several of the sixteen upacāras were well-known. The Nighantu (III. 14) enumerates 44 verbs that have the sense of 'worship' among which 'pūjayati' is

included The Nirukta in explaining the word 'supāniḥ' occurring in Rg III. 33 6 states that the word 'pāni' is[82] derived from 'pan' to offer pūjā and supports this derivation by saying that people worship gods by joining together their hands It is clear that the Nighantu treated 'pūjayati' as a verb occurring in the Vedas and that folding the hands (i e namaskāra) was a item of worship long before the Nirukta While explaining the word 'saparyan' occurring in Rg III. 31 1 the Nirukta offers 'pūjayan' as a synonym. From Pāṇini[83] V 3 99 and the Mahābhāsya thereon it is clearly seen that in the days of the former images of gods were made for sale and also for worship Patañjali expressly says that the rule applies to images which were worshipped and which gave livelihood to the *Pujaris* of those images and not to images made for sale Vide also Mahābhāsya on Pāṇini I 1 25. The Āsv Gr[84] provides that when *madhuparka* is to be offered to a rtvik, an ācārya, a bridegroom, a king or a snātaka or a relative (like father-in-law, paternal or maternal uncle), a seat, water for washing the feet, arghya water, water for ācamana, honey mixture, a cow are to be announced to the guest three times in each case In another place, the same sūtra[85] speaks of the presentation of sandal-wood paste, flowers, incense, lamp and garment to the brāhmanas invited at a srāddha In these two passages alone nine of the 16 *upacāras* are mentioned. The word pūjā took on a secondary meaning, viz (honour without use of gandha, puspa &c) even in the times of Dharmasūtrās (vide Āp Dh S I. 4 14 9, 'nityā ca pūjā yathopadesam') Yāj (I 229 ff) mentions in srāddha *āvāhana, arghya, gandha, mālya, dhūpa, dipa* &c When the worship of images became common, the

upacāras that had been offered for showing honour and worship to worthy men were by a natural analogy employed in it In my view the theory that pūjā and the upacāras were borrowed from the Dravidians or some non-Aryan people cannot be held to be proved, is quite speculative and that 'pūjā' of images of gods was an indigenous development. Medieval writers were careful to point out that there was no essential difference between yāga (vedic or other sacrifice) and pūjā, as in both there was the giving of some substance intending it for a deity. Prof J Charpentier contributed a paper on 'the meaning and etymology of pūjā' to the Indian Antiquary vol 56 pp 93–99 and pp 130 ff I demur to his conclusions He points out that 'pu' in Tamil means 'flower', that the word pūjā is derived from Dravidian 'pūcu', 'pūsu' to paint or daub' (p. 133) and asks the question why red colour is used in the worship of Gods; he himself answers it by suggesting that it was a substitute for blood There is no reason whatever for assuming that pūjā was derived from 'pu' and not from 'puspa' (flower) which was known to the Rgveda (II. 13 7 'puspinīh' and X 97 3 'puspavatīh'). There is no sound reason to assume that 'pūcu' (to paint) existed thousands of years ago in Dravidian languages and was not a more recent acquisition, when the word pūjā can be traced a thousand years before any existing literary work in any Dravidian language.[86]

Some works on vratas treat at great length the several upacāras, particularly flowers that should be offered to the various images worshipped, the consequences of offering those flowers, the various kinds of fragrant substances (*gandha*) to be offered or the incense to be burnt, the nature of the foods &c. Vide for example, Hemādri (on vrata) vol. I. pp. 49–51, Krtyaratnākara pp. 70–71, 77–79, Varsakriyākaumudī pp 156–181. For reasons of space it is not possible to treat of these matters here. Besides, H. of Dh vol II. (pp 731–734) deals at some length with the unguents, the flowers, the lamps, the naivedya to be offered in the ordinary *devapūjā*. A few matters not mentioned there are set out here for the sake of completeness of treatment The Sm. C. I. p. 201 quotes the Padmapurāna[87] to the effect that sandal-wood is holy among unguents (gandha), *agaru* (Agalochum)

is better than sandalwood, dark *agaru* is still better and saffron is preferable to dark *agaru*. Hemādri (on vrata vol I pp 43–44) quotes passages from several purāṇas defining[88] *catuḥsama* as tvak i e cinnamon, patraka (cassia leaf), lavanga i e cloves, and saffron (or two parts of musk, four of sandalwood, three of saffron and one of camphor) and sarvagandha as saffron, sandalwood, *uśīra* (fragrant roots of a plant), *mustā*, lāmajja (root of fragrant grass), camphor and the three perfumed things viz *tvak*, cardamom and *patraka* and Yaksakardama as camphor, *agaru*, musk, sandalwood and *kakkola*. The Agnipurāna (chap. 202 1) first states that Hari is pleased by the offerings of flowers, perfumes, incense, lamps and *naivedya* and then specifies the flowers that are fit for offering to the deities and that are unfit (verses 2–15). The Kalpataru on vrata (pp 180–181) quotes the Bhavisyapurāna (Brāhmaparva 197 1–11) for stating the consequences of using various flowers in worship, viz worship with mālatī flowers leads the worshipper in the presence of god, worship with *karavīra* flowers confers health and incomparable prosperity, by the flowers of Mallikā the worshipper becomes endowed with all pleasures, with pundarīka (lotuses) he secures bliss and lasting wealth, with flowers of the fragrant *kubjaka* he secures highest prosperity, with lotuses (white and blue) he secures spotless fame, with various *mukurakas* (Jasminium zambac) he is freed from disease, worship with Mandāra flowers destroys all kinds of leprosy, and with bilva flowers he obtains wealth, with *arka* flowers the Lord Sun confers blessings, with a garland of *bakula* flowers the worshipper has a beautiful daughter, the Sun worshipped with Kiṃśuka flowers does away with trouble, with Agastya flowers the deity gives success and worship with lotuses gives a beautiful wife, with vanamālā the worshipper becomes free from tiredness, the worshipper of the Sun with Aśoka flowers makes no mistakes, and the Sun worshipped with *japā* (china rose) flowers frees the worshipper from trouble. About dhūpa (incense burnt in worship) a good deal is said in the digests. The Kalpataru

(on vrata pp. 182–183)[89] observes as follows: The Sun comes near (i. e favours) a worshipper who burns sandalwood and confers desired objects when one burns *agaru* as dhūpa; one who desires health should burn *guggulu*; the Sun is always pleased by the use of pindāṅga (i e. *silhaka*) and confers health, wealth and the highest bliss; a man secures blessedness by using *kundaka* (the exudation of *sallakī*) as dhūpa and trade becomes fruitful by using śrīvāsaka (*sarala*) as dhūpa and one gets wealth by burning rasa (myrrh) and sarjarasa (resin of the śāl tree) Bāna in the Kādambarī (pūrvārdha, para 56) refers to the practice of burning *guggulu* in the temple of Candikā Kalpataru (on vrata pp 6–7), Hemādri (on vrata) vol I pp 50–51, Krtyaratnākara p 78 quote several verses from the Bhavisyapurāna defining dhūpas called 'amrta', 'ananta', yaksānga, mahānga The Bhavisyapurāna[90] remarks· the *jātī* is the best among flowers, kundaka is the best dhūpa, saffron is best among fragrant substances, sandalwood among unguents; ghee is best for lighting lamps and *modaka* sweets among naivedya foods It may be noted that the burning of guggulu and other substances had a practical end in view, viz. the destruction of fleas and bees [91]

It is no doubt true that in most vratas brāhmanas are to be fed, but one should not run away with the idea that the blind, the poor and the helpless were altogether forgotten. In the case of many vratas it is expressly provided that food should be given to the blind, the poor and the helpless. In describing the Aviyogavrata, both the Kalpataru (on vrata p. 75) and Hemādri quote a long passage from the Kālikāpurāna in which it is provided that on the day of the vrata tasteful and well-flavoured food and drink without stint should be distributed to the helpless, the blind and

The Bhavisya (Uttara, 22 33–34)[93] recommends that one observing a vrata should provide food for the blind, the distressed and the helpless according to his means. As in the case[94] of śrāddhas, particularly at Gayā, the Purāṇas often enjoin lavish expenditure on vratas and condemn stinginess or spending less on them than one is able to spend. Vide Matsya 100 36 The Bhavisyottara[95] on Ubhayadvādaśīvrata states 'the performer of Ubhayadvādaśīvrata being solely devoted to Kṛsna should not be tricky (spend less) in spending wealth'. In respect of Aviyogavrata the Kālikā-purāna provides 'the performer free from trickiness about wealth should give an equivalent to the brāhmanas or the couple if he is unable (to give pearls and precious stones)'. must be cultivated as common to all vratas viz. 'forbearance, truthfulness, compassion, charity, purity (of body and mind), curbing the organs of sense, worship of deities (or images), offerings into fire, contentment, not depriving another of his property. This ten-fold dharma is declared as common to all vratas' Devala prescribes: '*brahmacarya* (celibacy), purity, truthfulness and giving up of flesh-eating—these four are the highest (virtues) in vratas. Brahmacarya is lost by looking at (stranger) women, touching them and engaging in talk with them, but not by sexual intercourse with one's wife during the allowed days after her monthly illness' The Nāradīyapurāna remarks[97] 'brahmacarya is prescribed for being observed in all vratas and it is declared that generally sacrificial food is eaten'. *Haviṣyānna* is variously defined Manu[98] says 'the food proper for hermits (such as *nīvāra*), milk, juice of soma plant, flesh that has not become putrid, and aksāralavana (natural salt)—these are declared to be (fit) sacrificial food by nature'. Though flesh was offered in śrāddhas in the times of the several early smṛtis such as that of Yāj flesh must be excluded from the list of proper foods in the case of vratas owing to the express provisions contained in Devala-smṛti (cited above) and others. Vide H of Dh vol. IV. p. 149 n. 343 for *haviṣya* food. The Kṛtyaratnākara[99] quotes a long passage from the Samayapradīpa on what food should be partaken in vratas viz. 'first come yavas (barley), on failure of them *vrīhi* (rice), on failure of this, other food except māsa (black beans), *kodrava*, gram, *masūra* (a kind of pulse), *cīna* and kapittha'. The Purānas extol, as in the case of pilgrimages, the performance of vratas to the skies Certain vratas like those to be undergone by a Vedic student had ceased to be in vogue and vratas associated with Vedic sacrifices also had become rare in the centuries before the Christian era. In the grhya and dharma sūtras and in ancient smrtis like those of Manu and Yājñavalkya what were called vratas in the Purānas did not occupy any very prominent position. During the early centuries of the Christian era Buddhism and Jainism were influential rivals of the ancient sacrificial system. In order to wean away common people from those two schisms it is very probable that learned followers of the Vedic system hit upon the glorification of vratas and promised heaven and otherworldly and spiritual rewards to those who performed vratas that were comparatively easy and within reach of all instead of sacrifices and also adopted some of the practices of common folks as vratas, e g kukkuti-markati-vrata in Bhavisyottara 46. 1–43, Sītalā-vrata (Vratārka folio 111 b–113 b, N. S. p 123). The Brahma-purāna[105] says 'the reward that is secured by the worship of the Sun for a single day cannot be secured by hundreds of Vedic sacrifices or by brāhmanas to whom the fees stated in the texts are paid' The Padmapurāna[106] extols Jayantīvrata by saying that in the body of the man who performs it all holy places and deities reside The Garudapurāna[107] quoted by Hemādri states that the Kāñcanapurīvrata described by it is more purifying than even the Ganges, Kuruksetra, Kāśī and Puskara. The Bhavisya-purāna (Uttara 7 1) provides that a man crosses easily the deep ocean of hells by means of the boat of vratas, *upavāsas*

and *niyamas*. In the Mahābhārata[108] (and the Padmapurāna VI 53 4–6) it is stated that the Vedic rites and rites prescribed by Manu cannot be performed in Kaliyuga and that therefore it declares to Yudhisthira something that would be an easy remedy, requiring little wealth and causing little trouble but securing great rewards and that would be the essence of Purānas, viz one should not eat on the Ekādaśī of both fortnights; he who does not eat food on Ekādaśī does not go to hell. About the Ubhayadvādaśīvrata described in the Bhavisyapurāna it is said that Prabhāsa,[109] Gayā, Puskara, Vārānasī, Prayāga or holy places to the east or west thereof, or to the north are not superior or equal to the Kārtika vrata. The Anuśāsana-parva[110] proclaims that there is no higher *tapas* than upavāsa (fasting) or even equal to it and that poor men can secure the rewards of sacrifices by resorting to the upavāsa described. Hemādri quotes two verses on Arkavrata from the Bhavisyapurāna stating that if a man observes for a year *nakta* on the 6th and 7th tithis in each fortnight he obtains the merit secured by those who perform the Vedic sacrifices called *sattras* or who observe the vow of speaking the truth.

In the Varāhapurāna the question[111] asked is 'how can a poor man reach God' and the reply is that he can do so by *vratas*

and fasts The Lingapurāṇa (pūrvārdha 83 4) provides that one who for a year observes *nakta* (eating only once in the evening) and worship of Śiva on the 14th and 8th tithis in each paksa (fortnight) secures the reward of all sacrifices and reaches the highest goal The Bhavisya asserts that brāhmanas who have no sacred fires (śrauta or smārta) benefit in this way that gods become pleased with them by (the observance of) vratas, fasts, restrictive rules of conduct and various kinds of gifts, particularly by a fast on special tithis.

The keynote struck by the Matsya, Brahma and other Purānas is how to secure great rewards with little effort The Brahma-purāna remarks that by merely taking in Kaliyuga the name of Keśava a man obtains the same rewards that one got in *krta-yuga* by deep meditation, in Tretā by performing sacrifices and in Dvāpara by worship (of images) The Matsya says: The great sages do not commend sacrifices which involve killing (of animals); those whose wealth is *tapas* became firmly placed in heaven by making gifts, according to their means, of particles of grains (collected from fields &c), roots, fruits, vegetables and water vessels and that *tapas* is superior for (several) reasons to sacrifices The Padmapurāna reaches the peak of exaggeration when it says 'no one except Hari will be able to recount the merit of him who offers a lamp on the day of Hari in Kārtika with devotion' or 'Visnuvrata is the highest, a hundred solemn Vedic sacrifices are not equal to it'. The Skandapurāna[112] (quoted by Hemādri on vrata vol. I. pp. 318–321) contains a long eulogy of vrata, one verse of which may be cited here 'Gods attained their position through restrictive observances (vratas); they shine forth as stars by virtue of the vratas (they performed)'.

There were certain differences between Vedic sacrifices and vratas The promised reward of most sacrifices was heaven, while Purānas promised that most vratas would confer tangible benefits in this very life. Further, vratas could be performed by all, including śūdras, maidens, married women, widows, even prostitutes

There were vratas for the *brahmacārin* (called Veda-vratas) and for the snātaka These have been already dealt with in H. of Dh. vol. II pp. 370–374 and pp 412–415 respectively. That

vratas (in the medieval sense) existed even in the first centuries before and after the Christian era follows from the Āp Dh S and from the dramas of Kālidāsa, from the Mrcchakatika and the Ratnāvali The Āp Dh S II. 8 18 prescribes a vrata for one year which is equal in its merit to brahmacārivrata for 48 years and Āp Dh S II. 8 18–19 to Āp Dh S II. 8 20 prescribe two modes of a vrata to be begun on Tisya (Pusya) naksatra to be observed by a person desirous of prosperity Vide S B E vol II. pp 145–148 Hemādri (vrata II p 628 quotes Āp Dh S II. 8. 20 3–9), explains the sūtras and calls this Āpastambokta Pusyavrata

In the Śākuntala (Act II) the dowager queen (mother of Dusyanta) sends a message that on the 4th day from the date of the message her fast (vrata) would end[113] The Vikramorvasiya (III) *appears to refer to a vrata called in later times* Rohinīcandraśayana-vrata (vide Hemādri vol. II. pp 599–600) It may be noted that in the above works royal ladies are described as observing vratas In the Raghuvamsa Kālidāsa alludes to an Āsidhāra-vrata (XIII. 67) The Mrcchakatika (Act I) speaks of an upavāsa (a vrata) called Abhirūpapati which appears to have been somewhat like the Bhartrprāptivrata described by Hemādri (vol I. pp 1199–1200) The Ratnāvali (Act I at end) describes Madanamahotsava which reminds us of the same described in Hemādri (vol II pp 21–24) It appears, however, that the number of vratas in the first centuries of the Christian era was not very large Gradually, however, the number of vratas increased by leaps and bounds and their total number, as seen from the list furnished at the end of this section, would be in the region of one thousand One of the earliest digests on *tithis* and astrological matters in relation to Dharmaśāstra is the Rājamārtanda of king Bhoja (1st half of 11th century A D) It mentions only a few vratas (about 24) The next important extant work is the Krtyakalpataru of Laksmīdhara (1st half of 12th century A D) who mentions in the vratakānda about 175 A comparatively later work viz the Vratakālaviveka of Śūlapāni (1375–1430 A D), which discusses the rules about the proper times for observing vratas, mentions only 11 vratas Hemādri's is the largest published work on vratas, containing as it does

about 2200 printed pages in the B I. edition It deals with about 700 vratas. This shows that towards the end of the thirteenth century, when foreign invaders had seized the larger part of India and were ruthlessly razing temples to the ground and converting by force and fraud thousands to their faith, the men of the day, both learned and ignorant, were expending vast intellectual labour and huge sums of money on vratas, pilgrimages and śrāddhas, blissfully ignorant of and blind to the political and religious dangers that engulfed them all.

The vratakośa edited by M M Gopinath Kaviraja (in the Sarasvatībhavana series in 1929) lists 1622 vratas, but that list is unduly swollen and inflated for various reasons.[114] For example, the Astakā-śrāddhas and Anvastakā-śrāddhas are included and have nine numbers assigned to them There are twelve numbers assigned to Anantavrata because it is performed for twelve months from Mārgaśīrsa, but Hemādri (on vrata vol. II. pp. 667–671) treats it as one vrata. Upavāsavrata is given four numbers, the only reference given being Hemādri (vrata) II. p. 509 (only 1½ lines from Matsya). Hemādri (vrata II. pp. 748–52, 757 and so on) describes *Ekabhakta* twelve times in each month from Caitra to Phālguna and then on II. p 863 refers to him who performs Ekabhaktavrata for one year. The Vratakośa gives 13 separate numbers (2 for Ekabhakta and 11 for Ekabhukta, for this latter form there being no authority of Hemādri who calls all the 13 Ekabhaktavrata) Grahaśānti is given five numbers. It is unnecessary to multiply examples. If properly sifted the number would be much smaller than 1000.

When a person undertakes a vrata he must see to it that he finishes it; for dire consequences are laid down for him who gives it up 'through heedlessness. Chāgaleya declares[115] 'when

a person, having first undertaken a vrata, does not carry it out, being led away by some desire, he while alive becomes (i e. is to be treated as) a cāndāla and after death becomes a dog'. In such a case where through greed, infatuation or inadvertence a man is guilty of breaking his vrata, he has to undergo three days' fast and also shave his head and then begin the vrata (the remainder acc to Nirnayasindhu, the whole of it acc to Śūlapāni). The Varāhapurāna states 'that man who undertakes a vrata on ekādaśī day but does not, owing to foolishness, finish it, reaches a very evil state'.

Death in the midst of a vrata did not deprive the performer of the merit for which he began it Angiras[116] provides 'if a person that has begun some religious act for some benefit dies before the rite is finished, he secures the merit that is the reward (of that act) after his death, Manu so declared'.

No one should undertake a vrata in the midst of *āśauca* (impurity on birth and death) But it is provided by the Visnudharmasūtra[117] (22 49) that āśauca does not affect the king in doing his royal duties, nor those undergoing a vrata in the carrying out of the vrata Similarly, Laghu-Visnu observes in the case of vratas, sacrifices, marriages, in śrāddha, homa, worship (of an image), in *japa*, impurity does not affect after they are begun, but it affects before they are begun (i e is an obstacle to beginning these after impurity) Yāj. observer of vrata) from all beings, disease, forgetfulness, the command of one's *guru* do not break a vrata provided these occur only once (during the period of the particular vrata). It is provided by the Matsya-purāna, Agni and Satyavrata[119] that in the case of women that have commenced a vrata of long duration there is no stoppage of the vrata if they have monthly illness in the midst of the vrata or they become pregnant or are delivered of a child and that they should get the rites performed by another as long as they are impure, but physical acts (such as fasting) may be done by them. There are certain other matters that do not affect the observance of a vrata, viz (drinking)[120] water, (partaking of) roots, fruits and milk and sacrificial offering, the desire (or command) of a brāhmana, the order of one's guru and medicine. Hemādri remarks that the drinking of milk and the rest that follow do not affect vrata if the performer is a woman, a child or one who is in extreme pain. A person observing vrata[121] should eschew all this, viz anointing the body or the head with oil, chewing tāmbūla, applying sandalwood paste and whatever else would increase physical strength or passion.

What actions do not detract from the observance of upavāsa will be discussed later.

A few words about homa may be said here. Women could not offer homa with mantras (Manu IX. 18). Homa could be performed for them through a priest. When no particular substance is specified the *āhuti* (offering) into fire is to be of

CHAPTER III

Persons entitled to engage in Vratas, objects desired by means of Vratas, classifications of Vratas and literature on Vratas, times for Vratas

One important matter is that of vratādhikārinah (persons entitled to engage in a vrata). Persons of all castes including śūdras are entitled to perform vratas. Devala states:[123] 'there is no doubt that (men of) all *varnas* are released from sins by observing vratas, fasts and restrictive rules of behaviour and by mortification (lit heating) of the body.' Women are also entitled to perform vratas In fact the purānas and digests prescribe several vratas for women alone. Manu, Visnu Dh S and several purānas provide that a woman cannot perform a separate sacrifice, a separate vrata or a separate fast by herself, she is honoured in heaven by waiting upon her husband.[124] Visnu Dh. S. (25 16)[125] further provides that a woman who observes a vrata in which a fast enters while her husband is alive deprives her husband of his life and herself goes to hell. Whatever act of benefit in the other world a woman does without the consent of her father, husband or son yields no fruit to her[126] The medieval digests interpreted these verses as meaning that before performing a vrata, a maiden has to secure the consent of her father, a married woman of her husband and a widow of her son and that with the consent of the persons specified a woman

could perform an independent vrata for herself The digests are supported in this view by the sūtra of Śankha-Likhita[127] that it is the rule for women that they should practise vratas, fasts, restrictive observances and worship (or sacrifices) with the consent of their husbands The Lingapurāna[128] provides with the bidding (i e permission) of their husbands, women should perform *japa*, gifts, *tapas* and all else Opinion was divided whether a woman could get *homa* performed through another About the incapacity of women for mantras,[129] vide Manu II. 66, IX. 18 and Yāj I. 13 The Vyavahāramayūkha following Parāśara held that a śūdra could get the homa in adoption[130] performed through a brāhmana and that the same rules apply to women and śūdras and therefore a woman could get a homa required in vrata performed through a brāhmana Rudradhara (author of Śuddhiviveka) and Vācaspati held that a woman and a śūdra have no right to perform homa with Vedic mantras The Nirnayasindhu[131] supports the Vyavahāramayūkha on the question of homa in a vrata to be observed by a woman But it appears that Nīlakantha, author of the Vyavahāramayūkha, was of a different opinion when composing the Prāyaścittamayūkha[132] Vide H. of Dh vol IV p 78 note 186 on this point It is provided in the Matsya that a woman who is pregnant or is recently delivered of a child should only observe *nakta* instead of a fast and a

maiden or other female who is impure (in monthly illness or otherwise) should get her vrata performed through another, but, whether pure or impure, she may perform bodily acts (such as a fast) by herself (vide Tithitattva pp 121–122)

If a person is unable owing to disease or accident or the like to perform a vrata personally he could get it performed through a *pratinidhi* (a representative) Certain rules were laid down about this It is stated in the Satyāsādhaśrautasūtra[133] 'there is no pratinidhi (representative or substitute) in the case of the owner (the *Yajamāna*), the wife, the son, the (proper) place and time (for an act), the fire, the deity (to be invoked such as Agni, Indra), a rite and a text (to be prescribed for being employed in a rite)'. All religious acts are arranged in three classes, viz. *nitya* (obligatory), naimittika (to be performed when a certain *nimitta* or occasion arises or event happens) and kāmya (performed out of a desire to secure some object). Vide H. of Dh. vol. IV pp 60–61 note 150 for further details The Trikāṇḍamaṇḍana[134] has the following rules about *pratinidhi* in these three kinds of acts 'No pratinidhi (substitute) is allowed in the case of kāmya rites, a substitute is allowable in the case of nitya and naimittika rites; some recognized a substitute even in a kāmya rite after it is once begun; there is no substitute for a mantra or the deity or the fire (Gārhapatya, Āhavanīya or Dakṣināgni), a *kriyā* (such as *prayāja*) or *īśvara* (the svāmin or *yajamāna*); some say that a substitute is not allowed in the case of (a prescribed) place or time An *agnihotrin* can substitute, (if his wife is dead &c) an image of her made of gold or kuśas but a woman cannot proceed with a rite putting forward some

substitute or effigy in place of the husband.' If a person is unable, after undertaking a vrata, to carry it out, he should get it done by a representative. Such representatives are: son, wife, brother, husband, a sister, a pupil, purohita (for dakṣinā) and a friend. Paiṭhīnasi[135] states that a wife might carry on the vrata undertaken by the husband and the husband may do so for the wife, if both are unable a stranger may carry it out, in this way there is no break of vrata. Kātyāyana[136] says:—one who observes a fast for the sake of his father or mother, brother, husband and particularly for his guru secures one hundred-fold merit, if a person observes a fast on Ekādaśī in place of his maternal grand-father and the like they and their representative each obtain the full fruit thereof. These rules about pratinidhi apply to men of all *varnas*[137]

It is somewhat remarkable that the Vratārka *quotes from* Hemādri[138] a passage of the Devīpurāna to the effect that even mlecchas were authorized to perform vratas, if they had faith in them. In the Śāntiparva (65 13–25) Indra is made to say to king Māndhātā that even Yavanas, Kirātas, Gāndhāras, Cīnas, Śabaras, Barbaras, Śakas, Andhras and several others should serve their parents, they could perform rites laid down in the Veda, they could make offerings to their (deceased parents), may dig wells (for the use of all people) and may make gifts to brāhmaṇas. The Bhavisya-purāṇa[139] states that the Haihayas, Tālajanghas, Turks, Yavanas and Śakas desiring to reach the status of brāhmaṇas observed fasts on the first tithi (*pratipad*)

Another remarkable matter is that the Mahābhārata provides that brāhmaṇas and kṣatriyas should not engage in a continuous fast for more than three days and that vaiśyas and śūdras can observe a continuous fast for two days only and a fast for three days is not laid down for these two classes by those who know *dharma*. Devala also has a similar provision.[140]

The bulk of the vratas practised in medieval and modern times are kāmya i e. performed for the purpose of securing some object in this world or sometimes the next world or both. Most of the vratas are really secular though under the garb of religion and, though certain disciplines (such as fast, worship and celibacy, truthfulness) have to be observed, breathe a frankly materialistic attitude; they are meant to appeal to the ordinary human cravings that rule the whole world. The desired objects are legion and it is impossible to set them out in detail Some idea about them may however be conveyed. The Agnipurāṇa mentions *dharma* (puṇya), progeny, wealth beauty or good fortune, virtues, fame, learning, long life, wealth, purity, enjoyment of pleasures, heaven and mokṣa (release from the round of births and deaths) as the objects to be sought by the observance of vratas. The Kalpataru[141] on vrata says that vrata is the highest means of securing the several *lokas* (such as Brahmaloka, Śivaloka, Vaikuṇṭha) and the enjoyment of pleasures and triumph; that in Kṛta, Tretā, Dvāpara and Kali ages respectively kings Sujaya, Rāma, Dhanañjaya and Vikrama became lords of the whole world by means of vratas, that Śaṅkara declared to Hari in various treatises that *vrata* is the one (supreme) observance for man, that though many observances are laid down in each *yuga* they do not come up even to

the 16th part of the observance of vratas, that the virtuous daughter of Vikrama named Vasundharā, residing in the country of Daśārna, attained *mokṣa* through vratas and that gods, sages, *siddhas* and others attained highest perfection by means of upavāsas (fasts).

Classification of vratas: As the vratas to be treated of in this section are almost all self-imposed or voluntary, they may be divided into three classes. The Padmapurāṇa[142] observes: 'ahiṃsā (abstaining from causing injury), truthfulness, not depriving a person of his property by wrongfully taking it, *brahmacarya* (continence), freedom from crookedness or hypocrisy—those are mental vratas that lead to the satisfaction (or favour) of Hari; eating once only in the day, *nakta* (eating only once after sunset), fast (for the whole day), not begging (i. e. subsisting on food that one gets without asking for it)—this is physical vrata for human beings; study of the Veda, recounting (the name of) Viṣṇu, speaking the truth, freedom from backbiting these are vratas of speech.

Another classification can be based on the time for which a vrata may last, i. e. only for a day or a fortnight (pakṣa), a month, season, *ayana* (time of the stay of the Sun in the northern or southern hemisphere), year, or years. A vrata may be for one year or for more years than one or for a person's lifetime. In speaking of vratas performed in a certain month, the question of an intercalary month will have to be considered and will be dealt with in the next section on Kāla etc. Similarly, the matter of tithis occupies a very large place in works on dharmaśāstra and will have to be discussed The subject of Kāla and muhūrta will be dealt with in the next section. Though tithis properly pertain to that section, they will be dealt with here, since tithis are the most important topic in relation to the various observances that are to be performed throughout a year as their basis. The largest number of vratas are tithi-vratas. It is therefore that Hemādri begins his treatment of individual vratas with tithi-vratas (from part I, p. 335 to part II p 519) and passes on

in order to vāravratas (part II pp. 520–592), naksatravratas (part II pp. 593–706), Yogavratas (part II pp. 707–717), Karanavratas (part II pp. 718–726), Sankrāntivratas (part II pp. 727–743), māsavratas (part II pp 800–857), rtuvratas (part II pp. 858–861), samvatsaravratas (part II pp 862–867), prakīrnaka (miscellaneous) vratas (part II pp. 867–1002). The Krtyakalpataru (on vrata) on the other hand begins with vāravratas (pp. 8–34), then deals with tithivratas (pp. 35–398), naksatravratas (pp. 399–417), māsavratas (pp. 418–430), sankrāntivratas (pp. 431–434), samvatsaravratas (pp. 434–451) and prakīrnavratas (pp 452–459). Most of the works on vrata[142a] after dealing with some general matters begin their treatment of vratas with tithivratas. The Samayapradīpa has a different mode of treatment, viz. that it begins with Ganeśavratas (i e. vratas in which Ganeśa is the deity), then with vratas in which the Sun is the deity, then Śivavratas, Visnuvratas and so on. Some vratas are performed not only on a certain tithi, but also require the existence of a certain month or weekday or naksatra or all of these Another classification may be based on the persons competent to perform vratas; most vratas are meant for all men and women; some like Haritālikā and Vatasāvitrī are meant for women alone, some are to be performed by men alone; while there are others to be performed only by kings or ksatriyas or by vaiśyas.

There is an immense literature on vratas. There is no topic of Dharmaśāstra except probably that of tīrthayātrā and of śrāddha on which the Purānas wax so eloquent as on vrata. Some of the Purānas contain thousands of verses on vrata For example, the Brāhmaparva of the Bhavisyapurāna (in chapters 16–216) contains over 7500 verses and the Uttarakhanda of the same Purāna over five thousand verses on vratas; the Matsyapurāna (chapters 54–92 and 95–101) has about 1230 verses on vrata (most of which occur in the Padmapurāna V chap. 20 ff), the Varāhapurāna (chap 39–65) spends about 700 verses and the Visnudharmottara about 1600 verses on vratas. On a modest calculation the Purānas contain about twenty-five thousand verses at least on vratas. It is difficult to draw a strict line between vratas and utsavas, what are called utsavas have also an element of religious rites and conversely many vratas have some element of being a festival. In this work I have included

142 a. अथ संवत्सरकृत्ये निरूपणीये प्रायशः कर्माधिकरणतया विहितानां तिथीनां प्राधान्यात्। यथम तावत्तिथिस्वरूपनिरूपणपूर्वक कर्मोपयुक्तभागा निरूप्यन्ते। क. कि. कौ. p. 2.

several observances which some people may regard as purely utsavas and not vratas at all.

The topic of vratas is rather inextricably mixed up with discussions on Kāla and tithi The nibandhas (commentaries and digests) on vratas are numerous In this section I shall mention works that deal with vratas alone or with vratas in relation to *tithis*, but not works on kāla in general and muhūrta This is rather an arbitrary arrangement and it is possible that there would be some repetition and overlapping A verse in the Kālaviveka of Jīmūtavāhana names seven predecessors that had expounded kāla in relation to religious rites, viz Jitendriya, Śankhadhara, Andhūka, Sambhrama, Harivamśa and Yogloka. Some of these writers must have been earlier than the first half of the 11th century A D as in the Malamāsatattva Raghunandana states that Andhūkabhatta mentions in his work how in *śake* 955 (1033–34 A. D.) there was on Amāvāsyā Tulāsankrānti and the Vrścikasankrānti on the pratipad and again on Amāvāsyā Dhanus-sankrānti This establishes that Andhūkabhatta wrote his works about 1035 A D. But the works of all those seven writers on kāla have not yet been discovered. Two other works ascribed to king Bhoja of Dhārā[143] dealt among other matters with kāla and vratas (in the 2nd quarter of the 11th century) One of them, the Rājamārtanda, is available in Mss and, besides expounding the astrological significance of tithis, week days, naksatras, Yogas, deals (in verses 1136–1292 and 1327–1405) with several vratas and the proper times for them viz. Ekādaśī, Saptamyarkavrata, Agastyārghyadāna, Śravanadvādaśī, Rohinyastamī, Haritālī-caturthī, Durgotsava, Kaujāgara, Pretacaturdaśī, Sukharātri, Bhrātr-dvitīyā, Dīpadāna, Kārtikasnāna, Māghasnāna, Maghāsaptamī, Bhismāstamī, Pusyadvādasī, Aśokāstamī, Caitrāvalī, Sāvitrīvrata, Pāsānacaturthī, Aranyasasthī, Daśaharā, Sankrānti. The Rājamārtanda has not so far as I know yet been published, though hundreds of the largest Ms are quoted in the medieval digests It is at present the earliest extant work of a nibandha form treating of vratas. Another work dealing with vratas and ascribed to Bhoja is the one cited as Bhūpāla-samuccaya or Bhūpāla-krtyasamuccaya, or Krtyasamuccaya on *vratas*, *dānas* &c This

last work has not yet been unearthed and is found quoted in such medieval digests as the Krtyaratnākara

Apart from the Vedic Literature, sūtras, epics, Purānas and Rājamārtaṇḍa, I mainly rely in this section on vratas on the following works (those that I consulted in ms form being expressly indicated and the works being arranged in chronological order as far as possible): Krtyakalpataru (portion on vratas) of Laksmīdhara; Kālaviveka of Jīmūtavāhana; Hemādri's Caturvargacintāmani (on vrata); Samayapradīpa of Śrīdatta (ms); Krtyaratnākara of Candeśvara; Kālādarśa of Ādityasūri (ms), Kālanirnaya or Kāla-mādhava and Kālanirnayakārikā; Tithiviveka, Vratakālaviveka and Durgotsavaviveka of Śūlapāni; Nirnayāmrta of Allādanātha; Varsakriyākaumudī of Govindānanda; Kālasāra of Gadādhara; the Tithitattva, Ekādaśītattva, Janmāstamītattva, Durgārcanapaddhati, Krtyatattva and Vratatattva of Raghunandana, Vratapraksāśa (part of Vīramitrodaya) of Mitramiśra (ms. from Anūpa Sanskrit Library) and Samayaprakāśa (part of Vīramitrodaya), Samayamayūkha or Kālamayūkha of Nīlakantha; Vratārka of Śankarabhatta (ms); Tithyarka of Divākara; Daśanirnaya[144] of Hārīta Venkatanātha; Vratodyāpana-kaumudī of Śankarabhatta Ghāre; Vratarāja of Viśvanātha; Purusārthacintāmani of Vīsnubhatta; Ahalyā-kāmadhenu (ms in Scindia Oriental Institute, 1767–1771 A.D), Dharmasindhu of Kāśīnātha Of these the most important for vratas are Krtyakalpataru (from which even Hemādri, and Krtyaratnākara borrow many passages), Hemādri on vrata, Kālanirnaya of Mādhava, Krtyaratnākara, Varsakriyākaumudī, the works of Raghunandana and the Nirnaya-sindhu. Works like Vratārka and Vratarāja, though exhaustive, borrow *verbatim* long passages from Hemādri and others The treatment of vratas in several of the above-mentioned works is often uneven; for example, the Varsakriyākaumudī disposes of the observances of the 1st, 2nd and 3rd tithis in two pages (28–30), while it devotes twenty-two pages to Ekādaśī (pp 42–64).

It must be emphasized here that this section is concerned with the vratas described or mentioned in *works* on *Dharmaśāstra*. Even so the number of vratas is extremely large. No attempt is made here to include all *vratas* observed by women or by

primitive tribes or by the illiterate people all over India or contained in works written in the several regional languages such as Bengali, Hindi or Marathi The inclusion of such observances would entail an enormous amount of labour, would expand the work to huge proportions and would be beyond the proper scope of the History of Dharmaśāstra Further, to tabulate all the vratas and festivals of all common people and to study the folk life of villagers, forest-dwellers and mountain inhabitants in the States of the continent of India would be beyond the capacity of a single worker and would require the co-operative effort of a large team of workers spread over years When done, that work would be a monumental one on the social anthropology of India In this connection I may mention Prof B. K. Sarkar's work 'Folk element in Hindu culture' and the paper on 'a study of vrata rites in Bengal' contributed by Mr S. R Das[145] to 'Man in India' (1952) vol. 32, pp 207–245. Some writers have already published works dealing with the observances of common people such as Mrs Stevenson's 'Rites of the twice-born', Underhill's 'Hindu religious year', B A. Gupte's 'Hindu holidays and ceremonials', R. C Mukerji's 'Ancient Indian fasts and feasts', Mr. Rigvedi's Marathi work on 'History of Aryan festivals' (ed of 1924) In these books (except in the last and rarely in Underhill's) texts from Dharmaśāstra are generally conspicuous by their absence.

Times for beginning Vratas· Apart from the vratas that have to be performed on certain fixed tithis or times, elaborate provisions are made that vratas in general and several other religious rites are to be begun only at certain auspicious times or in certain astrological conditions A few of these are set out

145. It should not, however, be supposed that I agree with all the propositions in the above two, for example, the meaning which Mr. S R. Das assigns to Laksmī in Rg X 71. 2 (viz. beauty) is not acceptable to me. I hold that 'Laksmī' there also is the opposite of *alaksmī* as the word 'bhadrā' applied to Laksmī suggests and as in Rg. X. 155 1 the idea of alaksmī is clearly conveyed. I do not subscribe to the view that the idea of a malignant spirit was unknown to the poets of Rgveda times and that they had to go to the aboriginal people for that idea. Note the verses अजा सखाय· सख्यानि जानते भद्रैषा लक्ष्मीर्निहिताधि वाचि ॥ ऋ X 71 2, अराय्यि काणे विकटे गिरिं गच्छ सदान्वे । शिरिम्बिठस्य सत्वभिस्तेभिष्ट्वा चातयामसि ॥ ऋ X. 155 1. The निरुक्त (VI 30) explains this verse at length and states that *Bhāradvāja destroyed* Alaksmī and the Brhad-devatā (VIII. 60) says that *Rg* X. 71 removes Alaksmī.

here by way of sample. Gārgya[146] says 'when Jupiter and Venus have set (i. e. are not observable owing to their being near the Sun in the sky) or when they are in the stage of being called *bāla* and *vrddha* and in an intercalary month one should not begin a vrata nor perform its *udyāpana* (the rite of closing a vrata).' The childhood of Jupiter and Venus is a certain period after they set and senility (*vrddhatvá* or *vārdhaka*) is a certain period preceding their setting There is no unanimity on the length of these periods and the periods differ in different countries and also depend on whether there is a season of distress or difficulty, but Varāhamihira[147] states the longest provided should be accepted. The Rājamārtanda has several verses on this, one of which may be set out here: Venus[148] is *bāla* for ten days when it rises in the west, but is *bāla* for three days after rising in the east; Venus is vrddha for one paksa (15 days) when it rises in the east, but is *vrddha* for five days before it sets in the west. Gārgya observes:[149] Venus and Jupiter are (held to be bāla) in the Vindhyas whether in the east or west for ten days, but for seven days in the country of Avanti (of which Ujjayini was capital), in the country of Vanga (Bengal) and among Hūnas (they are bāla) respectively for six and five days. It is further provided in the[150] Devīpurāna that one should not undertake any religious act when Jupiter or Venus is in the sign of the Lion. Similarly, Lalla[151] remarks that all (religious) actions are

condemned when done in what is called Gurvāditya (that is when the sun is in the house of Jupiter viz sign of Pisces and when Jupiter is in the house of the Sun, viz Lion) The Vratarāja remarks that one is to avoid Jupiter in the Lion sign for religious acts only to the north of the Narmadā and elsewhere only in Simhāmśa (i. e the first quarter of the naksatra Pūrvā-phalgunī). The Ratnamālā[152] provides that Monday, Wednesday, Thursday and Friday are auspicious (confer success) in all (religious) acts, but on Sunday, Tuesday and Saturday only such actions succeed as are expressly prescribed for performance on those days. Bhujabala remarks that Tuesday is unfavourable for all auspicious acts but that it is commended for agriculture, study (of the Sāmaveda) and for battles [153]

The philosophical discussions on Time and on its division into year, *ayana* (the Sun's apparent motion in the two regions of the celestial sphere), *ṛtus* (seasons), māsa (month), paksa (half month,) week, days &c will be taken up in the next section. But the exact determination of the question as to the day on which a *tithivrata* is to be performed when the *tithi* spreads over two days occupies a very large space in works on dharmaśāstra

The word *tithi* by itself does not occur in the Rgveda and the other Vedic Samhitās But the idea must have been there even in the Rgveda Amāvāsyā is explained in later works as being of two kinds, viz. Sinīvālī (day on which amāvāsyā is mixed with the 14th tithi) and Kuhū (when amāvāsyā is mixed with the first tithi of the next fortnight) Similarly, Paurnamāsī is of two kinds, Anumati (mixed with the 14th tithi) and Rākā (mixed with the *Pratipad* of the next paksa) In the Rgveda Sinīvālī is[154] raised to the position of a divinity, is described as the sister of the gods, offerings are made to her and she is implored to bestow progeny on the worshippers The Br. Up VI. 4 21 implores Sinīvālī and the Aśvins to implant an

embryo in the wife. Rākā also[155] is similarly treated in the Rgveda (II. 32. 4-5 = Atharva VII. 48. 1-2). Rg X 59. 6 and X. 167. 3 treat Anumati as a deity, prayers are offered to her to enable the worshippers to see the Sun going up and to bestow happiness and she is spoken of in the same breath with Soma, Varuna and Brhaspati. The Vāj. S. prays[156] 'May Anumati approve to-day of our sacrifice'. It should be noted that the Nirukta (XI. 29) holds[157] a discussion on Anumati and Rākā, viz. the Nairuktas (etymologists) say that Anumati and Rākā are goddesses (wives of gods), while the Yājñikas hold that they are two kinds of Paurnamāsī; it is known (in Śruti) that the first Paurnamāsī is Anumati and the later is Rākā Similarly, the Nirukta holds a discussion on Sinīvālī and Kuhū (XI. 31) The Atharvaveda (VI. 11. 3) mentions Prajāpati, Anumati and Sinīvālī together. The word Kuhū occurs in the Atharvaveda and is applied to a deity that is invoked to come to the sacrifice and to bestow on the worshipper wealth and a heroic son. In the Tai S I. 8 8. 1 and Śat. Br. IX. 5. 1. 38 mention is made of these four, viz of Anumati, Rākā, Sīnīvālī and Kuhū, as recipients of *caru* (oblation of boiled rice) How these names were coined in the distant past is an insoluble riddle Anumati can be derived from root *man*, but why the tithi of the Full Moon mixed with the 14th tithi was so called is more than anyone can say. Kuhū may be plausibly derived from *kuha* 'where' (as in Rg. I 24 10, X 40 2) as the day when the moon is invisible and when primitive people asked in wonder the question 'where does the moon go'. But Rākā and Sinīvālī defy attempts at any plausible etymology. Eminent philologists, instead of

admitting ignorance, are not wanting, who following the traditions of the very ancient etymologist Yāska (who says in Nirukta II 1 '*na tveva na nirbrūyāt*), suggest that the word Sinīvālī is made up by combining the Babylonian-Akkadian word 'sin' (meaning moon) with Dravidian 'vel' (white light)[158] 'Amāvāsyā' (New Moon) is addressed as a deity by itself in Atharva[159] VII. 79 (84) 1–4, the first of which calls upon Amāvāsyā to come to the sacrifice and bestow wealth and a valiant son and the second of which hints at the derivation of the word from 'amā' (meaning 'together' or 'home') and '*vas*' (to dwell) The Śat. Br [160] remarks "this king Soma i e the moon is the food of the gods; when he (the moon) is not seen on this night either in the east or in the west, he comes to this world (i. e. the earth) and enters the waters and the herbs here, he is the wealth of the gods and their food; when he dwells on this night together (with waters and herbs) it (that night) therefore is called 'Amāvāsyā'. The Ait. Br. (40 5) states that on amāvāsyā the moon enters the sun. The Āp Dh S also echoes this idea that on the Amāvāsyā night the Sun and the Moon dwell together (are near each other) So amāvāsyā is so called either because the moon was supposed to dwell together with waters and herbs on the earth that night or because the Moon dwells in the Sun on that night Darśa has the same sense as amāvāsyā and means 'the day on which the moon is seen by the sun alone (and by no one else)' Vide H of Dh vol II p 1009 and note 2274 Names are sometimes given by contraries e. g a fool is called a wise man or a brave person may be called 'timid'. Amāvāsyā may have been called darśa because the moon is not

158 Vide 'Bhāratakaumudī' (in honour of Prof R K Mukerji) part I p. 208 for this etymology put forward by Dr. S K Chatterji Such etymologies are based on certain assumptions for which there is absolutely no evidence whatever, such as the word 'Vel' being used by the Dravidians thousands of years ago, that the vedic Indians were aware of both words 'Sin' (moon) and 'Vel' used by different peoples and could weld them together thousands of years ago and had no word of their own to denote what is meant by Sinīvālī.

seen that day (but would be visible the next day) Another tithi that is famous in the Vedic Literature is Astakā[161] (8th tithi after the full moon in any month, but particularly in Māgha) on which offerings were made to the pitrs (departed ancestors) Even in very remote times people could have easily marked the four main phases of the moon, viz Full Moon, half moon (8th day thereafter when half of the moon's orb shines), Moon's total absence and 8th day thereafter; and after noting these phases it must not have been very difficult to make close calculations about the periods intervening between the Full moon and the half moon, the New moon and half moon. As a matter of fact the Tai. Br[162] expressly says that the moon is worn away on the 15th and becomes full on the 15th i e. before the Tai. Br. it was well-known that there were 30 lunar days (tithis) in a lunar month. It is stated in the Śat Br[163] 'the joints of Prajāpati, while he was engaged in creating beings, became loose (or collapsed); the samvatsara is indeed Prajāpati and the joints of it (of samvatsara) are the two junctions of day and night, Paurnamāsi, Amāvāsyā and the beginnings (first days) of the seasons'. The words Paurnamāsī and Amāvāsyā occur very frequently in the Atharvaveda, the Tai. S and other Vedic texts, though the two words do not occur in the Rgveda The Atharvaveda says[164] that Paurnamāsī was the first among days and nights and was worthy of sacrifice The Ait. Br.[165] has an interesting passage: "they

(wise men) say that when a sacrificer dwells near his sacrificial fire, that is due to his thought that the gods will partake of his offerings, since they do not eat the offering of a sacrificer who does not abide by certain observances'. The opinion of the sage Paingi is that the sacrificer should stay near his sacrificial fires (or fast) on the previous Paurnamāsī (*i. e.* Paurnamāsī mixed with 14th), while the opinion of Kausītaki is that he should do so on the later one (*i. e.* the Paurnamāsī mixed with *pratipad*). The previous Paurnamāsī is called Anumati, the later one is called Rākā, while the previous Amāvāsyā is called Sinīvālī and the later one is called Kuhū That is the tithi (on which a religious rite should be performed), it is the one, being associated with which the sun sets and the sun rises." This passage shows that differences of opinion had arisen long before the time of the Ait Br as to on what day a particular rite associated with a certain fixed tithi was to be performed when the tithi was spread over two days. There are references in Tai S. and the Brāhmana literature which show that in those ancient days the duration of tithis and therefore the actual position of the moon could not sometimes be very accurately determined beforehand. A man about to perform an isti on New Moon (*darśesti*) does certain acts that are done on the day previous to amāvāsyā such as using the sour curds from last night's milking for coagulating the sacrificial food (i. e milk), separating the calves from the cows in the afternoon with a *palāśa* twig; and taking some husked rice, he thinks, owing to cloudy weather or through miscalculation, that the moon would not be seen in the sky the next morning, does not actually set apart a few handfuls of husked rice (meant as *nirvāpa* for the gods) or sets them apart, then the next day the moon is seen in the sky (*i. e* the next day is really 14th tithi instead of amāvāsyā) It is then prescribed that he has to perform an expiatory rite called Abhyuditesti Vide Tai S. II 5. 5. 1–2 and Śat Br. XI 1. 4 1–2 quoted[165] below.

The word tithi does not occur in the Saṁhitās, but it occurs in the Ait Br cited above and in the grhya and dharma sūtras.

The Gobhilagrhyasūtra[167] when prescribing a day for the setting up of sacred fires mentions the coincidence of an auspicious *tithi* and *naksatra* and in another place refers to the worship of the lord of the tithi and of the naksatra and of the tithi itself. The Kausītaki-grhya (I. 25) speaks of offerings to the tithi on which a child was born and prescribes that the dedication of ponds, wells and tanks was to be made in the bright half of a month and on an auspicious tithi (V. 2).

The Nirukta[168] while deriving the word *atithi* applied to Agni in Rg V. 4. 5 gives two explanations, one of which is 'one who approaches the houses of others on special *tithis*'. Pānini furnishes no sūtra relating to the word *tithi*, but it is possible to argue that the affix *titha* which he mentions in explaining words like 'bahutitha'[169] was a relic of the word tithi. Patañjali expressly mentioned Paurnamāsī tithi. Vide 'India Antiqua', the volume of studies presented to Dr. J. Ph. Vogel pp. 109–112 for Prof Edgerton's paper on affix 'titha'. From the above discussion it would be clear that the ideas and divergences of views about the proper tithis for certain religious acts existed in the Vedic times (at least before Ait Br.) three thousand years

ago and that the word *tithi* itself must be held to have been in use about 800 B. C, if not earlier still[170]

Tithi is defined as the time or period required by the moon to gain twelve degrees on the sun As the Sūryasiddhānta states 'tithi is the lunar day in which the moon leaving the sun (at the last moment of Amāvāsyā), traverses twelve degrees (*bhāgas*) towards the east every day.'[171] The moon's motion is irregular and therefore the moon traverses twelve degrees sometimes in 60 ghatikās, sometimes in more (up to about 65) and sometimes in less ghatikās up to about 54 The result is that one unit day may be co-terminous with one tithi, but often a unit day has two tithis i e in the morning it may be the 6th tithi, but in the afternoon, evening and night it may be the 7th It is possible that in a single civil day (from sunrise to sunrise) there may be three tithis e g. on Monday morning there may be only two ghatikās left of the 6th tithi, then the 7th tithi may be only 56 ghatikās in duration and then the 8th may follow for the last two ghatikās of that unit day Conversely, a single tithi may touch three days For example, the last two ghatikās of Monday may be the first two ghatikās of the 6th tithi, then the 60 ghatikās of Tuesday may be occupied by the 6th tithi and two more ghatikās (the last) of the 6th tithi may spread on to Wednesday morning A unit day which spreads over three tithis is declared by the Rājamārtanda to be very holy[172] (or auspicious), while on the other hand a tithi touching three days is said to be inauspicious for marriage, for marching on an invasion, for an auspicious religious act or an act meant to

advance prosperity.[173] If a tithi begins immediately before sunrise or its beginning coincides with sunrise and ends after the following sunrise the name of the tithi (as pratipad, dvitiyā or so on as the case may be) is coupled with both divasas (civil days) involved, so that two tithis of the same denomination appear one after another This is called vrddhi of the particular tithi. If a tithi begins sometime after sunrise on one morning and ends before sunrise on the following day it cannot be coupled with any day and is therefore deleted or omitted in the pañcānga (almanac) and there is *tithi-ksaya*. As a tithi is normally shorter than the civil day ksaya occurs more frequently than *vrddhi*.

From the words of the Gobhilagrhya quoted above it follows that long before the days of that work the several tithis were deemed to have certain deities as their lords (or presiding deities) Among the earliest extant enumerations about *tithipatis* (lords of tithis) is that in the Brhatsamhitā of Varāhamihira (chap. 98. 1–2) which sets them[174] out as follows (the tithis and their lords being mentioned in order):–1st Brahmā, 2nd Brahmā, 3rd Hari, 4th Yama, 5th the moon, 6th Kārtikeya, 7th Indra, 8th Vasus, 9th Nāgas, 10th Dharma, 11th Śiva, 12th Savitr, 13th Madana, 14th Kali, 15th Viśvedevas and of Amāvāsyā the pitrs. He further says that one should do on those tithis the acts that are appropriate to the lords of those tithis It appears that other writers differed somewhat from Varāhamihira, e. g the Ratnamālā sets[175] out the lords of tithis according to the Purānas as follows.–1st Agni, 2nd Brahmā, 3rd Girijā, 4th Ganeśa, 5th Nāga, 6th Viśākha (Skanda), 7th the Sun, 8th Śiva, 9th Durgā, 10th Yama, 11th Visnu, 12th Hari, 13th Madana, 14th Śiva, 15th the Moon. states what tithis are specially dear to what gods such as 8th and 14th to Śiva, 4th to Ganeśa, 9th to Candikā The Garuda (I 137 16–19) and Nārada-purāna (I 56 133–135) specify what deities are to be worshipped on the tithis from the first to 15th

Varāhamihira divides tithis into five[176] groups, viz Nandā, Bhadrā, Vijayā or Jayā, Riktā and Pūrnā and states that on those tithis the acts that are appropriate or suited to the lords of the tithis should be done and become crowned with success and the fruits of actions done on these five classes of tithis yield results similar to their names The same applies to *karanas* and *muhūrtas* The result is Nandā tithis are 1st, 6th, 11th; Bhadrās are 2nd, 7th, 12th; Vijayās 3rd, 8th, 13th, Riktās are 4th, 9th and 14th; Pūrnās are 5th, 10th, 15th. This is also brought out in the Atharvana Jyotisa, which also prescribes what should be done or not done on the tithis from the 1st to the 15th and provides that certain combinations of tithis and certain weekdays yield success and all rewards, viz Nandā tithi on Friday, Bhadrā on Wednesday, Jayā on Tuesday, Riktā on Saturday, and Pūrnā on Thursday.

The Tithitattva (pp 27–28) quotes a long passage specifying the loss a man suffers by eating fifteen specified things from the 1st to the 15th tithi respectively. The Nirnayasindhu (p 32) quotes verses from Muhūrta-dīpikā and Bhūpāla[177] (i e Bhoja) which specify the edibles and certain actions that are respectively to be given up on the tithis from the first to the 15th and on amāvāsyā On the other hand, Bhavisyapurāna (Brāhmaparva 16. 18–20) quoted by the Kalpataru on vrata p 35 specially recommends the eating of certain things on each of the 15 tithis from *pratipad* (the first) viz milk, flowers (on 2nd), anything

except salt (on 3rd), sesame, milk, fruits, vegetables (on 7th and 8th), flour, food uncooked by fire, ghee (on 11th), pāyasa (rice boiled in milk), cow's urine, *yavas*, water in which *kuśas* have been dipped. The Vāmanapurāna[178] (14. 48–51) prescribes what actions should not be done on the groups of tithis called Nandā &c., on certain week days and on certain naksatras.

The method of reckoning time by tithis is a very early one and is indigenous to India Though Western scholars have from time to time put forward various theories about the so-called Greek influence on Indian astronomy and astrology and about the Indian Naksatra system being borrowed from the Chinese (Biot) or from the Babylonians (Weber) or from the Arabs (Sedillot), no western scholar has had the courage, so far as I know, of alleging that the system of tithis is not indigenous but is borrowed from some non-Indian source. The theories about Greek influence will be briefly dealt with in the next section.

Vedic (and Smrti) injunctions are of two kinds, (1) those that urge a person to do a thing such as 'one should fast on Ekādaśī in both paksas', (2) those that dissuade a person from doing something as in 'one should not eat food on Ekādaśī'. Tithis are thus an *anga* of the two kinds of injunctions. According to Garga,[179] tithi, naksatra and vāra (week day) are a means of *punya* (merit) and *pāpa* (demerit, sin) by being subsidiary to the principal rite prescribed, but they are not able to produce the above result independently[180]

Tithi is of two kinds,[181] *pūrnā* (complete or full) and *sakhandā*. When a single tithi covers the whole day from sun-

rise for sixty nādikās (or ghatikās) the tithi is pūrnā, i e. the tithi begins exactly at sunrise and ends with the next sunrise and is exactly 60 ghatikās in extent. All others than this are sakhanda, these latter again are of two kinds suddhā and viddhā (pierced by or intermixed with another).[182] A śuddhā tithi is one that extends from sunrise to sunset or (in the case of some tithis like śivarātri) up till midnight; other sakhanda tithis are called *viddhā*. *Vedha* is of two kinds, morning vedha and evening vedha; the former generally occurs when after six ghatikās from sunrise a tithi touches or gets merged with the next tithi, while the latter (evening vedha) generally occurs when a tithi touches another tithi six ghatikās before sunset In the case of certain tithis the period prescribed may exceed six ghatikās

When the tithi in question is 60 ghatikās in extent and begins with sunrise (i e when it is pūrnā) there is no difficulty at all When a tithi is śuddhā in the sense given by the Dharmasindhu then also there is generally no difficulty. Some general rules have to be kept in mind. Śruti says[183] 'forenoon is for the gods, midday for men and afternoon for pitrs'. Manu (IV. 152) says one should carry out morning duties, decorating the body, bath, brushing the teeth, applying collyrium to the eyes and worship of gods in forenoon alone'. Therefore all religious acts prescribed for being performed by day on certain tithis for gods must be begun in the morning even if the tithi is mixed with another on that day, but all vratas to be performed in the evening or night have to be performed on the tithi existing in the evening or night even[184] though it may be mixed up (viddhā) with another tithi Another matter to be noted is that in both halves of the month all tithis may affect the previous tithi and following tithi by three muhūrtas (i e six nādis or ghatikās)[185] Some tithis produce *vedha* by a larger number of

ghatikās e. g. the 5th makes sasthī affected by twelve nādīs, 10th makes 11th viddhā by 15 nādīs, &c. Viddhā tithis are in some cases fit for performing religious acts, sometimes they are not. All rites[186] of the śrauta or smārta type, vrata, dāna and every other act enjoined by the Veda do not yield proper reward as long as there is no determination of the tithi proper for it. That tithi which covers up the time (such as morning), noon, whole day &c. at which a religious act is prescribed to be done is the proper one for[187] that act. The first principle to[188] remember is that Kāla (the time prescribed for a rite) is not a mere detail, but it is a *nimitta* (an occasion) on the happening of which a rite is to be performed and that therefore what is done at some time other than the prescribed one is practically as good as not done. There is a text of the Tai. S. II. 2. 5. 4 which indicates this principle about Kāla It says 'that man is cut off from the heavenly world, who desiring to perform the darśa-pūrnamāsa rites transgresses the time of full Moon or New Moon'. Hemādri[189] strongly emphasizes the performance of rites

on the proper time and states that a gaunakāla is resorted to for escaping from the censure of *śistas* or for the solace of one's mind or because there is no other alternative If a tithi can be had on two days and at the required time or if it does not exist on both days at the time required or it extends only up to a part of the time for which it is required, then the decision is arrived at, as a general rule, by what is called 'yugmavākya' to be cited below [190] Suppose, for example, that a vrata is to be performed at noon on a certain tithi, then that tithi may exist at noon on two days or suppose that the tithi begins one or two ghatikās after noon and ends on the next day one or two ghatikās before noon, then the decision as to which tithi (whether *pūrva-viddhā* or *para-viddhā*) is proper for the act would have to be decided as a general rule by the *Yugmavākya* The *Yugmavākya* may be translated as follows. 'The pairs (or combinations) of the following tithis lead to great reward, viz. of the 2nd and 3rd tithis, of the 4th and 5th, of the 6th and 7th, of the 8th and 9th, of the 11th and 12th, of the 14th with pūrnimā (Full moon tithi) and of Amāvāsyā with the 1st the reverse (i e combinations or pairs of other tithis) results in great loss, such combinations destroy all former (accumulated) merit' In these verses there are seven pairs and they are mutually applicable The question may be asked. on what tithi a vrata prescribed for the 2nd tithi should be performed if the 2nd is combined with the first on one day (that is, it is *pūrvaviddhā*) and is also combined with the 3rd on the next day (i e it is *paraviddhā*) The reply is as a general rule the day on which the 2nd is combined with the 3rd tithi should be the proper one for the dvitīyāvrata and not the day on which 2nd tithi is combined with the first Similarly, in the case of a vrata to be performed on trtīyā, if the 3rd tithi occurs on one civil day combined with the 2nd and on the next day it is combined with the 4th, then the proper day as a general rule for a trtīyā-vrata is the one on which the 2nd and 3rd tithis are in combination and not the other day on which the 3rd and 4th tithis combine The result of this passage is that combinations of 1st and 2nd tithi, of the 3rd and 4th, of 5th and 6th, of 7th and 8th, of the 9th and 10th, of the 10th and 11th, of 12th and

13th, of 13th and 14th, of Pūrnimā with the first and of Amāvāsyā with 14th are generally excluded as improper.[191]

It may be stated here that the rules laid down in the above verses (of yugmavākya) are riddled with exceptions. Some say that these rules apply only to tithis of the bright half and not to those of the dark half. But many works such as Aparārka (p. 216), Kālanirnaya (p 172), Vratakālaviveka (P. O. vol. VII, p 87), Nirnayasindhu (p 18) hold that the passage applies to tithis of the dark half also, since the express mention of Amāvāsyā in combination with *pratipad* is an indication in that direction It would be noticed that the *yugmavākya* (even though held to be applicable to the dark half) does not refer to the first tithi of the dark half, the 10th and 13th tithis of both halves Their combinations with the preceding or following tithis will be governed by express texts where available and by other considerations in other cases, such as the verse 'in the bright half that tithi should be preferred which exists at the time the sun rises and, in the dark half, that tithi should be preferred which exists when the sun sets'[192] Another important rule is that where there are express texts prescribing a particular combination of *viddhā tithis* as more appropriate for a vrata or other

The कालादर्श (folio 9 a) ascribes the verses to पैठीनसि. They are the same as राजमार्तण्ड folio 69 b and 70 a, verses 1123–24 (ABORI vol. 36 p 309) The समयप्रदीप (folio 7 b) explains these verses at great length and remarks 'अयं च युग्मादितिथिविधिरहोरात्रसाध्योपवासादिकर्मणि तिथिद्वैधे सति सर्वत्र बोद्धव्यः। देवपूजादावपि दिनद्वये विहितपूर्वाह्णादिनातिथिलाभे सति। यदा त्वेकस्मिन्नेव दिवसे विहितकाललाभः तदा तत्रैव कर्म न तु व्यस्तनिन्दाश्रवणात्तत्रापि युग्मादर. ।'. religious rite, that express rule prevails and not the rule derived from this yugmavākya[193] For example, it is laid down in the very place (where the yugmavākya occurs) that the 6th tithi, 8th tithi, amāvāsyā and the 13th of the dark half are to be preferred (for religious rites) when in combination with the following tithis (*i e. 7th, 9th, 1st of bright half and 14th of dark half respectively*) and others (than those mentioned in the first half such as the 7th, 9th) are to be preferred when combined with those preceding them.[194] The application of special considerations may be further illustrated by the following The same tithi may be preferred if *pūrvaviddhā* in one vrata and as paraviddhā in other cases owing to the difference in the deities of the vratas. For example, Skandasasthī is preferred as pūrvaviddhā, but Mandārasasthī is preferred as paraviddhā (because the deity is Mandāra and not Skanda) Sometimes, although the devatā is the same, it will have to be pūrvaviddhā and sometimes paraviddhā as in the Vināyaka-vrata which requires mid-day as the proper time. If the 4th exists at midday and then is mixed up with 5th, but did not exist at midday the previous day, then 4th mixed with 5th will be preferred, but if mixed with the 3rd before noon and not mixed with 5th at time of midday, 4th mixed with third will be preferred Sometimes it depends on the fact whether it is bright or dark fortnight Śukla pratipad will be preferred if pūrvaviddhā, but krsna pratipad will be preferred as uttaraviddhā The rites for *pitrs* are not governed by yugma-vākya The grhya-parisista provides that the pitrs attend on that tithi which exists at the time when the sun sets; that tithi and afternoon are assigned for the pitrs by Brahmā himself[195] Sometimes even a combination not approved by yugmavākya has to be accepted for the performance of a rite e. g when astamī with Rohinī naksatra exists (in Krsnajanma-vrata) the fast should be observed on that Astamī, though it may be combined with 7th tithi (and not on 9th as yugmavākya

requires).[196] Sometimes, even though a tithi be pūrnā, it is passed over in favour of a viddhā one.[197] Suppose there is Ekādaśī in the bright half from sunrise to sunrise on a certain day and there is Ekādaśī on the next day for two ghatikās, then there is Dvādaśī for 59 ghatikās in extent; thus trayodaśī commences the day after just one ghatikā *after sunrise*. According to this verse of Pracetas there is to be no upavāsa on the Ekādaśī, though it is pūrnā, but the fast will be observed on Dvādaśī, and the *pāranā* in order to be celebrated on dvādaśī will have to be during the first ghatikā of the third day from ekādaśī or earlier. But if the Dvādaśī in this case be only for 55 ghatikās, trayodaśī will begin three ghatikās before sunrise; if *pāranā* be done at sunrise it will be on the 13th and not on the 12th. In this latter case, according to Pracetas, the Upavāsa will have to be on the pūrnā Ekādaśī in order that the pāranā may be on 12th. It has to be further remembered that the positive prescription about celebrating a vrata or the like on the fixed tithi is governed by the yugmavākya, but the rules forbidding the partaking of oil, meat or the like on the fixed tithi apply for the whole of that day[198] and that tithi, whether it is 65 ghatikās and extends over three days or is only 55 ghatikās and extends over two days only. For explaining the words 'ekādaśyām nirāhārah' from Varāha-purāna (39. 32) the Ekādaśī-tattva (pp. 3–4) states that one is to fast not merely for the time that the Ekādaśī lasts on a week-day but for the whole of the week day on which Ekādaśī falls and it applies the reasoning contained in Jai VI. 2 19–20 (called *Kalañjādhikarana*). If the vrata is such that some items in it are to be done by day and some at night, then that vrata must be observed on that tithi which exists by day as well as at night and in such a case

the yugmavākya has no application Vide p 72 and note 184 above. In certain cases where the vrata has several items extending over the whole day or a large part of it, the tithi at the time of sunrise even if it be only for a ghaṭikā is declared by some texts to be *sakalā* (pūrnā) for purposes of both gifts and vratas.[199]

The Kālādarśa propounds the strange[200] theory based on Gobhila's words that the shortening and lengthening of the tithis is due to the piety and sinfulness of men and divides tithis into *kharva* (of proper extent, 60 ghatikās), *darpa* (more extensive than 60 ghatikās) and *himsrā* or *himsā* (of lesser extent than 60 ghatikās) The Rājamārtanda has the same[201] division and remarks that when the tithi is either *kharva* or *darpa* (and they are viddhā) then a rite is to be done on the later tithi (the proper tithi joined to the next one) and in the case of the shorter tithi (if it is viddhā) one should prefer the former (i. e the day on which the proper tithi is joined to an earlier one)[202] The Varsa-

kriyā-kaumudī ascribes a similar verse to Uśanas and remarks that it is opposed to the dicta of many such sages as Devala and must be restricted only to Darśaśrāddha forming as it does a syntactical whole with certain verses of the Chandogapariśista (which it quotes).

A general rule is stated in some works that when the full moon which is in the lunar mansion that gives the name to a month is in conjunction with Jupiter that tithi has the word *mahā* prefixed to it. For example, the Paurnimā of Kārtika would be called Mahākārtikī if the Moon and Jupiter are both in the Krttikās (Pleiades) on that tithi. The Rājamārtanda and Bhavisyapurāna provide that a bath on the Mahācaitrī and (on the remaining eleven paurnimās with prefix *mahā*) in certain holy places yields great rewards, viz bath at Prayāga on Mahāmāghī, on Mahāphālgunī in the Naimisa forest, on Mahācaitrī at Śālagrāma, on Mahāvaiśākhī at Mahādvāra, on Mahājyaisthī at Purusottama, on Mahāsādhī at Kanakhala, on Mahāśrāvanī at Kedāra, on Mahābhādrī at Badarī, on Mahāśvinī at Kubjāmra, on Mahākārtikī at Puskara, on Mahāmārgaśīrsī at Kānyakubja, on Mahāpausī at Ayodhyā [203]

There are long lists of actions forbidden on certain tithis. A few passages may be cited here. Devala [204] says 'on the 15th, the 14th and particularly on the 8th one should avoid oil, meat, sexual intercourse and the use of a razor.' The Nāradīya provides

CHAPTER IV

Individual vratas; Caitra Pratipad, Rāmanavamī, Akṣayya-tṛtīyā, Paraśūrāmajayantī, Daśaharā, Sāvitrī-vrata.

The Mahābhārata[205] prescribes how to set about a vrata. 'Taking in one's hand a copper vessel full of water and turning one's face to the north one should undertake the *upavāsa*, or whatever else he resolves in his mind to undertake as a vrata.' Devala[206] also says 'without taking food (the previous night), after taking a bath and having performed *ācamana* (ceremonial sipping of water) and after having declared before the Sun and other *devatās* (his intent) a person should perform a vrata'. The Varāhapurāna[207] sets out the formula of *saṅkalpa* 'after passing the 11th tithi without any food, I shall partake of food the next day, O lotus-eyed one (Viṣnu), O Acyuta, be thou my refuge'. The sankalpa is to be generally made in the case of a fast[208] or vrata in the morning; the first fifth part of a day comprising three ghaṭikās is called morning. Even when a tithi does not

begin in the morning (but begins in the afternoon) the sankalpa has to be made in the morning provided a vrata is to be performed on that tithi though it be viddhā. If no sankalpa is made the person secures very little benefit from the vrata[209] and half the merit is lost.

It is now time to turn to individual vratas on the several tithis. First comes the pratipad-vrata.

It will be shown in the next section how in ancient and medieval times the month in which the year began was different at different times and in different countries We shall begin with the pratipad of the month of Caitra, shall take the month as ending with amāvāsyā (*amānta*) and set out from Caitra the important vratas and festivals in each month and the tithis therein, and the rest will be entered in the list of vratas appended to this section on vratas.

In those parts of India (such as the Deccan) where the year begins with Caitra, the first tithi is observed with some pomp and religious ceremony. Most of the medieval digests such as Kalpataru (Naiyatakāla pp 377–382), Hemādri (on vrata vol. I. pp 360–365), Krtyaratnākara (pp. 103–110), Vratarāja (pp 49–53) quote from the Brahmapurāna the rites of the beginning of the year on the first tithi of Caitra bright half That Purāna[210] states that Brahmā created the world on the first day of the bright half of Caitra at sunrise, and started the reckoning of time On that tithi a mahāśānti (propitiatory rite) destroying all untoward occurrences and sins should be offered and first Brahmā should be worshipped with the well-known *upacāras* and then the other gods with mantras preceded by *om* and the word *namah* (*om namo Brahmane tubhyam*), to all divisions of time from the minutest to yugas and to daughters of Daksa and lastly to Visnu, then honour brāhmanas with food and fees, give presents to relatives and servants, homa should be offered to Agni called Yavistha, special food should be prepared and a great festival should be celebrated. The Bhavisyapurāna says

209 सङ्कल्पाकरणे फलहानिमाह भविष्यपुराणे। सङ्कल्पेन विना राजन् यत्किञ्चित्कुरुते नरः। फलं चाल्पाल्पकं तस्य धर्मस्यार्धक्षयो भवेत्॥ कृत्यतत्त्व p. 424

210 चैत्रे मासि जगद् ब्रह्मा ससर्ज प्रथमेऽहनि। शुक्लपक्षे समग्रं तु तदा सूर्योदये सति॥ प्रवर्तयामास तथा कालस्य गणनामपि। तत्र कार्या महाशान्ति सर्वकल्मषनाशिनी। सर्वोत्पात-प्रशमिनी कलिदुःस्वप्ननाशिनी॥ &c. कल्पतरु (नैयत० p 377), हे (व्रत I. p. 360), कृ र. p. 103.

that since it was declared by Brahmā to be the best among tithis and thus placed in the first place it is called Pratipad. On Caitra pratipad there is worship of the lord of the year, viz. the lord of the week-day[211] on which pratipad falls, arches and banners should be raised by each householder, one should anoint one's body with oil and have a bath, one should eat leaves of the *nimba* tree (that are bitter) and should hear from the reciter of the calendar the name of the year (śaka or saṁvat), its lord and the deities that would be the ministers for the year, the governing deities of all corns and fluids &c. Even in these days priests go about in the Deccan to the houses of their patrons and read from the *pañcāṅga* (almanac) the details about the lord of the year &c set out above, people raise a pole with silk cloth at top covered with a silver or brass pot, offer worship to the pole with sandalwood paste, flowers &c. and eat *nimba* leaves. This latter is done even in Saurāṣtra, though the people employ *saṁvat* reckoning.

The rule is that the pratipad to be celebrated is that which exists at the time of sunrise. If pratipad exists at sunrise on two days, then the earlier of the two is to be chosen or if there be no pratipad at sunrise on any day then the one which is pūrva-viddhā should be chosen. For example, if there is amāvāsyā for four ghatikās after sunrise, then there is pratipad for 56 ghatikās and one ghatikā more on the next day, then the pratipad though affected by amāvāsyā will have to be chosen for the beginning of the year and not the pratipad intermixed with second tithi the next day. If Caitra be an intercalary month then[212] the opinion of many writers is that the pratipad of the intercalary month should be held to be the beginning of the year. The Samayamayūkha holds that when Caitra is an intercalary month the year and spring commence with it, but the ceremonial bath with oil and listening to the recital of the śaka year should

be done in the pure month. The[213] Dharmasindhu makes a difference by saying that the ceremonial bath with oil should be taken on the occasion of the commencement of the new year and repeating the name of the new year should be done on the first day of the intercalary month, but the raising of the pole, eating of nimba leaves, listening to the recital of the almanac should be done in the pure month. In popular belief caitra-śuddhapratipad is one of the 3½ most important muhūrtas (auspicious days) of the year. The Sāmrājya-laksmīpīthikā (pp 128–133) gives a very elaborate description of the great festival on caitra-śuddha first performed by a king or a chieftain or a zamindar owning several villages.

The next important tithi in Caitra is the 9th in the bright half on which is observed the Rāmanavamīvrata and the celebration of the birth of Rāma, 7th *avatāra* of Visnu. The principal works on which reliance is placed in Hemādri (on vrata vol. I. pp 941–946), V. K. K (pp 523–529), Tithitattva (pp 59–62), Nirnayasindhu (pp 83–86) and other digests are the Agastya-samhitā and Rāmārcanacandrikā of Anandavanayati, pupil of Mukundavanayati. It is somewhat remarkable that the Krtyakalpataru on vrata does not deal with this. The Rāma cult appears to have become popular later than the Krsna cult. Though the Amarakosa gives Visnu, Nārāyana, Krsna, Vāsudeva, Devakīnandana and Dāmodara as synonyms, it does not mention Rāma (Dāsarathi), but mentions Rāma only as a synonym of Haladhara. Here only a brief treatment of Rāmanavamī can be attempted. The Rāmārcanacandrikā and Vratārka (folio 173a) expressly provide that all persons including even cāndālas can observe Rāmanavamīvrata (they have *adhikāra*).

It is stated in the Agastyasamhitā[214] that Rāma was born at noon on the 9th of the bright half of Caitra, when Punarvasu asterism was occupied by the Moon and both the Moon and

Jupiter were in conjunction and when five planets were in their *ucca* (exaltation), when the zodiacal sign rising on the eastern horizon was Karkataka (Cancer), and when the Sun was in the sign of Mesa (Aries) The Kālanirnaya of Mādhava (pp 229–230) lays down the following. When navamī is spread over two days, then, if there is navamī at noon only on the earlier of the two days, the vrata should be performed on that day. If there is navamī at noon on both days, or if there is no navamī at noon on any day, then the vrata should be performed on navamī mixed with daśamī (and not on navamī mixed with astamī).[215] If the 9th tithi is conjoined to Punarvasu asterism that day, that tithi is most holy. Even when there is conjunction of astamī, navamī and Punarvasu, still the vrata should be on the next day (i. e. on navamī with daśamī) There are further minute rules and differences on this which are passed over here.

It is stated that the Rāmanavamīvrata is *nitya* (obligatory) for all, while others say that it is obligatory only for devotees of Rāma and kāmya (optional) for those that desire special rewards (such as removal of sin, *mukti* or release from *samsāra*). The Agastya-samhitā[216] remarks 'This (vrata) is a course prescribed for all and it is the sole means of worldly happiness and *mukti*. Even a person who is impure or very sinful, having performed this best of vratas, is honoured by all and he becomes as if he were Rāma himself. That wretched man who eats food on Rāmanavamī suffers torments in the terrible hells called Kumbhīpāka. If a man fasts on a single Rāmanavamī all his objects are fulfilled and he is released from all sins'. The Agastyasamhitā further prescribes 'on that day (on which Rāma was born) vrata in the form of a fast should always be performed and on that day the devotee intent on Rāma worship should keep awake at night, sitting on the ground'. The use of the word 'sadā' (always) shows that the vrata is obligatory. Others say that the texts promise such rewards as removal of sin and therefore it is

kāmya. The conclusion of many works (like the Nirṇayasindhu and the Tithitattva) is that this vrata is both *kāmya* and *nitya* according to the Mīmāmsā maxim of 'samyogaprthaktva'[217] (Jai IV 3. 5–7) In the section on 'Agnihotra' the Veda says 'he makes an offering of curds in the fire'; there is another sentence in the same, viz 'one who desires bodily vigour should make an offering of curds in the fire'. The meaning is that curds being separately mentioned in two different sentences which are both independent, homa with *dadhi* is both *nitya* and *kāmya*.

The procedure of Rāmanavamīvrata as set out in H. V I. pp 941–946 N. S pp 83–86, T T. pp 59–62, K. T. V. pp, 96–98, Vratarāja pp 319–329, Vratārka (folios 172–182), may be briefly described as follows.—The devotee should take a bath on the 8th tithi in the bright half of Caitra, perform his *sandhyā* prayer and should invite a brāhmana learned in the Veda and sāstras and devoted to Rāma worship and knowing the procedure of Rāma mantras, should honour him and make a request 'I shall make a gift of the image of Rāma'. Then he should give oil to the brāhmana for anointing his body, make him bathe, make him wear white garments and flowers, should offer him a dinner containing *sāttvika* food and should himself partake of the same food and constantly think of Rāma On that day he and the *ācārya* honoured by him should go without food at night, should listen to the stories of Rāma the whole day and should himself sleep and make the ācārya sleep on the ground (not on a cot) The next morning he should get up, bathe, perform his *sandhyā*, should construct a brilliant mandapa with four doors and decked with arches, banners and flowers The eastern door should be decked with conch, wheel and (an image of) Garuda, bow and arrows, the western one with mace, sword and armlets and the north with lotuses, *svastika* signs and blue stones and prepare a raised altar four cubits (in the mandapa) and should provide holy songs, music and dance therein. He should have benedictions from brāhmanas Then

We have two Vedic passages 'अग्निहोत्रं जुह्वुयात् स्वर्गकाम.' and 'यावज्जीवमग्निहोत्रं जुहोति',

he should make a *saṅkalpa* 'On the Rāmanavamī I shall observe a fast for the whole day and being intent on worshipping Rāma shall make a golden image of Rāma and shall donate it for pleasing Rāma' and then say 'may Rāma remove my numerous heavy sins'. The image of Rāma should be placed on a pedestal, have two hands and Jānakī should be seated on the left thigh of (Rāma) image, which should be bathed with *pañcāmṛta*,[218] then *mūlamantra*[219] should be recited and the usual *nyāsas* should be made. The festival or pūjā is performed in the noon. Then at night he should keep awake and listen to the divine stories about Rāma and be surrounded by devotees of Rāma, should sing hymns about Rāma. Then the next morning he should bathe, perform sandhyā, should worship the image of Rāma with sixteen upacāras employing the 16 verses of Rg. X. 90 and with Paurāṇika verses, also perform the worship of the several limbs of the image (Śrī-Rāmabhadrāya namaḥ pādau pūjayāmi and so on), offer homa on the altar or in a *kuṇḍa* with the *mūlamantra* and then in the ordinary fire offer 108 oblations of clarified butter or *pāyasa* (rice cooked in milk with sugar), then he should honour the ācārya with gifts of ear-rings, finger rings, flowers, clothes &c. and should recite the following mantra 'O Rāma! I shall today donate this golden image of yours decked with ornaments and clothes for securing your favour; may Rāma favour me'. He should give dakṣinā (fee) to the ācārya and to other brāhmaṇas gold, cow, a pair of clothes, corn, according to his ability and then have dinner along with the brāhmaṇas. By doing so he becomes free from even mortal sins like brāhmaṇa-murder. There is no need to say more The man who performs this vrata has *mukti* in his hand (as it were) and he acquires the same merit that one secures by the dāna called Tulāpuruṣa[220] in

219. Nyāsa is mystical sanctification of the several limbs of the body with Vedic mantras (such as the 16 verses of Rgveda X 90) or other mantras. Vide H. of Dh. vol II. pp 319-320, 739 and 900 The Mūlamantra is either of six letters, viz. श्रीरामरामरामेति or of thirteen letters, viz. श्रीरामजयरामजयजयरामेति In these days the priest sometimes repeats Rg. X 3. 3 as the Vedic mūlamantra 'भद्रो भद्रया सचमान आगात् स्वसारं जारो अभ्येति पश्चात्। सुप्रकेतैर्द्युभिरग्निर्वितिष्ठन् रुशद्भिर्वर्णैरभि रामनस्थात्॥'. Here the word राम occurs, though in a different sense. सायण explains 'रामं कृष्णं शार्वरं तम.'.

220. For the Mahādāna called Tulāpuruṣa, vide H. of Dh. vol. II. p. 870.

Kurukṣetra on a solar eclipse Hemādri is comparatively brief, but the Tithitattva (pp 61–62), Nirnayasindhu (p 85), Vratārka add further details from Agastyasamhitā They say that images of Bharata and Śatrughna (by the side of Rāma image) and of Lakṣmana with a bow in his hand and of Daśaratha (to the right) and of Kausalyā should also be made and worshipped with appropriate Paurānika mantras (the one for Kausalyā is quoted in the note)[221] The Rāmārcanacandrikā adds further details about the worship of ten and five *āvaraṇas* to which even the Nirnayasindhu refers by name alone.

Rāmanavamī is not to be celebrated in the intercalary Caitra month (malamāsa). The same rule applies to Janmāṣṭamī and other vratas

In modern times not many people observe a fast on Rāmanavamī and hardly one performs homa or donates images, but the birth of Rāma is celebrated in Rāma temples by many at noon with great ceremony. A *Haridāsa* treats a gathering of men and women assembled in the temple to a *kīrtan* with music and bhajan on the birth of Rāma. At the end there is distribution of sweets or 'Sunthavadā' (dried ginger with sugar or jaggery) in the Deccan. In some places such as Nasik, Tirupati, Ayodhyā and Rāmeśvara this festival is performed with great pomp and thousands of people attend at these holy places There is no holy name other than that of Rāma so constantly on Hindu lips even in these days

The important tithi in Vaiśākha is the third of the bright half. It is called Akṣayya-tṛtīyā The earliest reference to it is probably in the Viṣnu-dharmasūtra where it is said that one should fast on this tithi, worship Vāsudeva with whole grains of rice, should offer them into fire and donate them; thereby one becomes purified from all sins, whatever a man donates on that day becomes inexhaustible. The Matsyapurāna (chap 65, verses 1–7), Nāradīya I 112 10 ff treat of this The former states that whatever is donated or sacrificed or muttered on this tithi becomes inexhaustible (in reward), that a fast thereon yields inexhaustible results, that if this tṛtīyā has Kṛttikā asterism

then it is specially commended. The Bhavisyottara-purāna[222] (chap 30 1–19) deals at some length with it. It says: 'this tithi is one of the Yugādi tithis because the Krta age began on it; whatever is done on it, such as bath, gifts, muttering of sacred texts (*japa*), offerings into fire, Veda study, satiating deceased ancestors (with water)—all that becomes inexhaustible'. It provides that gifts of jars of water and of umbrellas and of footwear should be made (to brāhmanas) on this day and that what is sacrificed or donated on this day never comes to an end and therefore this tithi is called aksaya (inexhaustible) by the sages V. Dh also refers to it[223] The Lar plates of Govindacandra of Kanauj recite that the king after bathing in the Ganges on the occasion of the Aksayya-trtiyā festival on Monday in *samvat* 1202 (i e 15th April 1146 A. D) made the grant of a village to one Śrīdhara Thakkura (E I vol. VII p 98). The third is to be taken for these religious rites when it exists in the forenoon, but if it exists in the forenoon on two days the one that exists on the later day should be chosen for vrata. Vide Hemādri on Kāla p 618 and on vrata vol. I. pp 500–502, Vratarāja pp 93–96, Sm K. p. 109 for further details. It is provided in the Purānas that śrāddha performed on the tithis called *Yugādi* gives inexhaustible gratification to the pitrs. But no pindas (rice-balls) are to be offered in Yugādi-śrāddha. Aksayyatrtiyā is one of the 3½ days popularly believed to be most auspicious in the year (it is itself ½).

On the third of Vaiśākha bright half is celebrated 'Parasurāmajayantī'.[224] It is to be celebrated in the first *prahara*

(watch) of the night ('sūryāstottaram trimuhūrtah pradosah' Dharmasindhu p 9) It is stated in the Skanda[225] and Bhavisya purānas that Visnu was born from Renukā on the third of the bright half of Vaiśākha when the naksatra was Punarvasu and in the first watch of the night and when six planets were *ucca* (in exaltation) and Rāhu was in the zodiacal sign Mithuna (Gemini) The image of Parasurāma is to be worshipped and *arghya* is to be offered to it with the mantra quoted below[226] If the third tithi is suddhā (i e not mixed with another tithi) the vrata (i e fast) is to be performed that day, but if on two days there is third tithi in the evening first watch even partially, then the later one is to be the day of the fast, otherwise (if the third is *viddhā*, but does not extend up to the first watch of the night) the fast should be observed on the first of the two days There are some temples erected in honour of Paraśurāma, particularly in the Konkana such as the one near Chiplun in which Paraśurāma-jayantī is celebrated with great ceremony Vide N S p. 95, Sm. K p 112, P. C 89 for further details H V I p 117 gives directions as to the image or painting of Parasurāma But Paraśurāma-jayantī is not observed in several parts of India (such as Saurāstra), though observed in South India

In the month of Jyestha there is a vrata called Daśaharā on the 10th tithi of the bright half The Brahmapurāna (63 15) states that the 10th of Jyestha bright half is called Daśaharā, because it destroys ten sins[227] Ten sins (divided into three

classes, of the body, of speech and of the mind) are enumerated in Manu XII 5–7 [228] The Rājamārtanda (verses 1397–1405) speaks of this vrata The N. S. (p 98) and some other digests put forward another basis, viz [229] Jyestha śu 10 on Tuesday (acc to Varāha) or Wednesday (acc to Skanda), on Hasta-naksatra, Vyatīpāta, Gara (*karana*), Ānanda-yoga, the moon and sun being in Virgo and Taurus respectively—when all these concur or when most of them concur, a person should bathe in the Ganges and then become free from all sins. Wednesday and Hasta constitute Ānandayoga It was supposed that the Ganges came to the earth on this tithi, on Tuesday and on Hasta asterism and therefore originally it appears to have been a vrata of a bath in the Ganges at Daśāśvamedha, of worship and gifts. Then it was extended to a bath in any big river and offering of *arghya*, sesame and water Vide Kāśīkhanda, Tristhalī-setu, K T. 431, Vratarāja pp 352–355, P. C pp 144–145 for further details. At present in towns and villages on the big rivers such as Krsnā, Godāvarī, Narmadā and the Ganges, a festival of the Ganges is celebrated At such places as Banaras, Prayāga, Haridvāra, Nasik the utsava is celebrated on a large scale If there be an intercalary Jyestha, this vrata was to be performed in that month.

On the Full moon day of Jyestha women whose husbands are living perform even now in many parts of India the Sāvitrī-vrata or Vatasāvitrīvrata The story of Sāvitrī whose memory has been cherished for ages by all Indian women as an ideal of a *pativratā*, of wifely devotion to the husband unto death (and even thereafter) is very popular and is described at great length in the Mahābhārata (Vanaparva chap. 293–299) and in the Purānas (such as in Matsya, chap 208–214, Skandapurāna, Prabhāsakhanda chap 166, Visnudharmottara, II chap 36–41). is narrated[230] that she married Satyavat whose death at the end of one year was predicted by the sage Nārada and that three days before the time indicated by Nārada she undertook a fast, accompanied her husband into the forest where he had gone to collect firewood, flowers and fruits as his blind father had lost his kingdom and that she had an argument with Yama the God of Death, who became so pleased with her that he gave her several boons and ultimately her husband that had died as predicted was restored to life The Bhavisyapurāna account of the story of Sāvitrī is cited at great length in Krtyaratnākara (pp. 264–278). Hemādri (on vrata II pp 258–272) sets out a vrata called Brahma-Sāvitrīvrata from Bhavisyottara which contains the story of Sāvitrī as in the Mahābhārata and Matsya and also (vol. II pp 272–279) a Vatasāvitrīvrata from Skanda. But the first was performed for three days from the 13th tithi to Full Moon in *Bhādrapada* month and not in Jyestha, while the 2nd was to be performed on Jyestha Full Moon by a woman whose husband was living or even by a sonless widow. This last is called Mahā-sāvitrīvrata by the Vratakālaviveka (p 20 of I H Q vol 17 No. 4 supplement).

The Nirnayasindhu refers to the vrata in Bhādrapada mentioned by Hemādri and remarks[231] that it was not in vogue in its day The Vrataprakāśa describes (folios 169–170) the Brahmasāvitrīvrata

But the Vatasāvitrīvrata that is now in vogue must also have been performed long before the 10th century A D The Agnipurāna (194 5–8) briefly describes[232] a vrata that in

essentials is the same as the modern Vatasāvitrīvrata The Rājamārtanda says 'on the 14th[233] of the bright half of Jyestha women full of faith perform the Sāvitrīvrata for being free from widowhood'. This is followed by people in the Deccan The Nirnayāmrta following the Bhavisya held that this vrata was to be performed on Amāvāsyā, while the Krtyatattva (p 430), and T. T. p 121 say that Sāvitrīvrata is to be observed on dark 14th after the Full Moon of Jyestha.

If the Paurnimā is spread over two days, then the vrata is to be performed on Caturdaśī (14th tithi) mixed up with Paurnimā The three days for which the vrata is to last may have to be begun on the 12th or 13th But if caturdaśī is of the extent of 18 ghatikās and then Paurnimā supervenes, then caturdaśī is to be given up (K N. p 301).

The worship of the Vata tree comes in probably because Satyavat when the moment of death approached took shelter under the shade of the Vata tree and supported himself by a branch of it and spoke in a choked voice to Sāvitrī that he had pain in the head[234] The procedure of this vrata as set out in the Vratārka (folios 312–320) and other late medieval works is briefly as follows:—The woman should make a sankalpa in the form 'I shall perform Sāvitrīvrata for securing long life and health to my husband and my sons and for securing freedom from widowhood in this and subsequent lives' She should then sprinkle water at the root of the Vata tree and surround it with cotton threads and should perform its worship with the *upacāras* and then offer worship to Sāvitrī (with image or mentally) from her feet upwards and pray to her to bestow on her beauty, good name, prosperity, and freedom from widowhood. Then she should worship Yama and Nārada and give presents (*vāyana*) to the priest and break her fast next day In Bengal the mode of performing Sāvitrī-vrata is different from the above In Bengal there is no Vatasāvitrīvrata, but there is Sāvitrīcaturdaśī on the 14th of the dark half of Jyestha to secure blessed wifehood in later lives. It is continued for 14 years

In JAOS vol 21 part 2 pp 53–66 Allen has compared the Sāvitrīvrata as described in the Mahābhārata and the purānas and in Hemādri and Vratārka

I have not generally tried to speculate about the remote origins, if any, of even the most important vratas But some scholars endowed with a lively imagination and imbued with the theories underlying Frazer's 'Golden Bough' have tried their hands at the origins of some vratas The late Mr B A Gupte endeavoured to explain 'the symbolism of the Sāvitrīvrata' in I A vol 35 (for 1906) pp 116–119 He bases his article on the forty figures that his wife drew with sandalwood paste in celebrating the Sāvitrī-vrata He holds that the story of Sāvitrī is based on a Nature Myth and that the first impression produced on him by the pictures drawn by his wife is that it is a marriage scene What mainly vitiates all his imaginative explanations is that the Sāvitrī-vrata is not mentioned anywhere in any work that can be said to be even two thousand years old and that he thinks his wife's figures or pictures represent the general way of celebrating that vrata in the whole of India throughout the centuries The Sāvitrīvrata is observed throughout India, but I have not been able to find that women all over India depict the scene as was done by Mr Gupte's wife (who probably was a well-educated lady and had an artistic training in some big city and turned her skill to lend charm and picturesqueness to that vrata, by adding her own artistic ideas to those of millions of uneducated simple women in small towns and villages)

CHAPTER V

EKĀDAŚĪ

The most important tithi in the month of Āsādha is Ekādaśī. A voluminous literature has grown round Ekādaśī in the Purānas and medieval digests There are separate treatises on Ekādaśī written by medieval writers, such as the Ekādaśī-viveka of Śūlapāni and the Ekādaśītattva of Raghunandana Besides, such medieval digests as Kālaviveka (pp 425–451), Hemādri on Kāla pp. 145–288, Kālanirnaya of Mādhava (pp. 233–275), Vratarāja pp 361–475, Kāla-tattvavivecana (pp 98–172) devote hundreds of pages to discussions on Ekādaśī. Endeavour would be made to write about most of the numerous matters relating to Ekādaśī, but everything would have to be compressed in as small a space as possible

If one were to examine the numerous passages of the Purānas and the like one would notice that some simply prohibit the partaking of food (on Ekādaśī), while others lay down the observance of Ekādaśīvrata. A few specimens of the first kind may be cited. The Nāradīya states[235] "all sins whatever and sins equal to brāhmana-murder take resort to food on the day of Hari; one who partakes of food on Ekādaśī incurs those sins; the Purānas again and again loudly proclaim 'one should not eat food, one should not eat food, when the day of Hari comes'." In this case the observance of Ekādasī consists in simply not eating for the whole day anything that is cooked Those passages which contain the word *vaja* are not to be looked upon as merely prohibiting (the eating of food) but are to be construed as prescribing something positive as in the case of Prajāpatīvrata 'one should not see the rising sun', which is interpreted by

Jaimini IV. 1. 3–6 and VI 2 20 Vide n 42 above. For example, it is said by the Matsya and Bhavisya 'When a man fasts on the 11th and partakes of food on the 12th, whether in the bright or dark half, that is a great vrata in honour of Visnu' Those passages that contain the word 'upavāsa' and those that prescribe rewards (of observing ekādaśī) must be construed as laying down the observance of a vrata and not as merely prohibiting anything Those passages also which condemn eating food on ekādaśī may be construed as merely intended to commend the vrata and not to contain a prohibition, following the Mīmāmsā[237] maxim 'condemnation is not indulged in (merely) for the sake of condemnation of that which is condemned, but for the purpose of commending the performance of the opposite of what is censured' The passages that lay down a vrata are again two-fold, viz those that make the observance of Ekādaśī obligatory (*nitya*)[238] and those that lay down the observance for securing some desired object (*kāmya*) Nārada lays down an obligatory rule 'men who are devoted to Visnu and who look upon Visnu as their highest goal should always fast on ekādaśī in each *paksa* (fortnight)' A passage laying down a kāmya-vidhi about Ekādaśī is contained in[239] Kātyāyana 'a person who looks on Visnu as highest goal and who desires to cross the ocean of *samsāra* or to secure prosperity, offspring, heaven, *moksa* or whatever else, should not partake of food on ekādaśī in both fortnights' The result is that ekādaśī is both nitya and kāmya and the maxim of *samyoga-prthaktva* cited above (p. 86) under Rāmanavamī applies Ekādaśīvrata on the ekādaśīs of both fortnights is *nitya* only for persons other than householders, the vrata is obligatory for householders (grhastha) only on the ekādasī of the bright half, but not on the ekādasī of the dark half, since Devala says 'one should not eat (cooked) food on ekādasī in both *paksas* (fortnights); this is the rule of conduct for forest hermits and ascetics, but a householder should

always observe only the Ekādaśī of the bright half'.[240] There are conflicting texts on this subject. The Padma says[241] 'a householder should observe a fast on only the dark ekādaśīs between Śayanī (Āsādha śu. 11) and Bodhinī (Kārtika śu 11) and on no other ekādaśī of the dark half'. There is a precept of Nārada[242] 'a householder having a son should not observe a fast on a Saṅkrānti day, on the day of ekādaśī in the dark half and on eclipses of the sun and the moon'. The best construction of these passages appears to be that a fast only on the ekādaśī of the bright half is obligatory for a householder, but he may observe (Kāmyavrata) a fast on the ekādaśīs occurring in the dark half between Śayanī and Bodhinī, but if he has a son he should not observe a fast even on those ekādaśīs that occur between Śayanī and Bodhinī A widow[243] is to be treated on the same level as a *yati* and a woman whose husband is living should fast only on the ekādaśī of the bright half It has to be further noted that these restrictions[244] do not apply to professed devotees of Viṣnu (technically called Vaiṣnava) To them the verse quoted in note 238 above applies and they have to observe a fast on all ekādaśīs. Hemādri (on vrata vol. I p. 999) held the view that all persons have *adhikāra* for fasting on ekādaśīs in both pakṣas.

On pp. 43–45 above the exaggerated importance attached to vratas in general has already been dealt with Upavāsa as a *prāyaścitta* (expiation for sins) has been described in vol IV.

pp. 52–54 Extremely exaggerated praise of the efficacy of fasting on Ekādaśī has been indulged in by many Purāṇas and digests In the Nārada-purāṇa there is a long passage on the greatness (māhātmya) of Ekādaśī (quoted in Hemādri on Kāla p 146 and Kālanirṇaya pp 273–274) A few of the verses may be cited here; 'by the fire arising from (the observance of) ekādaśī, fuel in the form of sins committed in hundreds of past lives is reduced to ashes Thousands of Aśvamedha sacrifices and hundreds of Vājapeya sacrifices do not reach even up to the 16th part (of the merit) of the fast on ekādaśī This ekādaśī bestows heaven and *mokṣa*, confers a kingdom and sons (on a man) and a good spouse and the health of the body The Ganges, Gayā, Kāśī, Puskara, Kuruksetra, the Narmadā, the Devikā, the Yamunā, the Candrabhāgā are none of them equal to the day of Harī' Similar verses occur in the Padmapurāṇa[245] The Anuśāsanaparva[246] pronounces on Upavāsa an exaggerated eulogy The Padma[247] declares 'on hearing the word ekādaśī, the messengers of Yama become afraid, having fasted on ekādaśī which is the best among all vratas, one should keep awake (in the night) for propitiating Visnu and should sumptuously decorate (the temple or *mandapa* of) Visnu The man who worships Harī with basil leaves secures by each single leaf the reward of a crore of sacrifices'[248] The Varāhapurāṇa (chap 30) declares that Brahmā gave Ekādaśī to Kubera (the lord of wealth) and that to the person who controls himself, who is pure and eats only what is not cooked by fire, Kubera, being pleased, gives everything The Padma narrates the story of a woman, who was always quarrelsome and who thought of her lover, was therefore censured by her husband and beaten, and who in anger went without food and died at night and who on account of her fast[249] (not under-

The Garudapurāna declares:[250] (if one places) on one side (in one pan) the gift of the whole world and on the other side (in another pan) the day of Hari, this ekādaśī is more holy and superior The ekādaśī in Āsāḍha śukla is called mahā-ekādaśī and also Śayanī.

General rules about those who have the adhikāra to undertake vratas have already been dealt with above. But some rules meant specially for the observers of ekādaśī will be set out here. Nārada[250a] provides 'A human being who is more than eight years old and is less than eighty years in age incurs sin if he eats food on ekādaśī through foolishness.' Kātyāyana has a similar verse These two establish that every human being of whatever caste or *āśrama* can observe ekādaśī provided he fulfils the conditions as to age laid down in the verses.

Knowing the weakness of human beings, sages relaxed the rule of an absolute fast on ekādaśī. The Nāradapurāna[251] says 'roots, fruits, milk and water may be partaken of (on ekādaśī) by great sages, but no sages have said that on ekādaśī cooked food may be taken' The Vāyupurāna[252] provided 'partaking of haviṣya food at night, food other than boiled rice, fruits, sesame, milk, water, ghee, pañca-gavya, air—each succeeding one is here (i. e in ekādaśī) more commendable (than each preceding one)'. Baudhāyana[253] declares that those who are unable to observe a

complete fast (on ekādaśī) or who are over 80 years of age should resort to *ekabhakta* and the other (alternatives). The Matsya provides[254] that those who are unable to fast (on ekādaśī) should prefer to take food by the nakta method and if a person is ill, he should make his son and others to undertake the fast (on his behalf). Who can act as *pratinidhis* in the case of a vrata has already been described above (pp 53–54)

It is said by Mārkandeya[255] that one may observe the methods of ekabhakta, nakta, ayācita, complete fast and *dāna*, but should not deprive oneself of the benefits of the observance of dvādasī (with ekādaśī) Here certain alternatives are allowed in place of an absolute fast and they have to be explained. But before doing so, attention has to be drawn to the rule propounded by Manu[256] viz if a person, being master of (i e. quite able to carry out) the main provisions for a rite, resorts to alternatives provided (by texts) he would not, foolish as he is, secure the otherworldly rewards (of that rite) Therefore, ekabhakta, nakta and ayācita are to be employed only if one is unable to observe a strict fast Ekabhakta means eating only once a day after the middle of the day Madhyāhna means the 3rd part of the day divided into five parts (i e from the 13th ghatī after sunrise up to the 18th of a day of 30 ghatīs) Hemādri (on kāla p 109) holds that madhyāhna is the middle part of the day divided into three parts and according to him the proper time for ekabhakta is the time immediately after midday, since the Skanda employs the words 'after the middle of the day is passed' (dinārdhasamayestīte),[257] while the gauna-kāla is up to

sunset Works like the Nirnayāmrta, Smrtikaustubha (pp. 9–10) approve of the division into five parts, and hold that ekabhakta means taking food at sometime between the 13th and 18th ghatī of the day (of 30 ghatīs)[258] When ekabhakta is merely an alternative to strict upavāsa on ekādaśī, food must be taken on the tithi on which the fast would have been observed if the performer were able to undergo it. The same[259] rule applies to *nakta* as a substitute for upavāsa.

Ekabhakta is also a vrata independently performed (without reference to ekādaśī) The Anuśāsanaparva (chap. 106 verses 17–30) declares the rewards secured by observing ekabhakta in each month from Mārgaśīrsa to Kārtika and Anuśāsanaparva (chap 107. 13–126) dilates upon the fruits of observing ekabhakta on each of the thirty days of a month The Krtyakalpataru on vrata (pp 457–468) sets out practically the whole of Anuśāsanaparva chap 107 (which the editor appears not to have noticed) and Hemādri on vrata vol II. pp. 930–931 does the same The Krtyakalpataru (on vrata pp. 419–421), the Krtyaratnākara (pp 406–7 and later on) and Hemādri on vrata (vol II pp 748–798) quote Anuśāsana 106. 17–30 about ekabhakta in different months at different places.

Nakta—Two verses about nakta occurring in the Linga, Nārada[260] and other purānas are: alms collected by begging are superior to fasting, food obtained without requesting anyone for it (i e *ayācita*) is superior to alms, nakta is superior to ayācita, therefore one should subsist by nakta method; eating havisya food, bath, truthfulness, small intake of food, offering oblations

the other is of the nature of a vrata. As regards the first all persons including householders having a son have *adhikāra* to observe it even in the dark half; but as regards the second (*upavāsa* of the nature of vrata) householders that have progeny should not observe it on the ekādaśīs of the dark half, they should not make a sankalpa, they should simply give up cooked food but should observe the *niyamas* of celibacy and the like As to ekādaśīs of the dark half between the Śayanī and Bodhinī even householders with sons have the right to perform the vrata Similarly, those who desire to secure absorption into Viṣnu, long life and sons may perform a kāmyavrata on ekādaśīs of both *pakṣas* Vaiṣnava householders should always fast even on ekādaśīs of the dark half The ekādaśīvrata is obligatory on all including devotees of Śiva, Viṣnu and the Sun. Upavāsa in the nature of vrata is again of two kinds, *nitya* and *kāmya* These are briefly the rules laid down in the Nirnayasindhu and Dharmasindhu (p 16) The main difference between mere upavāsa and upavāsavrata is that in the former there is no sankalpa that the person is undertaking an upavāsavrata and he simply abstains from taking food because the śāstra says that on ekādaśī one should not eat cooked food, while in the latter there is sankalpa and there are also several other matters to be observed.

It would now be proper to give a comparatively early but brief description of ekādaśīvrata The Nāradapurāṇa (Pūrvārdha chap 23 verses 12 ff) describes the procedure as follows —on the 10th *tithi* the man who has to observe the vrata should after getting up brush his teeth, take a bath, bathe a Viṣnu image in *pañcāmṛta* and offer worship (of several *upacāras*) to it On the 11th, after bathing, he should bathe the image with pañcāmṛta and worship Viṣnu with sandalwood paste, flowers and the like

It will be noticed that the main matters in the vrata are upavāsa, worship of Viṣṇu image, *jāgara*[271] at night with songs and music, pāraṇā on 12th and certain restrictions about looking at some persons or speaking to them and restraint of the senses The Brahma-vaivarta (IV 26 1–93) also contains the procedure of ekādaśī-vrata It will be noticed[272] that in the procedure of ekādaśī there is no *homa*, though in some other vratas there is a homa

Accretions gathered round this simple procedure It was laid down early enough that one engaged in upavāsavrata should miss four meals in three days, i e he should eat only once on the 10th in the noon, fast[273] both times on 11th and on the 12th he should miss one meal The general rule is that the sankalpa for vratas is to be made in the morning, but as regards ekādaśī-vrata exceptions have been made in the digests. For example, it is said that the sankalpa[274] about *niyamas* is to be made on the night of the 10th tithi *If* ekādaśī is mixed up with 10th, then sankalpa about fast is to be made at night,[275] if daśamī

extends beyond midnight and the ekādaśī becomes mixed with it, sankalpa is to be made the next day after noon Hemādri (on vrata vol I. p 1006) and Kālanirnaya (p 268) provide that the image of Vishnu should be worshipped in a *maṇḍapa* decorated charmingly with flowers of various kinds It is provided in the Skanda[276] that when a person breaks his fast on the 12th he should partake of the *naivedya* mixed with Tulasī (basil) leaves, since that destroys (the sins of) crores of murders

Numerous medieval digests set out the procedure of ekādaśī-vrata It is impossible for reasons of space to refer to them For the sake of comparison with the Nāradapurāna procedure, I shall set out the procedure of Ekādaśīvrata from the Dharmasindhu (p. 19), almost the latest authoritative work on Dharmaśāstra.

Now (is set out) the procedure of (ekādaśī) vrata On the day previous to the fast, the person, after performing all his daily duties in the morning, should make a *saṅkalpa* in the form 'beginning from the 10th *tithi*, O god Keśava, lord of gods, I shall perform for three days your vrata; make it free from obstacles'. Then at midday (of 10th) he should eat by the ekabhakta method The restrictions to be observed about ekabhakta are: he should avoid taking food in a vessel of bell metal, avoid flesh, *masūra* pulse, sleeping by day, over-eating, drinking too much water, eating food again (after the midday meal), sexual intercourse, telling falsehood, honey, gram, *kodrava*, vegetables, the food belonging to others, gambling, oil, sesame cakes, *tāmbūla* (betel leaves and nut &c), if he has to cleanse his teeth after ekabhakta he should do so with twigs At night he should sleep on a bed spread on the ground. In the morning of ekādaśī he should cleanse his teeth with the leaves of a tree and not with twigs. After performing bath and other daily duties, he should put on his finger a *pavitra* (loop) made of *darbha* grass, turn his face to the north, take a copper vessel full of water and make a *saṅkalpa* as follows. 'after remaining without food on the ekādaśī I shall, O lotus-eyed one, on the next day partake of cooked food, O Acyuta, be you my refuge'. Or he may offer a handful of flowers to Hari with this mantra. In the case of him who is unable to observe a total fast, necessary changes may be made in the sentence of *saṅkalpa* according to

his ability viz 'on ekādaśī I shall subsist on water or milk or on fruits or I shall take food at the time of nakta'. Śaivas should make the *sankalpa* with Rudra Gāyatrī;[277] Sun-worshippers should make the sankalpa with the usual Gāyatrī (Rg. III 62 10 'tatsavitur' &c) or by taking the name of the Sun. This sankalpa should be made by smārtas on the night of the ekādaśī tithi, if there is 10th tithi after sunrise (mixed up with ekādaśī), if 10th tithi exists beyond midnight on daśamī day all (whether smārtas or vaiṣnavas) should make the sankalpa after midday He should drink the water used for sankalpa On making the sankalpa he should pronounce over it thrice the mantra of eight syllables (such as 'om namo Nārāyaṇāya') Then after erecting a *maṇḍapa* decorated with flowers (garlands &c) he should offer worship to Hari (image) according to prescribed rules in that *maṇḍapa* with flowers, fragrant substances, incense, best *naivedya*, with various divine hymns of praise, charming songs and music, with straight prostrations on the ground like a staff, with best announcements with the word 'jaya' and at night he should keep awake.

The cult of ekādaśī went on growing apace, so much so that for the 24 ekādaśīs of the twelve months of the lunar year and for the two ekādaśīs of the intercalary month separate names were invented It is not possible to say with certainty when these names were given, but some of them must be about two thousand years old

The twenty-four names beginning with *caitra* śukla ekādaśī and ending with phālguna dark half ekādaśī are given in the note below[278] There is some divergence about the names, but

278 The 24 names from चैत्रशुक्ल 11 in order are कामदा, वरूथिनी, मोहिनी, अपरा, निर्जला, योगिनी, शयनी, कामिका or कामदा, पुत्रदा, अजा, परिवर्तिनी, इन्दिरा, पाशाङ्कुशा, रमा, प्रबोधिनी (or बोधिनी), उत्पत्ति, मोक्षदा, सफला, पुत्रदा, षट्तिला, जया, विजया, आमलकी (or आमर्दकी), पापमोचनी The पद्मपुराण (VI. chapters 41–65) contains over a thousand verses on these and the legends connected with them The Ahalyākāmadhenu (Ms in Scindia Oriental Institute at Ujjain) is probably the largest work on vratas having 1206 folios therein It deals with these names on folios 696 to 799 As regards the two ekādaśīs in an intercalary month, Padma VI 64 and 65 say that कमला and कामदा are the names of dark and bright half एकादशीस, while the अहल्याकामधेनु (folios 807–

for want of space no notice is taken of it here. One cause of divergence appears to be that in some Purānas the month is pūrnimānta, while in others the month is amānta and what is Bhādrakrsna in Pūrnimānta reckoning is Śrāvana-krsna in Amānta reckoning.

The ekādaśī on Jyestha bright half is called *nirjalā* because the vrata consists in not using or drinking water except at the time of bathing or at *ācamana*. It is described by Hemādri (on vrata vol I. pp 1089–1091) who quotes the Mahābhārata for it and by N S pp. 99–100. In the summer month of Jyestha it must have been a great trial to go without water for a day and therefore it was specially commended. Visnu was supposed to sleep for four months from Āsādha bright ekādaśī at night and to rise from his sleep on Kārtika bright ekādaśī by day and hence these two ekādaśīs are respectively called Sayanī (connected with the śayana i. e sleeping of Visnu) and Prabhodhinī[279] or Prabodhanī (connected with the *prabodha* i e. awakening of Visnu). What the legend of Visnu's sleeping from Āsādha śukla eleven for four months was really meant to illustrate or symbolize it is difficult to say As these four months were the months of the rainy season in many parts of India all movements from one place to another distant place came almost to a stand-still in ancient times; so probably mythology became busy and suggested that Visnu himself gave up all activity It is possible that this legend of four months' sleep may have some connection with the state of things when the ancestors of the Vedic Āryans lived in northern latitudes, when for four months the sun was either not seen or emitted only faint light This legend from whatever cause it may have arisen is worked up in various ways. It was said that Visnu not only slept on his snake couch but he also turned in his sleep from one side to the other (as human beings do) on Bhādrapada sukla eleven And therefore that ekādaśī in Bhādrapada was called Parivartinī This matter was still further elaborated and it was asserted that

all the great gods and goddesses went to sleep like Viṣnu on different dates, as stated in the Rājamārtaṇḍa quoted below [280] Then, further differences arose, some works saying Viṣnu went to sleep on the 11th, some that Viṣnu slept on 12th, while a third set said that Viṣnu slept on the 15th of Āṣāḍha bright half The Vanaparva (203 12) declares that Viṣnu sleeps on the hoods of Śesa Kālidāsa in the Meghadūta refers to both the sleeping of Viṣnu on his snake couch and his rising from it (sāpānto me bhujagasayanād utthite śārngapānau) Most scholars hold that Kālidāsa flourished between 350–450 A D In the Gangadhar Stone Inscription of Viśvavarman in the Kṛta year 480 there is a clear reference to the rising from sleep of Viṣnu in Kārtika (vide Gupta Inscriptions ed by Fleet No 17 at pp 72, 75, 79) Kṛta is held to be the same as Vikrama year by most scholars So the legend about Viṣnu's *śayana* on a snake bed and getting up from it may be about 2000 years old, if not more

The question as to the tithi on which the gods (and particularly Viṣnu) went to sleep very much exercised the minds of the authors of Purāṇas and of the digests For example, the Vāmanapurāṇa (16 6–16) contains verses [281] some of which may

be summarised here; 'a person should arrange a couch in the form of the hoods of the snake Śesa for the lord of the world (Visnu) on the 11th tithi of Āsādha and offer worship; he should, being himself pure, seek on the 12th permission from brāhmanas invited, and should bring to sleep the Lord that wears yellow clothes' Then the purāna proceeds to narrate how Kāma (God of Love) sleeps on 13th of Āsādha on a bed of *kadamba* flowers, the *Yaksas* on 14th, Śiva on the 15th (i e Pūrnimā) on a bed of tiger-skin, then Brahmā, Visvakarmā, Pārvatī, Ganesa, Yama, Skanda, the Sun, Kātyāyanī, Laksmī, Lord of snakes, Sādhyas respectively go to sleep on the tithis of the dark half from 1st to 11th The K V (p 225) and Hemādri (on Kāla pp 888–889) quote certain verses according to which Kubera, Laksmī, Bhavānī, Ganeśa, Soma, Guha, Bhāskara, Durgā, the Mātrs, Vāsuki, sages, Visnu, Kāma, Śiva are the lords of tithis from 1st to 14th for pavitrāropana (i. e giving the sacred upavita to the gods) and for śayana.

One important rule has to be remembered,[282] viz whatever *naksatra* or whatever *tithi* has a certain deity as its lord, the sleeping, turning from one side to another and the rest (i e getting up &c) take place on that tithi or naksatra Some celebrate the *śayana* of a god relying on the tithi, others rely on the naksatra. But the trouble is that one tithi has several lords, according to various authorities For example, pratipad has three lords, Agni, Brahmā and Kubera (Garuda I 116 3–8) For reasons of space it is not possible to refer to the texts on which different tithis are assigned for the śayana of Visnu. The Samayamayūkha (p 79), K T. V p 172 and Vrataprakāśa[283] (part of Viramitrodaya) espouse the view of Āsādha eleventh (of bright half) relying on the Brahmapurāna Many digests favour the 12th as the tithi of śayana and prabodha of Visnu relying on the several verses in the Varāha, Visnu-dharmottara and other Purānas Vide Kālaviveka p 175 (ff), V K K 286–288, Krtyatattva p 436, K R p. 209. inscription referred to in I A vol 25 p 290 we have the words 'punyā utthānadvādaśī' (the holy 12th tithi on which Viṣnu gets up from his couch), the inscription being dated in *śake* 1462 (1540 A. D) In some works Āṣāḍha Full moon is advocated for the śayana of Viṣnu [284] Vide K R p. 208, K V p 188, Kṛtyatattva p 436 These works provide how śayana and prabodha are to be celebrated On the śayanī day, the devotee prepares a couch in the evening with a piece of cloth or with flowers, worships Viṣnu (image) at night, repeats the mantra 'om namo Nārāyaṇāya' and then puts Viṣnu to sleep and repeats two verses, one of which is quoted below [285] On the day of prabodha the image of Viṣnu is given an elaborate bath and a full worship is done and several mantras from Varāha-purāṇa are recited and a Vedic verse (idam viṣnur, Ṛg I 22. 17) also is recited

Persons having *adhikāra* for ekādaśī-vrata may be divided into two classes, viz Vaiṣnavas and Smārtas The word vaiṣnava is defined in some of the Purāṇas [286] such as the Padma III 1. 21–32, IV 10 65–66, VI 252 74, VI 69, Viṣnu III 7. 20–33, III 8. 9–19, the Bhāgavata and in some of the digests A Vaiṣnava is really one who has received dīkṣā (initiation) according to the Vaiṣnava *āgamas* of the Vaikhānasa, Pañcarātra and other schools The Skanda defines a Vaiṣnava· that man is a Vaiṣnava who does not forsake (fast on) ekādaśī, whether he

be reduced to the direct misery or whether great bliss might have come to him, who has been given the dīkṣā of a Vaiṣnava, who behaves equally towards all living beings, who does not swerve from the duties of his class (varna), who is equal to his own friends of his class (varna), who is equal to his own friends or his enemies, who, being high (in principles), does not deprive anyone (of his possessions) or does not injure anyone, and whose mind is pure. Vide Prof. S. K. De's 'Vaisnava faith and movement' pp 364–366 and p. 413 where the author gives an analysis of the characteristics of the Vaisnava devotee drawn from the Haribhaktivilāsa of Gopālabhatta (for followers of Caitanya).

Though the Purānas give these definitions, some of which are very general and may apply even to persons not popularly called Vaisnavas, still in all parts of India and by all *śiṣṭas* it is admitted that those are Vaisnavas who are traditionally[287] known by that appellation. The question on what tithi upavāsa should be practised when ekādaśī is mixed up with the tenth tithi and twelfth has to be often answered in different ways according as the person who is to observe the fast is a Vaisnava or a Smārta. The answer depends on the rules about *vedha* which are rather complicated. It is not possible within the space at my disposal to go into details. Those who want to make a deep study of this matter may consult Hemādri on Kāla pp. 206–288, Kālanirnaya pp. 233–256, Tithitattva pp 104–108, Samayaprakāśa pp. 66–74, Nirnayasindhu pp 37–44, Smṛtimuktāphala (on Kāla) pp. 839–844), Dharmasindhu (pp. 16–19).

Ekādaśī, like all other tithis, is of two kinds, viz sampūrnā and viddhā or khandā The general definition[288] of the sampūrnā tithi is that when a tithi has the extent of 60 ghatikās commencing from the time of sunrise it is called sampūrnā To this ekādaśī was stated by the Skandapurāna[289] to be an exception In the case of Ekādaśī the Garudapurāna[290] and Bhavisya

lay down that ekādaśī is sampūrṇā only when it exists also two muhūrtas (i. e 4 ghaṭikās) before sunrise of the day on which it exists for the whole civil day.

The Nārada and other purāṇas condemn fast on ekādaśī mixed with daśamī Nāradapurāṇa (pūrvārdha, chap 29. 39–40) says 'the sixth tithi mixed with the 5th, the seventh mixed with the 9th and ekādaśī mixed with daśamī—a fast should never be observed on these; all should accept (for fast) ekādaśī free from daśamī; daśamī joined to ekādaśī destroys spiritual merit acquired in three past lives'. This aversion to daśamī was probably due to the fact that daśamī finds no place in the famous *yugmavākya* and the pair that is commended is that of ekādaśī and dvādaśī (and not of ekādaśī and daśamī) One well-known verse is. Gāndhārī observed a fast on ekādaśī mixed with daśamī; her one hundred sons (the Kauravas) perished (in the Bhārata war); therefore one should give up that kind of ekādaśī for a fast [291] The Nāradapurāṇa (pūrvārdha, chap. 29) devotes 15 verses to the discussion of Ekādaśī and Dvādaśī

In the Brahmavaivartapurāṇa quoted at great length by Hemādri on Kāla (pp 255–259) four kinds of *vedhas* of ekādaśī by daśamī (viz. arunodaya-vedha, atrivedha, mahāvedha and Yoga) are mentioned, but they are passed over here In the case of Vaiṣṇavas, if daśamī extends on a civil day beyond 56 *ghaṭikās* from sunrise, then ekādaśī follows and continues for the whole of the next civil day, there is then what is called Arunodayavedha and Vaiṣṇavas cannot observe a fast on such an ekādaśī which is preceded by Arunodayavedha The same result follows if daśamī extends up to 3, 2 or one ghaṭikā before sunrise or daśamī *persists* till the exact time when the sun rises and then ekādaśī starts (when there is what is called sūryodaya-vedha) A Vaiṣṇava in deciding on what tithi to fast is affected by both arunodayavedha and sūryodayavedha i e even if ekādaśī exists for full 60 ghaṭīs after sunrise on a civil day when daśamī precedes it by four ghaṭīs, or by three, two or one ghaṭī or when daśamī exists for one moment at sunrise and then ekādaśī follows at once, still the Vaiṣṇava cannot observe a fast on the ekādaśī of 60 ghaṭīs but only on the next i e the 12th. If dvādaśī touches three civil days, then the fast for Vaiṣṇavas

is on the day which is wholly covered by dvādaśī and the pāranā is on the next day when dvādaśī ends. In any cases other than those specified above ekādaśī is the fast day and dvādaśī is the pāranā day. Nāradapurāna (pūrvārdha, chap 29 verse 45) prescribes that if there are two ekādaśīs, whether in the bright half or dark half, a householder should fast on the earlier of the two and ascetics (yatis) on the later. Sannyāsins and widows are governed by the rules for Vaisnavas Smārtas (all those who are not Vaisnavas) are not affected by the doctrine of *aruṇodayavedha* but only by *sūryodayavedha* i e. if there is daśamī before sunrise and an ekādaśī follows from sunrise, smārtas have to observe a fast on the ekādaśī. There are many texts that are apparently in conflict, but the Kālanirnaya (pp 251–256) and Nirnayasindhu (pp. 37–44) introduce order by showing that some texts refer to Vaisnavas alone, some to Smārtas alone and some to both. The Ekādaśītattva (p. 55) brings together many of the conclusions about the fast tithi and the pāranātithi.

There are cases where the texts sometimes allow fast on ekādaśī even though mixed with daśamī. This occurs when dvādaśī does not exist even for a short time on the 13th tithi. But this is allowable only to Smārtas and not to Vaisnavas. Certain restrictions as to food and physical and mental activities had to be observed from the time sankalpa was made to the final ceremonies (*pāranā*) in ekādaśīvrata.[292] It may be noted that even when a person is in mourning he has to observe ekādaśīvrata[293] Certain observances were laid down as common to all vratas (including ekādaśī) viz. forbearance, truthfulness, compassion, charity, purity, restraint of senses, worship of god, homa, contentment and not misappropriating another's wealth.[294] There were separate rules to be observed on daśamī, ekādaśī and dvādaśī (10th tithi to 12th). They are somewhat overlapping. The observances prescribed for daśamī are: vegetables, flesh, masūra pulse, eating again (after ekabhakta), sexual intercourse,

dice-play, drinking much water—a devotee of Viṣnu should avoid these.[295] The Matsyapurāna[296] provides: (vessels of) bell-metal, flesh, wine, honey, oil, telling an untruth, physical exercise, journey, sleeping by day, earning (wealth), oil-cakes, *masūra* pulse—one should omit these twelve (on daśamī).

The restrictions on the day of fast are many, but a few are stated here. Hārīta lays[297] down: one should on a day of fasting avoid speaking with persons guilty of grave sins, heretical persons, atheists and the like and also falsehood, gambling and the like. The Kūrmapurāna provides: on the day of vrata one should not touch nor speak nor look at persons that are *antyajas* (untouchables) and have to live outside the village, a woman recently delivered, one guilty of grave sins and a woman in her monthly illness. Devala provides.[298] A fast perishes (i. e all rewards of observing it are lost) by sleep in the day, by play with dice and by sexual intercourse; but in case of great pain (or danger) a fast is not affected by drinking water (frequently). The Rājamārtaṇḍa lays down: a man fasting on an Ekādaśī should not be guilty of telling a lie, gambling, sleeping by day and sexual intercourse. Hemādri (on vrata vol. I p. 331) quoting Matsya forbids a bath with oil on ekādaśī. A fast is vitiated by drinking water often, by eating *tāmbūla*, by sleep in day time and by sexual intercourse. When Vyāsa[299] says that flowers,

ornaments, (rich) clothes, fragrant substances, incense, sandal-wood paste, brushing the teeth and collyrium (in the eyes) would not vitiate a fast, he is referring to the fast observed by women whose husbands are alive.

On the 12th the person has to offer worship to Viṣṇu and has to avoid sleeping by day, the food belonging to another person, eating again after the midday meal (on 12th), sexual intercourse, honey, bell-metal vessel, meat, oil.[300] The passage in the note below is practically the same as the one cited from Brahmāṇḍa-purāṇa by Hemādri (on Kāla p 203) as containing the restrictions about dvādaśī.

The result of the insistence by Vaiṣṇavas on observing a fast on ekādaśī mixed with dvādaśī was often this that in order to be able to observe pāraṇā on dvādaśī before it ended, they had to get up very early before dawn, take their bath and compress all their morning and midday duties into a short period before sunrise. In modern times many orthodox Vaiṣṇavas do this and rely on the authority of the Nārada[301] and Skanda purāṇas quoted below. A smṛti[302] text goes so far as to prescribe 'on seeing that dvādaśī exists only for half a *kalā* after *niśītha*, a (Vaiṣṇava) person should perform all acts proper to be performed up till midday following, because Śaṅkara has so ordered'. *Kalā* as a measure of time has been variously defined Matsya (142 4) and Vāyu (100 217–218) say that 30 kalās are equal to a *muhūrta* (i. e two ghatikās); on the other hand, the Amarakośa holds that 360 kalās constitute a muhūrta and the Kālanirṇaya

It explains निशीथादूर्ध्वं as 'सार्धमहरत्रयस्योपरि' i e after 3½ praharas of the night. But निशीथ ordinarily means अर्धरात्र and therefore निशीथादूर्ध्वम् would mean any time after midnight निशीथ is also explained as 'महानिशि द्वे घटिके रात्रेर्मध्यमयामयोः'. महानिशा is defined as the two praharas of the night (excluding the 1st and 4th or last) Vide हे. on काल p 708, का वि 343, नि सि 130 for several definitions of महानिशा कल्पतरु (नैयत० p. 370) says that महानिशा is the period of eight ghaṭikās after the first half prahara of night. accepts this last. As the astronomers themselves were at variance as to the length of a tithi in question, a plain straightforward rule was proposed that the fast in case of doubt should be observed on dvādaśī and the pāraṇā should be observed on the 13th.[303] The rank and file of Vaiṣṇavas are very exclusive and bigoted and treat with some contempt everything connected with Śiva and some of them eat sumptuous food on Śivarātri, instead of observing a fast Many of the smārtas generally observe a fast both on the Ekādaśī and the Śivarātri (particularly the Mahāśivarātri i. e on Māgha dark 14th). There have been great wrangles and hatreds among Vaiṣṇavas and Śaivas The Brahmapurāna expressly[304] states that in the holy Purusottamakṣetra a temple of Śiva was erected in order to put a stop to the wranglings between Śaivas and Bhāgavatas (devotees of Viṣnu) The higher Hindu thought including even the Purāna excursions in philosophy always held that there[305] is only one God, that the one *Brahma* that is all Intelligence, that is incapable of being thoroughly comprehended, that is without parts and without body, is imagined to have different visible forms for securing the purposes of devotees and that deities deemed to have visible forms are imagined as male or female or as portions (of the one *brahma*). The Mahābhārata and some of the Purāṇas emphasize that God is one and that there is no difference between Śiva and Viṣnu.[306] Vide Vanaparva 39 76–77,

Some purānas[307] put forward the notion that health is secured from (the worship of God as) the Sun, wealth from Agni, (true) knowledge from Śankara, and *mokṣa* from Viṣnu.

Some of the purānas (such as Brahmavaivarta) specially mention eight kinds of dvādaśīs viz. Unmīlanī, Vañjulī, Trisprśā, Paksavardhinī, Jayā, Vijayā, Jayantī and Pāpanāśinī. Vide Hemādri on Kāla pp. 260–263, H. (on vrata) vol. I. p 1214, N. S. 43, Sm. K 250–254. Detailed descriptions of these are passed over here. Jayā,[308] Vijayā, Jayantī and Pāpanāśinī are dvādaśīs respectively having Punarvasu, Śravana, Rohinī, Puṣya naksatras. Trisprśā is[309] dvādaśī which spreads over three days i. e. it exists before sunrise on a certain day, then on the whole of the next day from sunrise and for some time (however short) after the latter. On these fast should be observed by those desirous of destruction of sins and attainment of *mokṣa*.

It would not be out of place to bring together in one place the different items that constitute Ekādaśīvrata.

On the 10th the performer has a meal at midday (ekabhakta), then he cleans his teeth (not with a twig) but with leaves or by rinsing the mouth twelve times with water. Then on the night of 10th he gives up his evening meal and begins to observe the restrictions indicated above (pp.115–116). Then on the 11th after getting up he cleanses the body as well as the mind and makes a *saṅkalpa* in the morning as described above (pp 105–106) The sankalpa has to be made at night or in the noon if ekādaśī is viddhā Then he recites thrice the mantra of eight syllables (*om namo Nārāyanāya*) on the water in the copper vessel in his hands and drinks water therefrom. On the 11th he prepares a

maṇḍapa of flowers, worships the Viṣṇu image therein and offers the several *upacāras*. He fasts that day. He recites hymns of praise to Viṣṇu and falls prostrate on the ground in salutation. He then keeps awake at night On the 12th he takes a bath in the morning, offers worship to Hari and dedicates his fast to the God, recites the mantra (Ajñānatimirāndhasya' &c cited above p. 105) and performs the pāraṇā. Thus is the general outline of *kāmya* ekādaśīvrata. In the case of the obligatory fast, the performer should abstain from food the whole day and also keep the several restrictions to be observed on ekādaśī (as described above such as not drinking water more than once, not sleeping by day &c) The rules for the followers of Caitanya about ekādaśī as summarised from the Haribhaktivilāsa by Prof S. K De in 'Vaisnava faith and Movement' on pp 371–375 do not differ much from those stated above.

A vrata comes to an end by a rite called udyāpana (carrying out) or pāraṇa or pāraṇā The word pāraṇa or pāraṇā is derived by some from the root 'pāra' meaning[310] 'to finish an action or rite'. The word occurs in the drama Śakuntalā referred to above on p 46 and in Raghuvaṃśa II 70 'prātar-yathoktavrata-pāraṇānte'. Vide for pāraṇā also Raghuvaṃśa II 39 and 55 According to the Kūrma-purāṇa, one should fast on the ekādaśī and pāraṇā is to be on the 12th but pāraṇā should not be done on 13th tithi, since that would destroy (the merit) of twelve dvādaśīs[311] In spite of this, pāraṇā on the 13th[312] tithi had to be allowed under certain circumstances e g if ekādaśī is mixed with daśamī on a prior day and with dvādaśī on the next day, then the fast is to be on dvādaśī but if no dvādaśī at all exists on the day after fast, then pāraṇā may be on the 13th tithi The Viṣnudharmottara[313]

prescribes 'a vrata ends with pāranā and at the end of a vrata, brāhmanas are to be fed; before one vrata is finished one should not commence another'. The general rule is that in all vratas[314] the pāranā is in the morning. One should perform the udyāpana as laid down in the texts providing for the vrata concerned; a vrata becomes fruitless if the udyāpana be not performed. If no form of udyāpana is prescribed by the texts, the performer should perform a rite in consonance with the[315] vrata He should make gifts in proportion to his wealth when no form of udyāpana is mentioned in the texts on a vrata. For making the vrata complete he should donate cows and gold. If none of these can be given and nothing can be done as laid down in the texts, the words of a brāhmana alone are sufficient to complete a vrata; but if a man receives the blessed words of brāhmanas without giving a daksinā (though able), he goes to hell!

A difficulty may arise owing to the rules that no fresh vrata is to be undertaken till one (prior) vrata is finished and that vrata includes its pāranā. Suppose, a man has undertaken years ago to observe two vratas, then he may have to observe a fast on ekādasī and also on dvādasī owing to another vrata already undertaken Pāranā involves *bhojana* (taking food). But this is impossible if one has to undergo two fasts successively The remedy is that at the end of the first vrata the performer (who has to undergo two fasts) should sip water. The Veda says that when a man partakes of water it is neither eating nor non-eating.[316]

CHAPTER VI

CĀTURMĀSYA

On Āsādha-śukla ekādaśī or dvādaśī or paurnimā [317] or on the day when the Sun enters the Zodiacal sign Cancer, cāturmāsya-vrata is to be observed. Whenever it may be begun it is to be finished on Kārtika-śukla 12. The performer should observe a a fast that day, worship Viṣnu (image) and pray as follows: (Garuḍapurāna I 121 2–3) 'O God! I have undertaken this vrata in your presence; may it succeed without obstacles if you become favourable to me, after I undertake this vrata if I die when it is half-finished, may it become completely fulfilled through your favour'! The vrata may be begun even when Jupiter or Venus has become invisible and the like The performer has to give up some edible during the four months, viz vegetables in Śrāvana, curds in Bhādrapada, milk in Āśvina and pulses in Kārtika According to some authorities, he has to give up some or all vegetables for all the four months. The performer is asked to give up many other things also such as sleeping on a cot, meat, honey &c When the vrata is finished, he invites brāhmanas, announces to them what restrictions he had undertaken, feeds them, gives them daksinā, and recites the prayer 'O Lord! this vrata was undertaken by me in order to please you, O Janārdana! may it become complete through your favour, whatever defect there may be!' This vrata is even now observed, particularly by women The Krtyatattva (p 435), Vratārka, Vrataprakāśa (folio 105a) and other medieval digests quote long passages from the Matsya, Bhavisyottara (I. 6–9) and other purānas about the results of giving up certain things in the Cāturmāsyavrata A few passages are set out for sample. 'a man secures a sweet voice by giving up jaggery, has charming limbs by giving up oil, by giving up ghee he secures beauty, by giving up fruits he becomes intelligent and has many sons, by giving up vegetables and leaves he secures well-cooked

dishes, by giving up curds and milk he goes to the world of cows'.[318]

In the Vedic period there were sacrifices called Cāturmāsyas (seasonal sacrifices) that were performed on the Full Moon days of Phālguna (or Caitra), of Āsādha and Kārtika and were respectively called Vaiśvadeva, Varunapraghāsa and Sākamedha (the fourth called Śunāsīrīya need not detain us). Vide H. of Dh. vol. II. pp. 1091–1106. It was expressly stated by Āpastamba Śrauta VIII. 4. 13 that Vaiśvadeva (*parvan* of Cāturmāsya) was to be offered in vasanta and Varunapraghāsa in the rainy season. It may be noted that the sacrificer in these seasonal sacrifices had to keep certain observances such as sleeping on the ground,[319] avoiding meat, honey, salt, sexual intercourse and bodily decorations, which closely resemble the restrictions laid on the person observing Ekādaśīvrata. The Yājñavalkya-smṛti[320] (I. 125) makes it obligatory on a person of means to offer a Soma sacrifice every year, a paśubandha in each *ayana*, the Āgrayanesti (performed when new crops are ready) and the *cāturmāsyas*. The cāturmāsyas meant here are the Vedic ones mentioned above and not the Paurānika vratas of cāturmāsya.

The Yājñavalkya-smṛti employs the word vrata in the sense of prāyaścitta in III. 251, 252, 254, 266, 269, 282, 298, 300, in the sense of 'brahmacarya' in III. 15, and in the sense of the food to be subsisted upon in III. 289, but hardly ever in the sense of a rite to be observed on a tithi or week day or naksatra as in the purānas This at least indicates that the vratas mentioned in the purānas had not attained prominence in the time of the Yājñavalkya-smṛti, which, in spite of its containing over 1000 verses, hardly ever refers to any vrata in the sense of the purānas.

CHAPTER VII

Vratas called Nāgapañcamī, Manasāpūjā, Rakṣābandhana, Kṛṣṇajanmāṣṭamī

In the month of Śrāvana there are several important vratas, one of which is Nāgapañcamī on the 5th of the bright half of Śrāvana The Nāgapañcamī is observed in different ways in all parts of India Some hold that, instead of Akṣayyatṛtīyā, Nāgapañcamī is the one half auspicious day out of 3½ most auspicious days in the year. The Bhavisyapurāna, Brāhmaparva (chapter 32 verses 1–39), expatiates on Nāgapañcamī Krtyakalpataru (on vrata) pp 87–90 and Hemādri (on vrata vol. I pp 557–560) quote several verses from the Bhavisyapurāna Briefly, the Bhavisya[321] says when men on the 5th bathe with milk the nāgas called Vāsuki, Taksaka, Kāliya, Manibhadra, Airāvata, Dhrtarāstra, Karkotaka and Dhanañjaya, these give *abhaya* (freedom from danger) to their families A legend is told (in Bhavisya I. 32) that Kadrū, mother of nāgas, laid a bet with her sister Vinatā about the colour of the tail of Indra's horse called Uccaih-śravas, Kadrū asserting that the tail was black though the horse was white and Vinatā saying that the body and tail were white and when the nāgas refused to practise the deceit whereby they were to become the dark hair in the horse's tail, Kadrū cursed them that fire would burn them (in the *sarpasattra* of Janamejaya) Persons should make golden, silver or clay images of nāgas, should worship them with Karavira and Jāti flowers and incense etc, feed brāhmanas with ghee, *pāyasa* etc. and should bathe nāgas with milk The result would be that nāgas would bestow on the worshippers safety (from snake-bite) The Bhavisyottarapurāna (chap 36) contains another method On Śrāvana 5th (bright half) a person should draw on both sides

In other purānas twelve nāgas are named e g कृत्यतत्त्व p. 437 and तिथितत्त्व p 33 quote from गरुड 'अनन्त वासुकिं शङ्ख पद्म कम्बलमेव च। तथा कर्कोटकं नागं धृतराष्ट्रं च शङ्खकम्। कालिय तक्षकं चापि पिङ्गल मणिभद्रकम्। यजेत्तान-सिताक्षागाद् वृद्धश्रुको दिवं व्रजेत्॥'. भविष्योत्तर 36 48–49 and Bhavisya I 32. 50–51 also set out twelve names of Nāgas, each one being the object of worship in each of the twelve months of the year.

of his door with cowdung figures of serpents which should be worshipped with curds, dūrvā tendrils, kuśas and sandalwood paste, flowers and presents of food They would have no danger from snakes. Vide Hemādri on Kāla p. 621, K V p. 413, K R p. 234 In Saurāstra Nāgapañcamī is observed in Śrāvana dark half.

It appears that in Bengal and south India (but not in Mahārāstra) there is worship of Manasādevī in one's own courtyard on a branch of the snuhī plant on the 5th of Śrāvana dark half. The Rājamārtanda has four verses, one of which is quoted below. Samayapradīpa and Krtyaratnākara refer to the worship of Manasādevī. The Tithitattva[322] (p. 33) contains the *dhyāna* of Manasādevī taken from Padmapurāna. First, there is a sankalpa[323] about the worship of Manasādevī in order to get rid of the danger from snake-bite, then one offers *gandha*, flowers, incense, lamp and *naivedya* and then Ananta and other *nāgas* are offered worship, the principal item being naivedya of milk and ghee. Nimba leaves are placed inside the house and the performer eats them and also makes brāhmanas eat them The Brahmavaivartapurāna (II) devotes two chapters (45–46) to the birth of Manasādevī, her *pūjā* and stotra (praise) &c. Dr Sukumar Sen has edited in the B I series Vipradāsa's 'Manasāvijaya'

In the Deccan on Śrāvana bright half 5th figures of snakes are drawn with red sandalwood paste on wooden boards, or clay images of snakes coloured yellow or black are purchased and worshipped and given milk and snake charmers go about with snakes of all sorts, to which people offer milk and some money is paid to the snake charmers

If pañcamī is mixed with the 4th and 6th tithis, that mixed with the 6th is to be preferred. The Vratakālaviveka[324] speaks of Manasāvrata on Jyestha-śukla 10th with Hasta-naksatra or without it and remarks that when this vrata is performed Manasā goddess protects a man from the danger of poisonous snakes

How and when serpent worship arose in India is a difficult problem The Ṛgveda contains no reference to snake worship On the contrary the Vedic god Indra is said to be the killer of *ahi* (a serpent) in Ṛg. II. 30. 1, II. 19. 3 and the slaughter of *ahi* is frequently mentioned as in Ṛg. I. 165. 6, III. 47 4. That *ahi* meant a serpent with a hood is clear from Ṛg. VI. 75 14 (ahiriva bhogaih paryeti bāhum). In Br. Up IV. 4. 7 and Praśna IV. 5 there are references to the cast-off slough of serpents (mentioned as 'pādodara' whose feet are inside its body) and in Ṛg IX. 86 44 (ahir na jūrnāmati sarpati tvacam) also. But in many passages of the Ṛgveda (such as I. 32 11) *ahi* appears to have a metaphorical sense and refers to a demon like Vrtra that prevented waters from flowing down. In the Tai. S IV. 2. 8. 3. and Vāj S. (XIII. 6–8) there are three verses that contain salutations to serpents. In the Atharvaveda (VIII. 14. 13–15) there is a reference to serpents some of which like Taksaka and Dhrtarāstra are named The Kāthaka S V. 6 enumerates the pitrs, sarpas, gandharvas, waters and herbs as pañcajana, and the Ait Br. XIII. 7 asserts that gods, men, gandharvas, apsarases, snakes and pitrs were pañcajana. This cannot be the meaning of 'pañcajanāh' in Ṛg. X. 53 4. The above passages show that sarpas had come to be a clan like gandharvas in late vedic times

In the Āśv. gr II. 1 1–15, the Pāraskara-grhya II. 14 and other grhya sūtras a rite called 'sarpabali' (offering to serpents) was performed on the Full Moon day of Śrāvana Vide H. of Dh. vol II. pp 821–823 for a description The nāgas figure frequently in the Mahābhārata Vide Ādi. chap. 35 enumerating the names of many nāgas beginning with Śesa and chap 123. 71, Udyoga 103 9–16 (naming numerous nāgas) Arjuna while engaged in his twelve years' vow of brahmacarya came to

the country of the Nāgas (probably a tribe that had nāga as their emblem) and took as his wife Ulūpī, a Nāga princess who was smitten by love. Babhruvāhana, son of Citrāngadā, fought with Arjuna who had come to Manipura for protecting the Aśvamedha horse, was killed by Babhruvāhana and restored to life with the help of a Sañjīvana jewel (Āśvamedhikaparva chap. 79–81). Serpents came to be associated with both Visnu and Śiva. Visnu is said to sleep on the hoods of Śesa-nāga (Vanaparva 203. 12 and 272. 38–39) and Śiva wears serpents on his body like yajñopavīta (Anuśāsana 14. 55).[325] In the Bhagavadgītā X. 28–29 Lord Krsna identifies himself with Vāsuki among serpents and Ananta among nāgas What difference is made between 'sarpa' and 'nāga' is not clear. Probably 'sarpa' means all creeping things, while nāga means 'the cobra'. The Purānas are full of stories about nāgas Vide J. Ph. Vogel's painstaking work (Indian Serpent Lore, 1926) based on the Mahābhārata, the Purānas and the Rājatarangini. It appears that serpent worship arose gradually from the fear of serpents that must have taken a heavy toll of life, particularly at the beginning of the rainy season. Even in these days about 10000 people die of snake-bite every year in India, while persons killed by all wild animals are hardly 3000 Why the tithi was changed from Full Moon (for Sarpabali in the grhya sūtras) to the 5th of the bright half is not clear. It may be due to the slight change in the time of the onset of rains owing to the precession of the equinoxes. Vide Fergusson's 'Tree and Serpent worship' pp. 1–75 and Plate XV which reproduces the sculptures on the eastern gateway of Sanchi, where occurs the figure of five-headed Nāga. Stone images of serpents under sacred trees like *pippala* are common in the Dravida country and a few temples dedicated to nāgas exist such as the one at Battis Shirālen in Satara District and at Bhom-parānden in Hyderabad.

On the Full Moon of Śrāvana there is in the afternoon a ceremony called Raksābandhana (tying the protective amulet). It is described by Hemādri on vrata, vol. II. pp. 190–195, N. S. p 121, P.C. 284–285, Vratārka (folio 335a–336a) One should at sunrise on Full Moon of Śrāvana and after offering tarpana to gods, sages and pitrs, get prepared a protective packet (or amulet) containing whole rice grains and mustard and deco-

rated with gold (thread) and strung together with variously coloured threads and have such an amulet tied In the case of a king, a jar should be placed on a square raised in the palace and the king should occupy his seat together with his ministers, he should be surrounded by courtesans and music and benedictory words should go forth; gods, brāhmanas and arms should be first honoured, then the royal[326] priest should tie the amulet to the accompaniment of the mantra. 'I tie on you that whereby Bali, the very powerful king of demons, was bound; O protective (amulet), don't slip off, don't slip off' All including śūdras and other human beings should get the amulet tied after honouring priests according to ability When this is done, a man lives on happily for a year. Hemādri quotes Bhavisyottara for the story that Indrāni tied on the right hand of Indra a protective amulet whereby he was enabled to vanquish the *asuras* This tying should not be done when paurnimā is mixed up with either 14th or the following pratipad It may, in order to avoid these two, be done even at night

This ceremony of tying an amulet on the right wrist is still in vogue and priests go about tying these amulets and receive some fee for doing so Mukerji (p 81) is unduly harsh on the poor brāhmanas when he says that it is a day of blackmail by the priests Women in Gujarat and some other places tie silken amulets round the wrists of their brothers and give and receive presents

On the Full Moon day of Śrāvana it is usual on the sea coast of western India (particularly in Konkan and Malabar) not only for Hindus, but also for Moslems and Parsis of the merchant class to go to the sea and offer flowers and a cocoanut to the sea. The sea becomes less rough and the violence of the monsoon winds abates after the Full Moon of Śrāvana and the cocoanut is offered to the sea god (Varuna) in order that he may make sea voyage for vessels of merchandise safe

In Śrāvana on the 8th of the dark half is celebrated the Krsnajanmāstami or Janmāstami vrata and festival, which is probably the most important vrata and utsava celebrated throughout the whole of India

In some Purāṇa passages it is declared that Janmāstamī is celebrated on the 8th of the dark half of Bhādrapada. The explanation is that in those passages the months are Pūrnimānta and the dark half is in these months the first paksa.[327] The Padma (III 13), Matsya 56, Agni 183 contain numerous verses on the greatness (māhātmya) of Kṛṣnajanmāstamī.

It would not be out of place to say a few words about Krsna and about the antiquity of Krsna worship. There is a reference in the Chāndogya-upanisad (III. 17. 6) to Krsna Devakīputra receiving instruction from Ghora Āngirasa. There was a Vedic poet named Krsna who calls upon the Aśvins to listen to his invocation in Ṛg. VIII. 85. 3 and the Anukramanī assigns Ṛg. VIII. 86–87 to Krsna Āngirasa. Jain tradition regards Krsna as contemporaneous with Nemi, the 22nd Tīrthankara, and from the account of the 63 great men of Jain pre-history about one third are shown as associated with Krsna. The life of Krsna as gathered from the Mahābhārata is a composite one. In some passages he is depicted as a Yādava prince, the staunchest friend of the Pāndavas[328] (and particularly of Arjuna), as a great warrior, statesman and philosopher. In other passages he is identified with the Supreme Lord of the worlds and as Visnu Himself (Śānti 47. 28, Drona 146. 67–68, Karna 87. 74, Vanaparva 49. 20, Bhīsma 21. 13–15). There are most sublime praises of Krsna put in the mouths of Yudhisthira (Drona 149. 16–33), Draupadī (Vanaparva 263. 8–16) and Bhīsma when about to die (Anuśāsana 167. 37–45). We have further information about him from the Harivaṁśa, the Visnupurāna, Vāyu (98. 100–102), the Bhāgavata and Brahmavaivarta that deal with Krsna's romantic career among cowherds, which is wanting in the Mahābhārata.

It appears from Pāṇini (IV. 3 98)[329] that there were people in his day described as Vāsudevaka and Arjunaka that were devoted to Vāsudeva and Arjuna Patañjali in his Mahābhāsya mentions several persons and incidents connected with Krsna. On Vārtika 6 to Pān. III. 1. 26 the Mahābhāsya gives two examples 'Kamsam ghātayati' (meaning 'he tells the story of the slaughter of Kamsa') and 'Balim bhandhayati' (meaning 'he narrates the story of the imprisonment of Bali') In Vārtika 2 to Pān. III. 1. 138 the word 'Govinda' is derived (from go + vinda). On Vārtika 2 to Pān III 2 111 Patañjali gives the example 'Jaghāna Kamsam kila Vāsudevah' (Vāsudeva, they say, killed Kamsa) and implies that the incident occurred long ago which the speaker could not have seen but was popularly known[330] This is a quarter of an Upendravajrā or Upajāti verse. Patañjali names Satyabhāmā with its shortened form Bhāmā (Kielhorn, vol. I. p 111), the words 'Vāsudevavargyah' and 'Akrūravargyah' occur (on Vārtika 11 on Pān. IV. 2 104) On Pān. IV. 1 114 (rsyandhaka-vrsni-kurubhyaś-ca) under vārtika 7 Patañjali mentions Ugrasena as a scion of the Andhakas and Vāsudeva and Bāladeva of the Vrsnis Patañjali quotes half of an Anustubh verse 'Saṅkarsana-dvitīyasya balam Krsnasya vardhatām' (Kielhorn's ed. vol. I. p 426). Patañjali is regarded by most modern scholars as having flourished in the 2nd century B C. (about 150 B. C) Therefore it follows that some poetic work or works that referred to incidents of Krsna's career (such as Kamsavadha) had been composed some centuries before the Christian era. Vide I A. vol. III pp 14–16 for allusions to Krsna in the Mahābhāsya and I. A vol. XIV pp 326 ff, for verse quotations in the Mahābhāsya collected by Kielhorn. In the Ādiparva (chap 1. 256)[331] and in Sabhā 33. 10–11 Krsna is identified with Vāsudeva and is said to be the Highest Brahma

329. वासुदेवार्जुनाभ्यां वुन्। पा IV 3 98 on which the महाभाष्य remarks 'अथवा नैष क्षत्रियाख्या संज्ञैषा तत्रभवत '. वासुदेव भक्ति (भक्त्य) यस्य स वासुदेवक' It may be noted that the compound word वासुदेवार्जुनाभ्या occurs in शांतिपर्व 4.31.

330 The passage about the killing of Kamsa is interesting. इदं तर्हि कथं वर्तमानकालता कंसं घातयति बलिं बन्धयतीति चिरहते कंसे चिरनद्धे च बलौ' (महाभाष्य ed. by Kielhorn, vol. II. p. 36). This shows that in the time of the महाभाष्य the killing of Kamsa (by Krsna) was supposed to have taken place in hoary antiquity. Patañjali states further on that Kamsavadha was represented dramatically, that pictures were painted about it and lastly that works had been composed narrating that event.

and the source of the universe. The Ghosundi inscription of 2nd or 1st century B C. mentions the hall of worship of Sankarsana and Vāsudeva (E I 16 pp. 25–27, E. I. 22 p. 198, I. A. vol. 61 p. 203) addressed as 'Bhagavat' and 'sarveśvara'. Nanaghat cave inscriptions of about 200 B. C mention both (A. S. W. I. vol. V pp. 60–74). The Besnagar column (Garuda-dhvaja) Vaisnava inscription[332] where the *Bhāgavata* Heliodorus, son of Diya, hailing from Taksaśilā and Yavana ambassador of king Antalikita (Antalkidas) to king Bhāgabhadra mentions Vāsudeva as '*devadeva*'. The preceding items of evidence indicate that the worship of Vāsudeva was prevalent in northern and central India from at least 500 B. C.. if not earlier. Vide R G. Bhandarkar's 'Vaisnavism, Śaivism &c.' pp. 1–45 for the various phases of the Kṛsna cult and its antiquity.

It is rather surprising that the passages quoted in the medieval works on Krsnajanmāstamī are mostly borrowed from the Bhavisya, Bhavisyottara, Skanda, Visnudharmottara, Nāradīya and Brahmavaivarta purānas, but hardly ever from the Bhāgavata-purāna which is the Veda of the Vaisnavas of later medieval and modern times. The description of Krsna's birth in the Bhāgavata is vague and commonplace. All that[333] is said there is that the time when Krsna was born was endowed with all good characteristics and was very charming, that the quarters looked very clear and the sky was lit up by bright stars, that the wind that blew was very pleasing to the skin and laden with fine fragrance and that when Janārdana was born of Devakī it was midnight and darkness had enveloped everything.

In the Bhavisyottara (44. 1–69) Krsna himself is represented as narrating to Yudhisthira the incidents of Janmāstamī-vrata: 'I was born of Vasudeva and Devakī on the 8th of Bhādrapada dark half at midnight when the Sun was in Lion (Leo), when the

Verses 2 and 4 appear to echo the words of रघुवंश III 14 'दिशः प्रसेदुर्मरुतो ववु. सुखाः'.

Moon was in the sign of the Bull (Taurus) and there was Rohiṇī naksatra' (verses 74–75), when on the 8th of the dark half of Śrāvana there is Rohiṇī-naksatra, the tithi is called Jayantī, if a man observes a fast on that tithi, that destroys his sins committed in childhood, youth, old age and many previous lives' The result is that if there be no Rohiṇī naksatra on Śrāvana dark half 8th, it is simply Janmāstamī, but when Rohiṇī is joined to dark 8th of Śrāvana it is Jayantī. The Rājamārtanda has two verses on this.[334]

The important question is whether the Janmāstamī-vrata and Jayantī-vrata are really only one vrata or whether they are two separate vratas The Kālanirnaya,[335] after a long discussion in which Mīmāmsā principles contained in Jai II. 2 23 and IV. 1. 22–24 are relied upon, arrives at the conclusion that the two are separate vratas on the grounds that the two names are different (viz Janmāstamī-vrata and Jayantīvrata), their occasions (*nimitta*) are different (the first depends only on dark Astamī, while the latter exists only if there is Rohiṇī on 8th of dark half of Śrāvana) and their characteristics are different in that in Janmāstamīvrata śāstra requires only a fast, while in Jayantīvrata the śāstra requires a fast and also gifts and the like. Besides, Janmāstamīvrata is obligatory (*nitya*), since the texts only speak of the incurring of sin if it be not performed, while Jayantīvrata is both *nitya* and *kāmya* in that the śāstras connect it with special rewards in addition to the incurring of sin by its non-observance Further, the two are separately

mentioned in the same verses.[336] Hemādri, Madanaratna, the Nirnayasindhu (p. 126) and several works hold the view that the two are different. But the N. S notes[337] that in its day people observed only Janmāstamī-vrata and not Jayantī-vrata. On the other hand the Jayantīnirnaya (p. 25) states that people generally celebrate Jayantī only (and not Janmāstamī). This variance is probably due to the fact that the two works (N. S. and J. N.) belong to the north and south of India. The Samayamayūkha[338] and Purusārthacintāmani (p. 117) very severely criticize the views of Mādhava set out above from the Kālanirnaya, one of the principal arguments in these last being that the Mīmāmsā rules relied upon by Mādhava apply to rites, but Jayantī is the name of a tithi i. e the 8th of dark half when conjoined to Rohinī. The Jayantīnirnaya of Hārīta Venkaṭanātha holds that the two are different and that both are nitya as well as kāmya (pp. 4–5 and p. 30). It further points out (p 19) that in Janmāstamīvrata tithi is the principal matter while in Jayantī it is the naksatra (Rohinī) that is principal.

Two discordant notes are struck by the Varāha-purāna and by the Harivamśa The former says[339] that Krsna was born on 12th of Āsādha bright half. According to the Harivamśa q by Hemādri and Jīmūtavāhana, the naksatra was Abhijit when Krsna was born and the muhūrta was *vijaya*[340]. It is quite

possible that these two represent some older traditions about the date of the birth of Krsna

Another important point very much canvassed in the medieval digests is about the exact tithi and time when the Janmāstamīvrata is to be celebrated The K. N (pp 215–224), Krtyatattva pp 438–444, Tithitattva pp. 47–51, Samaya-mayūkha p. 50–51, N. S pp. 128–130 and several other digests state certain conclusions about this

It is clear from almost all Purānas and other works on Janmāstamī that the principal time for the celebration of the birth of Krsna is the midnight [341] of the 8th of Śrāvana dark half (Bhādrapada dark, if the month is Pūrnimānta). This tithi is of two kinds viz (1) without Rohinī naksatra and (2) with Rohinī naksatra. In each of these two, the Kālanirnaya of Mādhava (pp 218–224), the Nirnayasindhu (pp 128–130), the Dharmasindhu (pp 64–67) and other digests set out several possible alternative combinations The Nirnayāmrta (pp 56–58) mentions as many as 18 kinds, eight of the *śuddhā* tithi, 8 of the *viddhā* tithi and two more, one being the one where Rohinī-naksatra is there at midnight and the other being Navamī joined to Rohinī and having either Wednesday or Monday. A discussion of these would be somewhat complicated and hardly otherwise than of academical interest to modern readers. Therefore, all these alternatives are not set out here. Instead, the brief conclusions put forth by the Tithitattva are given [342] by way of sample. These are: If Jayantī (Astamī with Rohinī) exists only a single day, the fast must be observed on that very day; if it spreads over two days, then the fast is on the later of the two; if there is no Jayantī, then the fast is to be observed on Astamī joined with Rohinī, if two days have Astamī joined to Rohinī, then fast is on the later of the two; if there is no Rohinī naksatra then fast is to be observed on the Astamī that exists at midnight or if astamī exists on two days at midnight or if it be not existent at midnight then on the later day.

If Jayantī fast occurs on Wednesday or Monday there are far greater results and such a fast is superior to crores of other vratas and the man who observes a fast on Jayantī conjoined to Wednesday or Monday would not be born again.[343]

The main items in Janmāstamīvrata are fast, worship of Krsna, jāgara (keeping awake at night, listening to and repeating hymns of praise and stories about Krsna's exploits), pāranā.

The medieval digests such as Tithitattva (pp. 42–47), the Samayamayūkha (pp. 52–57), Kālatattvavivecana (pp. 52–56), Vratarāja (pp 274–277), Dharmasindhu (pp 68–69) contain a lengthy procedure of Janmāstamīvrata based principally on Bhavisyottara chap. 55. A brief summary from the first two works (which agree in the main in most respects) is set out below.

On the day of the fast in the morning the devotee should invoke the presence of the Sun, Moon, Yama, Time, the two twilights, the (five) elements, Day and Night, Wind, the lord of the quarters, the earth, the sky, the denizens of aerial regions and gods.[344] He should hold in his hand a copper vessel filled with water, some fruits, flowers and whole rice-grains, refer to the month &c. and make a sankalpa 'I shall perform the Krsnāstamī-vrata, for securing a certain reward or for the removal of my sins'. He then repeats four mantras addressed to Vāsudeva, one of which is quoted below.[345] After repeating the mantras he should discharge the water in the vessel. He should construct a delivery hall for Devakī having auspicious jars full of water and mango leaves, garlands of flowers, fragrant with burnt *aguru* and

Round about the room or the walls (of the room) he should paint gods and gandharvas with folded hands, Vasudeva with a drawn sword, Devakī, Nanda, Yaśodā, gopīs, Kaṃsa's guards, the river Yamunā and the snake Kāliya therein and other incidents of Gokula as far as he could. He should place in the delivery hall a bed surrounded by screens He should take a bath with sesame in the noon in the water of a river or the like and at midnight make the saṅkalpa, 'I shall perform the worship of Kṛṣṇa with his attendants', he should make an image of Kṛṣṇa of gold or silver &c., touch the cheeks of the image and vitalize the image (prāṇa-pratiṣṭhā) with mantras He should contemplate upon Devakī (with a mantra) and on Śrīkṛṣṇa lying as an infant on the bed and offer worship to Lakṣmī, to Vasudeva and Devaki, Nanda and Yaśodā, Baladeva and Caṇḍikā with appropriate mantras for bath, for incense, naivedya &c.; he then briefly performs symbolically the ceremonies of Jātakarma, cutting the navel chord, Sasthīpūjā and nāmakaraṇa. Then at time of moonrise (at or a little after midnight) he should offer *arghya* on an altar or to (image of) the moon with Rohiṇī with water from a conch mixed with flowers, kuśas and sandalwood paste with a mantra, should bow to the moon and prostrate[346] himself with several verses containing the different names of Vāsudeva and at the end address prayers to him. Then he should keep awake the whole night in listening to the hymns of praise to Kṛṣṇa, to the stories in the Purāṇas and in songs, music and dances. Next day after performing all usual acts to be performed in the morning and again offering worship to the image of God Kṛṣṇa, he should feed brāhmaṇas and donate to them gold, cow, clothes with the words 'May Kṛṣṇa be pleased with me'. He should then repeat the mantra[347] 'salutation to him who is Brahma, who is Vāsudeva of blessed birth and beneficent to cows and brāhmaṇas and whom Devakī gave birth

from Vasudeva for the protection of Vedas spread over the earth. Let there be peace! Let there be bliss! He should then take out the image of Krsna, donate it to a brāhmana and bring the vrata to a close after performing pāranā.

The procedure in the Dharmasindhu (pp. 68-69) is more elaborate than the above, though no essential difference exists. It makes use of Vedic mantras (from Rg. X. 90. 1-16) along with Paurānika mantras, while in the Samaya-mayūkha and Tithitattva no Vedic mantra is expressly mentioned. As regards *jāgara* the Dharmasindhu provides that the stories[348] about Krsna may be made striking by reciting poems composed in regional languages, that Vedic hymns may have at their end Paurānika stories recited, that visual representations (such as dances) may be resorted to, that this is a procedure meant for the three higher varnas, but in the case of śūdras it is not proper to follow the same procedure; they should omit Vedic hymns but may engage in music and Paurānika recitations.

One question often raised in some of the medieval digests on Dharmaśāstra is: what is the principal matter in Janmāstamī-vrata. Some held that both fast (upavāsa) and worship (pūjā) are principal and they rely on a Bhavisyapurāna[349] passage 'when at midnight on the 8th of the dark half there is Rohini, worship of Krsna destroys sins committed in three lives; a man observing a fast then and performing worship of Hari does not sink'. The Samayamayūkha, after an elaborate discussion in which Mīmāmsā doctrines such as those in Jai. I. 4. 1-3 are employed, arrives at the conclusion that the fast is only an auxiliary (*anga*), while worship (pūjā) is the principal thing. On the other hand the Tithitattva[350] relying on the verse of the

The word 'अयोग्यत्वात्' is used because in those days śūdras were not entitled to study and recite Vedic Mantras

Bhavisya opening the description of the vrata 'On that day one should accept the restrictions of upavāsa' and also Mīmāmsā doctrines holds that *upavāsa* is the principal matter and pūjā is an *anga* (auxiliary matter). The *Jayantinirnaya* contained in the *Daśanirnayi* of Hārita Venkatanātha discusses at length the two (pp. 3 ff). This subject need not be pursued much further.

It has already been stated above that every vrata requires a pārana as the last item, that pārana takes place the day after the day of the fast and that it is generally performed in the morning. There are certain special rules about the pārana of Janmāstamī fast and Jayantī fast. A few dicta of the purānas may be first noted. The Brahmavaivarta[351] states 'one should never perform pārana while astamī tithi is running or Rohinī naksatra is still there on the Astamī; (if one does so) one destroys what he has done previously and the fruits acquired by the fast. A tithi destroys eight-fold, while a naksatra does so fourfold; therefore one should perform the pārana (of Janmāstamī) at the end of the tithi and naksatra'. The Nāradapurāna[352] remarks 'when a fast has to be observed on the conjunction of a tithi and naksatra, pārana should not be done until at least one of the two has ended; when a vrata falls on a conjunction (of tithi and naksatra), pārana should be done only when one of the two is separated (i e. ends)'. The Vahni-purāna provides 'pārana is commended at the end of the naksatra or at the end of the tithi'. Both the Tithitattva and the Krtyatattva[353] arrive on interpreting these and other verses at the following conclusions. 'Pārana is to be observed on the day after the fast, but after the end of the tithi (astamī) and the naksatra (Rohinī), but when one of

the two ends before *mahānišā* and the other during mahāniśā or after it, pārana should be observed at the end of one of the two; when both exist during the period of mahāniśā then one should perform pārana in the morning at the end of the festival'. At the end of the pārana the performer repeats the mantra 'salutations to Govinda, who is Being, who is the ruler of (all) beings, who is the lord of (all) beings and who is the source of all beings'.[354] The above statement shows that in certain cases the pārana of Janmāstamīvrata may be at night,[355] particularly for vaisnavas who perform the vrata as a duty and not for any reward.

There is a difference of meaning between udyāpana and pārana. Some vratas like Ekādaśī and Janmāstamī are performed throughout a man's life; in such cases there is only pārana after the fast on every occasion that a fast is observed. If a man undertakes a vrata only once and finishes it, then the concluding rites of the vrata are called *udyāpana*.

Besides the items mentioned above, it is the practice, particularly of boys and common people in Mahārāstra, to hang up pots full of curds and buttermilk on the day after the birth of Krsna is celebrated, to play underneath the pot, sing songs and then pierce the pot and get drenched by curds and buttermilk running out from the holes made. This is probably due to the legends associated with Krsna's boyhood among cowherds. The Bhāgavata[356] expressly says that the cowherds sprinkled each other on Krsna's birth with curds, milk, ghee, and smeared each other with these. This is called 'Gopālakālā in Mahārāstra. But this is not observed in other parts of India such as Saurāstra. Surprisingly enough the Krsnajanmāstamī festival does not, like the Rāmanavamī festival, figure in the Krtyakalpataru on vrata. One cannot account for this omission.

But in the Naiyatakāla section[357] of the same work, a brief procedure of Kṛṣṇajanmāṣṭamī (which is word for word the same in the Kṛtyaratnākara) different from the one specified above from the Tithitattva and other works, is set out It is as follows: On the 8th of the dark half of Bhādrapada was born in Kaliyuga in the 28th (kalpa?), Kṛṣṇa, son of Devakī, for removing the burden (of the earth) and the reduction of kṣatriyas. He (his image) should therefore be worshipped on that day, as also (of) Devakī and Yaśodā with sandalwood paste, flowers, incense, various fruits and foods and dishes prepared from barley and wheat together with cow's milk At night the devotee should keep awake with songs and dances Then on the 9th about the time of *arunodaya* (4 ghaṭikās before sunrise) women dressed in red clothes and decked with garlands of flowers should carry the images of these (Kṛṣṇa, Devakī and Yaśodā) to a holy river bank or to a charming and unfrequented lake, wherein they should themselves take their bath and also bathe the images; then returning home they should eat a meal of barley together with jaggery, honey, ghee and black pepper.

Before closing this account of Janmāṣṭamī reference must be made to a paper read in 1867 before the Berlin Akademie der Wissenschaften by the renowned German scholar, Prof. A Weber. The subject of the paper was 'An investigation into the origin of the festival of Kṛṣṇajanmāṣṭamī' and the paper was divided into four parts; the first dealt with the sources (an English translation of it by E. Rehatsek was published in Indian Antiquary vol. VI. pp. 161–180 and pp. 281–301), the 2nd dealt with ritual, the 3rd part was the most important and was concerned with a novel theory, viz the ritual of Kṛṣṇāṣṭamī festival was something transferred from outside of India, that the description in the ritual of Kṛṣṇa's image as suckling at the mother's (Devakī's) breast was the keystone of the theory of this ritual as of foreign origin and that it was suggested by pictorial representations of the Madonna with a suckling child (Christ)

&c. An English translation of this part appeared in Indian Antiquary, vol. III. pp. 21–25 and pp. 47–52. This paper, though it is a monument of learning and patient industry (for that period when very few Sanskrit books had been printed), gave rise to severe criticism owing to its fantastic and perverse conclusion about Krsnajanmāstamī ritual being borrowed from Christian representations of Christ and his mother Mary. In I. A. vol. III. p. 300 Growse attacked it very severely. In spite of all criticisms the tenacious German scholar stuck to his guns and launched an attack against his critics, particularly against Dr. Rajendralal Mitra, in I. A. vol IX. pp. 226–229. As hardly any Sanskrit scholar in these days would espouse the theory put forward by Weber, I do not think that I should waste much time over a refutation thereof. Most European scholars, nurtured on the vaunted intellectual eminence of the ancient Greeks and on the intolerant attitude of christianity towards other faiths, when they became acquainted with things Indian and studied Sanskrit, were obsessed (though not very obviously expressed) by two notions, viz. much in India that resembled what prevailed in the West must have been borrowed from the West and further, that Indians, who had allowed themselves to be invaded by outsiders and governed by foreigners for centuries, must not have been good at anything. These two notions gave rise to many untenable theories such as the following: the Rāmāyana was borrowed from Homer's Iliad, the art of writing was unknown to Pānini, the Brāhmī script was based on Phoenician or Aramaic script, that the Gītā was based on the Bible, that the very ancient Indian naksatra system was borrowed either from the Chinese, the Babylonians or Arabs. Most of such theories were the result of little knowledge and the non-recognition of certain common sense rules and have now been consigned to the limbo of deserved oblivion. The common sense rule is that when a thing or a state of things has existed for centuries in a certain country or among a certain people, the burden of proving that it was borrowed by that country or people from outside is very heavy on those who assert such borrowing; mere similarities can never be held to amount to any evidence of borrowing at all; scholars should be very chary of confidently asserting borrowing and should put forward their conclusions very cautiously. It would not be irrelevant to point out the main circumstances on which Weber, often a champion of lost causes, relied for his theory.

The first is that in the ritual of Krsnāstamī contained in some digests (that said that they borrowed the passage from *Bhavisyottara*) the image of Krsna was to be shown [358] as suckling at the breast of Devakī, that this is a unique direction, that in the Rāmanavamī festival which is similar to Janmāstamī the image of Rāma is not required to be suckling at the breast of Kausalyā, that this detail was copied from the representation of the *Madonna Lactans*. Weber relied (vide I. A. vol. III p. 51) on one De Bossi who said that pictures of infant Christ at the breast existed in 2nd century A. D. Weber brushed aside the testimony of other scholars that the Madonna with the child was a subject little known to the early christian centuries and the opinion of other scholars that the representations of the Madonna Lactans are extremely rare in Byzantine and Russian art (I A. vol III p 48) and almost always of very late date. Weber makes a mountain of a molehill. The image of Rāma is also described as lying on the lap of the mother Kausalyā.[359] Further, all purānas do not provide that the image of Krsna was to be suckling at the breast Hemādri, in describing the Jayantīvrata from the Purānas, shows that the image was to be on the lap of the mother Devakī.[360] Was the Hindu imagination so poor that when they could describe the image of Rāma or Krsna as lying on the mother's lap they could not also imagine that it could be shown as suckling at the breast and had to run to the West to copy that detail from representations of the Madonna and the child thousands of miles away?

The 2nd point made much of by Weber was that Nārada is represented as having brought from Śveta-dvīpa (white land) the doctrine of salvation by faith. Weber holds that Śvetadvīpa was Alexandria, while Lassen holds that it was Parthia If we read the description of Śvetadvīpa in the Śāntiparva (chapters

336–339) and in such Purānas[361] as Vāmana (chap. 25.16 and 60. 56) and Kūrma (I. 49) it would be clear that Śvetadvīpa was an imaginary or mythical place where everything was white, where Visnu and the gods dwelt and that it had no earthly existence at least in the minds of the authors who wrote the above works.

The third important point according to Weber was that certain incidents in Krsna's life such as Kāliya-mardana are similar to those in Christianity. Weber himself says that victory over Kāliya is a travesty of the christian tradition of the serpent. It appears to me that there is nothing common between the two except the word serpent.

CHAPTER VIII

Vratas of Haritālikā, Gaṇeśacaturthī, Ṛṣipañcamī, Anantacaturdaśī.

On the 3rd tithi of the bright half of Bhādrapada occurs the Haritālikāvrata for women alone. This vrata is not found in the Kṛtyakalpataru on vrata or in Hemādri. It is described only in the later medieval digests like the Nirnayasindhu (p. 133), Vratārka (folios 44 b–49 b), Vratarāja (pp. 103–110) and Ahalyākāmadhenu (folios 282–295). It may, however, be noted that the Rājamārtaṇḍa of Bhoja (first half of 11th century A.D.) devotes four verses to Haritālicaturthī on Bhādrapada 4th of bright half and says it is dear to Pārvatī (two of them are quoted below in note).[362] It is very much in vogue among Mahārāstra women. The following is a brief description. The woman should take an oil and myrobalan paste bath and wear fine silken clothes. After referring to the tithi &c the woman should make saṅkalpa as noted below.[363] She should bow to Umā and Śiva; she should offer worship to Umā by means of the 16 upacāras with appropriate mantras such as āvāhana (invoking to be present), āsana (seat), pādya, arghya &c. After offering flowers the performer should carry out worship of the limbs of Umā from the feet in the form 'bow to Umā, I worship her feet' to the head. Then she should offer incense, lamp, naivedya, *ācamanīya*, fragrant substances like camphor and sandalwood for rubbing on the hands, betelnut, *tāmbūla*, dakṣiṇā, ornaments, *nīrājana* (waving of a lamp). She should then offer worship to the several names of Umā (such as Gaurī, Pārvatī &c.) and the several names of Śiva (such as Hara, Mahādeva, Śambhu &c.) and present a handful of flowers, and go round (pradakṣiṇā) the images of Umā and Maheśvara, make with an appropriate mantra in each

from Vasudeva for the protection of Vedas spread over the earth. Let there be peace! Let there be bliss! He should then take out the image of Krsna, donate it to a brāhmana and bring the vrata to a close after performing pāranā.

The procedure in the Dharmasindhu (pp. 68–69) is more elaborate than the above, though no essential difference exists. It makes use of Vedic mantras (from Rg. X. 90. 1–16) along with Paurānika mantras, while in the Samaya-mayūkha and Tithitattva no Vedic mantra is expressly mentioned. As regards *jāgara* the Dharmasindhu provides that the stories[348] about Krsna may be made striking by reciting poems composed in regional languages, that Vedic hymns may have at their end Paurānika stories recited, that visual representations (such as dances) may be resorted to, that this is a procedure meant for the three higher varnas, but in the case of śūdras it is not proper to follow the same procedure; they should omit Vedic hymns but may engage in music and Paurānika recitations.

One question often raised in some of the medieval digests on Dharmaśāstra is: what is the principal matter in Janmāstamī-vrata. Some held that both fast (upavāsa) and worship (pūjā) are principal and they rely on a Bhavisyapurāna[349] passage 'when at midnight on the 8th of the dark half there is Rohini, worship of Krsna destroys sins committed in three lives; a man observing a fast then and performing worship of Hari does not sink'. The Samayamayūkha, after an elaborate discussion in which Mīmāmsā doctrines such as those in Jai. I. 4. 1–3 are employed, arrives at the conclusion that the fast is only an auxiliary (*anga*), while worship (pūjā) is the principal thing. On the other hand the Tithitattva[350] relying on the verse of the

Bhavisya opening the description of the vrata 'On that day one should accept the restrictions of upavāsa' and also Mīmāmsā doctrines holds that *upavāsa* is the principal matter and pūjā is an *anga* (auxiliary matter) The Jayantinirnaya contained in the Daśanirnayī of Hārita Venkatanātha discusses at length the two (pp. 3 ff) This subject need not be pursued much further.

It has already been stated above that every vrata requires a pārana as the last item, that pārana takes place the day after the day of the fast and that it is generally performed in the morning. There are certain special rules about the pārana of Janmāstamī fast and Jayantī fast. A few dicta of the purānas may be first noted The Brahmavaivarta[351] states 'one should never perform pārana while astamī tithi is running or Rohinī naksatra is still there on the Astamī; (if one does so) one destroys what he has done previously and the fruits acquired by the fast. A tithi destroys eight-fold, while a naksatra does so fourfold; therefore one should perform the pārana (of Janmāstamī) at the end of the tithi and naksatra'. The Nāradapurāna[352] remarks 'when a fast has to be observed on the conjunction of a tithi and naksatra, pārana should not be done until at least one of the two has ended; when a vrata falls on a conjunction (of tithi and naksatra), pārana should be done only when one of the two is separated (*i e. ends*)'. The Vahni-purāna provides 'pārana is commended at the end of the naksatra or at the end of the tithi'. Both the Tithitattva and the Krtyatattva[353] arrive on interpreting these and other verses at the following conclusions 'Pārana is to be observed on the day after the fast, but after the end of the tithi (astamī) and the naksatra (Rohinī); but when one of

the two ends before *mahāniśā* and the other during mahāniśā or after it, pārana should be observed at the end of one of the two; when both exist during the period of mahāniśā then one should perform pārana in the morning at the end of the festival'. At the end of the pārana the performer repeats the mantra 'salutations to Govinda, who is Being, who is the ruler of (all) beings, who is the lord of (all) beings and who is the source of all beings'.[354] The above statement shows that in certain cases the pārana of Janmāstamīvrata may be at night,[355] particularly for vaisnavas who perform the vrata as a duty and not for any reward.

There is a difference of meaning between udyāpana and pārana. Some vratas like Ekādaśī and Janmāstamī are performed throughout a man's life; in such cases there is only pārana after the fast on every occasion that a fast is observed. If a man undertakes a vrata only once and finishes it, then the concluding rites of the vrata are called *udyāpana.*

Besides the items mentioned above, it is the practice, particularly of boys and common people in Mahārāstra, to hang up pots full of curds and buttermilk on the day after the birth of Krsna is celebrated, to play underneath the pot, sing songs and then pierce the pot and get drenched by curds and buttermilk running out from the holes made. This is probably due to the legends associated with Krsna's boyhood among cowherds The Bhāgavata[356] expressly says that the cowherds sprinkled each other on Krsna's birth with curds, milk, ghee, and smeared each other with these. This is called 'Gopālakālā in Mahārāstra. But this is not observed in other parts of India such as Saurāstra. Surprisingly enough the Krsnajanmāstamī festival does not, like the Rāmanavamī festival, figure in the Krtyakalpataru on vrata. One cannot account for this omission.

But *in the Naiyatakāla section*[357] of the same work, a brief procedure of Kṛṣṇajanmāṣṭamī (which is word for word the same in the Kṛtyaratnākara) different from the one specified above from the Tithitattva and other works, is set out. It is as follows: On the 8th of the dark half of Bhādrapada was born in Kaliyuga in the 28th (kalpa?), Kṛṣṇa, son of Devakī, for removing the burden (of the earth) and the reduction of kṣatriyas. He (his image) should therefore be worshipped on that day, as also (of) Devakī and Yaśodā with sandalwood paste, flowers, incense, various fruits and foods and dishes prepared from barley and wheat together with cow's milk. At night the devotee should keep awake with songs and dances. Then on the 9th about the time of *arunodaya* (4 ghaṭikās before sunrise) women dressed in red clothes and decked with garlands of flowers should carry the images of these (Kṛṣṇa, Devakī and Yaśodā) to a holy river bank or to a charming and unfrequented lake, wherein they should themselves take their bath and also bathe the images; then returning home they should eat a meal of barley together with jaggery, honey, ghee and black pepper.

Before closing this account of Janmāṣṭamī reference must be made to a paper read in 1867 before the Berlin Akademie der Wissenschaften by the renowned German scholar, Prof A Weber. The subject of the paper was 'An investigation into the origin of the festival of Kṛṣṇajanmāṣṭamī' and the paper was divided into four parts, the first dealt with the sources (an English translation of it by E. Rehatsek was published in Indian Antiquary vol VI. pp. 161–180 and pp. 281–301), the 2nd dealt with ritual, the 3rd part was the most important and was concerned with a novel theory, viz the ritual of Kṛṣṇāṣṭamī festival was something transferred from outside of India, that the description in the ritual of Kṛṣṇa's image as suckling at the mother's (Devakī's) breast was the keystone of the theory of this ritual as of foreign origin and that it was suggested by pictorial representations of the Madonna with a suckling child (Christ)

336–339) and in such Purānas[361] as Vāmana (chap. 25.16 and 60. 56) and Kūrma (I. 49) it would be clear that Śvetadvīpa was an imaginary or mythical place where everything was white, where Visnu and the gods dwelt and that it had no earthly existence at least in the minds of the authors who wrote the above works.

The third important point according to Weber was that certain incidents in Krsna's life such as Kāliya-mardana are similar to those in Christianity. Weber himself says that victory over Kāliya is a travesty of the christian tradition of the serpent. It appears to me that there is nothing common between the two except the word serpent

CHAPTER VIII

Vratas of Haritālikā, Gaṇeśacaturthī, Ṛṣipañcamī, Anantacaturdaśī.

On the 3rd tithi of the bright half of Bhādrapada occurs the Haritālikāvrata for women alone. This vrata is not found in the Kṛtyakalpataru on vrata or in Hemādri It is described only in the later medieval digests like the Nirnayasindhu (p 133), Vratārka (folios 44 b–49 b), Vratarāja (pp. 103–110) and Ahalyākāmadhenu (folios 282–295). It may, however, be noted that the Rājamārtanda of Bhoja (first half of 11th century A D.) devotes four verses to Haritālicaturthi on Bhādrapada 4th of bright half and says it is dear to Pārvati (two of them are quoted below in note)[362] It is very much in vogue among Mahārāstra women. The following is a brief description The woman should take an oil and myrobalan paste bath and wear fine silken clothes. After referring to the tithi &c the woman should make sankalpa as noted below.[363] She should bow to Umā and Śiva; she should offer worship to Umā by means of the 16 upacāras with appropriate mantras such as āvāhana (invoking to be present), āsana (seat), pādya, arghya &c. After offering flowers the performer should carry out worship of the limbs of Umā from the feet in the form 'bow to Umā, I worship her feet' to the head Then she should offer incense, lamp, naivedya, *ācamaniya*, fragrant substances like camphor and sandalwood for rubbing on the hands, betelnut, *tāmbūla*, daksinā, ornaments, *nīrājana* (waving of a lamp). She should then offer worship to the several names of Umā (such as Gaurī, Pārvati &c) and the several names of Śiva (such as Hara, Mahādeva, Śambhu &c.) and present a handful of flowers, and go round (pradaksinā) the images of Umā and Maheśvara, make with an appropriate mantra in each

case an obeisance[364] and a prayer and donate presents placed in vessels of wickerwork together with auspicious substances.

This vrata is not prevalent in Bengal nor in Gujarat.

It is provided by Mādhava that[365] if the third is mixed up with the 2nd tithi and the 4th tithi, the vrata is to be performed on the later day, provided the third tithi exists at least for a muhūrta (two ghatikās) and then 4th tithi follows.

In modern times women purchase coloured clay images of Pārvatī, of Śivalinga and a friend of Pārvatī and worship them.

It is difficult to say why the vrata is called Haritālikā. The Vrataraja[366] (p. 108) says it is vrataraja (the prince among vratas) and was so called because Pārvatī was taken away (from home) by her friends.

The Vrataraja contains a story said to have been narrated by Śiva himself to Pārvatī about the vrata by performing which she secured him as her husband and also the position of being half of Śiva's body. The Varāhapurāna (chap. 22) contains a long narrative about the marriage of Gaurī with Śiva.

On the 4th of the bright half of Bhādrapada is observed the festival of Ganeśacaturthī in many parts of India (though not in Bengal or Gujarat). According to the Samayamayūkha,[367] Ganeśacaturthī is also called Varadacaturthī. The proper time for the performance is mid-day, as said by Brhaspati[368] quoted in the Kālanirnaya. When Caturthī-tithi is mixed up with the

ever knows this story about the clearance of Krsna from a false charge would not be liable to have a false charge made against him by any one The *Tithitattva*[376] provides that if a man inadvertently sees the moon on the night of the 4th in Bhādra (sukla) he should repeat the verse of the nurse quoted above over some water, drink it and should listen to the story of the Syamantaka jewel

When Ganeśa is worshipped on Bhādra 4th of bright half, that tithi is called, according to Bhavisya, Śivā, when Ganeśa is honoured on Māgha-śukla 4 it is called Śāntā, and when on the 4th of the bright half the weekday is Tuesday that caturthi is called Sukhā. The three[377] are respectively described in Hemādri (vrata) vol. I pp. 512–513, pp 513–514 and pp 515–519.

In modern times the worship of Ganeśa lasts for one day and a half, for two days, 5 days, 7 days or till Anantacaturdaśi (14th of bright half of Bhādra), according to the usages of the people, their inclinations and their tastes The image is then immersed in a well, tank or in the sea in a great procession. In certain parts of the Deccan and among common people it is customary to perform Gauripūjā on 7th and 8th of Bhādrapada-śukla and immerse Gauri (represented by a sheaf of plants) and Ganeśa image on the same day and at the same time on 9th.

Ganeśa is the most popular god in these days and it is the practice to invoke him at the beginning of every important undertaking or rite He is the God of wisdom, the presiding deity of literature, the bestower of success and the destroyer of obstacles

About the antiquity of Ganeśa worship and of images of Ganeśa a good deal has been said in *H. of Dh* vol II. pp 213–216 and 725 A few matters not mentioned there may be set out here The Brahmavaivarta-purāna has a section called Ganeśa-khanda (in 46 chapters), wherein several legends about Ganesa are dwelt upon. The Ganapatyatharvaśirsa[378], imitating the

style of such ancient Upanisads as the Taittirīya, Brhadāranyaka and Chāndogya, identifies Ganapati with the Highest Brahma. The Ahalyākāmadhenu quotes passages from Bhavisyottara-purāna on Ganeśacaturthī In I. A. vol 35 p. 60 an archaeological and mystic explanation is offered about the mouse being the conveyance of Ganeśa and his elephant head, which is fantastic and hardly convincing. Several legends are told about Ganeśa, his elephant head, his single tusk Vide Mukerji p 9 One of the most fantastic is the one in the Varāhapurāna (chap 23) where it is said that from the laugh of Śiva sprang a very handsome boy whom Pārvatī looked at with admiring eyes when Śiva's jealousy was roused and he cursed the boy to be elephant-headed and pot-bellied and then be relented and made him the chief of all Vināyakas.

The Krtykalpataru (on vrata) pp. 84–87 quotes a passage from the Narasimha-purāna[379] (chap 26. 2–20) about Ganeśacaturthī-vrata, which also occurs among several vratas about Ganeśa set out in Hemādri (on vrata vol. I pp 510–512) It differs considerably from the celebration of Ganeśacaturthī described above. A few important points are stated here Ganeśa is described as having one, two or four tusks and as having four arms. It is further stated that Ganeśa causes obstacles (*vighna*) if not worshipped at the beginning of every undertaking. Ganeśa assumed the form of an elephant for effecting the purposes of gods and thereby frightened all *dānavas*.

On the 5th tithi of the bright half of Bhādrapada occurs the Rsipañcamī-vrata. It was meant for men of all varnas but is now mostly practised by women. Hemādri (on vrata, vol. I. pp 568–572) describes the vrata at length quoting from the Brahmānda-purāna. One should, after bathing in a river or the like and after performing his daily duties, repair to his *agnihotra* shed, should bathe with Pañcāmrta the images of the seven sages and, anointing them with sandalwood paste and camphor, worship them with flowers, fragrant substances, incense, lamp, white clothes and yajñopavītas and sumptuous naivedya and offer

them arghya[380] with the mantra noted below. One should, when engaged in this vrata, subsist on vegetables alone and observe celibacy. The result is freedom from all sins and from troubles of three kinds[381] and the increase of one's good fortune. If a woman performs this vrata she enjoys happiness, becomes endowed with good bodily form, beauty and sons and grandsons

Later mediæval digests like the Vratārka (folio 90), Vratarāja (pp. 200–206) add details and a story from Bhavisyottara narrated to Yudhisthira by Krsna. The sin of Brahmahatyā (brāhmana-murder), of which Indra became guilty by killing Vrtra, son of Tvastr, was distributed in four places viz in Agni (the first flames mixed with smoke), rivers (turbid in the rains), mountains (on which trees exuding sticky gum grow) and among women (in their monthly illness). Therefore this vrata should be performed particularly by women for getting rid of the sin of contact during their monthly illness

The sankalpa is given below[381a] Another detail is that the seven sages together with Arundhatī are to be worshipped It is further provided that one should subsist on vegetables[382] or *nīvāras* or śyāmāka grains or bulbous roots or fruits and should not eat anything produced by ploughing the land Even in these days those who perform this vrata do not eat corn produced by employing oxen. In modern times if men perform the vrata the priest invokes for them seven sages with Vedic mantras viz. Rg. IX 114. 2 (for Kasyapa), Rg V. 78. 4 (for Atri), Rg. VI 25 9

The mantra for Arundhatī is quoted below[383] In this vrata the number seven is important. The vrata is to be performed for seven years, there are to be seven jars, seven brāhmanas were to be invited to whom finally the images (made of gold or silver) of the seven sages were to be donated If all the images were placed in one *kalaśa*, then the jar with the images was to be donated to one brāhmana and the others were to be given kalaśas with clothes and daksinā.

If pañcamī is mixed up with the 4th tithi and the 6th tithi, one must perform the Ṛsipañcamī vrata on the 5th mixed with the 4th (pūrvaviddhā) and not on 5th mixed with 6th, in accordance with the *Yugmavākya* quoted above (n 191) Besides, Hārīta expressly[384] prohibits the acceptance of the 5th mixed with the 6th in the words (5th tithi mixed with the 4th should be accepted and not the 5th joined to the 6th, both in the bright and dark halves and in rites for the gods and *pitrs*). But there is the most important rule laid down by Hārīta himself that in all vratas comprising worship the tithi to be selected is the one that covers mid-day.[385] Supposing that the 5th tithi does not cover mid-day when joined with 4th, but covers mid-day when joined with 6th, the latter (paraviddhā) would have to be chosen. Hemādrī would hold this latter view, while Mādhava holds that everywhere 5th which is pūrvaviddhā is to be accepted. Hence there is divergence of view among the great writers.

It appears that originally the Ṛsipañcamī-vrata was meant for the removal of sins for all, but later on it came to be specially provided for women; but it is not observed in Saurāstra

On the 14th of the bright half of Bhādrapada is celebrated the Anantacaturdaśī-vrata. It does not appear in the Krtyakalpataru (on vrata).

It consists chiefly in the worship of Hari as Ananta and in wearing on the the right hand in the case of men and on the left

in the case of women a holy strap of thread dyed with saffron made of cotton or silk twisted into fourteen knots. It is an individual pūjā and not a festival of a socio-religious character. The Agnipurāna (chap. 192, verses 7–10) gives a brief description as follows. On the 14th of the bright half one should worship the image of Ananta (Hari) which is made of darbha grass placed in a vessel for water (a jar) He should get ready flour of a *prastha* of paddy and make cakes from that, half of which should be donated to a brāhmana and the remaining half he should use for himself One should perform this vrata on the bank of a river and listen to stories about Hari and (pray to Hari) as follows.[386] O Vāsudeva! save (people) sunk in the great and endless ocean of *samsāra* and make them apply themselves to the contemplation of the form of Ananta, salutation to thee that hast numerous forms! Having worshipped (Hari) with this mantra and having tied on one's arm or round one's neck a string of threads over which a mantra has been uttered, the person who performs the Anantavrata becomes happy If Hari is Ananta, then fourteen knots may be deemed to symbolize the fourteen worlds created by Hari

Hemādri (on vrata vol. II pp 26–36) has an elaborate description of Anantavrata together with the story of Kaundinya and his wife Śīlā told by Krsna to Yudhisthira. Krsna states that Ananta is one of his forms and identifies himself with Kāla (Time) that is called Ananta. Ananta should be worshipped with the *upacāras* of sandalwood paste, incense, flowers, naivedya

In front of (the image of) Ananta should be placed a *doraka* dyed with saffron and having fourteen knots The mantra (quoted in note) should be recited and the doraka should be tied on one's arm, one should then dine with an easy mind after contemplating on Nārāyana as Ananta In the story it is narrated how because the husband Kaundinya from youthful rashness and pride cut the Ananta thread tied round his wife's hand he lost everything, then repented and was taken into favour by Ananta The V K. K. (pp 324–339) describes at great length the procedure of Anantapūjā together with stories taken

from the Bhavisyottara, and the Tithitattva also (p. 123) quotes portions from the Bhavisyottara The Kālanirnaya (p. 279) expressly states that the Anantavrata is described in the Bhavisyottara and discusses a few verses therefrom. The Vratārka (folio 277a–285a) describes this vrata at great length. Briefly it is this: first sankalpa, then making a *sarvato-bhadra maṇḍala* and placing a jar thereon, on which is placed a *nāga* with seven hoods made of darbhas and in front of it a *doraka* with 14 knots, worshipping the doraka on the jar with 16 upacāras with the Purusasūkta (Rg. X. 90) and Paurānika mantras; 14 devatās of the knots from Visnu to Vasus are invoked, then there is worship of the limbs from the feet upwards in such mantras as 'Anantāya namah pādau pūjayāmi,' then a handful of flowers with the mantras of Visnu, prayer to Ananta, tying the doraka with a mantra, casting away the old doraka after offering it worship. Salt is forbidden in this vrata. It was[387] believed that if this vrata was performed for fourteen years, one reached the world of Visnu.

There is a variance in the views of eminent writers about the exact time and the tithi for the vrata when 14th is mixed with other tithis (13th or Paurnimā). Mādhava[388] holds that mid-day is not the *karmakāla* in this vrata, but that tithi which exists at sunrise for three *muhūrtas* is the most suitable one for Ananta-vrata. The Nirnayasindhu holds[389] that Madhava was mistaken because he relied for his decision on a general rule that the principal tithi to be accepted is the one that covers mid-day, that the Anantavrata is not mentioned in other purānas and also in other digests and that the passages of the Bhavisya and Skanda quoted by others are baseless and unauthoritative.

There are even in these days many persons who engage in the Anantacaturdaśī-vrata, but their numbers are rapidly diminishing.

CHAPTER IX

Navarātra or Durgotsava

From the 1st of Āśvina bright half to the 9th is celebrated the Durgāpūjā festival, otherwise called Navarātra, observed all over India in some form or other. Some of the works[390] provide that Durgotsava must be celebrated in both Śarad (Āśvina-śukla) and Vasanta (in Caitra-śukla). But it is the Durgotsava[391] of Āśvina that is celebrated in a grand style, particularly in Bengal, Bihar and Kāmarūpa

If a person is unable to celebrate the festival[392] for nine days, he should do so for three days beginning from the 7th tithi of Āśvina-śukla In fact, the Tithitattva[393] puts forward several alternative periods for Durgāpūjā as follows: (1) from the 9th tithi of the preceding dark half of Pūrnimānta Āśvina to the 9th tithi of Aśvina-śukla; (2) from the first tithi of Āśvina śukla to 9th; (3) from the 6th to the 9th; (4) from the 7th to the 9th; (5) from the Mahāstamī to the 9th, (6) only on the Mahāstamī; (7) only on the Mahānavamī. Most of these alternatives find support in the Kālikā and other Purānas

There is a voluminous literature on Durgotsava. Every digest on vratas, tithis and pūjā devotes considerable space to this subject. Moreover, there are special treatises on Durgotsava or Navarātra, such as the Durgotsavaviveka of Śūlapāni, the Durgāpūjā-prayogatattva (published by the Sanskrit Sāhity Parishad, 1924) of which the Durgārcanapaddhati of Raghunandana (published by Jīvananda, vol. II) is a part, Durgābhaktitaranginī of Vidyāpati,[394] the Navarātra-pradīpa of Vināyaka *alias* Nanda-pandita, the Durgotsavapaddhati by Udayasimha (2nd half of 15th century A. D.).[395] Besides these, the Mārkandeyapurāna (chapters 78–90 in Venk. Press ed. and 81–93 in Banerji's) contains what is called Devīmāhātmya[396] (or Saptaśatī or Candī) in which are described the appearance of Devī from the accumulated *tejas* of Visnu, Śankara, Agni and other gods, her getting different weapons from the several gods such as the trident from Śiva, discus from Visnu, Vajra from Indra, her victory over and slaughter of the

396. Modern scholars generally hold that the Devīmāhātmya, of which the oldest known ms is dated in 998 A. D (as stated in Winternitz's 'History of Indian Literature, English Translation, 1927, p. 565 note 2) was later inserted in the Mārkandeyapurāna Though the Devīmāhātmya is called Saptaśatī (collection of 700 verses), the total number of verses therein is only about 573 to 590 in different mss and editions The Venk, press edition in chap. 78–90 has 589 and K. M. Banerjea's in chap. 81–93 has 573. Nāgojibhatta in his com. on सप्तशती remarks (folio 55b) 'अष्टसप्तयुक्तराणां श्लोकानां शतपञ्चकम्। प्रोक्त सप्तशतीस्तोत्रं तत्सप्तशतसंख्यया॥'. The number 700 is made up by looking upon words like उवाच as मन्त्रs and half verses as full verses and so on. The 13 chapters are divided into three parts, chap. I being प्रथमचरित, chap 2–4 being मध्यमचरित and 5–13 being उत्तमचरित The 77 or 78 verses of the 1st chapter (प्रथमचरित) are made into 104 mantras viz. उवाचमन्त्राः 14, अर्धमन्त्राः 24, श्लोकमन्त्राः 66. The सप्तशती is treated as if it were a Vedic hymn or verse with ऋषि, metres, प्रधानदेवता, and विनियोग (for जप) 'अस्य श्रीसप्तशतीमन्त्रस्य मार्कण्डेय-ब्रह्मेन्द्र-वासुदेव-रुद्रा ऋषयः। गायत्र्युष्णिगनुष्टुप् छन्दांसि। मधुकैटभमर्दिनी—महिषासुरसेनामहिषासुरमर्दिनी — धूम्रलोचनचण्डमुण्डरक्तबीजशुम्भनिशुम्भमर्दिन्यः प्रधानदेवताः। Besides, some verses are described as कवच (armour), others as अर्गल (bolt for fastening) and still others as कीलक (pin, the inner syllables of a mantra); पठित्वा कवचं चादौ अर्गलं कीलक तथा। जपेत्सप्तशतीं चण्डीं क्रम एष शिवोदितः॥' These three (कवच, अर्गल and कीलक) are outside the देवीमाहात्म्य. The महिषासुरवध in वराहपुराण chap. 95 is to some extent different from the description in the other Purānas It appears to be the earliest Paurāṇika version of the slaughter of Mahisāsura.

great demon Mahiṣāsura, and of the demons Caṇḍa and Muṇḍa, Śumbha and Niśumbha The Kālikāpurāna, the Brhan-nandikeśvara-purāna[397] and the Devīpurāna also devote considerable space to Durgā and her pūjā I have used, though not much, the English work on Durgā-pūjā by Pratapachandra Ghosh published so far back as 1871. My endeavour will be to give as briefly as possible an account of all the salient features of this great religious worship and festival from the Sanskrit texts themselves.

This pūjā is nitya as well as kāmya;[398] it is the first because the Kālikāpurāna (63 12–13) prescribes that whoever, through laziness, hypocrisy, hatred or stupidity, does not celebrate the great festival of Durgā has all his desires frustrated by the angry Devī, it is also kāmya because rewards are promised when one celebrates Durgotsava 'all should always perform the worship of Devī in order to secure incomparable eminence which confers the puruṣārthas, viz Dharma, Artha, Kāma and Mokṣa' and 'one should worship Bhavānī for pleasing her, for happiness in that year, for the destruction of evil spirits and goblins and for delight' (Tithitattva p. 65) The original purposes and objects of this festival were high and noble as stated in the Devīpurāna[399] "This is a great and holy vrata conferring great *siddhis*, vanquishing all enemies, conferring benefits on all people, especially in great floods; this should be performed by brāhmaṇas for solemn sacrifices and by kṣatriyas for the protection of the people, by vaiśyas for cattle wealth, by śūdras desirous of sons and happiness, by women for blessed wifehood and by rich men who hanker for more wealth; this was performed by Śaṅkara and others". But in course of time, the objects were brought down to the ordinary level as stated in the Devīmāhātmya[400] 'by listening

with devotion to my greatness in the great annual pūjā performed in autumn, a man becomes free from all troubles and becomes endowed with wealth and agricultural produce by my favour'. The exaggerated importance of this Durgā-pūjā will be clear from one verse of the Bhavisya 'rites like Agnihotra, solemn sacrifices described in the Vedas and completed with daksinā are not equal even to one hundred-thousandth part of the worship of Candikā.'[401]

This Durgāpūjā is very cosmopolitan in character It could be performed not only by persons belonging to the four varnas, but even by those who were outside the pale of the caste system Durgā-pūjā has a congregational character and is not purely religious, but has also a social element in it (such as inviting friends and treating them &c). The Bhavisyapurāna[402] says 'Devī should be worshipped (in her shrine) on Vindhya mountain, in all places, cities, houses, villages and forests by brāhmanas, ksatriyas, kings, vaisyas, śūdras, who are full of devotion, who have taken a bath and who are cheerful and jolly, by *mlecchas* and other men (such as pratilomas) and by women'. In another place the Bhavisya states[403] 'Durgā is worshipped by various groups of mlecchas, by all *dasyus* (thievish tribes or outcaste Hindus), by people from Anga, Vanga and Kalinga, by kinnaras, Barbaras (non-Aryans) and Śakas'. Later medieval writers were careful to point out that mlecchas had no *adhikāra* to perform *japa* or *homa* or *pūjā* with mantras through a brāhmana as śūdras had, but they could only mentally resolve to offer in honour of Devī animals as offerings and wine[404] also and do so.

It is stated in the Skanda and Bhavisya[405] purāṇas that the worship of Caṇḍikā in autumn (Āśvina) is of a threefold character; viz sāttvikī, rājasī and tāmasī, the sāttvikī worship is effected by *japa*, by-offering *naivedya* in which there is no meat; and japa consists in reciting the texts of the purāṇas in which the greatness of Devī is described; rājasī worship is effected by offering a *bali* and with naivedya which contains flesh; that is tāmasī worship which is effected by the offerings of wine and meat and from which *japa is* absent and which is without mantras, this last is approved among Kirātas (i e. forest tribes and the like) Raghunandana adds[406] in his Prāyaścittatattva that the offering of wine in Durgāpūjā relates to ages other than the Kali age (i e other than the present age).

It has been stated above (pp 110–111, n 280) that the principal gods are deemed to go to sleep for four months on different tithis from the *pratipad* (1st) of Āsādha-śukla to the 15th. Therein Durgā is said to go to sleep on the 8th of the bright half of Āsādha. Therefore, in Āśvina she would be asleep. Hence the texts provide for the rousing (*bodhana*) of Devī from sleep As usual there are conflicting views The Tithitattva[407] notices the views of some that if the Devī is to be worshipped as having 18 arms she was to be roused on the 9th of the dark half preceding Āśvina bright half, but that if she was to be worshipped as possessing ten arms then the *bodhana* was to be on the 6th (of the bright half of Āśvina) Raghunandana does not accept this and holds that the *bodhana* of Devī with ten arms was to be either on the 9th (of the preceding dark half) or on the 6th (of the bright half of Āśvina). If the performer begins on the 9th of the dark half the saṅkalpa will be as noted below.[408] He may, however, begin on the first

Then he should repair to the *pandal* erected for Durgā-pūjā, perform *ācamana*, should bind together with Aparājitā creeper twigs or leaves of nine plants[415] so as to form one bundle or sheaf, viz. plantain, pomegranate, coriander, turmeric, Arum Indicum, Arum colocacia, bilva, aśoka and jayantī. Each of these substances is accompanied by an appropriate separate mantra.

He should offer worship to the bundle of nine plants and to the image (of Durgā) and make the Devī abide in the bilva tree with sandalwood (and other substances mentioned above). The rousing (bodhana) of the Devī and the invitation to the bilva tree are separate and are done with separate mantras (Tithitattva pp. 75–76). The two may be done at the same time if 6th tithi exists in the evening; but if it does not exist in the evening then *bodhana* may be done on the 6th and invitation on the 7th or bodhana may be done in the morning and invitation in the evening. The clay image of Durgā together with the twig of bilva is to be entered in the house and worshipped. The details of the complicated discussion are not set out here.

Then follow acts to be done on the 7th tithi. On the 7th tithi conjoint with mūla-naksatra or without it the performer after taking a bath approaches a bilva tree, worships it, folds his hands and says 'O blessed bilva tree! you are always dear to Śankara; after taking from you a branch I shall perform Durgā worship; O Lord! you should not feel pain due to the cutting of a branch; O bilva! prince among trees, salutation to you!' After saying this he should cut off from the bilva tree a branch other than one in the south-west or north-west and endowed with a couple of fruits (or without fruit) with the mantra noted below.[416] Then he should take the branch, come to the place of worship (the mandapa or the like) and place it on a pītha (a seat). He worships the latter with 'salutation to the bilva branch' and honours Cāmuṇḍā *on the bilva* branch and the clay image with the words 'this is pādya (water for washing the feet), salutation to Cāmuṇḍā' and addresses the bilva branch with the mantra quoted in n. 413 above. Then he utters the mantra 'O Cāmuṇḍā'! move, move, make others move, enter my house quickly and go to the place of worship, *svāhā*'. Then he establishes the *ghaṭa*, worships the nine plants and five devatās, establishes the image on a seat and the bundle of nine plants to its right to the accompaniment of songs and instrumental music and places the bilva branch in a copper vessel near the (image of) Devī and performs the prāṇa-pratiṣṭhā[417] (vivifying or endowing with life) of the image of the Devī and of Gaṇeśa and other deities in the manner provided in the Durgārcanapaddhati (*p* 666) and Tithitattva (*pp.* 77–78). Then he should, after taking in his hand husked rice-grains and flowers, contemplate upon the form of Devī Then the Durgārcanapaddhati (*pp.* 666–667) quotes a long but finely worded passage from the Matsya, the corresponding passage from the Kālikāpurāṇa may be briefly rendered as follows [418]

Devī possesses a mass of hair, her head ornament is the crescent of the moon, she has three eyes, her face resembles a lotus and (full) moon, her complexion is like molten gold, she is well formed and has charming eyes, she is endowed with blooming youth, decked with all kinds of ornaments, has charming teeth, looks keen and has full and upraised breasts, her posture is such that she is bent at three places, she has crushed the demon Mahisa, she has ten arms long and soft like lotus stalks, she holds a trident in the right hand and a sword and discus below that (trident) in order, a sharp arrow and śakti (missile) in the group of her arms, a shield, a fully bent bow, a noose, a goad (held in order) from above and a bell and axe should be held in the left hand from below; under her one should show a headless buffalo from which rises a demon with a sword in his hand, who is pierced in the region of the heart by the trident (of Devī), who (demon) possesses teeth set awry, whose body is dyed red with blood, whose eyes are bloodshot and distended, who is encircled by a noose of snakes, whose face is rendered fearful by his curved eyebrows, whose hair is seized by Durgā with the left hand holding a noose, whose mouth emits blood; one should exhibit Devī's lion; the right foot of Devī (should be shown) as resting evenly on the lion's back and her left foot toe (resting) a little higher on the demon.

Then the performer should put a flower on his head, take flowers and rice grains in his hand and make an invocation (āvāhana) with two mantras to Durgā to be present in the bilva branch and establish her with the prayer to bestow long life, health and prosperity. He offers to the Devī the several upacāras of āsana, pādya, arghya &c. Then he should go near the sheaf of nine plants and repeat the mantra "O blessed Durgā! come, enter into the (sheaf of) plants; this is your place in the mortal world; I throw myself on your mercy"! So saying he should worship Devī in the *ghata* (jar) with ten or five upacāras

The मत्स्यपुराण (260. 56-66) has almost the same verses (with a few variations) that are quoted by दु. भ. त pp 4-5 and 75-76, त कि. कौ pp 413-414, दुर्गार्चन॰ pp. 666-67, and by का. त वि. p. 285. For सीदर्णा, मत्स्य reads तद्वत् and दुर्गार्चनप॰ reads देवीम्; मत्स्य and का त वि. read शार्ङ्गि वामतोपि निवोधत; मत्स्य and दुर्गा॰ read निर्यदन्त्रविभूषितम् for तिर्यन्दन्त॰ त्रिभङ्ग—probably refers to त्रिवलि which was held to be a sign of beauty among women or it means that the figure of Devī should be shown as bent in three parts of the body दु. भ त (pp 5-6) quotes कालिकापुराण also for description of भद्रकाली with 16 arms. On p. 6 (दु. भ. त.) भद्रकाली is described as त्रिवलीमध्यभूषिता.

or with flowers and sandalwood paste with separate mantras for each of the nine plants (mentioned in note 415) in the form 'Hrīm, om, kadalīsthāyai brahmānyai namah' and so on (Durgārcanapaddhati[419] p. 669). Then he should worship Durgā with pādya and other upacāras[420] and offer a kid or the like as an offering. The kid or he-buffalo should be dark and should be at least five years old.[421]

Much has been written about the sacrifice of animals in Durgāpūjā Only a few points can be dealt with here. The Kālikā-purāna enumerates the following animals as fit for sacrifice in honour of Durgā and Bhairava[422] 'birds, tortoises, crocodiles, fish, deer of nine kinds, buffalo, *gavaya* (Gayal), bull, goat, *mongoose*, boar, rhinoceros, black antelope, śarabha (a fabulous animal), lion, tiger, a human being and blood from one's own (i. e. the performer's) body; but the females of the species specified above were not to be offered as *bali* and the person who did so would go to hell. This was probably a concession to placate Devī who might have a soft corner for a bali

of her own sex. The bali should have no defect and should not be one whose tail or ears were cut off Though the above list of victims that may be offered is long, usually only goats and he-buffaloes were sacrificed It is said [423] 'the Devī that resides on Vindhya is not so well pleased with the offerings of flowers, incense, and unguents and of other animals as she is pleased with offerings of rams and he-buffaloes'. The Varsa-kriyā-kaumudi[424] quotes "one should never offer to the great Devī a horse or elephant; if a brāhmana offers a lion, a tiger or a human being (as *bali*) he would go to hell and even in this world he would have a short life and would be devoid of happiness and prosperity; if (a brāhmana) offers his own blood, he would be guilty of suicide. If a brāhmana offered wine he would lose his status as a brāhmana. When wine is laid down as a necessary offering he should offer cocoanut water in a vessel of bell-metal or honey in a copper vessel." But there were texts that contradict this For example, it is said in the Kālikāpurāna 'goat, he-buffalo, human being are declared to be bali, mahābali and atibali, respectively.' [425] It has to be remembered that though an animal is killed still what is offered to the Devī is generally blood and the head of the victim. The Kālikāpurāna[426] says 'blood purified by the recitation of mantras over it and the head (of a victim) are said to be nectar; in the worship (of Devī) the adept worshipper

should offer flesh rarely (if at all) except blood and the head, which (two) become nectar" The Kālikāpurāna further states that Śivā (Durgā) partakes of the head as well as the flesh of the victim, that one should offer in pūjā the blood and head of the victim, but the wise (devotee) should employ flesh in edibles and in *homa*. The Durgārcanapaddhati (pp 669–671) prescribes an elaborate ritual about killing the *bali* and offering its blood and head and the rites and mantras slightly differ according as the bali is a goat, a buffalo or the performer's own blood The[427] *bali* is made to face the east, the sādhaka (devotee) faces the north and repeats certain mantras one of which is Vāj. S. 23. 17 'Agni was the animal to be sacrificed. They sacrificed with him, he conquered this world (the earth) on which Agni exists; that will be your world, you will conquer that world, drink this water. Vāyu (wind God) was the animal &c; the Sun was the animal &c.' Another mantra is Manu V. 39 (=Viṣnudharmasūtra 51. 61=Kālikā 71.39) viz. 'animals were created by Brahmā himself for serving the purpose of sacrifice, for the well-being of sacrifice and of all; therefore killing (an animal) in a sacrifice is no killing (does not cause the sin or blame of ordinary killing)'. He should place on the head of the bali a flower with a mantra; then he sprinkles water with kusas over the bali and then worships the sword with the mantra 'you are the tongue of Caṇḍikā and you accomplish heaven (for the worshipper); Hrīm, Śrīm, O sword!'. The performer contemplates on the sword as described in Tithitattva (p. 81) and Durgārcanapaddhati (p 670), honours it with sandalwood paste and the rest and repeats eight names of the sword, bows to it, takes it up with the words 'Ām, Hrīm, Phaṭ' and with one stroke cuts off the victim facing the east (while the performer faces the north) or facing the north (while the performer faces the east) Then he collects blood in a vessel of clay or other material, places it before the Devī and offers it with the words 'this is the blood of the goat; Om, O Jayantī!' and says 'Aim, Hrīm, Śrīm, O Kauśikī! May she be pleased by the blood.' Then he offers the head of the bali (goat or the like) placing on the head a lamp with a flaming wick He then takes blood from the sword (with

which the animal's neck was cut) and makes a *tilaka* mark with it on his forehead with two mantras. It was supposed that the tilaka of blood would make all persons amenable to the person who had that blood mark on the forehead as the mantra quoted below expresses. 'When the *bali* is a buffalo, the mantras repeated over a goat are omitted and two others are substituted viz. 'as you hate a horse and as you carry Candikā, so kill my enemies and bring happiness, O buffalo; you are the vehicle of Yama, you possess excellent form, you who are deathless; bestow on me long life, wealth, fame, a bow to you who are a buffalo'. The fruit of offering buffalo's blood to Devī was deemed to be her gratification and favour for a hundred years. Then he performs japa of a mantra (quoted in note)[428] and also certain verses of laudation and asks for certain benefits (Durgārcana, p. 672).[429]

The Kālikāpurāna in a long passage[430] provides gradually rising periods of times for which Durgā becomes gratified by the offering of the blood of various animals. A few might be cited here: Durgā secures satisfaction for one month by the (offering of the) blood of fishes and tortoises, and for two months by (the blood of) crocodiles; by the blood of the black antelope and of the boar Devī is pleased for twelve years and by the blood of buffalo and rhinoceros for a hundred years; by the blood of the lion, the śarabha and from the performer's body Devī is gratified for a thousand years and by a human being as a *bali* for a thousand years." There was a revulsion of feeling against blood sacrifices in some hearts and so even the Kālikā provides[431] that the offerings of kūsmānda (pumpkin-gourd) and sugarcane stalks, intoxicants and *āsavas* (spirits distilled from molasses, flowers or herbs) are like (animal) victims and gratification

(to the Devī) is the same as by the offering of a goat. But even in these days castes deemed higher, even including brāhmaṇas, offer goats and rarely buffaloes to Durgā, if that is the custom of the caste or family. I understand that many families of learned brāhmaṇas such as the Bhaṭṭācāryas of Bhaṭpara in West Bengal sacrifice fruits and vegetables in lieu of animals The Ahalyākāma-dhenu[432] says that some Vaiṣṇavas regard the night when victims are killed as horrible and do not eat food or even drink water on that night and that among brāhmaṇa castes the offering (bali) should be in the form of kūṣmāṇḍa and the like or flour images of animals or simple ghee should be offered As to other castes also it has been declared that Kūṣmāṇḍa, bilva fruit, sugarcane stalks may be cut into pieces.

The convenient belief from very ancient times has been that a victim offered in sacrifice to gods and pitṛs went to heaven. Ṛg I. 162 21[433] (= Vāj S 23. 16) and Manu V. 42 say so. Hemādri quotes verses saying that all the animals such as the buffalo that are employed for (gratifying) Devī go to heaven and those that kill them incur no sin.[434]

The foregoing is somewhat of a digression, as the *bali* is generally to be sacrificed on the 9th and as the rites of even of the 8th have not yet been described On the Mahāṣṭamī conjoined to Pūrvāṣāḍhā-naksatra or without it, the devotee after taking a bath and sipping water, should face the east or north, sit on a seat of *darbhas*, perform purification of himself and the body which is made up of five elements by repeating separately the mystic letters 'yam, ram, lam, vam' in the manner set out on p 673 of Durgārcanapaddhati, then he performs *prāṇāyāma*, and then *nyāsa* on the several parts of the body from the heart and head to the feet He sprinkles over himself and the materials of worship water contained in a vessel of conch-shell

and the like and over which he mutters eight times the mantra 'Hrīm, Om Durgāyai namaḥ', he contemplates on Durgā as described on p. 163 and note 418 above, places a flower on his head, mentally offers *upacāras* (to Devī), again contemplates on Devī's form and then offers the upacāras from *āsana* (seat) to pranāma (as indicated in note 420 above) with appropriate brief mantras. Then he offers worship to several goddesses to the right side, front side and left side of Devī with brief mantras and to the Mātṛs[435] (64 are enumerated in Durgārcanao. pp. 676–677, or 32, or 16 or 8) according to one's ability with five upacāras or with sandalwood paste and flowers and to the eight mātṛs Brahmāni &c Then there is *aṅgapūjā* (worship of Devī's limbs) from heart and head to the feet. Then worship is offered to her weapons such as trident, sword, discus, sharp arrow, shield, fully strung bow, the noose, goad, bell; and then her lion-seat is honoured and also armour, whisk, umbrella, flag and flag-staff, drum, conch Separate mantras are recited in connection with the pūjā of each of these, as laid down in Durgārcanapaddhati pp. 678–681, in the Nirnayasindhu pp. 179–181 (which quotes them from Viṣnudharmottara) and other works. They are all passed over here for saving space Then he goes near the sheaf of nine plants and worships it with five upacāras or with sandalwood paste and flowers offered to each separately. Then he makes an offering of *māṣa* pulse and boiled rice.

On the day on which there is Mahāstamīpūjā the performer observes a fast But a householder[436] who has a son should not observe a fast on the Mahāstamī. He should follow one of the alternatives specified above in note 252 (naktam havisyānnam &c). Whatever procedure about food he may follow, he, keeping himself pure and observing the rules of conduct for vrata, should worship Devī; he should offer worship on the Mahāṣṭamī and on the 9th with *balis*; he should take leave (of Devī) on the 10th with

Śrāvaṇa-naksatra after performing the Śābara festival. When the last quarter of Śravaṇa (naksatra) is running then he should give a send-off to Devī on the 10th tithi. The Tithitattva[437] positively asserts that a fast is to be observed on the same day on which Mahāstamī-pūjā is performed

On this 8th tithi the performer has to honour maidens, feed them and brāhmaṇas also. He may honour a maiden or maidens from the first to the 9th tithi, but he must do so at least on 8th. The Devīpurāṇa[438] says "Durgā is not so much gratified by *homa*, gifts and *japa* as she is gratified (becomes favourable) by honouring maidens." And he has to give them dakṣiṇā also. Hemādri (on vrata vol I. 903–906) quotes a long passage from the Skanda-purāṇa on this subject Skanda provides that the performer should feed maidens from the first tithi of Navarātra on a rising scale, viz one maiden on the first tithi, two on the 2nd and so on up to nine on the 9th If he feeds nine virgins every day (of the Navarātra) he secures land; if he feeds double the number on each succeeding day he gets prosperity. He should not honour a maiden who is one year old (or less), for, such a girl has not developed at that age liking for fruits, flowers and sandal-wood paste. Therefore, he should honour maidens who are from two to ten years old, and not those that are beyond ten years The Devīpurāṇa provides that if no virgin is available, one may honour even a married girl who has had no menstruation[439] The Skanda provides that maidens from two years to ten should be honoured under the following names respectively, viz. Kumārikā (two years old), Trimūrti (three years old), Kalyāṇī, Rohiṇī, Kālī, Caṇḍikā, Śāmbhavī, Durgā, Subhadrā The Skanda provides special pūjā mantras for each of the nine kinds of maidens and different rewards are provided for honouring each of the nine classes. These are passed over here. The general *āvāhanamantra* for all in the morning after the performer has

taken a ceremonial bath with oil is noted below.[440] In this way he is to honour virgins with bodice, clothes, sandalwood paste, flowers and *aksatas*, with different kinds of edibles and dishes and feed them with *pāyasa* (rice boiled in milk and sugar). One should not honour a maiden that has a limb more or less, that suffers from leprosy, or that has varicose veins or has a broken head or has limbs from which blood or pus oozes or has ulcers, that is blind from birth, is squint-eyed or blind of one eye or is ugly or has little hair or much hair or is diseased or is born of a slave woman. A man should honour a brāhmana maiden in all acts, a ksatriya maiden for victory, one belonging to untouchable castes in acts of terrible nature. After the maidens are fed, brāhmanas also should be fed (Durgārcana. pp. 681),

The Tithitattva (pp. 69–72), Nirnayasindhu and other works provide that in the Navarātra the performer should hear the recitation of the Vedas (Vedapārāyana) and that beginning with the first tithi up to the 9th he should himself mutter Candīpātha (recitation of Devīmāhātmya) or engage a person to do so, reciting it once on the first, twice on 2nd tithi and so on up to nine times on 9th tithi. The Devīpurāna provides for pūjā, japa and homa and the mantras therefore by saying that the worship of Devī is to be performed by casting into the fire sesame and with curds, milk and ghee. The Devī-mantra is either what is called the Jayantīmantra[441] (quoted in note) or the mantra of nine syllables (quoted in the note). The Dvaitanirnaya-siddhāntasangraha states that the mantra is either one that a man's *guru* has taught him, or the Vedic verse 'Jātavedase sunavāma' (Rg. I. 99.1) or one with nine letters or the one 'namo devyai mahādevyai' or the slokas in the Saptasati.[442] The Tithitattva quotes (pp. 69–71) a long passage

from the Vārāhī-tantra about the result of reciting Devīmāhātmya several times. A few verses are cited for sample. "When some great danger threatens, one should recite (Devīmāhātmya) seven times; if repeated twelve times one secures fulfilment of one's desires and the destruction of enmity; if repeated 14 times, an enemy would be subdued and a woman would be brought under one's control; repeating a hundred times results in increase of one's kingdom, if repeated a thousand times Laksmi comes to a man of her own accord As Asvamedha is the prince among sacrifices, as Hari (is superior) among gods, so the laud called Saptaśatī is the highest among all lauds[443]" The Tithitattva further provides that one should recite[444] before the reading of the 'prathamacarita' the rsi (sage), the metre &c. of it and also when repeating the *Madhyamacarita* and the *Uttaracarita* Very great importance was attached in ancient and medieval times to the recitation of mantras and even modern men brought up in English schools, colleges and Universities often implicitly believe in their efficacy, even if one may not understand their meaning. The qualities of the sounds of mantras or of parts of mantras (such as 'hrīm') and their potentialities, the various devices employed when using them are deemed of far greater importance than the meaning. The Gītā (X 25) itself puts Japa-yajña as the highest among yajñas such as those of *dravya* (materials or money), tapoyajña (Gītā IV 28). Mantras are supposed to have a tremendous effect on the sub-conscious mind and it may perhaps be so if one concentrates one's mind thereon to the exclusion of all else. A person could himself recite the Saptaśatī or engage a person to read it to him who was called *pāthaka* or *vācaka* as in T. T. p. 72, Durgārcana p 661 Some very orthodox writers went so far as to lay down that a śūdra could only listen to the Mahābhārata or Saptaśatī but could not read it himself. Raghunandana[445] like Kamalākara appears to have held this view. One

should stop reading at the end of a chapter and not in its middle; but if for some reason one had to stop in the middle of a chapter, when one again commenced reading or reciting Saptaśatī, one should not proceed from where one left off in the middle of a chapter, but begin with the first verse of the chapter half read or recited. Provision was made that the reader engaged for reading Saptaśatī should be handsomely requited for his labour by gifts of gold, silver, cows with bell-metal pails for milking. Mr Ghosh notes (p. 39) that besides the reader of Devīmāhātmya a separate priest is selected to repeat the mūlamantra a hundred thousand times and is called *Jāpaka*. The Nirnayasindhu (pp 185–186) gives elaborate descriptions of Śatacaṇḍī-pātha and Sahasracaṇḍī. In the first, ten well-conducted brāhmanas including the *ācārya* are chosen. They are to recite together Saptaśatī once on the 1st day, twice on the 2nd, thrice on the 3rd and four times on the 4th; in this way Saptaśatī would be repeated one hundred times. In Sahasracaṇḍī one hundred brāhmanas are to be chosen and they are to repeat Saptaśatī for four days as in Śatacaṇḍī-pātha A thousand brāhmanas are to be fed and one hundred cows are to be donated. The Nirnayasindhu notes that these two are not included in the great digests but there is popular usage to this effect.

After each pūjā prescribed for the day, the family members, their friends and guests sit together and partake of the *prasāda* (which in the houses of the well-to-do comprises select delicacies). Formerly, the persons sitting together would have sometimes numbered hundreds, but in the days of rationing and control, this would not happen. Mukerji (p. 124) notes that guests made offerings to the goddess (usually cash which belongs to the owner and not to the priest.)

After the pūjā, homa is performed as indicated above; offerings are to be made in fire called 'Balada'[446] with the word 'svāhā' at the end to the accompaniment of a mantra preceded by 'om'. The Durgārcana-paddhati notes (p. 681) that after the special rites on the Mahāṣṭamī described above (viz. pūjā, honouring maidens, homa &c.) are finished the rest of the tithi should be spent by the devotee in dance, songs[447] and music

(jāgara) It appears that in the Devī and Kālikā purāṇas it is provided that even on the 8th at midnight an animal such as a goat or he-buffalo should be sacrificed and that on the 9th tithi many *balis* were to be sacrificed. 'When the Sun is in the sign of Kanyā (Virgin or Virgo) and in the month of Īśa (Āśvina) one should offer pūjā on the 9th tithi of the bright half; one should observe a fast (on that tithi) and at midnight should begin pūjā of Devī with great expenditure and paraphernalia when the naksatra is Mūla or Purvāsādhā; an animal should be killed and a he-buffalo and a goat should be sacrificed'.[448]

A short period of time, viz. the last *ghatikā*[449] of Mahāstamī and the first ghatikā of navamī, was called 'sandhi'. During that period of two ghatikās a pūjā of Devī together with Yoginīs is to be performed which is deemed to be the holiest pūjā (Ghosh p. 120) This pūjā is to be performed like the pūjā on Mahāstamī, but the bali is to be offered at and after the Mahānavamī begins[450] and not during the last ghatikā of Mahāstamī.

Now the rites of the Mahānavamī have to be described. On the 9th tithi conjoined to Uttarāsādhā naksatra or without it, pūjā is to be performed on the lines of the one of Mahāstamī. This day's pūjā is[451] only a repetition of that on the 8th, the

only difference being that a larger number of balis (goats etc.) may be sacrificed on it than on the 8th tithi. A bali is to be offered as it is obligatory to do so on the 9th[452] Then the worshipper should perform homa, if able to do so. The sankalpa at the time of giving daksinā is given in the note.[454] If no daksinā be paid, the whole rite becomes fruitless Then he should pray that 'all defects in the pūjā may be remedied, that whatever he has offered with a devout heart, whether leaves or flowers, fruits or water, whatever naivedya he has offered, may be graciously accepted by Devī and that if any mistake has occurred by his missing some letter or *mantra* Devī should forgive all that' He should wash the feet of a brāhmana maiden and give her sumptuous dinner and ask her to place with her hand on his head *aksatas* and devoutly follow her a few steps. On the 10th tithi after bathing and sipping water he should offer worship with sixteen upacāras or with as many as possible, should praise Devī with these words 'Om Durgām Śivām' &c. (on p 672 of Durgārcanapaddhati), should prostrate himself before her and make request to Devī with the mantra 'Mahisaghni mahāmāye &c' (*ibid* p. 672) and with the verse quoted [454a] below take a flower and cast it on the image with the words 'forgive'. Then after repeating two verses he should raise the image (of Devī), the bilva twig and the sheaf of nine plants from their places and keep them in another place and wave lamps made of [454b] flour before them He should go near the water of a river with dance, song, music, Vedic recitations and auspicious sports and pastimes and immerse the image in a tank or in a river after the prayer [454c] 'O Durgā, mother of the world, go to your place in order to come back after the lapse of a year.' Then he should perform the *śābarotsava* This last means that actions usually associated with the śabaras (i e aboriginal tribes like the Bhils &c) should be indulged in (to express ecstacy of the Durgāpūjā) on the 10th tithi after the immersion

The same occur in दुर्गार्चन० p. 683. In the famous Victoria Museum in Calcutta, there is a painting of the *visarjana* of Durgā in a boat made by Thomas Daniel in 1780 A. D,

of the image of Devī.[455] The Kālaviveka quotes Satya to the effect that leave is taken of Devī on the last *pāda* of Śravana-naksatra in the day and śābarotsava is celebrated on the 10th, and explains that what is meant is that like men of the Śabara tribe, people wear leaves of trees, their bodies are besmeared with mire, they make incoherent prancing movements and are engaged in dances, songs and music. The Kālikāpurāna dwells on this at great length. It says: "the *visarjana* (sending away) of Devī should be made with festivals in the manner of śabaras, viz. people may make merry to their heart's content by throwing dust and mud, with auspicious sports and revelry, with indulgence in words and songs referring to male and female organs and with words expressive of the sexual act. The Devī becomes angry with him who does not abuse another and whom others do not abuse and pronounces on him a terrible curse." This provision that every one, how highsoever, was to join in the śābarotsava was probably made for emphasizing that before the Devī the highest and the lowest were of equal status and every one must join in the frolics on the 10th tithi to show that all men were equal at least one day in the year. After the immersion friends visit friends and partake of sweets. It appears that this last practice is now not in vogue.

A few words must be said with reference to certain relevant matters. How Devī was to be contemplated upon can be seen from p 163, note 418 above. That shows that only the image of Devī with the lion and the demon Mahiṣāsura was to be constructed. In the Mārk. purāna[456] it is stated that Devī strode over the great demon's throat, struck him with her trident and with her heavy sword cut off his head and made him fall down on the ground. But in modern times the image of Devī is placed in a structure of wickerwork and there are images of Laksmī and Ganeśa on

the *right side and of Sarasvatī and Kārtikeya on the left*[457]. Raghunandana does not make much of these additional deities, though he speaks of the prāṇapratiṣṭhā of Gaṇeśa and others. On p. 146 of 'Cave temples of India' by Fergusson and Burgess reference is made to a tableau at Mahavalli-puram of the strife between Mahiṣāsura and Devī (with eight arms), which the learned authors assign to the period 650–700 A.D. The image may be made of gold or silver, clay, metal, stone or there may only be a picture of Devī. For Durgāpūjā it is not absolutely necessary that there should be an image. Devī may be worshipped[458] in a *liṅga*, on an altar or in a book, in her pādukās (wooden or stone feet), in image, in a picture or a trident or sword or in water. Some of the purāṇas like Garuḍa and Bhaviṣya[459] state that on the 7th or 8th tithi nine wooden houses or only one with four corners may be constructed, that in the midst of it a platform or altar of four cubits in length and breadth should be made on which a throne of silk, woollen cloth and deer-skin should be prepared, whereon Durgā (image) made of gold, silver, clay or wood was to be established having four or ten arms, possessing a complexion like heated gold, three eyes and the moon as a head ornament.

There is no unanimity about the arms of Devī. The Varāha-purāṇa (95. 41) speaks of 20 arms of Devī and mentions the twenty weapons she carries (95. 42–43). In the Devībhāgavata V. 8. 44 she is said to have 18 arms. Hemādri (on vrata, vol. I. pp. 923–924) quotes verses in which Devī is said to have eight arms and ten arms respectively. both ten arms and eight arms. It appears that different numbers of arms were associated with different forms and names of Devī. For example, Vidyāpati in describing the form of Kālī or Cāmundā speaks of her as having four arms. In the Virāṭaparva (chap. 6) where Yudhisthira praises Durgā, she is described (in verse 8) as having four arms.

There are varying views about the word 'navarātra'. Some hold that navarātra means 'nine days and nights'; it signifies only the time for a vrata (i. e. it is a guṇavidhi), not the name of a rite (*karma*), while others contend that navarātra is the name of a rite or vrata, which may last for eight days (if there is *tithikṣaya*) or ten days (if there is vrddhi of a tithi from the first tithi to the 9th). The first view is held by works like the Kālatattvavivecana (pp. 270–272), while the 2nd is held by the Nirnayasindhu[461] (p. 165), the Puruṣārthacintāmaṇi (p. 61) and others. As the discussion is scholastic and hardly of any practical importance it is passed over here.

The principal matters in Navarātra or Durgāpūja, though it may be spread over three days (from 7th tithi) or nine days (from 1st to 9th), are four as laid down by the Liṅgapurāṇa viz. *snapana*[462] (bathing the image), pūjā, the offering of a victim (bali) and homa. For want of space snāpana has not been dwelt upon in the above. The Durgārcanapaddhati (p. 674), the Vratarāja (p. 340) and other digests state at length how the image of Durgā may be bathed with scented water, with milk, curds, ghee, *pañcagavya* of a *kapilā* cow, sugarcane juice and what rewards are reaped by particular kinds of baths. One example is given here for a sample.[463] The man who even for

a day bathes Caṇḍikā with pañcagavya to the accompaniment of Caṇḍīgāyatrī goes near Viṣṇu If the image is made of some material (like clay) that cannot bear a water bath, the bright sword placed near Devī's image may be bathed or a mirror, as stated by the Kālikāpurāṇa The other three out of the four principal items in Durgāpūjā have been dealt with above. Out of the four, pūjā is the most important and a fast is only an *aṅga* (ancillary matter).

Then the question arises as to when pūjā is to be performed. Here there are varying views. The Samaya-mayūkha[464] (p. 14) quoting Devī-purāṇa appears to hold that the pūjā should be in the morning, while the Nirṇayasindhu (p 165) holds that it should be at night It appears from the Devī-purāṇa and Kālikā-purāṇa that pūjā in the morning, mid-day and at night is intended[465] 'When the sun is in sign Virgo, the devotee should follow the method of *ayācita* or *nakta* or take food only once or subsist only on water beginning from the *navamikā tithi* of the bright half, should bathe in the morning, should rise superior to the opposites (of heat and cold, happiness and pain &c) and should worship (Śiva and) Śivā three times a day.' The Kāla-tattvaviveçana[466] resolves this conflict by saying that morning and midday *pūjās* are brief, the principal and elaborate pūjā is at night only. There is some confusion caused by the texts laying down the nakṣatras, tithis or both on which the different items in the Durgāpūjā were to be performed The Kālaviveka quotes Vyāsa as follows: 'one should awaken Devī on Ārdrā-nakṣatra, make her enter (the devotee's house) on Mūla, and

having worshipped her on Uttarāsādhā should take leave of her on Śravana'.[467] Most digests refer only to the tithis. For example, we saw above (p. 159 note 411) that on the 7th tithi the bilva branch is to be brought to the house, on the 8th fast, pūjā and *jāgara* are to be observed, the *bali* is offered on 9th, and on the 10th *nīrājana* and discharging the Devī take place. Some texts combine the tithi and naksatra for the several parts of Durgāpūjā. For example, the Rājamārtanda verse (q in n. 426 above) says 'one should, after propitiating with faith (Devī) by the head, flesh and blood of several kinds of animals, take leave of her on Śravana-naksatra and 10th tithi'. The Devīpurāna provides[468] 'The bilva tree should be addressed with a mantra on 6th tithi joined to Jyesthā, (the sheaf of) plants should be brought into the house on the 7th joined to Mūla, fast, pūjā and *homa* take place on the 8th joined to Pūrvāsādhā, on the 9th joined to Uttarāsādhā one should worship Durgā with animal sacrifices and after prostrating oneself before her leave should be taken of her on 10th tithi joined to Śravana'. It often happened that the tithi and naksatra provided for an item did not tally and some rules were evolved. The first rule is: if both tithi and naksatra as provided tallied then that led to very good results, as said in the Lingapurāna 'even if there be no Mūla-naksatra, one should enter the bilva branch in the house on the seventh; the same rule applies to other tithis, but if the naksatras exist on the tithis specified there is increase of the results or

The बोधन on आर्द्रा refers to the 9th tithi of the dark half preceding the navarātra, Mūla refers to the 7th tithi when the *bilva* twig was to be brought to the house, Uttarāsādhā and Śravana would correspond to the 9th and 10 tithis respectively.

rewards.' The *second rule* was that *tithi* was superior[469] and therefore *even if the nakṣatra did not exist on the tithi specified, one should follow the tithi laid down for the several items in Durgāpūjā. Devala* and Lalla[470] laid this down.

One question on which there is difference of view is about the tithi on which Navarātra is to be begun when pratipad is mixed with amāvāsyā or dvitīyā. There are very lengthy discussions in the Nirnayasindhu, Kālatattvavivecana, Puruṣārtha-cintāmani and other works. Some quote passages from the Devī and other purāṇas condemning the beginning of navarātra on pratipad mixed with amāvāsyā. Devī is made[471] to say 'in my worship *pratipad* which is joined to amāvāsyā should not be accepted; pratipad existing only for a muhūrta (two ghatikās) at sunrise and then joined to the 2nd tithi should be accepted (for commencing Navarātra festival)'. On the other hand there[471a] are texts like the following: if one were to accept for the (beginning of the) worship of Caṇḍikā pratipad joined to part of 2nd *tithi* through ignorance or through another's advice, that leads to the death of that person's son. The Samayamayūkha says that both classes of texts are baseless or if they are authoritative they leave the matter undecided as they are opposed to each other. The decision has to be arrived at in a different manner. 'If pratipad is mixed with amāvāsyā but does not exist the next day, then it must be accepted for starting Navarātra as there is no other alternative. Therefore, even a pratipad mixed with amāvāsyā has to be accepted in such a case in spite of texts to the contrary. If pratipad starts with sunrise and spreads over the next day for less than three muhūrtas,

then the full pratipad has to be accepted for beginning navarātra. If at first there is amāvāsyā for one muhūrta, then pratipad follows and then spreads over the next day up to less than three muhūrtas, then this latter, that is, pratipad mixed with dvitīyā has to be accepted as the beginning. For want of space all possible alternatives are not dealt with here.

One important matter was not stressed above. On the first day of Navarātra one has to establish a *kalaśa* or *ghata*. A full kalaśa has been a symbol of holiness and prosperity from early Vedic times (compare Ṛg. III. 32.15 'āpūrno asya kalaśaḥ'). This is a rite which is performed in the Deccan, Gujarat and Saurāstra even though the elaborate Durgāpūjā of Bengal finds no place there. The procedure given in Durgābhaktitaraṅginī p 3. Nirṇayasindhu (p. 767), Vratarāja (pp. 62–66), Puruṣārthacintāmaṇi (pp. 66–67) and other works is elaborate. Ghatasthāpana is spoken of in Durgārcanapaddhati (p. 663) and has to be performed by day and not at night. One should make[472] an altar with holy clay and sow *yava* and wheat grains thereon with Ṛg. X. 97. 22, and establish a jar there of gold, silver, copper or clay with Ṛg. IX. 17. 4, fill the jar with water with Ṛg. X. 75. 5 (imam me Gange &c.), and cast in the jar sandalwood paste, *sarvauṣadhi*,[473] dūrvā grass, leaves of five trees (mango &c.), clay from seven places, fruit, five jewels and gold with appropriate mantras, surround it with a piece of cloth with Ṛg. III. 8. 4, place a pūrṇa-pātra (a cup filled with rice grains) on the jar and worship Varuṇa thereon, contemplate on Durgā (as described in note 418) and invoke Durgā to come and be present in the jar along with all groups of gods and offer the upacāras from *pādya* onwards, fold his hands, offer a prayer and boiled rice with *māṣa* pulse or a kūṣmāṇḍa &c. In the Deccan the main items in the Navarātra are the establishment of ghata, offering a garland of flowers on every tithi up to the 9th, a strict

code of conduct (such as not shaving oneself) to be observed by the performer. If on the pratipad day on which the jar is to be established there is citrā-naksatra [474] and the astrological conjunction called Vaidhrti, it is to be done at the end of these, but if these two exist the whole of the day, then the rite should be performed in the latter part of these two. The S. M held that these texts were baseless According to Ghosh (p. 76), in Bengal nine jars are established in a figure (*sarvatobhadra*) filled with coloured powders at prescribed places and these are decorated with nine differently coloured flags. But in some parts of India only one ghata is established.

Hemādri (on Vrata, vol. I. p 906) quotes Devīpurāna for honouring horses.[475] The Durgāpūjā was meant for all. Kings and such men as kept horses were advised to honour horses in Navarātra from the 2nd tithi in conjunction with Svāti-naksatra up to 9th tithi The Durgābhaktitarangini devotes several pages to this nīrājana of horses from Śālihotra, Bhoja, Varāhamihira and other authorities (pp. 56–63 and 67–69). Kings were advised to perform Lohābhisārika rite about horses from Āśvinśukla first to Mahānavamī (H V. I. 910–916, N. S. 178, R. N. P. 414–416). For Lohābhihārika or Nīrājana rite, vide H. of Dh. Vol. III. p. 230 notes 309–311 and p. 910 note 1773. Although the Krtyakalpataru (on vrata) does not speak of Durgotsava on the lines stated above, the Naiyatakālika section of that work (pp. 408–410) quotes a long passage from the Bhavisyapurāna [476] which states that Mahisa was killed by Candikā and therefore she should be worshipped on *navami*, all varnas should worship her, kings should fast on it and gifts should be made; the Devī is pleased by the offering of the

The Kṛtyakalpataru on Vrata does contain a vrata called Durgāstamīvrata derived from the Devīpurāna (pp. 225–233), but it has nothing to do with the exploits of Durgā.

Hemādri also (on vrata, vol. I. pp. 856–862) contains the same vrata with a few variations. That vrata is entirely different from the Durgotsava described in the Kālikāpurāṇa. In the first place there is no reference in it to the killing of Mahiṣāsura. In the next place, that vrata is described as beginning from the 8th of Śrāvaṇa-śukla and going on for one year in each succeeding month on the 8th of the bright half. Feeding virgins and brāhmaṇas is mentioned in it also, but in each month the food offered to Devī and to the virgins is generally different.

About the antiquity of the worship of Durgā, vide H. of Dh. vol. II pp. 738–739. A few matters that were not and that could not be mentioned there are noted here. Ambikā is said to be the sister of Śiva in Tai.[477] S., but in the times of the Tai. Ār. X. 18 Śiva is said to be the husband of Ambikā or Umā. In the Vanaparva chap. 6 (where there is a long laud of Durgā[478] by Yudhiṣṭhira), she is described as the daughter of Yaśodā and Nanda and as the sister of Vāsudeva, is addressed as Kālī, Mahākālī and Durgā, in verses 10–11 the weapons carried by her in her hands are mentioned and in verse 15 she is said to have destroyed Mahiṣāsura. When Arjuna (in Bhīṣma 23) offers a Durgāstotra at the bidding of Kṛṣṇa, he gives her several names, among which are Kumārī, Kālī, Kapālī, Kapilā, Bhadrakālī, Mahākālī, Caṇḍī, Kātyāyanī, Kauśikī, Umā. But as the dates of these passages in the Mahābhārata are far from certain no chronological conclusion can be stated. Literary works and

coins supply some *firm data about the antiquity of the Durgā cult. In the Raghuvaṃśa chap II a lion is said to have been appointed a guard to protect a devadāru (pine) tree planted by Pārvatī. Pārvatī is called Gaurī in Raghu. II 26 and in Kumārasambhava VII. 95 and Bhavānī in Kumārao (VII. 84), Caṇḍī in Meghadūta (I. 33). Similarly, in the Kumārasambhava the Ardhanārīśvara form of Śiva is mentioned.*[479] *The mātṛs are referred to in the same work (VII 30, 38) and also Kālī with skulls as ornaments (ibid VII. 39) In the Mālatī-mādhava (Act V) the offering of human victims to Cāmuṇḍā in the city of Padmāvatī is mentioned. In the Mṛcchakaṭika VI. 27 the legend of the killing of Śumbha and Niśumbha by Durgā occurs. If we hold that Kālidāsa flourished between 350–450 A D., the above evidence makes it quite probable that the worship of Durgā may go back some centuries before 300 A. D The evidence of coins lends support to this conclusion. A siṃhavāhinī goddess is seen on the reverse of the coins of Candragupta I of the Gupta*[480] *dynasty (about 305–325 A.D). On a coin of the late Kusāna king Kaneshko the reverse shows the figure of a goddess with a lunar crescent seated full face on a lion crouching left and the godddess appears to have a noose and sceptre*[481] *The lion as vehicle and the noose indicate that the goddess should be Durgā and not Lakṣmī. This would take us to the first or 2nd century A. D.*

Why two Navarātras were recognized (in Caitra and Āśvina) is a matter of conjecture. *It is possible that these two pūjās arose from the fact that spring crops and autumn crops became ready at these two times* The worship of Durgā was very much influenced by Śākta doctrines and practices. Ghosh in his work on 'Durgāpūjā' (p XVI ff) tries to establish that the Vedic idea of Dawn (Uṣas) spreading over the sky was changed by the Purāṇas and Tantras into the terrific goddess Durgā I am not prepared to accept this explanation at all, as the links between the Vedic goddess Dawn and the terrible goddess of the Kālikā-purāṇa are altogether wanting and as there is a gap of many centuries between the disappearance of Uṣas from the ancient pantheon and popular worship and the emergence of Durgā. There may be some astrological connec-

tion between Durgā (Virgo) riding a lion (Leo). But this also cannot be clearly made out.

In the Indian Historical Quarterly vol. 21 (pp 227–231) Mr. N. G. Banerjee refers to the Durgotsava-paddhati of Udayasimha which begins with the Mahānavamī and a sankalpa for victory and ends with the description of horses marching on *daśamī* to victory and avers that this work indicates that Durgāpūjā was originally a military rite and was later on transformed into a religious festival. He relies upon the description in the Raghuvaṁśa (IV. 24–25) how the advent of Sarad (autumn) season impelled Raghu to march on an invasion and to perform the *śānti* rite for horses called Aśvanīrājana and also on the Brhatsamhitā. chap. 44 (Kern's ed.) where occurs an elaborate description of the nīrājana of horses, elephants and fighters on the 8th, 12th, or 15th of the bright half of Āśvina or Kārtika. There are serious objections against accepting this theory. It is not unknown that unconnected celebrations may be joined together on the same tithi or tithis. For example, in many parts of North India the Rāmalīlā festival for ten days is associated with Navarātra days. But Navarātra and Rāmalīlā are independent of each other and in some parts even of North India, only one or the other is popular and celebrated and not both. There is nothing improbable in there being two occasions for nīrājana, one in Durgotsava and another on the occasion of a king's march on an invasion Besides, a work of the 15th century can hardly be relied upon as evidence for explaining the origin of a festival that was in vogue for about a thousand years at least before that work. Moreover, if it was the usage to celebrate the marching on an invasion in Āśvina with nīrājana (lustration), that rite might have been borrowed from that in Durgotsava by analogy instead of the utsava having adopted the military usage. The Kālikā-purāna which describes at length Durgotsava also speaks of the nīrājana in Āśvina-śukla on the 8th and the worship of a noble handsome horse for seven days with sandalwood paste, flowers &c and requires the observation of the horse's movements for drawing prognostications (chap 88. 15–75). There is nothing to show that the details of Durgotsava described in the Kālikā and other purānas did not exist in the 4th, 5th and 6th centuries A. D. when Kālidāsa and Varāhamihira flourished and mentioned the lustration of horses. The theory of Mr N. G. Banerjee appears to be unwarranted by the evidence so far available and cannot be accepted.

CHAPTER X

Vijayādaśamī and Divāli

The 10th tithi of Āśvina-śukla is called Vijayā-daśamī. It is elaborately described in Hemādri (on vrata, vol. I. pp. 970–973), Nirnayasindhu (pp 69–70), Purusārtha-cintāmani (pp. 145–148), Vratarāja (pp 359–361) and Kālatattva-vivecana (pp. 309–312), Dharmasindhu (p 96) As Daśamī (10th tithi) is not mentioned in the *Yugmavākya* the Kālanirnaya relies on a verse that in the bright half that tithi which exists at sunrise should be accepted for performance of rites and in the dark half the one that exists at sunset [482] Hemādri proposed (on vrata vol. I. p 973) two simple rules (when 10th is *viddhā*) that that tithi on which Śravana-naksatra exists should be accepted and in all other cases 10th mixed with 9th be accepted. But the other digests introduce many other considerations and complicated rules follow. A few of them are given below If the 10th tithi is mixed up with 9th and 11th, the day on which it is mixed with 9th should be accepted provided there is no Śravana-naksatra on the next. The Skanda says: Aparājitā-devī should be worshipped by men on the 10th towards the north-east and in the afternoon, when the 10th is mixed with 9th. Aparājitā should be worshipped on that day for welfare and victory. Another verse[482a] is 'A person should offer worship on the 10th tithi in Āśvina bright half and should not perform the worship of Aparājitā on Ekādaśī' It must be remembered that the proper time for Vijayā-daśamī rites is aparāhna (afternoon) and *pradosa*[482b] is gaunakāla (secondary time). If 10th extends over aparāhna on two days, the first (i. e 10th mixed with 9th) should be accepted. If the 10th exists at pradosa time (but not at aparāhna) on two days, then the later (viz. 10th mixed with 11th) should be accepted; Śravana is not decisive just as Rohini in

Janmāstamī is not. If on both days the tenth tithi does not exist at the time of aparāhna then the first (10th mixed with 9th) is to be accepted; but in this case if on the 2nd day Śravana-naksatra exists at the time of aparāhna then the latter (10th mixed with 11th) is to be accepted. These are the conclusions of N. S. The P. C. (p. 148) disputes the last proposition. Hemādri and following him Nirnayasindhu (p. 189) quote Kaśyapa[483] to the following effect: 'if daśamī exists for some time at sunrise and if there is then ekādaśī for the rest of that day and there is Śravana-naksatra at aparāhna on that day, that tithi is called Vijayā; since Rāma started on his invasion (against Rāvana) on Śravana-naksatra, men should celebrate the crossing of the limits of their village on that day and naksatra'. The Nirnayasindhu and other works quote a verse[484] 'That time (on 10th tithi in Āśvina) which is slightly later than evening twilight and when the stars have just begun to appear is to be known as Vijaya and tends to the success of all undertakings.' Bhrgu says 'the[485] 11th muhūrta (on a day of 15 muhūrtas) is called Vijaya; all desirous of victory should march out at that time.' These verses explain why this tithi is called Vijayā-daśamī. These two verses show that the time called Vijaya is of two kinds.

The Vijayādaśamī is one of the three most auspicious days in the year (the other two being Caitra-śukla first tithi and Kārtika-śukla 1st). Therefore in India children begin to learn the alphabet on this day (i. e. perform Sarasvatīpūjana), people start new undertakings on this day, even when the moon and the like are not astrologically favourable[486] and if the

king marches against his foes on this tithi when there is Śravana-naksatra it is very auspicious and brings to him victory and peace.

On this day the principal acts are the worship of Aparājitā, the worship of Śamī, Sīmollanghana (crossing the boundary of one's village), returning home and having a lamp waved before oneself by the women in the house, wearing new clothes and ornaments and in the case of a king, nīrājana of the horses, elephants, soldiers and marching out.

Dasarā or Vijayādaśamī is a great day for people of all castes, but it is specially a day for the ksatriyas, the nobles and kings.

The procedure of the worship of Aparājitā (invincible) Devī is briefly as follows (from Dharmasindhu p 96) In the afternoon one should go to the north-east of one's village, smear the earth (with cowdung) on a pure spot, should draw with sandalwood paste or the like a figure with eight segments, should make a *sankalpa* as in the note and should invoke Aparājitā in the midst of that figure with the words 'salutations to Aparājitā' and also invoke Jayā and Vijayā to the right and left of Aparājitā respectively with the words 'salutation to Kriyāśaktī' and 'salutation to Umā' respectively. He should then offer worship with sixteen upacāras to Aparājitā, Jayā and Vijayā with the mantras 'Aparājitāyai namah, Jayāyai namah, Vijayāyai namah' and offer the prayer 'O Devī! accepting this pūjā which I have offered to you according to my ability, for my protection may you go to your own place'. In the case of the king he should pray for victory in the words 'May Aparājitā wearing a striking necklace and resplendent golden girdle and fond of doing good bestow victory on me' and then he should take leave of her in the words 'O Devi! &c'. Then all people should go out of the village to Śamī (Mimosa Suma) tree growing in the north-east, offer worship to it People may perform the crossing of the boundary of the village before or after the worship of Śamī. Some provide that the images of Rāma and Sītā should be worshipped on Vijayādaśamī, since Rāma conquered Lankā on this day (A K. folio 218[a]).[487]

487. 'मम सकुटुम्बस्य क्षेमसिद्ध्यर्थमपराजिताप्रूजनं करिष्ये-इति सङ्कल्प्य' धर्मसिन्धु p. 96. In the case of a king the सङ्कल्प should be 'मम सकुटुम्बस्य यात्राया विजयसिद्ध्यर्थमपराः'. The मु चि (pp. 145–147) gives a more elaborate procedure for the king. The word सीमोल्लङ्घन has assumed the form शिलंगण in Marathi.

In the case of the king the procedure described by Hemādri (on vrata vol. I. pp. 970–71) is as follows: the king coming out of his palace should be preceded by his *purohita* and after performing the rites on starting for a journey should march towards the east; after reaching the end of the capital he should perform Vāstupūjā (worship of a site) and worship the guardians of the quarters and the devatās (in temples) he may meet on the road. He should then offer worship to Śamī tree with Paurānika mantra [488] 'I take refuge with the blessed and auspicious Śamī tree, that removes all inauspicious things and evil acts and the effects of bad dreams'; then he (the king) should take first towards the east and towards other directions the Visnu steps. After making an effigy of his enemy or merely bringing him before his mind he (the king) should pierce him in the heart with an arrow [489] with a golden shaft The purohita recites verses about the victory of the king in the quarters; the king should honour worthy brāhmanas, the astrologer and purohita and should arrange sports of elephants, horses and foot-soldiers. He should then enter his palace to the accompaniment of auspicious shouts like 'Jaya' and lights should be waved before him by courtezans. The king who performs every year this auspicious ceremony secures long life, health, prosperity and victory; he suffers from no ailments physical or mental nor defeat and obtains unblemished wealth and victory in the world. If a king [490] starts on an invasion without celebrating Vijayādaśamī he would secure no victory for a year in his kingdom. The Tithi-tattva quotes Rājamārtanda [491] to the effect that if for any reason the king cannot march out in person on Vijayādaśamī he should send out his umbrella or favourite weapon for a victorious march. The Nirnayasindhu, Dharmasindhu and other

late medieval works add some verses about Śamī and other details[492] 'Śamī destroys sin, Śamī has reddish thorns, it held (concealed) the arrows of Arjuna and it appealed lovingly to Rāma, O Śamī worshipped by Rāma! May you remove obstacles on the march that I am to undertake according to my convenience and ease'. If a Śamī tree is not available, then the aśmantaka tree[493] should be worshipped with a mantra (given in note below). Taking up a little wet clay from the root of the Śamī tree together with *akṣatas* one should bring it to one's house to the accompaniment of songs and loud instrumental music; then the person should wear new apparel and ornaments along with his relatives and lights should be waved before him as an auspicious rite by chaste young women.[494]

In modern times on Vijayādaśamī there is śamīpūjā in many parts of India. But śamī is a rare tree In Mahārāstra and Konkana, twigs of a tree called Āptā are brought from the forest and arranged in the form of a bush near a temple and in the afternoon the people of a town or village engage in a sort of mock scramble for taking away twigs of Āptā and distribute the leaves among their neighbours, friends and relatives saying 'take this gold'. In Saurāstra and in several other places there is no such distribution of leaves. The Dharmasindhu notes that common people (in Mahārāstra) cut off twigs of śamī and take them to their houses but that this has no śāstra basis[495] In some places a he-buffalo or a goat was formerly sacrificed on this day In the former princely States of India such as Baroda and Mysore

durbars were held on Vijayādaśamī (or Dasarā, as it is called) and grand processions with richly caparisoned elephants and prancing horses were taken out on the streets of the capital. The kings in ancient and medieval times performed the Nīrājana ceremony of horses and elephants, soldiers and the king himself. Kālidāsa mentions that when *śarad* came Raghu performed the śānti rite called vājinīrājana (Raghuvaṁśa IV. 24–25). In his Brhatsamhitā (chap. 44. ed. by Kern) Varāha describes at length lustration rites for horses, elephants and men The Nirnayasindhu sets out the mantras at the time of nīrājana of the army 'O goddess, ruling over gods! may my army divided into four sections (elephants, chariots, horsemen and foot-soldiers) attain to the position of having no enemy left in this world and may victory come to me everywhere through your favour.' The Tithitattva provides that the king after performing nīrājana for vigour to his army should see the fine *khañjana* bird in the vicinity of water or cowpens and address it with the mantra[496] 'O khañjarītabird! you have come to the earth, you have a blue and auspicious neck and you bestow all desires; salutation to you!' The Tithitattva then (p. 103) descants upon the conclusions about the future to be drawn from the several places where the khañjarīta (wagtail) is seen and from the directions in which it is seen. The Brhatsamhitā has a chapter (45) on the auguries to be drawn from the sight of the khañjana bird, almost the whole of which is quoted by the Kṛtyaratnākara (pp 366–373) and a few verses of which are quoted by Varsakriyākaumudī pp 450–51. In Manu V. 14 and Yāj I. 174 among the birds whose flesh is forbidden for eating is khañjarīta (probably because it was such a valuable bird for prognostications).

In some parts of Northern India Rāmalīlā celebrations go on for ten days and culminate on the 10th of Āśvina in the burning of a tall hollow paper and wickerwork structure concealing crackers representing Rāvana and his hosts.

There are several other local customs and usages such as worship of weapons of war and implements of one's trade or avocation associated with Dasarā or Vijayādaśamī which are passed over here for reasons of space.

There are many conjectures about the origin of the Dasarā festival. Some, relying on the usages of some parts of India to offer to gods ears of new corn, of hanging on the doors of the house the ears of green or unripe paddy and of putting in the turban young sprouts of wheat and the like, hold that it is more or less an agricultural festival. Others hold that as, about *Dasarā* monsoon rains stop, swollen rivers abate and crops are near being garnered, it is the most suitable time for marching on an expedition and that therefore the origin is due to military exigencies. I incline to the latter view. In ancient countries other than India, there was a fixed season when kings went to battle. For example, we read in II Samuel chap. 11 1 'And it came to pass, after the year was expired, at the time when kings go forth to battle, that, David sent Joab'. The cult of Śamī is very ancient. Two logs of wood (*aranis*) from an Aśvattha tree growing inside a Śamī were employed in producing fire by attrition for Vedic sacrifices. Fire symbolizes vigour and valour and logs of Śamī are helpful in producing fire and śamī wood is very hard. In the Atharvaveda (VII. 11 1) we have the words 'the Aśvattha tree rides Śamī'. The Tai. Br. I. 2. 1 16 refers to Agni being produced from Aśvattha that is 'Śamīgarbha' and Tai. Br. I. 2 1. 7 connects Śamī with śānti (the removal of adverse signs). In the Tai. Ā. (VI 9. 2.) we read 'O Śamī! remove from us (destroy) sins and enmities' (śamī śamayāsmad-aghā dveṣāṃsi). It had some affinity with Navarātra also, as the latter celebrates the military exploit of Devī against Mahiṣāsura, and was therefore celebrated immediately after Navarātra. The word 'Dasarā' is derived from 'daśa' meaning 10 and 'ahan' (a day).

Dīvālī: This festival of lights, illuminations and fireworks is the most joyful of all festivals and is most widely observed throughout India. Observances, however, differ in detail and number from age to age and from province to province. It is not a single festival in honour of a single god or goddess as the Kṛṣṇajanmāṣṭamī or the Navarātra is. It is spread over four or five days and contains several independent items. The days of Dīpāvalī properly so called are three. It is called Dīpāvalī (row of lamps) in many works, but also Dīpālikā (in colophon to chap. 140 of Bhaviṣyottarā). When emphasis is laid only on one item in this festival of several days it is also designated Sukharātrī in Rājamārtaṇḍa (verses 1346-1348, vide *ABORI* vol. 36

p 329) and in Kālaviveka (pp. 232, 403-4), Yaksarātri[497] in Vātsyāyana's Kāmasūtra, Sukhasuptikā (in Vrataprakāśa, folio 204 and Hemādri on Vrata vol. II. pp. 348–349). In a scholarly paper contributed to the Journal of the Ganganath Jha Institute (vol. III. pp. 205-216) Prof. P. K. Gode traces the antiquity of this festival. The Bhavisyottara contains a charming verse with a *double entendre*[498] 'May this auspicious day of lights remove your sins like Rāmāyana in which the thunder of clouds is stopped (or in which Meghanāda i. e. Indrajit, son of Rāvana, is described as killed), in which the tips of wicks are burning (or in which Rāvaṇa became infuriated) and in which young women find delight (or with which Rāma is pleased). Some works like the N. S. and Kālatattvavivecana (p. 315) hold that the three days viz. 14th, amāvāsyā and Kārtika first, constitute the Kaumudī festival.[499]

Taken all in all Dīpāvalī spreads over about five days. The whole festival comprises five principal items spread over five days, viz. worship of wealth, the celebration of Visnu's victory over Narakāsura, worship of Laksmī, victory of Visnu over Bali and dice-play and the exchange of brotherly and sisterly affection. There are illuminations and the discharge of crackers on almost all the five days from the 13th of the dark half of Āśvina This last is called in Gujarat and Saurāṣtra 'Dhanteras'. Before and on this day houses are painted and decorated, the courtyards of houses are cleaned, and metal vessels are polished and illuminations begin. The Padmapurāna VI. 124. 4 refers to illuminations on the 13th of the dark half of Kārtika (by the pūrnimānta reckoning). Skanda quoted by Nirnayāmrta provides for lighting lamps at the advent of night on Kārtika dark

13th outside the house in honour of Yama in order to avoid accidental death[500]

The Bhavisyottara contains a lengthy description of the four days of the Divālī festival from the 14th. I shall take that chapter as basis and add, where necessary, other passages from other texts

On the 14th of the dark half of Āśvina[501] (or of Kārtika in the pūrnimānta reckoning) persons afraid of Hell should take an oil bath at the time of daybreak, should whirl over their heads the twigs of Apāmārga tree together with clods of ploughed land and the thorns (of the twigs) The mantra to be repeated is noted below[502] Then the purāna provides for tarpana (satiation with *anjalis* of water &c mixed with sesame) to Yama and mentions seven names of Yama.[503] Then the purāna provides that a lamp should be lit for Naraka (i. e. for the avoidance of Naraka) and that in the evening illumination with charming lamps should be provided in the temples of Brahmā, Visnu, Śiva and others, in *mathas* (monasteries), in rooms for implements, on *caityas* (mounds on which sacred trees grow), in assembly halls, on rivers, and ramparts, in parks, wells, principal roads and in the women's apartments, in shrines of siddhas, Arhats (Jaina saints), Buddha, Cāmundā, Bhairava, in isolated stables for horses and elephants (verses 15–17) Other texts provide that on this day

502. हर पापमपामार्ग भ्राम्यमाण' पुन पुन। आपद किल्बिष चापि ममाशेषहर सर्वदा। अपामार्ग नमस्तेस्तु शरीर मम शोधय। भविष्योत्तर 140 9 अपामार्ग (literally, that washes away or removes) is a plant called Achyranthis Aspera (in Marathi आघाडा) used in incantations, medicine etc. It is frequently mentioned in अथर्ववेद IV 17,6–8, IV. 18 7–8, VII. 65. 1–2, vide also वाज सं. 35 11 अपामपमप किल्बिषमप. क्षुत्याममो रप.। अपामार्ग त्वमस्मदप दुष्वप्न्य सुव॥

503 The names are differently quoted by मद. पा 296 from बृहन्मनु as यमाय धर्मराजाय मृत्यवे चान्तकाय च। वैवस्वताय कालाय सर्वभूतक्षयाय च। औदुम्बराय दध्नाय नीलाय परमेष्ठिने। वृकोदराय चित्राय चित्रगुप्ताय वै नम॥, These are quoted by व. क्रि. कौ. p 459, नि. सि. p. 199 These are पद्म VI 124 13–14. It may be noted that these are 14 names of यम corresponding to the tithi being 14th. The verse यमाय " क्षयाय च is भविष्य 140 10. The verses mentioning 14 names of यम are quoted by हे (on व्रत vol II p. 352).

in the midst of the bath one should whirl over one's body twigs and leaves of apāmārga or of gourd or of prapunnāta (called Tāklā in Marathi) for the removal of hell and that one should light a lamp with four wicks in memory of Narakāsura. It was believed[504] that Laksmī came to dwell in oil and the Ganges came to all waters on the 14th in Dīpāvalī and he who would take an oil bath on this morning would not see the world of Yama. In modern times, people in the Deccan after their bath on 14th crush under their foot a bitter fruit called Kārīt, which probably represents Narakāsura. The oil bath was to be taken about the time of arunodaya, but if for some reason it could not be done then it may be taken even after sunrise.[505] The Dharmasindhu says that even *yatis* (ascetics) should undergo the oil bath on this day. It appears probable that originally the 14th was called Narakacaturdaśī because Yama was to be propitiated for fear of Hell. Later on the legend about the killing by Krsna of Narakāsura, king of Prāgjyotisa city (Kāmarūpa), said to have been born of the Earth when it came in contact with the Varāha incarnation of Visnu, was pressed into service. People now-adays remember only Narakāsura on this day and hardly any one performs Yamatarpana.[506] The depredations of Narakāsura are narrated in the Visnupurāna V. 29 and in the Bhāgavata X. (uttarārdha) chap. 59. He deprived Aditi, the mother of gods, of her ear ornaments, Varuna of his umbrella, Mandara of a peak called Maniparvata and kidnapped 16100 girls of gods, siddhas and kings and imprisoned them in his palace.[507] Krsna killed him and if Purāna descriptions are to be treated as historical Krsna's actions were prompted by great pity

The Tithitattva notes that there is a usage of eating fourteen kinds of vegetables on this day in order to correspond with the 14th tithi, enumerates them from Nirnayāmṛta and recommends that this should be followed.[508]

Several works such as the Varsakriyā-kaumudī and the Dharmasindhu prescribe that[509] on the evenings of the 14th of the dark half and amāvāsyā of Āśvina men with firebrands in their hands should show the way to their pitṛs (deceased ancestors) with the mantra 'May those men in my family who were cremated and those who had no cremation performed for them and those that were burnt only by resplendent fire (without religious rites?), reach the highest state (or goal); may those (pitṛs) who, leaving the world of Yama, came for the *Mahālaya śrāddhas* (in the dark half of Bhādrapada or Āśvina acc to pūrnimānta reckoning) find their way by the brilliant light (of the firebrands) and reach (their own worlds)

The medieval texts prescribe on 14th of Āśvina[510] dark half the performance of the following acts, viz oil bath, tarpana of Yama, lighting lamp for Naraka, illuminations at night, holding firebrands, worship of Śiva, worship of Mahārātri, taking food at night only Out of these only three (viz oil bath, lighting a lamp for Naraka and night illumination) are now-adays generally performed and the rest are omitted. After the bath people put on new clothes and ornaments and take a repast of sweets and the like and in the noon there is a sumptous feast There is a good deal of discussion in the Nirnayasindhu (p. 197), P. C (p. 241), Dharmasindhu (p 104) about the time when oil bath is to be taken, if the 14th is mixed up with the 13th and amāvāsyā That is passed over here

Narakacaturdaśī is also called Bhūtacaturdaśī in Krtyatattva (p. 450).

On all the three days, viz. 14th of dark half of Āśvina, amāvāsyā, and the first of Kārtika-śukla an oil bath in the morning is prescribed for him who desires wealth and prosperity.

Āśvina amāvāsyā is a very important day. One should take an oil bath in the morning[511] and perform the worship of Laksmī for the removal of *alaksmī* (bad luck, penury) Some texts add that the barks of five trees[512] should be boiled in water for the bath and the person should have lights waved before him by women. The Bhavisyottara (in chap 140, verses 14–29) describes the celebrations on amāvāsyā at some length. Briefly it comes to this. In the morning one should take (an oil) bath, worship gods and pitrs and perform the pārvana śrāddha with curds, milk, ghee and feed brāhmanas with various edibles. Then in the afternoon the king should proclaim in his capital 'today is the sovereignty of Bali; O people! enjoy yourselves'. People also in their houses should make merry with dance and music, should offer tāmbūla to each other and anoint their bodies with saffron powder, dress themselves in silken robes and wear gold and jewels, young women move about in groups wearing brilliant clothes, the houses should be full of rows of lamps, handsome maidens should cast rice grains about and the waving of lamps (nīrājana) should be resorted to which confers victory. Towards midnight the king should move about in the capital on foot to see the fun and charm of the festival and then return to his palace. When midnight is past and people's eyes are heavy with approaching sleep, the women in the city should create great noise by beating winnowing baskets and drums and should drive out *alakṣmī* (ill luck) from the courtyards of their houses. Hemādri (on vrata vol. II. pp. 348–349) quotes from Bhavisya certain additional items: 'no one except children or ailing persons should take a meal by day, one should worship Laksmī in the evening and should illuminate with treelike rows of lights shrines of gods, squares where four roads meet, cemeteries, rivers, mountains, houses, bottoms of trees, cowpens, caves. They should decorate shops where merchandise is bought and sold with white cloth and flowers, then feed

brāhmaṇas and hungry persons in places surrounded by lamps and take dinner dressed in white garments and decked with ornaments. The Nīlamata-purāṇa calls this amāvāsyā night 'Sukh-suptikā' and describes it (verses 505–510) in the same way as Hemādri's quotation does[513] In Bengal Kālī is worshipped on this day, who it is said is both Lakṣmī and Sarasvatī In modern times this is a day specially for merchants and traders. On this day they worship their books of account, invite friends, customers and other traders and give them tāmbūla and some sweets. Old accounts are closed and new ones opened. There is a popular legend that Brahmā gave to brāhmaṇas *rakṣābandhana* (Śrāvaṇa Full Moon day) as their festival, *Dasarā* to kṣatriyas, Divālī to traders and Holikā to Śūdras The night of the worship of Lakṣmī[514] is called Sukharātri, since Lakṣmī gives up her sleep on the amāvāsyā when the sun is in Libra (or Balance) and it is provided in some works that at the dawn of Sukharātri when the house is illuminated by lamps one should honour one's relatives with words of complimentary queries and worship Lakṣmī, that removes the taint of ill luck, with auspicious flowers, sandal-wood paste, curds, yellow pigment and fruits The Kṛtyatattva quotes a verse "when there is 14th tithi in a portion of the day and there is amāvāsyā on the night of that day Lakṣmī should be worshipped and (that night) should be known as Sukharātrikā" and then gives an elaborate procedure of the worship of Lakṣmī. provides that on this Sukharātri not only Laksmī but also Kubera[515] is to be worshipped.

The first of Kārtika-śukla is regarded as one of the three most auspicious days of the year. The Dharmasindhu [516] remarks that though the three days from the 14th tithi are designated Dīpāvalī yet that day which has Svāti-naksatra is most commended. It may be stated that Balipratipadā is often conjoined to Svāti-naksatra. On this day also an oil bath is obligatory. The most important item on this tithi is the worship of Bali. The Bhavisyottara (140. 47–73) describes this worship of Bali as follows: The king should at night draw the figure of Bali having two arms on a circle made on the ground with five coloured powders; the image should have all ornaments and should have Vindhyāvali (Bali's queen) near him, should be surrounded by asuras like Kūsmānda, Bāna, Mura and others, should wear a crown and ear ornaments; the king should himself offer worship in the midst of his palace together with his brothers and ministers with several kinds of lotuses and offer sandalwood paste, incense and *naivedya* of food including wine and meat and employ the following mantra[517] 'salutation to you, O king Bali, son of Virocana, enemy of gods and the future Indra, accept this worship.' Having thus worshipped he should keep awake at night by arranging for dramatic spectacles presented by actors based on stories about ksatriyas. Ordinary people also should establish inside their houses on a couch the image of king Bali made with white rice grains and worship it with flowers and fruits. Whatever gifts,[518] large or small, are made

on this day become inexhaustible and bring delight to Viṣṇu. The Kṛtyatattva (p 453) provides that three añjalis of flowers should be offered to Bali The Bhaviṣyottara adds 'this tithi increases the dominion of Bali; baths and gifts made on this tithi in Kārtika yield a hundredfold reward'

If the pratipad is mixed with amāvāsyā or dvitiyā, the worship of Bali, the proper time of which is night, should be performed on pratipad mixed with amāvāsyā, since Hemādri quotes from Padma 'Śivarātri and Bali's day should be observed on the day when the tithi is mixed with the preceding tithi' and on account of the yugma-vākya Mādhava also is of the same [519] opinion

Bali was the son of Virocana and grandson of Prahlāda, a great devotee of Viṣṇu. *In the Vanaparva (28 2) Bali asks his* grandfather Prahlāda the question 'which is better, *kṣamā* (forbearance) *or tejas*' (vigorous action) In the Śāntiparva 225 13 it is said that Bali felt jealous of brāhmaṇas The story of Bali who had become very powerful and made gods lose their *tejas* is narrated in Brahmapurāṇa 73, Kūrma I. 17, Vāmana chap 77 and 92, Matsya chap 245–246 and Bhaviṣyottara 140 Bali began an Aśvamedha Viṣṇu assumed the form of a dwarf brāhmaṇa student and begged for land that would be measured by his three steps Though warned by Śukra that the dwarf was really Viṣṇu, Bali promised to give land equal to three steps Then the dwarf grew larger and larger and covered heaven and earth in two steps When Vāmana asked Bali where to plant the third step Bali told him to plant it on his back and thus Bali was thrust into the nether regions. Bali's adherence to his plighted word conferred on Bali the overlordship of *pātāla* and the position of the future Indra. This story is an ancient one. The Mahābhāsya[521] on Pānini III I. 26 states that when a person recites the story of Bali's imprisonment (in *pātāla* by Visnu) or represents it on the stage people use such phraseology as 'Balim bandhayati' (he imprisons Bali), though Bali was imprisoned a long time ago. This makes it certain that the story was embodied in dramas and poems more than two thousand years ago.

The Balipratipadā appears to be called Vīrapratipadā[522] in the Vāmana-purāna. It is also called Dyūtapratipad (Krtyatattva p. 452) The purānas[523] say that on that day Śiva was defeated in dice-play by Pārvatī, that Śankara became sad, while Gaurī remained happy. Therefore, on this day in the morning men should resort to gambling. Whoever succeeded on this day in gambling would find that the whole year thereafter was beneficial to him but if he suffered defeat in gambling that day he would lose his wealth that year. In Ellora cave No. 21 Śankara and Pārvatī are shown as playing with dice; vide plate 38 in 'Ellora' by Balasaheb Pant-Pratinidhi of Aundh. In many parts of India people engage on this day in gambling and fortunes are often lost or made on this day. Even in a comparatively small country like Nepal gambling stakes soared up to three million rupees in 1955 on the Balipratipad day.

521. On वार्तिक 6 of पा. III 1 26 the महाभाष्य says 'कंसवधमाचष्टे कंसं घातयति बलिबन्धमाचष्टे बलिं बन्धयति', then on वार्तिक 15, the महाभाष्य says 'इह तु कथं वर्तमानकालता'. Vide note 330 for this sentence. 'अत्रापि युक्ता। कथम्। ये तावदेते शोभनिका नामैते प्रत्यक्षं कंसं घातयन्ति प्रत्यक्षं च बलिं बन्धयन्तीति।' शोभनिकाः means actors in a dramatic representation.

The printed वामन (chap 92 56–57) reads 'दीपप्रदाननामासौ तव भावी महोत्सवः।' पुष्पदीपप्रदानेन' etc It is likely that the true reading is वीर प्रतिपद् आप्य as in का. त. वि. p 321 (वीर being addressed to बलि).

On this day also there should be illuminations. It is said 'by lighting[521] lamps during (the day of) Bali's domination Laksmī becomes stable; this is called Dīpāvalī because there is waving of lights in this festival. Having reached (the day of) Bali's domination how will lamps be burning in the houses of those who do not observe the festival of the rows of lamps?'

The Dharmasindhu furnishes[525] a long list of the observances on this *pratipad* day according to the several purānas and digests, viz. worship of Bali, illuminations, holiday for and worship of cows and bulls, worship of Govardhana, the tying of Mārgapālī (lit protectress of the road), wearing new clothes, dice-play, waving of lights before men by women (whose husbands are alive), and tying up an auspicious garland. In modern times only three out of these, viz worship of Bali, illuminations and gambling are observed and the rest are hardly observed anywhere Therefore only brief references will be made to the rest Cows, calves and bulls are to be worshipped with two mantras (quoted in note) and decorated and cows are not to be milked and bulls are not to be made to carry burdens this day. This is to be done in the morning of Kārtika pratipad. If it be mixed up with[526] the 2nd it should not be done on that day as that would lead to the death of one's sons, wife and loss of wealth, but this should be observed when pratipad is mixed with amāvāsyā. Devala prescribes this and remarks that by the worship of cows three prosper, viz people, cows and the king As regards Govardhana-pūjā, those who are in the vicinity of Govar-

dhana (a hill near Mathurā) should go to it and worship in the morning, while others not near it should prepare a Govardhana with cowdung or with heaps of cooked food or draw it in a picture and worship it along with Gopāla (Krsna) and offer all the 16 upacāras to Govardhana and Gopāla (Krsna) with mantras which pointedly refer to Krsna's giving protection to the settlement of cowherds (Gokula) against the heavy downpour of rain to the discomfiture of Indra. The sankalpa is given in the note.[527] The naivedya is to be on a grand scale. Therefore, the Smrtikaustubha (p. 174) states that Govardhana-pūjā[528] is called Annakūta (heap or hill of food) in Padmapurāna. Vide Var. 164 for Govardhana and Annakūtaparikrama The Dharmasindhu provides that a *homa* should be performed with the two verses 'ā gāvo agman' (Rg. VI. 28. 1) and 'praite vadantu' (Rg. X. 94. 1). Mukerji (pp 150–152) describes how Govardhana-pūjā is carried on in some out-of-the way rural tracts in United Provinces, though it has become altogether defunct elsewhere. Vide I. A. vol. 60 pp. 187–190 and vol. 61 pp. 1 ff and pp. 231 ff for description of the Gāyadānr festival observed in Bihar, Orissa and some other parts on Kārtika first of bright half in the afternoon in which cows gaily stamped with circular stains of red and blue on their skin and horns glistening with oil and red ochre chased a puny pig with their pointed horns and killed it.

In the afternoon of the pratipad (Kārtika-śukla) the tying of Mārgapālī takes place.[529] A rope of kuśas or kāśas (Saccharum spontaneum) should be made according to the usage of one's family and tied to a tall pole and a tree in the east; one should bow to it and offer a prayer to it with the mantra (quoted in the note 529) and all including the king and brāhmanas accompanied by cows, elephants and the like should pass by the

way underneath the rope. In the same way a strong rope of kāśas or the like should be made and a tug of war should ensue, the rope being frequently pulled on one side by the princes and on the other by persons of lower castes. The pulling of the rope should be done in front of a temple or the palace or where four roads meet and an equal number of strong men should be selected for each side. A line should be drawn behind each side. If the persons of lower castes succeed in drawing the other side towards them then it should be held that the king will be victorious thereafter for one year.[530] The Nīrājana ceremony by women should be performed in the morning (if the pratipad is mixed with dvitīyā) and the Mangalamālikā (a series of auspicious rites or auspicious garlands) should be performed in the evening on the 2nd tithi (if pratipad exists only for a short time and is followed by dvitīyā).[531]

As shown above, the three days from Āśvina-kṛṣṇa 14th are spoken of as days of *Kaumudīmahotsava*.[532] The Bhaviṣyottara and Padma derive the word Kaumudī from 'ku' (earth) and the root 'mud' to be delighted, the meaning being 'in which people find delight on the earth among themselves' and then another etymology is suggested, viz kumudas (white water lilies) are offered to Bali in this festival.

In the Vedic period and for some centuries thereafter certain rites were performed in the month of Āśvina or in Śarad such as the Āśvayujī and Āgrayaṇa or Navaśasyeṣṭi. The first is one of the seven pākayajñas mentioned by Gautama-dharmasūtra (VIII. 19). The first was performed on the Full Moon day of Āśvina. Vide H. of Dh. vol. II, p. 827 for a description of Āśvayujī and pp. 827–29 for Āgrayaṇa. But it is not possible to trace the Divālī festival to these rites. How the Divālī rites first arose cannot be stated with any approach to

plausibility. In the Anuśāsana parva it is said that the donor of lamps shines in the heavens like a row of lights (dīpapradah svarga-loke dīpamāleva rājate, 98 51). Some writers regard these as a reference to the Divāli. But it is not so clear as to place the matter beyond doubt In I. A. vol. 32 pp. 237–239 Mr. B A Gupte contributed a paper on 'Divali folklore'. He refers to the several legends and characteristics connected with the Divālī, viz. the killing of Narakāsura, depriving Bali of his empire, the crowning of Rāma and Vikrama in these days of Divālī and illuminations and says that the origin must be sought in the movement of the earth round the sun, the change of season, the end of the rice crop and the manuring of soil for the second crop. The connection he traces is rather remote and somewhat fantastic and I am afraid that his theory of origins will appeal to very few in these days.

On the 2nd of the bright half of Kārtika occurs a very fine festival called Bhrātrdvitīyā or Yamadvitīyā. The Bhavisya states:[533] 'on the 2nd tithi of Kārtika bright half Yama was treated by Yamunā to a dinner in her house; therefore this tithi became declared in the world as Yamadvitīyā; wise men should not take mid-day meal in their own houses but they should take food from the hands of the sister through affection, as doing so increases one's welfare or prosperity. Gifts should be made to sisters; all sisters should be honoured with golden ornaments, clothes, reception and meals; but if there be no sister, one should honour a woman whom he regards as sister (uncle's or aunt's daughter or a friend's sister).' The digests add further details. One should[534] do worship to Yama and Yamunā and to Citragupta, and brothers and sisters should offer *arghya* (water in token of respectful reception) to Yama. The procedure is briefly this. In the morning the sister should invite the brother, make him

take at mid-day a bath with scented water and unguents rubbed on his body; she along with the brother should worship Yama and Yamunā with arghya and offer handfuls of flowers. The arghya mantra is[535] 'Come, come, O Yama, son of the Sun; you that carry in your hand a noose; accept this worship offered on Bhrātṛdvitīyā and also arghya; salutation to you!' Then two more mantras may be addressed.[536] 'O Dharmarāja, salutation to you, the elder brother of Yamunā; O son of the Sun, protect me along with your servants; salutation to you. Salutation to you, O Yamunā, sister of Yama and honoured by people, always confer on me favours, O daughter of the Sun, salutation to you!' After this she serves food to her brother with the verse 'Brother! I was born after you; partake of this pure food for pleasing Yama, particularly Yamunā'. If the sister be older than the brother she should say 'I was born before you'. Then after the brother finishes his meal she should deck him with sandalwood paste and then herself partake of the food. Some works like the Vratarāja (pp. 78–91) present a far more elaborate procedure, which is passed over here but two matters provided for by it may be mentioned. The first is that a person before going to his sister's house should mutter ten names of Yama (quoted in note[537]). The second is that the sister is to worship images of Yama and of eight mythological personages (Mārkandeya, Bali and others) supposed to be immortal for the increase of her brother's life[538] In modern times hardly any religious ceremony is performed except that residents of places near or on the banks of the Yamunā river (Jumna) bathe in the Jumna and there is a *mela* on the river on this day. The only thing generally done is the brother's visiting his sister, dining at her house, light being waved before him and his making some presents to the sister.

This festival of Bhrātṛdvitīyā is really an independent one, but it was probably tacked on to the three festive days of Divālī in order to lengthen out the days of fun and joy. Sisters, when after their marriage they leave their brother's home, may not meet for years and further the sister may have become rich and the brother a poor man or *vice versa*. Our ancient writers evinced a keen appreciation of the bonds of disinterested affection between brothers and sisters and set apart a day in the year for their meeting to enable them to go over their sweet memories of childhood and to re-live for a day at least their early life which had gone forever. A religious tinge was added to the festival by recalling the two mythical personalities of Yama and Yamī, that figure in the famous Yama–Yamī hymn (Ṛg. X. 10). I should like to digress a little and strongly protest against the conclusion drawn by certain Western Sanskrit scholars that the hymn is an indication of the prevalence of the usage of the marriage of a brother and a sister among ancient Aryans. The hymn is a purely imaginative effort 'which bodies forth the forms of things unknown', as in the case of Ṛg. X. 119 where the poet imagines what Indra must have felt when treated to huge portions of Soma beverage. In Ṛg. X. 10.10[539] the sage makes it clear that in *future* ages something like what was delineated in his fantasy might occur (namely, sisters might do unsisterly acts). Macdonell in his 'Vedic Mythology' (pp. 172–173) indulges in some facile assumptions. Yama may be an Indo-Iranian divinity, but Yamī does not occur in the Avesta at all, as he himself admits, but only in later Parsi writings. Therefore, what is stated in these later writings should not be foisted upon the sages of the Ṛgveda. He supposes that the sage in Ṛg. X. 10 indulges in propaganda for exonerating Yama from incest. Propaganda is well-known to Western countries in the 19th and 20th centuries A D The Ṛgveda nowhere states that the human race was produced from Yama and Yamī. There is no warrant for saying that Yamī is Indo-Iranian and consequently the myth of the human race being born from a brother and sister is not Indo-Iranian Pargiter in AIHT (p. 70) follows the ball set rolling by Macdonell and others and boldly asserts that, when the Vāyu (in 93.12) says that Nahuṣa had six sons born of pitṛkanyā, Virajā, the word pitṛkanyā means 'sister' and Nahusa married his 'sister or half sister'

539. आ घा ता गच्छानुत्तरा युगानि यत्र जामयः कृणवन्नजामि। ऋ. X. 10 10. 'Those later ages might come when sisters might do what is not sister-like.'

and that union between brother and sister was not unknown as Ṛgveda X. 10 about Yama and Yamī shows. One suspects the motives of a writer like Pargiter who held high judicial office in India, when he does not explain why 'pitṛkanyā' was used and not 'svasṛ', when he pays no heed to the fact that in many places in Vāyu (72. 5, 73. 1–2, 26, 36, 40, 45, 77 74) Menā, Acchodā, Pīvarī, Gauh, Yaśodā, Virajā herself, Narmadā and Gandhakālī are spoken of as 'pitṛnām mānasī kanyā', that Vāyu (72), Matsya (13. 2–9) and other Purānas speak of seven groups of pitṛs and set out how from the mind-born daughters of pitṛs several scions were born Virajā (described as pitṛkanyā in Vāyu 93 12 which Pargiter naively renders as father's daughter i e. sister) is spoken of in the same Purāna (Vāyu 73. 45) as the 'mind-born daughter' of these (i. e of Pitṛs) in the plural and not as 'of the father'. Writers like Pargiter sometimes create more riddles by their so-called research than they can be said to have solved.

The Padma asserts that those who please their married sisters with presents of clothes and the like are not subject to any quarrel for a year, nor to danger from enemies Both Bhavisyottara and Padma state 'He who eats a meal prepared by his sister's hand on the day on which king Yama was served in this world a meal by Yamunā through affection secures wealth and the best of foods'.

In Vedic times and in early smṛtis like those of Manu (II. 11) and Yāj. (I 53) it was difficult for a brotherless maiden to get married (vide H of Dh vol II p 435) But from this it is a far cry to say that the Bhrātṛdvitīyā owes its origin to this idea or practice.

CHAPTER XI

Makarasaṅkrānti and Mahāśivarātri

Makara-Saṅkrānti. This is a very important religious observance and festival. About 70 years ago (in the author's boyhood) it occurred on the 12th or 13th January according to the several Indian almanacs then current, but now it falls, owing to the precession of the equinoxes, on the 13th or the 14th of January in the month of Pausa. Sankrānti means 'the (apparent) passage of the sun from one rāśi (sign of the Zodiac) to the next following' and hence the rāśi in which the Sun enters is designated as the Sankrānti of that name [540] When the Sun leaves the rāśi called Dhanus and enters the Makara-rāśi that is called Makarasankrānti The rāśis are twelve and the Sankrānti names with their western equivalents are given in the note. [541] There are only twelve sankrāntis even if there be an intercalary month in some year. Everyone of the twelve sankrāntis was regarded as a holy day. The Matsya-purāna (chap 98) deals with the completion of Sankrānti-vrata. Briefly, it provides that on the day previous a person, whether male or female, should take food only once in the noon and on the Sankrānti day should brush his teeth and then take a bath with water mixed with sesame.[542] The person should offer to a self-restrained brāhmana householder three vessels containing edibles together with a cow intending them to be for Yama, Rudra and Dharma and repeat four verses one of which is as follows: "As I do not make any difference between Śiva, Visnu, the Sun and Brahmā, may Śankara (Śiva) who pervades

the Universe be always a bestower of welfare on me!'.[543] The person should make, if able, further gifts of ornaments, a bedstead and golden jars (two) to the brāhmana; but, if poor, should offer only fruits to the brāhmana. Then he should take his meal but without oil and should feed others according to his ability. Women also should perform this vrata. Great merit was attached to a bath in the Ganges on a sankrānti, on an eclipse and on New and Full moon, as such a man reached the world of Brahmā.[544] A bath with ordinary water (not heated) was obligatory (*nitya*) on every sankrānti, since the Devipurāna declared:[545] "the man who would not take a bath on the holy day of Sankrānti would be for seven lives diseased and poor; whatever offerings are made to gods and pitrs by men on sankrānti are returned to them by the Sun again in several future lives".

It may be stated that in ancient texts the entrance of the Sun alone in a rāśi is not regarded as holy time, but the entrance of all planets in a naksatra or rāśi was deemed to be a holy time.[546] Hemādri (on Kāla p. 437) and the Kālanirnaya (p. 345) quote three verses[547] specifying the holy times (*punya-kāla*) of the passage of the Sun and planets as follows: in the case of the Sun the punya-kāla is 16 ghatikās before and after the moment of the Sankrānti; for the moon it is one ghatī and thirteen *palas* on both sides, for Mars four ghatikās and one pala, for Mercury three ghatikās and 14 palas, for Jupiter[548] four

Though the planets also have sankrāntis, later writers hold that the word *saṅkrānti* by itself means only Ravi-sankrānti, as stated by the Smrti-kaustubha p. 531.[549]

The twelve Sankrāntis in the year are grouped into four classes, viz. there are two *ayana* sankrāntis (that is Makara-sankrānti from which *udagayana* starts and Karkata-sankrānti from which Daksināyana starts), two Visuva sankrāntis (that is, Mesa and Tulā sankrāntis when the day and night are equal in length), the four sankrāntis called Sadaśīti or Ṣadasīti-mukha (i. e. Mithuna, Kanyā, Dhanus and Mīna) and Visnupadī or Visnupada (that is, Vrsabha, Simha, Vrścika and Kumbha)[550]

all-pervading on account of the division into very small and large parts in the form of year, *ayana*, season, month, fortnight, day and the like. Devī bestows rewards in accordance with the divisions into meritorious and sinful (actions).[551] Even one act done at that time (of Saṅkrānti) yields results multiplied crores of times. From dharma (righteous acts) increase life, kingdom, progeny, happiness and the like, from *adharma* (unrighteous conduct) spring diseases, sorrows and the like; whatever is donated and whatever japa is performed near (i.e. at the time of) Viṣuva (Meṣa and Tulā) saṅkrāntis and at the *ayana* (Makara and Karkaṭa saṅkrāntis) becomes inexhaustible; the same holds good about Viṣṇupada and Ṣaḍaśīti-mukha'.

The exact moment of time when the sun leaves one rāśi and enters the next following rāśi is impossible of being marked by the eyes of flesh (ordinary human eyes). Therefore thirty ghaṭikās before and after the moment of Saṅkrānti are said to be the time.[552]

In order to convey how infinitesimally small is the time of the Sun's entrance into a rāśi after leaving another the Devī-purāṇa has[553] the following: "thirtieth part of the time taken by the throb of the eye of a man sitting happily at ease is called 'tatpara'; one hundredth part of 'tatpara' is called 'truṭi'; one hundredth part of 'truti' is the (duration of) time of the sun's

passage (from one rāśi into another). As it is not possible to perform on such an infinitesimally small point of time the rites prescribed for performance on saṅkrānti, one has to accept periods of time near this moment as the proper time. The first rule is that the nearer[554] the ghatikās are to the time of actual entrance the holier they are. Therefore it is laid down that in saṅkrāntis the puṇyatama-kāla (holiest time) is sevenfold[555] viz. three, four, five, seven, eight, nine or twelve ghatikās; during those periods real merit is accumulated. If one cannot perform the prescribed rites within these limits thirty ghatikās are permitted as the highest limit in the texts for the *puṇyakāla* (holy time) for all saṅkrāntis except Sadaśīti (in which the maximum puṇyakāla is 60 ghatikās) and Viṣṇupadī (where it is 16 ghatikās before and after).[556]

Each of these twelve saṅkrāntis in the year is seven-fold (i. e. has seven different names) according as it occurs on a particular week day or in conjunction with certain classes of nakṣatras. The seven names[557] are: Mandā, Mandākinī, Dhvāṅkṣī, Ghorā, Mahodarī, Rākṣasī, and Miśritā. A saṅkrānti (such as Meṣa or Karka or Makara) is called Ghorā if it occurs on Sunday, Dhvāṅkṣī on Monday, Mahodarī on Tuesday, Mandākinī on Wednesday, Mandā on Thursday, Miśritā on Friday and Rākṣasī on Saturday. Again, a saṅkrānti (like Meṣa or Karka and so on) is called respectively Mandā, Mandākinī, Dhvāṅkṣī Ghorā, Mahodarī, Rākṣasī, Miśritā according as it commences respectively on nakṣatras called dhruva, mṛdu, kṣipra, ugra,

cara, krūra, miśrita Vide note below[558] for the naksatras falling under these 7 groups It is further provided that the ghatikās from two (or three) to twelve said to be the holiest times (in note 555 above) are to be taken as respectively referring to the seven kinds of sankrānti i e two or three *ghatikās* is the holiest time in Mandā sankrānti, four ghatikās in Mandākini sankrānti and so on. It is laid down that Mandā sankrānti is beneficial to brāhmanas, Mandākini to ksatriyas, Dhvānksi to vaisyas, Ghorā to sūdras, Mahodari to thieves, Rāksasi brings success to vendors of liquor and Miśritā increases the (profit of the) avocations of Cāndālas, Pukkasas, of those whose business is of a terrible nature and of all craftsmen (vide Hemādri on Kāla pp 409–410 and Varsakriyā-kaumudi p 210 quoting Devīpurāna).

There is some conflict on the question of the general rule about the extent of *punyakāla* on a sankrānti. Śātātapa,[559] Jābāla and Marici prescribe the sixteen ghatikās before and after the moment of Sankrānti as the punyakāla for the performance of the religious acts prescribed on Sankrānti On the other hand, the Devīpurāna[560] and Vasistha lay down fifteen ghatikās each before and after sankrānti as the punyakāla This conflict is removed in various ways. One is to hold that the Devīpurāna is not restrictive but what it means is only this that lesser limits are meant to indicate that greater merit results by

their observance. Another explanation was to hold that the limit of 16 ghatikās applied to saṅkrāntis called Viṣnupadī.

A saṅkrānti may take place by day or at night. If Saṅkrānti occurs by day that whole day is puṇyakāla. If Saṅkrānti occurs by night, lengthy and complicated discussions occur in Hemādri, Mādhava and others. One rule evolved is that in ten saṅkrāntis excluding Makara and Karkaṭa saṅkrāntis the puṇyakāla is by day when those saṅkrāntis occur by night.

Several exceptions are engrafted on the general rule about 15 or 16 ghatikās before and after a saṅkrānti being the puṇyakāla. Therefore, several works like the Tithitattva (pp. 144–145) and Dharmasindhu (pp 2–3) give brief final conclusions on this topic. I summarize[560a] the conclusions of the latter work. On the Sun's passage in Meṣa and Tulā the puṇyakāla is fifteen ghatikās before and after S (some say ten ghatikās); in Vṛsabha, Simha, Vṛścika, Kumbha S, P is sixteen gh. before S; in Mithuna S, Kanyā, Dhanus and Mīna S, P is 16 gh. after S; in Karkaṭa S, P is thirty gh. after S; in Makara S, P is forty gh. after S. If Saṅkrānti occurs by day when a period of two ghatikās or less only remains before the close of the day then in the case of Mithuna, Kanyā, Dhanus, Mīna and also Makara saṅkrāntis P is before S for the gh. specified above against each; if S occurs in the morning at a period of two gh. or less from sunrise then in Vṛsabha, Simha, Vṛścika, Kumbha and also Karkaṭa S, P is after S for the period specified above. If S occurs at night but before midnight, P is latter half of the daytime before the S; if S occurs at midnight or later than midnight but in the night, P is on two days viz the latter half of the daytime before S and the first half of the day after S; this applies to all S except Makara and Karkaṭa. When Uttarāyaṇa begins in Makara in the night P is the day after S and if S begins in Karkaṭa at night P is the day prior; if Makara S occurs at evening twilight (i. e. during three ghatikās after sunset) then P is on the previous day; if Karka S occurs in morning twilight (i. e. during three gh. before sunrise) then P is on the day following the S.

This discussion about the puṇyakāla is necessary because a bath is to be taken and gifts are to be made during that time in order to secure the full merit thereof The general rule is that a

bath is not to be taken and a gift is not to be made at night. Parāśara[561] says 'a bath by day purified by the rays of the Sun is commended; bathing at night is not commended except on seeing an eclipse'. The Viṣnudharmasūtra says the same. But several exceptions were recognized The Bhaviṣyapurāṇa[562] provides 'one should not take a bath at night and particularly should not make a gift at night, but a bath and a gift may be made at night on proper occasions A gift at night is commended in an eclipse, marriage, saṅkrānti, pilgrimage, on death, on the birth of a child and at (before sitting down for) hearing *itihāsa* (Mahābhārata)' Gobhila[563] provides 'people may bathe and make gifts at night in eclipses, saṅkrāntis, marriage, in distress (or death) and on the birth of a child and in vratas undertaken for a desired object' A bath is therefore obligatory on every saṅkrānti and particularly in Makara-saṅkrānti. There are special recommendations about gifts in Hemādri on Kāla (pp. 414–419) which are taken by him from Viśvāmitra and which are borrowed by Nirnayasindhu (pp. 4–5), Samaya-mayūkha (pp 143–144) and others and which are as follows. gift of ram on Meṣa, of cows on Vṛṣabha, of clothes, food and drinks on Mithuna, of ghṛtadhenu[564] on Karkaṭa, of a conveyance with some gold on Simha, of clothes and cows on Kanyā, of different kinds of grains and seeds on Tulā, on Vṛścika of clothes and houses, on Dhanus of clothes and conveyances, on Makara

The Skanda[565] says 'He who donates *tila-dhenu* on Uttarāyana (i. e. Makarasaṅkrānti) secures all objects and obtains the highest happiness.' The Viṣṇudharmottara provides 'the gift of garments on Uttarāyana yields great reward (merit). A man becomes free from diseases by donating sesame and a draught bull'. The Śivarahasya declares that Śiva after he performed the Gosava sacrifice created sesame on Makara-saṅkrānti for the gratification of all men and provides 'men should bathe in water in which sesame are mixed and one should rub one's body with sesame; *tarpaṇa* of gods and pitṛs should be made with water in which sesame have been put; sesame should be given to brāhmaṇas on Uttarāyana saṅkrānti; one should eat sesame and perform *homa* with them; those who perform homa with sesame and honour brāhmaṇas shine in the heaven (as stars) like those who donate a thousand cows; auspicious lamps fed with oil of sesame should be lighted in Śiva temples and a brāhmaṇa should worship God (Śiva) with grains of rice and sesame'. The Kālikā-purāṇa (q. by Hemādri on Kāla p. 413 and Kṛtyakalpaa, Naiyata, pp. 366-67) provides: 'one should place on the top of (the linga emblem of) God (Śiva) the five jewels viz gold, diamond, sapphire, ruby and pearl; but if a man has none of these he may place in Uttarāyaṇa on the top of the linga gold one[566] *karṣa* or half karsa in weight; he should worship with plenty of ghee prepared from cow's milk and should donate ghee and a blanket after washing and pressing it; he should give condiments and a dinner to brāhmaṇas and ascetics and honour them with dakṣiṇā'.

greet each other by giving articles from simple sesame and jaggery to artistic sugared preparations of sesame coloured with saffron and go about saying 'take these sesame and jaggery and speak sweet words' (in Marathi)

The importance of *tilas* (sesame) is brought out in the following: A person[572] who uses sesame in six ways does not sink (is not unsuccessful or unlucky) i. e. who rubs his body with sesame, who bathes with sesame, who is pure and always offers water mixed with sesame (to his deceased ancestors), and who offers sesame into fire, who makes a gift of sesame and who eats sesame.

Gifts are made in these days on Makarasankrānti, but mostly by women. They honour priests by donating vessels (of clay, copper or brass) containing several things such as betelnuts and coins and also invite their women friends and distribute among them earthen vessels containing red powder, pieces of turmeric, betelnut and also separately several other things such as sugarcane stalks In south India there is a festival called Pongal[573] which corresponds with the Makarasankrānti observed in Northern and Western India, Pongal being the first day of the Tamil year. This South Indian festival lasts for three days.

According to the modern astronomical calculations, the winter solstice occurs on 21st December and on that day commences the Sun's apparent march towards the north. But in India people who follow the almanacs based on the ancient methods and data think that the Sun's march towards the north takes place on the 14th of January. They are thus about twenty three days behind the correct Makarasankrānti owing to the precession of the equinoxes. This fact was recognised even in the medieval Dharmaśāstra works For example, Hemādri[574]

says that twelve days before the (popular) day of a sankrānti, the real punyakāla occurs and therefore gifts and the like prescribed on the occasion of sankrānti should also be performed on the day twelve days prior to the popular sankrānti day.

The origin of the observances of Makarasankrānti cannot be very ancient. The Sun's apparent northward march for six months has been mentioned in Brāhmana and Upanisad texts at least a thousand years before Christ For example, the Śatapatha[575] Br. states 'That half moon which increases represents the gods and that which decreases represents the fathers. The day represents the gods and the night represents the fathers. And further, the forenoon represents the gods and the afternoon the fathers ...Now when he (the sun) moves northwards then he is among the gods, then he guards the gods; and when he moves southwards then he is among the fathers, then he guards the fathers.' The Chāndogya-Upanisad[576] contains a reference to the Sun's passage to the north during six months in the words 'from light to day, from day to the bright half of the month, from the bright half of the month to the six months during which the sun goes towards the north, from the months to the year, from the year to the Sun &c.' But here the word *udag-ayana* is not expressly employed The word 'ayana' occurs in the Ṛgveda III 33. 7 (āyannāpo ayanam-icchamānāh) 'the waters seeking a passage went rushing.' Here 'ayana' has the etymological sense of 'passage' or 'place' But in the grhyasūtras the word 'udagayana' in the sense of the sun's northward passage occurs. The

From नि सि p. 5 it appears that Aparārka also said in his comment on Yāj I 217 after quoting Visnudharmasūtra 77. 1–2 that the difference between the real Makarasankrānti day and popular Makarasankrānti day was twelve days But those words as quoted by N. S. from Aparārka are not found in the printed Aparārka at p. 426 (Ānandāśrama ed.).

The कौषीतकि-ब्राह्मण 19. 3 also has a striking passage 'स षण्मासानुदावृत्य तिष्ठते दक्षिणावर्त्यर्त्वृपेमे वसन्ति वैदुषतीयेनाह्ना यद्दयमाणा.'.

Āśvalāyana-grhya[577] prescribes the auspicious times for certain domestic rites as follows: 'in the northward passage of the sun, in the bright half of a month and on an auspicious naksatra, *caula* (child's tonsure), *upanayana*, *godāna* and marriage may be celebrated; according to some teachers a marriage may be celebrated at all times (not necessarily in northward passage of the sun &c.)'. But here no rāśi name appears In Jaimini VI. 8. 23 it is provided that rites for gods are to be performed in the northward passage of the Sun, some day in the bright half of the month and on an auspicious day. As a matter of fact, none of the ancient Śrauta, Grhya or Dharmasūtras mentions any rāśis or prescribes any auspicious or inauspicious times concerned with rāśis but only times in relation to naksatras Some people try to interpret the words '*susthe indau*' (when the moon is well placed i. e auspicious) in Yāj. I 80 as referring to rāśis, but they forget or ignore the fact that the earliest extant commentator of Yājñavalkya, Viśvarūpa, explains those words as referring to naksatras and not to rāśis. The subject about the introduction of rāśis will be briefly discussed in the next section on Kāla and Muhūrta. As udagayana had already been regarded for many centuries as an auspicious period, naturally Makarasankrānti from which the northward passage of the Sun starts became a very sacred day, when the rāśi system was introduced. Why so much importance was attached to sesame on this Makarasankrānti day it is difficult to say Probably in view of the cold prevailing at the time of the beginning of uttarāyana an oily substance like sesame easily available and of great food value was selected. In any case the observances and festival of Makarasankrānti do not appear to be much older than the beginning of the Christian era

In modern pañcāngas, Makarasankrānti, being deemed to be a deity, several curious matters are added, viz. sankrānti rides on some *vāhana* (principal vehicle or draught animal such as an elephant) and an upavāhana (as ancillary vehicle), she wears a garment either dark, white or red or of some other colour, she is supposed to carry a weapon (such as a bow or javelin),

she applies a *tilaka* of some substance (like *lac*, gorocanā), she is either young, middle-aged or old, her posture (sitting, standing &c.) is mentioned, the flower she holds, the food she eats, the ornament she wears—these are mentioned, her two names (out of the seven mentioned above on p. 215 note 557 based on the week day and the naksatra on which sankrānti takes place) are specified, she is supposed to come from one direction (east or the like), to proceed to another (such as the west &c.) and to cast a glance at a third direction; then her bodily form is described such as drooping lips, long nose, with nine arms (or the like). And the prognostications are as follows: whatever things Sankrānti accepts, their prices rise or they are destroyed and whatever she glances at is ruined; happy are the people in the direction from which she comes and unhappy are those in the direction she goes.

Mahāśivarātri: The 14th tithi of the dark half of a month is called Śivarātri, but the 14th of the dark half in Māgha (or in Phālguna according to the pūrnimānta reckoning) is the Śivarātri *par excellence* and is often designated Mahāśivarātri.

The Garudapurāna I. 124, Skanda I. 1. 33, Padma VI. 240, Agni 193 contain the Māhātmya of the Śivarātri on the 14th of the dark half of Māgha. Though some details differ, in all these the main outlines are the same.

All these praise Śivarātri-vrata highly. When after [578] observing a fast on that day, Śiva is worshipped with *bilva* leaves and *jāgara* for the whole night is observed, Śiva saves the man from hell and bestows enjoyment of happiness and moksa and the man becomes like Śiva himself. Gifts, sacrifices, austerities, pilgrimages and observances of vratas are not equal to even one ten-millionth part of Śivarātri.

The story that illustrates this extremely exaggerated praise of Śivarātri in the Garudapurāna seems to be the older of the three and therefore it is briefly set out here. There was a king of *nisādas* named Sundarasenaka on Mount Abu, who went out

to a forest for hunting with his dog. He bagged no animal and being oppressed by hunger and thirst he remained awake the whole night on the bank of a tank in a thicket of trees. Underneath a bilva tree there was a Śivalinga and in an effort to keep his body at ease he threw down leaves of the bilva tree which fell on the top of the linga without his knowing it In order to put down dust he (took water from the tank and) splashed it so that it fell on the linga and one of his arrows fell down from his hands on the linga through inadvertence which he took from the linga by falling on his knees before the linga In this way he unconsciously bathed the linga, touched it, worshipped it (with bilva leaves) and kept awake the whole night. In the morning he came back to his house and partook of food given by his wife. When he died in course of time he was seized by the myrmidons of Yama, when Śiva's attendants fought with them and liberated him and he became a sinless attendant of Śiva together with his dog In this way he collected merit without knowing it; if a person does with[579] full knowledge (what the niṣāda did without knowing) the merit is inexhaustible. The Agnipurāṇa expressly mentions the hunter Sundarasenaka[580]. The whole chapter of Garuda is quoted in the Varsakriyā-kaumudī pp. 512–513. The story in the Skanda is more elaborate. There it is a wicked *Kirāta* named Canda who killed fish by catching them in his nets and killed also many animals and birds. He had a wife who matched him in his cruelty. Thus passed many years One day he ascended a bilva tree taking water in a quiver desirous of killing a wild boar and passed the whole night without sleep keeping a watch and cast down many bilva leaves which fell on a linga at the bottom of the bilva tree. He also rinsed his mouth with water from the quiver, that fell on the linga. In this way he worshipped Śiva in all ways, viz he bathed (*snapana*) the linga with water, he worshipped linga with numberless bilva leaves and he kept awake the whole night and was without food that day. He alighted from the tree and began, after reaching the tank, to catch fish. Because he did not return home that night, his wife went without food and water and passed that night in anxiety. In the morning she came to that forest with some food for her husband and seeing her husband on the other side of a river, she placed the food on the river bank and began to

cross the river. They both bathed in the river, but before the kirāta could reach the food a dog came there and ate all the food. When the wife wanted to kill the dog the kirāta whose heart was softened persuaded his wife to desist from killing the dog. By that time it was noon (on amāvāsyā) and Śiva's attendants came there to take both the husband and wife as he had worshipped (though unknowingly) the linga and as both had fasted on 14th. The kirāta and his wife reached Śivaloka. The Padmapurāna (VI. 240. 32 ff) weaves, as the Skanda does, its story round a niṣāda.

There is a conflict of views about what the chief thing is in Śivarātri is. The Tithitattva holds that a fast is the principal thing in Śivarātri and relies on the words of Śaṅkara. 'On that tithi (Śivarātri) I am not so pleased with bath (of the linga) nor with clothes (offered to the linga) nor with incense nor by worship nor with the offering of flowers as I am pleased by a fast'.[581] On the other hand, Hemādri and Mādhava hold that Śivarātri means fast, worship and *jāgarana*[582] and all the three are apprehended as principal and quote passages from the Skandapurāna and Nāgarakhanda in support.[583] 'That man who observes a fast on Śivarātri for twelve years and who keeps awake (in dance and music) before me the whole night would reach heaven. That man, who worships Śiva and performs jāgara on the 14th, would not thereafter taste milk at mother's breast (i. e. would not be born again); the niṣāda, unknowingly worshipping a self-existent linga, observing a fast and jāgara, became free from sin and attained the position of the attendant of Śiva'.

In the Kālanirnaya[584] there is a lengthy discussion on the question whether the word 'Śivarātri' is used in a conventional sense (viz. a particular tithi) or in an etymological sense (every night on which some observance relating to Śiva is performed), or a metaphorical sense (viz a vrata, though the word expresses a tithi) or a *yogarūḍha* sense i. e. etymological *cum* conventional like the word *paṅkaja* (a lotus) The conclusion established is that the word Śivarātri is yogarūḍha like the word pankaja (lotus), which does spring from mud (so far the sense is etymological) but which is confined to only one thing viz lotus (so far there is rūdhi or convention) and does not apply to a frog.

Śivarātrivrata is both *nitya* (obligatory) and *kāmya* (optional). It is nitya because there are passages which lay down that sin follows if a man does not perform it[585]; 'the being that does not worship with devotion Rudra who is the lord of three worlds wanders through thousands of future lives' Besides, there are verses which lay down that the vrata should be performed every[586] year: 'O great goddess! a man and a chaste woman should every year worship Mahādeva with devotion on Śivarātri'. This vrata is optional because the texts provide the rewards of performing this vrata For example, vide p 85 above and p. 86 above for the maxim of *saṃyoga-pṛthaktva*.

This vrata according to the Īśānasaṃhitā[587] can be performed by all human beings 'The Śivarātrivrata destroys all

sins and confers enjoyment of happiness and moksa (final liberation) on all human beings including cāndālas'.

The Īśānasamhitā provides: a devotee of Visnu or Śiva or of another god, if he gives up Śivarātri, destroys all the fruits of his worship (of the deity to whom he is devoted). Everyone[588] who performs this vrata has to observe certain restrictions, viz. non-injury, truthfulness, freedom from anger, celibacy, compassion, forbearance and he has to be calm in mind, devoid of fits of passion and has to perform austerities and he should be free from malice; knowledge of this vrata should be imparted to such a one provided he follows his preceptor; if one imparts it otherwise, one goes to hell.

The proper time for this vrata is night, since, as stated in the Skanda[589] 'goblins, the Śaktis and Śiva (who wields the trident) move about at night and therefore these are to be worshipped at that time on caturdaśī.' The Skanda[590] provides 'A fast should be observed on that caturdaśī of the dark half that is joined to niśītha (i. e. that exists at that time); that tithi is the best and leads to companionship with Śiva'. Hemādri quotes Nāgarakhanda[591] as follows: on the 14th of the dark half of Māgha I shall go in the Kaliyuga on the surface of the earth at night and not by day. I shall undoubtedly transfer myself to all lingas, whether movable or permanently fixed, for the removal of the sins committed in the (preceding) year; therefore the man who offers worship to me at night with these mantras will be free from sin'. In the Īśānasamhitā it is said 'The first God (Śiva) appeared in the form of Śivalinga, whose refulgence was equal to that of a crore of suns, on the 14th of Māgha dark half. The tithi to be accepted for the Śivarātri

vrata should be one that covers that time. A man should perform this vrata on that tithi when the 14th covers the time before and after midnight.'[592] Hemādri also quotes a verse like this 'The 14th tithi called Śivarātri that covers *pradosa* should be accepted (for vrata); one should observe a fast on that tithi since there has to be a jāgara (in that vrata) at night.'[593]

Owing to the above somewhat conflicting dicta there is a great deal of discussion on the proper day and time for the vrata in Hemādri on Kāla (pp. 298–308), Kālanirnaya (pp. 297 ff), Tithitattva (pp 125–126), Nirnayasindhu (pp. 222–224), Purusārthacintāmani (pp 248–253) and other works Some works like the Nirnayāmrta[594] put emphasis on the word *pradosa* (in note 593) above, while others emphasize the word *nisitha* and ardharātra. The conclusions drawn by Mādhava (the prince of nirnayakāras) are stated here If caturdaśī covers both pradosa and niśītha, then the vrata should be observed on that day. If caturdaśī spreads over two days (i e. it is mixed with 13th and also with amāvāsyā) and 14th exists at the time of niśītha on both days, or if it does not so exist on any of the two days, then covering pradosa is the determining factor; where 14th covers pradosa on two days or does not cover pradosa on any of the two days, then existing at niśītha is the determining factor; if caturdaśī having extended over two days covers only one out of the two (pradosa and niśītha) on each day then conjunction with Jayā (i. e. 13th tithi) is the decisive factor.[595]

A brief description of how Śivarātrivrata was performed in ancient times may be gathered from Garudapurāna I. 124 11–23 After honouring Śiva on the 13th tithi the man who is to undertake the vrata should resolve to observe certain restrictions He should declare 'O God I shall keep awake the whole night on the

14th tithi. I shall make according to my ability worship, gifts, austerities and *homa*. O Śambhu! on 14th I shall take no food and shall take food on the next day. Oh Lord! be thou my refuge for securing enjoyment of happiness and mokṣa' The person observing the vrata should approach a teacher and should bathe (the linga) with *pañcagavya* and with pañcāmṛta. He should repeat the mantra 'Om namaḥ Śivāya' He should worship Śiva with the upacāras beginning with sandalwood paste and he should offer into fire sesame, grains of rice and boiled rice mixed with ghee. After this homa he should offer *pūrṇāhuti* (an offering made with a full ladle) and listen to music and good stories (about Śiva). He should again offer offerings at midnight, in the 3rd quarter of the night and in the 4th quarter. Having inaudibly repeated the mūlamantra (*om namaḥ Śivāya*) he should pray to Śiva about daybreak to forgive his sins with the words 'O God! I have worshipped in this vrata without obstacles through your favour; O Lord of the worlds! O Śiva! pardon me. Whatever merit I have won this day and whatever has been offered by me to Śiva I have finished this vrata to-day through your favour; O bountiful one! be pleased with me, and go to your abode; there is no doubt that I have become pure by merely seeing you.' He should feed persons who are devoted to contemplating (on Śiva) and should give to them garments, umbrellas and the like; 'O Lord of Gods! lord of all things! that bestoweth favour on people; may my lord be gratified by what I have given with faith.' Having thus prayed for forgiveness, the person undertaking this vrata may carry it on for twelve years. After obtaining fame, wealth, sons and kingdom he may repair to the city of Śiva; he should perform jāgara (on 14th) in all the 12 months of the year; the man undertaking the vrata after feeding twelve brāhmaṇas and donating lamps may secure heaven.

The Tithitattva (p. 127) adds some details which are interesting The linga is to be bathed with milk in the first watch of the night, with curds in the 2nd, with ghee in the 3rd and with honey in the 4th. The mantras in the four watches are respectively 'hrīm, Īśānāya namaḥ,' 'hrīm Aghorāya namaḥ,' 'hrīm Vāmadevāya namaḥ' and 'hrīm Sadyojātāya namaḥ.' The mantra at the time of offering arghya is also different in each of the four watches. It is further provided that there should be songs and dances in the first watch of the

night. The Varsakriyākaumudī (p. 513) provides that in the 2nd, 3rd and 4th watches also the person undergoing vrata has to perform worship, arghya, japa and listening to stories (about Śiva), to offer hymns of praise and make prostrations and at day-break he should pray for forgiveness with arghya water. If Māgha-krsna 14th falls on a Sunday or Tuesday, that is most commendable for this vrata.[596]

Later medieval digests such as the Tithitattva (pp. 126 ff), the Kālatattvavivecana (pp 197–203), Purusārthacintāmani (pp. 255–258), Dharmasindhu (p 127) provide an elaborate description of the procedure of Śivarātri vrata. The K T V. remarks[597] that the procedure of Śivarātri-vrata is different in the several purānas. For comparison with the one in the Garuda quoted above a summary of it from the Dharmasindhu is given here. On the 13th tithi the performer should take only one meal in the noon, on the 14th after finishing his usual morning duties and rites, he should make a sankalpa in the morning with a mantra 'I shall perform this Śivarātrivrata that yields great rewards; O Lord of the world! may it be without obstacles through your favour. On the 14th I shall be without food and shall take my meal on the next day for enjoyment of pleasures and *moksa*, O Lord! be you my refuge.' If the performer be a brāhmana, he should recite the two *rk* verses[598] 'rātrim prapadye' and cast water In the evening (of 14th) he should take a bath with black sesame, should apply the *tripundra* mark[599] with ashes to his forehead and also hold a rosary of *rudrāksa* (berry of Elaeocarpus Ganitrus), should go to a temple of Śiva at the beginning of night, should wash his feet, should take *ācamana* (should sip water) and should make a sankalpa 'I shall perform the pūjā of the first watch on Śivarātri'; if he intends to perform separate pūjās on all the four watches or if he wants to perform a pūjā only once he should say 'I shall perform the worship of Śiva on Śivarātri for securing the favour of Śiva' Then he should repeat the sage (Vāmadeva)

of the Śiva mantra of five letters (*Śivāya namaḥ*), the metre (Anustup), the Devatā (Sadāśiva) and it is to be employed for *nyāsa*, *pūjā* and *japa*. Then he should bow to the sage, metre and Sadāśiva and perform *nyāsa* on the several parts of the body from the heart with appropriate mystic letters and mantras (such as 'om namas-tat-purusāya namah hrdaye' to the last '*om yam astrāya phat*'); then he should worship the jar (*kalaśa*) and contemplate on Śiva as portrayed[600] in the verse quoted below. He should then establish a linga by performing the *prāṇa-pratisthā* and touch it and should invoke[601] Śiva with four mantras and pray Śiva to be present in the linga till the end of the pūjā. Then he should offer an *añjali* of flowers. If the linga is already permanently fixed or if the linga, though not fixed, has already been established with the necessary saṁskāras, he should omit the details from prānapratisthā to *āvāhana*. Then he should perform the remaining upacāras (out of 16) from *āsana* to the last. As regards snāna it is provided that the linga is to be bathed with pañcāmrta (vide note 218), with the *mūlamantra* (Śivāya namah) and the mantras 'āpyāyasva' (Rg I. 91. 16 ff) and should wash it with pure water with the three verses 'āpo hi sthā' (Rg. X. 9. 1–3). Then he should perform *abhiseka* (bathing of the deity) with water made fragrant with sandalwood, saffron and camphor to the accompaniment of the Rudra mantras[602] recited once or repeated eleven times and of the Purusasūkta (Rg. X. 90). At the end of snāna (of the linga) the performer should give *ācamana* water (to the linga) and perform tarpana with water mixed with aksatas for Śiva with eight names (Bhava[603] &c.) and the wives of these eight. After flowers the performer should offer 1008 or 108

CHAPTER XII

Holikā and Grahaṇa (eclipse)

Holikā. Holi or Holikā is a festival of unmixed gaiety and frolics throughout India, though all parts do not observe it in the same way. One element, viz bonfire, is present almost everywhere except in Bengal. Swinging of Krsna image on Phālguna Full Moon is done in Bengal, but it is not observed in several other parts of India The number of days during which this festival is observed also varies from province to province. Another item which is common to many parts of India is the sprinkling of friends with coloured water from bamboo or metal syringes or with red powder and this merriment is indulged in even now by persons in high places. In the Konkan men dressed as women accompanied by several persons go about with songs (often obscene) and music and dance. The only religious element is the worship of Krsna in Bengal and in some provinces where bonfires are made a priest is engaged to perform pūjā before the bonfire, people go round the fire throwing cocoanuts in the burning wood and grass, taking them out half-burnt and distributing the singed kernel among the people present as *prasāda.* In some parts people produce sounds by beating their mouths with the backs of their hands. It is not possible nor necessary to set out in this notice all the varying details of this festival throughout the whole of India.

This festival is very ancient. Originally the form of the word was Holākā and from references in the bhāsya of Śabara on the Pūrvamīmāmsā-sūtra (I. 3. 15–23)[610] it appears that it was in ancient times a usage very prevalent in the eastern parts of Bhārata. But Jaimini and Śabara appear to hold that

The जैमिनीयन्यायमालाविस्तर on this explains 'वसन्तोत्सवो होलाका.' This topic is called होलाकाधिकरण because the first example in Sabara's bhāsya refers to the practice of Holākā.

Holākā should be observed by all Āryas. In the Kāthakagṛhya 73 1 there[611] is the *sūtra* 'Rākā Holāke' which is explained by the commentator Devapāla as follows 'Holā is a special rite performed for the *saubhāgya* of women and in that rite Rākā (Full Moon) is the deity'. Other commentators interpret it differently. Among the twenty *krīḍas* found in the whole of Bhārata and also restricted to certain provinces only and mentioned by Vātsyāyana in his Kāmasūtra[612] (1 4 42) is Holākā which is explained by the commentary Jayamangalā as comprising the sprinkling of each other by people on Phālguna Full Moon with coloured water discharged from a horn or the like and throwing perfumed powder Hemādri on Kāla (p. 106) quotes a verse from Brhadyama[613] in which Holikā-pūrnimā is called 'Hutāśanī' (as in modern times). Hemādri further quotes a verse from Lingapurāna[614] "the Phālguna Full-moon day is said to be known as 'Phālgunikā', as full of boyish pranks and tending to the prosperity of people" and another verse from Varāhapurāna where it is qualified as 'patavāsavilāsinī' (i. e containing pranks with powder) Hemādri (on vrata, II. 184–190) quotes a long passage from the Bhav. U (chap. 132 1–51) in which Yudhisthira is represented as asking Krsna why in each village and town a festival is held on Phā Full moon, why boys become boisterous in each house and kindle Holākā, what god is worshipped therein, who introduced the festival and what is done therein and why it is called 'Adāda.' Krsna tells him a legend about king Raghu whom the citizens approached with the complaint that a certain rāksasī (ogress)

called Ḍhondhā troubled boys by day and night. The king consulted his *purohita* who told him that she was a rāksasī, daughter of Mālin, who got from Śiva a boon that she would not be liable to be killed by gods or men nor suffer from arms nor from cold, heat or rain. The priest further told the king that Śiva said that she would be in danger from boys going about crazily The priest added that on Phālguna 15th season of cold vanishes and summer starts, that people may laugh and enjoy themselves, that boys with bits of wood in their hands may go out of houses in great glee, collect a heap of wood and grass, set it on fire with Rāksoghna mantras, clap their hands, go round the fire thrice, laugh, sing and utter obscene words in the popular language and by that noise and loud peals of laughter on the part of boys and by the homa[615] the ogress would die. When the king got all this done, the rāksasī expired and the day came to be called 'Adādā' and Holikā. Then it is further stated that on the next day which is the first tithi of the month of Caitra (on the pūrnimānta reckoning) people should salute the ashes of the bonfire with the mantra quoted below,[616] then worship of Kāma should be made on a square in the house yard in the midst of which square a seat should be arranged and in front a jar covered with leaves containing aksatas and smeared with white sandalwood paste should be placed The image of Kāma should have sandalwood paste applied to it by a beautiful woman and thereafter the priest should make the performer partake of mango blossoms mixed with sandalwood paste. Then donations should be made to learned brāhmanas, bards &c according to one's ability with the words 'May the God of Love be pleased with me' The purāna winds up with the verse 'When the season of frost ends on the 15th of the bright half and the time of spring approaches in the morning, that man who partakes of mango blossoms with sandalwood paste lives in happiness.'

Instead of the gay and saturnalia-like practices prevalent in many parts of India about Holikā, Bengal celebrates it by the Dolayātrā. Śūlapāni composed thereon a short work called

Dolayātrā-viveka[617] The festival should be carried on for five or three days. Before the Full moon of Phālguna, on the 14th at the beginning of night an utsava in honour of Agni is to be celebrated to the east of the *mandapa* Then an image of Govinda is to be made, it is established in a structure with 16 pillars on a *vedikā* (raised platform) and it is to be bathed with pañcāmrta and various items of worship are to be offered and seven times the swing on which the image is placed has to be rocked to and fro. Fire kindled on the first day is to be preserved till the days of the festival end. At the end the swing is to be rocked 21 times It is narrated that king Indradyumna started this swing festival in Vrndāvana. By means of this utsava a man becomes free from all sins Then Śūlapāni discusses at some length the exact tithi, *prahara* and naksatra on which the Dolayātrā is to be performed. Briefly, the conclusion is that Dolayātrā must be performed when the Full Moon tithi is running, whether there is Uttarā-phalgunī-naksatra or not[618]

The Kālatattvavivecana very succinctly puts down the characteristics of Holikotsava as set forth in the Bhavisyottara[619] The Nirnayasindhu (227), Smrti-kaustubha (516–519), Purusārtha-cintāmani (308–319) and other late medieval works discourse on this festival, but for reasons of space their discussions are not set out here.

As Holākā is mentioned by Jaimini and the Kāthakagrhya, it follows that it prevailed at least some centuries before Christ. The Kāmasūtra and Bhavisyottara connect it with spring and it was performed at the end of the year (on pūrnimānta reckoning). Therefore, the bonfire represents the expiry of the season of frost and cold and heralds the warmth and love-making of spring. The ribald songs, dance and music are further accretions due to the joy felt on the advent of spring. The sprinkling of coloured

water and powder is an additional item in the celebration of the delights of spring. In some provinces this sprinkling is done on the very day of the Holikā, while in the Deccan it is indulged in on the 5th day (popularly called Ranga-pañcamī) after Holikā bonfire. Though the Holikā festival is composite in several parts of India and is celebrated on more days than one, in origin it is no more than a spring festival. In some parts mud is [620] thrown by people at each other on the day after bonfire. That is probably an extension of the idea of applying ashes of the bonfire to one's forehead and the body on the day after it. The usage in some parts of creating noise by striking the back of one's hand against one's mouth accompanied by an obscene reference to sex is a further perversion due to welcoming the advent of spring which is traditionally the season of love-making. Mr. Gupte in 'Hindu holidays and ceremonies' tries hard to show that the Holikā festival was 'imported from Egypt or Greece' (p. 92). This theory is very fantastic and does not deserve to be taken seriously. He had not read, it appears, the ancient works mentioned above and is not himself sure whether the origin is to be found in Egypt or in Greece.

Grahaṇa (eclipse, solar and lunar). Great importance was attached from very ancient times to eclipses. An extensive literature has accumulated on this subject. Vide among others Hemādri on Kāla 379–394, Kālaviveka 521–543, Kṛtyaratnākara 625–631, Kālanirnaya 346–358, Varsakriyākaumudī 90–117, Tithitattva 150–163, Kṛtyatattva 432–434, Nirnayasindhu 61–76, SmK 69–80, Dharmasindhu 32–35, Gadādharapaddhati (Kālasāra) 588–599. A total eclipse of the Sun is referred to even in the Ṛgveda V 40.5, 6, 8 'O Sun! when Svarbhānu, the son of an asura, struck you with darkness. O Indra! when you struck down the wiles of Svarbhānu that existed below the heaven, Atri secured the Sun which had been concealed by darkness that deviated from the usual rule (or law) by means of the highest (or 4th) prayer' &c.[621] It is stated in the Śāṅkhāyana Brāhmaṇa

(24 3) that the Atris performed the Saptadaśa-stoma three days before Visuvat and thereby smote the demon Svarbhānu that had pierced the sun with darkness i e the solar eclipse (in Rg. V. 40 5 ff.) took place three days before the autumnal Visuvat (equinox)

It appears from the Brhat-samhitā that the real cause of eclipses was known to Indian astronomers several centuries before Varāhamihira (1st half of 6th century A. D.) who remarks[622] 'In a lunar eclipse the moon enters into the shadow of the earth and in a solar eclipse the moon enters the Sun (i e. comes between the sun and the earth), that this cause of eclipses was found by (former) ācāryas who had a divine insight, that Rāhu is not the cause (of eclipses), this is the true state that the śāstra (of astronomy) declares (or this is the real intent of śāstra)'. In spite of this correct theory of eclipses, common people and even learned men (not astronomers) then believed and do believe up to the present day that Rāhu is the cause of eclipses and regard an eclipse as a special occasion for bath, gifts, *japa*, śrāddha and the like Varāhamihira makes an effort[623] to square Śruti, Smrti, popular belief and real astronomical doctrine by the remark that there was an Asura on whom a boon was conferred by Brahmā 'You will be gratified by a portion of the gifts and offerings made on an eclipse', that Asura remains present to receive his portion and that therefore it is metaphorically (poetically) said that he is Rāhu Rationalism and popular traditions and superstition cannot go together. Some difference was made between an eclipse of the Sun and

that of the moon. Vyāsa says: [624] 'an eclipse of the moon is one hundred thousand times (more meritorious than an ordinary day) and an eclipse of the Sun ten times more so than the preceding and if the waters of the Ganges are near (for a bath) then a moon eclipse is one crore of times (more meritorious) and a sun's eclipse is ten times more so than the preceding'.

The first duty of a person on seeing an eclipse is to bathe. It is said 'on[625] seeing Rāhu (i e. eclipse) men of all *varṇas* become impure They should first bathe and then do their usual duties and should give up food already cooked (before the eclipse)'. Peculiar sanctity was deemed to attach to the time of grahaṇa. If a man[626] does not take a bath at the time of eclipse, at the passage (of the sun) from one *rāśi* to another, there is no doubt that he would suffer from leprosy for seven future lives and sorrow would be his lot' He should take a bath in cold water and in as holy a place as possible. The holiest bath is the one in the Ganges or Godāvarī or at Prayāga, then in any one[627] of the big rivers such as the six rivers connected with Himavat mountain and the six south of the Vindhya mentioned in the Brahmapurāṇa, then in any other water, since at the time of eclipse all water becomes holy like Ganges water. A bath with hot water was allowed only to children, old men and persons that were ill. One had[628] to take a bath when the

eclipse began, to perform homa, worship of gods and śrāddha while the eclipse was in progress, to make gifts when the eclipse was about to end, and to take a bath again when the sun or moon became free from eclipse. Even a person who is impure owing to a birth or death has to take a bath on an eclipse but he is not to make a gift or to perform śrāddha (according to Gauda writers), but the Madanaratna and the Nirnayasindhu refute this view and hold that in an eclipse even one who is in āśauca can take a bath, perform śrāddha and purascarana[629] In the purāṇas and medieval digests some distinction as regards merit or holiness was made between eclipses in certain months and baths in certain rivers or holy places The Kālanirnaya (p 350) especially commends the Godāvarī for a bath in a lunar eclipse and one in the Narmadā for a solar eclipse. The Kṛtyakalpataru (Naiyatakāla), Hemādri on Kala and the Kālaviveka quote[630] a long passage from the Devīpurāṇa, some verses of which may be rendered here' 'an eclipse in Kārtika is the highest (in merit) at the confluence of the Gangā and Yamunā, in Mārgaśīrsa on Devikā, in Pausa Narmadā is holy, in Māgha Sannihitā is holy' &c. On the occasion of the partial eclipse of the sun on 20th June 1955 about four hundred thousand people took a bath at Kurukṣetra and Sanyahet (Sannihitā of ancient times)

The general rule is that one should not take a bath, make a gift or perform a śrāddha at night. Āpastamba[631] says 'let him avoid a bath at night'. Manu says 'one should not perform a śrāddha at night, she (night) is declared to be a rākṣasī (a demon) and also at both twilights and when the sun has just risen'. But eclipses were an exception as regards bath, gift and śrāddha. Yājñavalkya enumerates[632] eclipses among the proper times for śrāddha

It is stated by Śātātapa[633] that gifts, baths, *tapas* and śrāddha at the time of eclipses yield inexhaustible (rewards or merit); the night is a rāksasī elsewhere (at times other than those of eclipses); therefore one should avoid it (in other matters). A passage is quoted from the Mahābhārata[634] 'on *ayana* and *Viṣuva* days and on the occasion of the eclipses of the sun and the moon, one should make a gift of land together with daksinā to a deserving brāhmana'. Yājñavalkya succinctly observes 'not by learning alone nor by *tapas* alone (does one become a deserving person); that is declared a deserving person (*pātra*) in whom these two (*vidyā* and *tapas*) and actions (appropriate to these) are found' Numerous inscriptions published so far bear witness to the fact that over the whole of India ancient and medieval kings and well-to-do people carried out to the letter this recommendation of making gifts of land on eclipses. As regards śrāddha, it is often difficult to perform it at the time of an eclipse for two reasons Most eclipses are partial and the time is short Besides, there is a prohibition to eat food during an eclipse A prājāpatya expiation is prescribed for partaking of food during an eclipse[635] It is therefore provided in some smrtis and digests that the śrāddha performed should be the āmaśrāddha or hemaśrāddha[636] Though the person performing śrāddha in an eclipse is deemed to reap great merit, the person partaking of śrāddha dinner is liable to undergo an expiation and is generally looked down upon. The Mitāksarā on Yāj I 217–218 quotes the first quarter of a verse 'one should not eat during a solar or lunar eclipse'[637] Therefore a good brāhmana cannot be easily secured and the performance of śrāddha with details is well-nigh impossible, even though Śātātapa and others state that it is obligatory' 'on seeing Rāhu (i. e an eclipse) one should perform a śrāddha even at the cost of all his wealth; one who does not perform śrāddha then sinks like a cow in mud' The order of the several acts on an eclipse is 'first bath in Ganges or other water, prāna-

In these days most people except very sophisticated ones still take a bath on eclipses and make some gifts also, but do not proceed further in the matter of eclipses. An eclipse is the best time for japa and for dīkṣā (initiation) and perfection in the mantras peculiar to various deities: 'one[638] should engage in japa and the like while an eclipse of the sun or moon is in progress; one should not bathe nor eat food during that time, but when the sun and the moon are free from eclipse one should bathe and partake of food one may engage in the japa of the Gāyatrī mantra (Rg. III. 62 10) and it is laid down that if one does not engage in japa on an eclipse one becomes sinful For dīkṣā as to mantras seven days from eclipse are allowed Solar eclipse is the best time for dīkṣā.

The Puṇyakāla (the holy period) in the case of eclipses lasts only as long as the eclipse is visible to the eye. Jābāli says[639] 'In the case of saṅkrānti the puṇyakāla is 16 kalās on both sides thereof, but in the case of a lunar or solar eclipse it lasts only so long as the eclipse is visible'. This leads on to a question that is very much discussed in the several medieval works and on which there is great divergence of views. Much emphasis is laid on the words 'yāvad-darśana-go-carah' and 'rāhudarśane' occurring in several verses (quoted in the notes, 633, 639 &c.) The Kṛtyakalpataru (Naiyatakāla) argues that in those passages 'darśana' (being visible) is declared to be the cause or occasion of the several acts (snāna, dāna &c.) to be performed in an eclipse, that an eclipse is an occasion only when it is known that it has occurred, and that knowledge must be derived from the eye and that

therefore when the sun or moon is screened *from* view by clouds one need not enter upon a bath and the like prescribed *in the* case of an eclipse[610] Hemādri *on Kāla quotes this* view and criticizes it in several ways He first relies on Manu IV. 37 that prescribes that one should never see the sun when it is *rising or setting or when it is eclipsed or is reflected in water or when it is in mid-sky If* actual seeing were *necessary*, that is an impossible condition as Manu has *prohibited it* and the result would be that *one* need not bathe when an eclipse is really on He further says that śiṣṭas do observe bath &c even if they do not actually see the eclipse Therefore, he proposes that punyakāla *exists so long as* the *eclipse is* deduced to last from the śāstra (*of astronomy*) The Kṛtyaratnākara[611] (pp. 625–26) discusses the *question, remarks* that snāna and the *other* prescribed actions *should* be performed *during* that period *in* which the eclipse *can* be seen It was argued by some that an eclipse by itself (and not seeing it) is the occasion on which bath, gift &c, must be observed; to this the Kālaviveka[612] gave the reply that, *if* mere existence of an eclipse were an occasion for bath, then the unacceptable conclusion would be that even if the moon were to be eclipsed (in some other *country*) *according to* astronomical *calculations* a person in a different country would have to undergo a bath by day for a lunar eclipse in a distant land. The Smṛtikaustubha and Samayaprakāśa[613] *therefore* lay down that what is meant by 'darśana-gocarah' *is that* when one knows *from the* astronomical science that the eclipse is capable of being seen with the eye in a particular country one should at the respective times perform bath and the like (even though one may not actually see it). The Samvatsara-pradīpa is quite explicit 'that is said to be an eclipse which *can be observed* by the eye; one

should perform religious acts on such an eclipse, but not on mere calculation.'

If a solar eclipse occurs on a Sunday and a lunar one on Monday, such a conjunction was called Cūdāmani and it was laid down that a Cūdamani eclipse yields one crore of times as much merit as an eclipse on other week days[644]

Some held that on the day previous to an eclipse one should observe a fast; but Hemādri provided that a fast was to be observed on the day of the eclipse[645] A householder however who had a son living was not to observe a fast as laid down in a text.[646]

About partaking of food before, during and after an eclipse elaborate rules were laid down from comparatively early times. The Viṣnudharmasūtra[647] provides· 'one must not eat during an eclipse of the moon or sun; he should eat, after having previously taken a bath, when the eclipse is at an end; if the sun or moon have set before the eclipse was over he must bathe and on the next day he may eat again after having seen the sun rise'. This is elaborated in two verses quoted in several works: 'One should not take food before a solar eclipse and also in the evening of the day of a lunar eclipse; and one should not eat when the eclipse is in progress; but when the sun or moon is free from eclipse one may, after a bath, partake of food; when the moon is free from eclipse one may take food (even at night thereafter) provided it is not *mahānisā*, when the sun or moon sets before being free from eclipse, one should see them rising the next day, bathe and then partake of food'.

The two verses are कूर्मपुराण, उत्तरार्ध 19. 15–16.

It was further prescribed that not only was one not to eat during an eclipse, but in the case of a lunar eclipse one was not to eat for three *praharas* (9 hours or 22½ ghatikās) before the eclipse started and for four *praharas* before a solar eclipse starts, but this does not apply to children, old men and women.[648] This period of three or four praharas before an eclipse was called and even now is called 'vedha'. The *Kṛtyatattva* (p. 434) collects together in one place all the above propositions about taking food. Although these rules are not generally observed in these days by people in cities and by educated people, in the author's boyhood they were strictly observed by almost all adults educated or illiterate.

Certain astrological results were deemed to follow from eclipses. One or two are cited here for illustration. The Viṣnudharmottara[649] states that if in one and the same month there is first an eclipse of the moon and then of the sun, that occurrence would tend to create disputes between brāhmaṇas and kṣatriyas, but if the opposite was the case, then there would be prosperity. The same purāṇa says that persons born on the nakṣatra on which there is an eclipse of the sun or moon suffer troubles unless they perform śānti rites (to avert the evil results). Hemādri (on Kāla pp 392–93) quotes several verses from Garga about the prognostications derived from eclipses of the sun and moon when they are in certain nakṣatras. Atri provides:[650] 'When the moon and the sun are eclipsed in the nakṣatra of a man's birth, that forebodes disease, long journeys, death and great danger from the king (of the country)'.

LIST OF VRATAS AND UTSAVAS

The following list of vratas and *utsavas* does not claim to be thoroughly exhaustive But it is far more exhaustive and informative than any similar list so far prepared in English by any one or contained in any work in English. The line of demarcation between vratas and utsavas is very thin. Many vratas contain an element of festivities and many utsavas have more or less a religious element also and were religious in the beginning though later on they became secular, like the Olympic games of Greece. It may be pointed out that in the Asiatic Researches, vol III, Sir William Jones published a list of Hindu festival days based on the Tithitattva (pp 257–293) and Prof. Kielhorn also inserted a list of festival days based mainly on the Dharmasindhu in I. A vol 26 pp 177–187. Both these are meagre The Indian Ephemeris (vol. I part 1 pp. 55–69) has a long descriptive list and a brief but accurate account of Indian festivals in relation to tithis and *vice versa*. Yet it is not as exhaustive as this list will be and it refers hardly to any authoritative texts. Very recently in the Report (1953) of the Calendar Reform Committee presided over by the late Dr M. N Saha there is a list of lunar festivals (from Caitra onward) and solar festivals and of some important tithis (pp 101–108) and an alphabeticed list of festivals (pp 111–115), which is exhaustive but its great defect is that no texts are cited or referred to and hardly any details are given except month, paksa and tithi. There are a few works on vratas written in Bengali and other regional languages of India, but I could not include most of them in this volume as I do not know most of those languages, though I have referred to some of them. Apart from vratas and utsavas certain matters and technical terms that occur frequently in works on vratas have been included. The list is arranged in the Sanskrit alphabetical order, though everything is transliterated into the English alphabet for the convenience of printing For saving space abbreviations have been very largely employed and a list of the most important abbreviations is given in the preceding pages. As regards each vrata the time when it begins, whether it is a tithivrata or vāravrata, samvatsara-vrata or a naksatravrata or a prakīrnaka vrata is generally indicated (except where from its very title or description its nature is clear), the deity to be worshipped is pointed

out where possible or necessary, some details are added in certain cases, and some of the works in which it is described are mentioned The rewards promised are not generally set out, as most of them are included in the rewards mentioned on p 55–56 above, and as they are often too numerous to specify and also for reasons of space. Similarly, tithis that are Yugādi or Yugāntya or Manvādi or Kalpādi have not all been noted as they are too many but they are enumerated in one place under the words Yugādi &c I have made great efforts to trace the Paurāṇic quotations to their sources, but I regret that I have not been quite successful owing to several causes such as the vast extent of Purāṇas, owing to several recensions of the same purāṇa and owing to my inadvertence or sheer weariness One feels that tracing a verse to its origin is often as difficult as finding a pin in a haystack. The author or authors of Purāṇas often wrote like modern advertisers of medicines, toilet articles &c Most of the vratas are said to have been declared by divinities like Śiva to Pārvatī, by Kṛṣṇa to Yudhiṣṭhira, by great sages like Mārkaṇḍeya, Nārada, Dhaumya, Yājñavalkya, Vasiṣṭha and it is often added that the Vrata is a great secret not narrated or known even to gods and goddesses e g. Śivarātrivrata (in HV II. 88).

It may not be out of place to point out here what should be done about the numerous vratas and utsavas, described so far and to be mentioned in the long list that follows. Many of the vratas and utsavas once observed have already gone out of vogue owing to various causes. But it would not do to recommend the abolition of all vratas and utsavas even in the latter half of the 20th century. Some seasonal vratas and festivals should be kept up as in the case of Divālī and Holikā, but they should be shorn of extravagances like gambling on Balipratipadā or the obscenities and dirt-throwing indulged in by some people in Holikā. Other vratas and utsavas like the Rāmanavamī, Vijayādaśamī, Kṛṣṇa-janmāṣṭamī should also be celebrated in order to remind the present generation of the great heroes and *avatāras* of the past and the supreme values they exemplified in their lives and a few new ones such as the Jayantīs of Shivaji, Guru-Govindsingh, Tagore, Tilak and Gandhi may be added. Besides, such vratas as Vaṭa-sāvitrī and Haritālikā may still be emphasized for observance by women and lastly such nice observances redolent of disinterested regard and affection as Rakṣābandhana and Bhrātṛdvitīyā deserve to be preserved.

It should be remembered that several vratas depend conjointly upon month, tithi and naksatra together It is difficult to classify such vratas and my classification may in some cases appear to be arbitrary. For saving space the details mentioned above will not generally be conveyed in regular sentences, but in catch-words only The figures after the abbreviated name of a work represent pages and Roman figures refer to volumes or parts; and double Arabic figures with a dot between represent chapter and verses respectively. As most vratas are tithivratas, the word tithi is not mentioned where the vrata has reference to a tithi alone and to no other particular (such as month or week-day &c.). The word vrata has been generally omitted after the names, except where I felt that doubt or confusion is likely to be caused The word 'purāna' is not added to the names of purānas such as Agni, Vāmana &c Except in the case of purānas references to medieval digests and commentaries are generally arranged in chronological order The following abbreviations are used for months and half months: Cai. = Caitra, Vai. = Vaiśākha, Jy. = Jyestha, Ās. = Āsādha, Śr. = Śrāvana, Bh. =Bhādrapada, Āśv.=Āśvina, K.=Kārtika, Mārg. = Mārgaśīrsa, P. = Pausa, M. = Māgha, Phā. = Phālguna; Śu.or śu.= Śukla, Kr. or kr.= Krsna (paksa)

Aksayācaturthī—Caturthī with Tuesday yields special rewards for vratas like upavāsa GK 72

Aparādha-śata-vrata—Begin from Mārg. 12th, amāvāsyā or 8th of bright or dark half; one year; Hari worship; 100 aparādhas enumerated in Bhav U. 146. 6–21; all these sins are destroyed by this vrata. Thirty-two *aparādhas* are enumerated in Var. 117.

Apāpasaṅkrānti-vrata—begins on a sankrānti; a year; Sun is devatā; white sesame to be offered; HV II. 739–740.

Abhirūpapati-vrata—A fast is so called, whereby is secured a husband that is learned or handsome; m. in the drama Mrcchakatika I (prelude) and Cārudatta p. 4 (TSS. 1914).

Abhīstatrtīyā—begins Mārg. śu. 3; tithi; Gaurī worshipped; Skanda, Kāśī-khanda 83. 1–18.

Abhīstasaptamī—7th tithi of any month; worship of the oceans, continents (dvīpa), pātālas and the earth; HV I. 791 (from Vi. Dh. only one verse).

Amāvāsyā—*derivation* of, HK 311–315; HK 643–644, KV 343–44, TT 163, bhāsya on Gobhila-grhya I. 5. 5, PC 314–345; VKK 9–10 quote passages from MB and Purānas stating that Amāvāsyā falling on Monday, Tuesday or Thursday is specially holy, so also if it occurs on certain naksatras such as Anurādhā, Viśākhā, Svāti; HV II. 246–257. Vide KN 309 ff for several derivations of the word and legends connected therewith from the Brāhmanas and Purānas. Amāvāsyā mixed with 1st tithi to be preferred to one mixed with 14th except in Sāvitrīvrata Vide Vratārka folios 334^a–356^b for amāvāsyā-vratas.

Amāvāsyā-krtya—Vide SMK 281, KSS 21–23, VKK 81–82.

Amāvāsyā-nirnaya—KR 622–624, Dh. S 23, KN 301–307.

Amāvāsyāpayovrata—subsisting on milk alone on each amāvāsyā; tithi; one year; Visnupūjā; HV II. 254 (from Pad.).

Amāvāsyāvrata—(1) HV II. 257 (from Kūr); offering something to a brāhmana intending it for Śankara; (2) HV II. 257

(one verse from Kūr.). honouring three brāhmaṇas intending to please Brahmā

Amāvāsyā-vratāni—HV II. 246–257, TT 162 ff, Vratārka (folios 344a–356b)

Amuktābharaṇa-saptamī—Bh. śu. 7, worship of Śaṅkara and Umā; HV I. pp 632–638, SMK 222–228 (almost same passages as in HV). Vide Nār. I. 116 32–33.

Ambuvācī—the time in solar Āṣāḍha when the Sun is in the first quarter of Ārdrā-nakṣatra; VKK 283 quoting RM (catvārim-śat-liptā &c.), KT 434 (three days and 20 *ghaṭis* from the week day on which the Sun enters sign of Gemini, during which no sowing of seeds, nor Vedic study to be done) Mother earth and rivers are deemed unclean during these days in Bengal (in Jy. or Āṣ. Kṛ. 10 to 13th). Vide HK 701, 703

Ayanavratas—Ayana depends on the motion (apparent) of the Sun. There are two Ayanas Dakṣiṇāyana begins when the Sun enters Zodiacal sign Karkataka (*Cancer*). KNK 14 says: 'Dakṣiṇa and Uttara ayanas respectively are appropriate to fierce and quiet rites and its com (Vivaraṇa) provides that images of the Mātṛs, Bhairava, Varāha, Narasiṃha, Vāmana and Durgā are to be established in Dakṣiṇāyana KR 218, HK 16, SM 173, SP 13.

Ayācitavrata—subsisting on food not obtained by begging from another. KN 138–139, NA 19, KTV 214–218, PC 49.

Araṇya-dvādasī—begun by bath on morning of Mārg. su 11 or in K., M., Cai or Śr; tithi; for one year; Govinda deity; sumptuous feast on 12th in a forest to 12 *dvijas*, *yatis* or householders and their wives; HV I. 1091–1094 (from Bhav U.); some mss read 'Aparā-dvādasī.'

Araṇyaṣaṣṭhī—Jy. śu. 6; RM verse 1396 states that women with fans and arrows (v. l. 'with fans alone in one hand') wander in forests GK p 83 says it is same as Skandaṣaṣṭhī; tithi-vrata; Vindhyavāsinī and Skanda worshipped; KR 165 (quotes RM), VKK 279, K. T. 430–431; observers subsist on lotus stalks, bulbous roots and fruits hoping for the health of their children.

Arūndhanāṣṭamī—Vide VK, No 470.

Aruṇodaya—The last half quarter (*prahara*) of night HK 259, 272; KN 241 (quoting Skanda and Nāradīya) says 'four ghaṭikās before sunrise'

Arundhatīvrata—for women only; for freedom from widowhood, for sons &c.; fast for three nights; 3rd tithi in the beginning of Vasanta (spring); worship of Arundhatī; HV II. 312–315, VR 89–93.

Arkavrata—eating at night alone on 6th and 7th (*v. l* 7th & 8th) in both fortnights; tithivrata; for a year; Arka (Sun) worshipped; KKV 387, HV II. 509.

Arkasaptamī—tithi; for two years; deity Sun; one is to drink from a cup made of the leaves of *arka* plant; HV I 788–789 (from Brah.). Vide Pad. V. 75. 86–106 which state that vrata to be begun in Uttarāyana on a Sunday in śukla pakṣa; on 5th *ekabhakta*, on 6th nakta, on 7th fast and on 8th pāranā

Arkasamputasaptamī—Begin on Phā. śu. 7; tithi; for a year; Sun worshipped; Bhav. I. 210. 2–81 (q. by KKV 191–198, HV I. 690–696).

Arkāṣṭamī—On Sunday on 8th śu; worship of Umā and Śiva in whose eye the Sun rests; HV I. 835–837.

Arghya—See H. of Dh. vol. II. pp. 318, 543. Later medieval digests made it elaborate. VKK 142 says 'arghya for all deities consists of sandalwood paste, flowers, whole grains of *yava*, tips of kuśa grass, sesame, mustard and dūrvā.' Vide HV I. 48, KR 296, VR 16 (for eight ingredients of).

Ardhaśrāvaṇika-vrata—begin on 1st of Śr. śu.; one month; worship of Pārvatī called Ardhaśrāvaṇī; worshipper to observe *ekabhakta* or *nakta* for one month; at end to offer dinner to maidens and brāhmaṇas; HV II. 753–754 (from Br.), VP (folios 106–107).

Ardhodaya-vrata—This is a vrata of rare occurrence and is said to be equal in holiness to a crore of Sun eclipses Later medieval digests (e. g. TT 187, KSS 30, NS 211, SmK. 442–445, P. C. 316) quote a verse from Mahābhārata 'when in the month of Pausa or Māgha there is amāvāsyā with Śravaṇa-naksatra and Vyatīpāta-yoga, that is called Ardhodaya and Vratārka (folios 348^a–350^b) states that according to Prayāga-setu of Bhatta Nārāyaṇa it takes place in Pausa when amānta reckoning is used and in Māgha when Pūrnimānta reckoning is used. HV (II. pp. 246–252) quotes from Skanda and adds Sunday to the above requirements and BB (pp. 364–365) adds that the Sun must be in Makara (Capricorn). The TT 187, Vratārka folio 348^a and

PC 316 read a half verse 'this yoga is commended only if it occurs by day and not so if at night' KSS 30 provides that if one out of the several requirements (*Pausa or Māgha Amāvāsyā, Vyatīpāta, Sravana-naksatra, Sunday*) is absent, it becomes Mahodaya-parva In *Ardhodaya a bath at Prayāga in the morning is most meritorious, but it is provided that all rivers become like the Ganges at Ardhodaya.* The devatās of the vrata are three viz Brahmā, Visnu and Maheśvara and they are worshipped in the same order; *offerings* (of ghee) are made in fire with Paurānika mantras, and also with three Vedic mantras viz '*Prajāpate*' (*Rg. X. 121. 10*) for Brahmā, '*Idam Visnur*' (*Rg. I 22. 17*) for *Visnu*, '*Tryambakam yajāmahe*' (*Rg VII. 59. 12*) for Maheśvara. At the end gifts of cow or money are made. In I. A. vol 25 p. 345 there is mention of Ardhodaya in śake 1352, Pausa, which corresponds to 14th January (Sunday) 1431 A. D. The reference to the distribution of all his wealth by Emperor Harsavardhana at Prayāga once in five years made by the Chinese traveller Yuan Chwang (vide 7 I. A. 196 at p 198) is not to Ardhodaya at all, as some suppose. If Beal's B R. W. W. vol. I. pp. 214 and 233 be carefully read this will be clear.

Alaksmīnāśaka-snāna—On full moon of P. when there is Pusya naksatra, persons should bathe after anointing their bodies with white mustard and drive off *alaksmī* (*misfortune or poverty*) and worship images of Nārāyana, Indra, Moon, Brhaspati and Pusya by bathing them with water in which sarvausadhis are put and with homa. Vide SMK 344-345, PC 307, GK 178.

Alavanatrtiyā—On śu 3 of any month, specially of Vai, Bh. or M.; women alone to perform; fast on 2nd and food on 3rd without salt; Gaurī worshipped; it may be for life; KKV 48-51, HV I. 474-477, S. Pr folio 32*a*. Vide Bhav., Brāhma-parva 21. 1-22 for this.

Avatāras—Tithis of the appearance of (they are called Jayantis), cited in NS 81-82 and KSS 13 as follows: Matsya-Cai. śu. 3; Kūrma-Vai. pūrnimā; Varāha-Bh. śu 3, Narasimha-Vai śu. 14; Vāmana-Bh. śu. 12, Paraśurāma-Vai. śu 3, Rāma Cai. śu. 9; Balarāma-Bh śu 2; Krsna-Śr kr 8; Buddha-Jy. śu. 2. Some works say Kalkin is yet to appear while others give Śr śu 6 as Kalkijayanti. Some works differ as to the tithis e. g. some say Matsya appeared on Cai. śu. 5 (and

not 3). Vide Śrī B. Bhattacharya's paper on 'the ten avatāras and their birth dates' in volume of studies presented to Dr. F. W. Thomas pp. 31–33 quoted from Śakti-sangamatantra I. See under Vaiśākha. The Eran Inscription of Toramāna refers to Varāhāvatāra (Gupta Inscriptions p 159). Var. 48. 20–22 (q. by both KKV 333 and HV. I 1039) state which avatāra out of the well-known ten (including Buddha and Kalkin as separate) is worshipped for what object.

Avamadina—a week day on which two tithis end is so called. NS 153 quoting Ratnamālā ("Yatraikah sprśate tithidvayāvasānam vāras-ced-avamadinam taduktam-āryaih"). This is to be avoided when beginning a vrata for the first time, as there is ksaya of a tithi here.

Avighnavināyaka or Avighnavrata—(1) begin on Phā. 4th; tithi; four months; Ganeśa worshipped. HV I 524–525, KKV 82–83, both quoting from Varāha 59. 1–10; (2) 4th tithi on both fortnights; three years; Ganeśa deity; NA 43 (from Bhav U).

Aviyogadvādaśī—Bh. śu. 12; tithi; worship of Śiva and Gaurī, Brahmā and Sāvitrī, Visnu and Laksmī, the sun and his consort Niksubhā. HV I 1177–1180.

Aviyogavrata or Aviyogatrtiyā—For women; begin on Mārg. śu. 2 with partaking rice boiled in milk and sugar on 3rd; worship of Gaurī and Śambhu; for a year; worship of images of both made from rice flour under different names in each of twelve months with different flowers; KKV 70–75, HV I 439–444, KR 452–455. Vide Bhav U. 22 for this.

Avaidhavyaśuklaikādaśī—Cai. śu. 11; HV I. 1151 (only one verse from Vi. Dh).

Avyaṅgasaptamī—Śr. śu. 7; tithi; to be performed every year; 'AVYAŃGA' to be offered to the sun; 'Avyanga' is explained in KKV 150 as a hollow strip made of fine white cotton thread, resembling a serpent's slough, 122 finger-breadths long (the best), or 120 (middling) or 108 (the shortest) It seems to have been like the *Kusti* worn by modern Parsis. Vide Bhav. (Brāhma-parva) 111. 1–8 q. by KKV 149–151 and HV I 741–743, also V. P (folio 116, which mentions the story of Sāmba in Bhav.). The printed Bhav. uses the word 'abhyanga'. In Bhav (Brāhma) 142. 1–29 we have the legend of Avyangotpatti. In verse

18 occurs the word 'sārasanah' which reminds one of 'Saracen'. Vide Nār. I. 116. 29–31 for AVYAṄGĀKHYA-VRATA, the 7th tithi being destroyer of sins if it is conjoined to Hasta-naksatra. Avyanga appars to be a Sanskrit adaptation of the Avestan 'Aivyanghana' (meaning 'girdle'). In the 16 ślokas addressed to the prince Jadi Rānā by the Parsis emigrating to India occurs this 'who put on the waist a woollen *kushti* which is fastened on the *sadra* (garment), each end of which is like the mouth of a serpent, which is tied into knots at equal distances' (vide M. M Murzban's 'Parsis in India' vol. I at p 93) It seems probable that this particular form of Sun-worship was imported from Iran or was borrowed from Parsi practices. The Br. S. (59 19) states that the priests of Savitr should be Magas i. e Maga or Śākadvīpiya brāhmanas for whom vide I A vol. VIII. 328 and Weber's edition of Magavyakti of Krishnadas Mishra.

Aśūnyaśayanavrata or Aśūnyaśayanadvitīyā—on dark 2nd tithi of four months from Śr; tithi; Laksmi and Hari worshipped; occurs in Vi Dh I. 145. 6–20 and III. 132 1–12, Vā. 16. 16–29, Āgni 177. 3–12, Bhav. I. 20. 4–28, KKV 41–44 (q. from Bhav U) and 44–46 (from Mat. 71 2–20=Pād. V. 24, 1–19). The Matsya contains a somewhat different mode; HV I 366–371 (from Bhav.) and 371–377 (from Bhav U); KR 225–228 (quotes Bhav I. 20 4–28). This vrata secured *avaidhavya* to women and *aviyoga* (absence of the loss of wife) to men. Vide S Pr (folio 22b) and SmK 146–148 One of the mantras that occur in both KKV 43 and HV I. 373 is 'Laksmyā na śūnyam varada yathā te śayanam sadā | śayyā mamāpyaśūnyāstu tathātra Madhusūdana' ||. KR (p 228) remarks that when it is said that the vrata begins in Śr. Kr, the month is *pūrnimānta* according to the usage. Mentioned in 'Corpus of Inscriptions in the Telingana Districts of Nizam's Dominions' by Dr. Srinivasachar No 50 pp 140–142 of *śake* 1198 Māgha śu. 10 (1276 A. D.) where Kuppāmbikā wife of a Kākatiya General is said to have performed it.

Aśūnyavrata—on dark 2nd tithi of four months from Śr., in which *arghya* with curds, whole grains of rice and fruits are offered to the moon; if the second tithi is mixed with (viddhā) the third tithi on a certain day the vrata should be performed on that day; P C 83.

Aśokakalikābhakṣana—Vide Aśokāṣṭamī.

Aśokatrirātra—For three nights from the 13th tithi of Jy., Bh. or Mārg. śu; for one year; Aśoka tree of silver to be worshipped and image of Brahmā and Sāvitrī on first day, of Umā and Maheśvara on 2nd and of Lakṣmī and Nārāyana on third and then images donated; this vrata removes sins and diseases and confers long life, fame, wealth and prosperity on sons and grandsons; HV II 279–283, VP (folio 102b), Vratārka folio 261b-264; mostly for women, but men desirous of prosperity of sons may also perform it.

Aśokadvādaśī—same as Viśokadvādaśī. Begin in Āśv.; for a year; on 10th take light meal, on 11th fast and on 12th pāraṇā; worship of Keśava; results are health, beauty and freedom from sorrow; Mat. 81. 1–28, 82. 26–30 quoted in KKV 360–363; HV I. 1075–1078 (quotes almost same verses from Pad)

Aśokapūrṇimā—On Phā. pūrnimā; tithi; for a year; the earth is to be called Aśokā in first four months and also in the next four months; worship of Earth and arghya to the Moon; in the first 4 months worship earth as Dharaṇī, in the next four as Medinī and in last four as Vasundharā. Keśava is to be worshipped at the end of each group of 4 months; Agni 194. 1, HV II. 162–164.

Aśokapratipad—Āśv. śu. 1; tithi; worship of Aśoka tree or its golden or silver image or its picture; only for women; HV I. 351–52 (from Bhav U. chap. 9).

Aśoka-saṅkrānti—Vratārka folio 388b–389a; to be performed on ayanasankrānti or Visuvasankrānti when there is Vyatīpāta, ekabhakta; Sun to be worshipped; gifts of sesame.

Aśokāṣṭamī—(1) Cai. śu. 8 and if there be Wednesday and Punarvasu-naksatra then special merit; worship of Durgā with Aśoka flowers, one should drink water mixed with eight Aśoka buds, worship of Aśoka tree with the mantra 'tvām-aśoka harābhīstam madhumāsa-samudbhavam | pibāmi śokasantapto mām-aśokam sadā kuru'. KV 422 (quotes mantra from Linga), HK 626 (from Visnu), HV I 862–63 (from Linga) and 875–76 (from Ādityapurāna but no mantra); KR 126–127; R M (1379–80) has the mantra 'tvām-aśoka harābhīsta' and the verse 'Aśoka-kalikāś-cāstau' and BB 1734–35, both of which verses are Gar. I

133. 1-2; PC 109; SMK 94. Vide JRAS for 1900 pp. 545, 791 and for 1901 p 127 for some remarks. (2) KV 422, KR. 126, KT 463 and other digests state that all tīrthas and rivers come to the Brahmaputrā on Cai śu 8 and a bath in it on that day yields the same rewards as Vājapeya, when it falls on Wednesday and on Punarvasu.

Aśokāṣṭamī—Worship of Umā NM p. 74 (verses 905-907) states that Aśoka plant is Devī herself.

Aśvatthavrata—Vratārka (folio 406b-408a) from Adbhutasāgara following Ātharvanaśākhā; worship of Aśvattha in case of evil portents, invasions, epidemics, diseases like leprosy.

Aśvalīkṣā—When the moon is in Svāti in Āśv. śu., worship Uccaiḥ-śravas and one's own horses may be honoured if there be 9th tithi; Śānti rites and threads coloured in four colours to be tied round horses' necks; NM p 77 verses 943-947.

Aśvapūjā—On Āśv. śu. 1 to 9; see below under Āśvina

Asvavrata—a Saṃvatsaravrata, Indra is the deity; Mat 101. 71 q. by KKV 443, HV II. 911 (quotes same 1½ verses from Pad).

Aṣṭamīvratas—There are about 30 Aṣṭamī-vratas, which will be entered at the proper places. General rule is that in the bright half Aṣṭamī mixed with Navamī is to be preferred and in dark half aṣṭamī mixed with saptamī is preferred. Vide TT 40, DS 15. For Aṣṭamīvratas vide HV I. 811-886, KN 194-228, KKV 225-272, VR 256-319, VKK 38-40, PC 109-139. There are a few exceptions to above two rules, some of which may be noted at the proper places

Asidhārāvrata—begin on Ās śu. 15; five days or ten days after Ās. 15, K.15 or for 4 months from Ās., or one year or 12 years, one has to sleep on bare ground, to bathe outside house, eat food only in the night, to remain celibate even though sleeping in wife's embrace, curb anger and be devoted to *japa* and *homa* to Hari Different rewards acc to length of time, the greatest being that after twelve years of this vrata the observer may secure the rulership of the world and on death become one with Janārdana Vi Dh. III. 218 1-25 q by HV II. 825-827. The word means the vrata is as sharp or difficult as treading on the edge of a sword. The Raghuvaṃśa 13. 67 in referring to Bharata's abstention from enjoying regal splendour out of regard for the exiled Rāma calls it *ugra* 'iyantī varsāni tayā sahogram-abhyasyatīva vratam-āsidhāram'.

Ahan—a day. There are several views about the divisions of the day, viz. into two, three, four, five, eight, or fifteen parts. The two are pūrvāhna and aparāhna (as in Manu III 278); for three vide notes 257–258 above Four parts described by Gobhila (q by KN p. 110) are pūrvāhna (for 1½ *prahara*), madhyāhna for one prahara, aparāhna up to the end of the 3rd prahara and thereafter sāyāhna till end of day. For names of five divisions vide H of Dh. vol IV p 376 In Rg V. 76. 3 (utāyātam saṅgave prātarahno) three of the five parts of a day viz *prātaḥ*, *saṅgava* and *madhyandina* are expressly mentioned. Eight divisions of the day are mentioned by Kautilya (I. 19), Daksa (chap 2) and Kātyāyana. Kālidāsa in Vikramorvāśīya II 1 (sasthe bhāge) appears to know this. There are fifteen muhūrtas of the day and fifteen of the night Vide Brhadyogayātrā VI 2–4 for 15 muhūrtas. As the day and night become long or short at different places (except on the equator) each of the muhūrtas will vary in length to some extent even in the same place in different seasons of the year. Similarly, pūrvāhna or prātahkāla will be of 7½ muhūrtas if day is divided only in two parts, if into five parts pūrvāhna or prātaḥ will comprise only three muhūrtas. The KN (p. 112) remarks that the division into five parts being observed in many Vedic and Smrti texts as the principal division, that division, is the one resorted to in the śāstric passages about positive and negative injunctions. Vide HK 325–329, VKK 18–19, KTV 6, 367.

Ahiṁsāvrata—not to eat flesh for a year and then donate a cow and a golden deer; samvatsaravrata; KKV 444, HV II. 865 (quoting Pad = Mat 101 35)

Āśunakṛtya—Vide KR 301-397, VKK 343-458, NS 144-192, SMK 287-373, KT 444-447. This month has numerous observances and festivals. The important ones will be separately entered in the list. A few lesser ones are noted here. V. Dh (90. 24-25) provides that by donating ghee everyday in this month, a man pleases Aśvins and becomes handsome and by feeding brāhmaṇas with cow's milk (and its products) he secures a kingdom. On śu 1 there is mother's father's śrāddha by a grandson whose father is alive (vide H. of Dh. vol. IV p. 533); on that day also begins

Navarātra; on śu 4 worship of Satī (Pārvatī who threw herself in a lake on that date) with arghya, flowers &c. and honour is to be paid to chaste women, mother, sister and other women whose husbands are alive (KKN 404, KR 348), on śu. 5 nāgas made of kuśa grass and Indrānī are to be worshipped (NA 47, KR 348), in bright half on a tithi with an auspicious naksatra and muhūrta going to field having ripe crops with music and dance, one should offer homa and should eat the new corn with curds as also new grapes (KKN 405, KR 303); in Śukla paksa when there is naksatra Svāti Uccaihśravas (Sun's horse) first carried the Sun and hence he and one's horses should be honoured by an owner of horses (KKN 407, KR 347); in śu. paksa on Mūla one should invite Sarasvatī, establish her on Pūrvāsādhā in books, offer oblations to her on Uttarāsādhā and take leave of her on Śravana and one should not read, teach or write during these days (NS 171, SmK 352, PC 73). In Tamil lands Sarasvatī-pūjā in books on Āśv. śu. 9; Tulāmāsa (Āśv.) is sacred for bath in Kāverī river; and on Amāvāsyā there is a special bath in Kāverī river.

Āsādha-krtya—KR 196–218, KT 434–437, VKK 283–292, NS 101–109; SMK 137–148. Some of the smaller observances of Āsādha are mentioned here. Ekabhakta vrata for whole month (SMK 137, KR 196); gift of sandals, umbrella, salt and myrobalans (v l. 'new kambala') to a brāhmana for securing favour of Vāmana (avatāra) on the first or on some convenient day of Āsādha; on śu. 2. if there is Pusya naksatra, Rathotsava of Krsna, Balarāma and Subhadrā (TT 29, NS 101, SMK 137); on śu 7 (fast on 6th and) worship of Sun called Vivasvat who appeared on Pūrvāsādhā that day (KKN 390, SmK 138); on 8th image of Devī that killed Mahisāsura should be bathed with turmeric water and camphor and sandalwood paste, and feast to brāhmanas and maidens full of sweet dishes and tasty liquids and lamps lighted; NA 56, SmK 138; as to 9th see under Ubhaya-navamī, on tenth Varalaksmīvrata (very important in Tamil country) and worship on a *kalaśa*, as to 11th and 12th vide under these words; Full Moon is very holy and gifts must be made (Rāmāyana q by KR 214); if there be Uttarāsādhā naksatra on Pūrnimā worship of ten Viśve-devas (KKN 393, KR 213 and H. of Dh. vol. IV p. 457); gift of food on Pūrnimā gives inexhaustible merit (V. Dh.); on Pūrnimā

ascetics to shave and perform Vyāsapūjā (NS 109, SMK 144–146); on dark 8 Vināyakapūjā (KKN 390, KR 198); Ar. K. 8 is Manvādi tithi.

Indravrata—55th of the 60 saṃvatsara-vratas m. in KKV 451 (one verse which is Mat. 101. 89 and is quoted from Pad. by HV II. 883) One has to honour a householder and his wife three times a day and give a cow at end of the year.

Indradhvajotthānotsava—(festival of the raising of Indra's banner). On Bh. su. 8 the pole for the banner was to be brought or made of sugarcane and was to be worshipped with attendant ceities and was to be taken down and cast in deep water. It was raised on Śravaṇa, Dhaniṣṭhā or Uttarāṣāḍhā nakṣatra and taken down on Bharaṇī at night. It is elaborately described in Varāha's *Bṛhatsaṃhitā*, *chap* 43, Kālikāpurāṇa (90), RM verses 1260–1292 (vide BORI. vol. 36 pp. 323–327), HV II 401–419, TT. 115–117, VKK 322–323, KV 294–299, KR 292–293. It was recommended for observance by king. It is mentioned in Buddhacarita (SBE 49 part I. p 113), Raghuvaṃśa IV 3, Mṛcchakaṭika X. 7, in the 1st book of Maṇimekhalai and 5th of Śilappadhikāram, and in an inscription published in E. I. XII. 320 (dated in 461 of Mālava era i. e 404–5 A. D.). It is described in Kālikāpurāṇa 90, in Kṛtyakalpataru (on Rājadharma) pp 184–190 (from Devīpurāṇa), in RNP pp 421–423, and is mentioned in Nāgānanda I. Vide H. of Dh. *II pp 825–826 for description*. RNP (pp 430–433) quotes several Paurāṇika āśīrvāda mantras and prārthanāmantras from the Viṣṇudharmottara.

Indravrata—47th of the 60 Saṃvatsara-vratas described in KKV p 449. One has to sleep in the open in the rainy season, and make a gift of a milch cow. It is Mat. 101. 69.

Indrapaurṇamāsī—HV II. 196 (one verse from BhavU) Fast on Bh. Full Moon and honouring thirty householders with their wives with ornaments; secures *mokṣa*. Vide GK 176.

Iṣṭajāgaraṇī—VI. Dh. III. 200. 1–5: begin in Cai. and in K.; worship Hari with Ṛg. X. 90 1–16 and the 16 upacāras and at end gift of a cow.

Īśā-vrata—Fast on śu. 14 and on Full Moon day when it is a Thursday: worship of Liṅga with Viṣṇu to the left and Khakholka (the Sun) to the right; five years; gift of one cow at end of 1st year, of 2 at end of 2nd, of 3 at end of 3rd, of

4 at the end of 4th and five at the end of 5th; KKV 383–385, HV II. 179–180 (from Kālikā).

Īśvaraganagaurīvrata—18 days from Cai Kr. 1 to Cai. śu. 3; this is meant only for women whose husbands are alive; worship of Gaurī and Śiva; well-known in Mālava (Mālwa); AK folio 237.

Īśvara-vrata—On dark 14th; worship of Śiva; HV II. 148 (from Bhav., 4½ verses).

Ugra-naksatras—are the three Pūrvās (Pūrvāsādhā, Pūrvābhādrapadā, Purvāphalgunī), Maghā and Bharanī. Vide under Naksatra and Br. S. 97. 8.

Uttamabhartrprāpti—on 12th of śu. of Vasanta; Visnu is deity; Var. 54 1–19.

Uttarāyana—Gifts are recommended at the beginning of each *ayana* (vide Śātātapa in KV 536 and VKK 292) and gifts made at the beginning of an *ayana* yield a crorefold of merit, while a gift on Amāvāsyā gives only 100 times (RM q. by KV. 381, VKK 214). Vide I. A. vol. 20 pp. 104–106 for a grant of Eastern Cālukya king Mango-yuvarāja on the occasion of Uttarāyana-sankrānti.

Utthāpanaikādaśī—on K. śu. 11; GK 188, KSS 42 (has three mantras for Visnūtthāpana).

Utpattyekādaśī—Vide VK No 694.

Utsarjana—Vide H. of Dh. vol. II 815–818, NS 120–121, SmK 164–167.

Utsavas—Numerous utsavas are mentioned in the Purānas and works on vrata. Some of these such as Holikā, Durgotsava have already been described at some length above. A few more will be briefly dealt with at appropriate places in the list The word 'utsava' occurs in Rg. I. 100 8 and I. 102 1 and is derived from the root *sū* in the sense of 'urging or inspiring' by Sāyana. Vide 'India Antiqua' (a volume presented to Dr. J. Ph. Vogel) pp 146–153 where Prof. Gonda derives it from root 'su' (rather unconvincingly)

Udakasaptamī—drinking only a handful of water on 7th tithi gives happiness; KKV 184, HV I. 726 (from Bhav).

Udasevikā—same as Bhūtamātr-utsava. This utsava followed immediately after the Indradhvaja was taken down (i. e. it took place on Bh. śu. 13). It somewhat resembled the wild

and mystic Roman Bacchanalia In HV II 359–365, KKN 413–421 and KR 387–395 this festival is described at length from the Skanda The origin is traced to Bhairava and a girl called Udasevikā (whose body was smeared with mud) sprung from the mind of Śiva and Pārvatī respectively. They became husband and wife All people become on this day vociferous about sexual matters Men and women go out like crazy persons, ride asses, bulls and dogs, smear themselves with ashes and mud, even men 100 years old act like boys, become void of shame, utter obscene songs, dress like cowherds, *dombas*, barbers and also went about naked. It is remarkable that Skanda averred that gods and *pitrs* did not accept the offerings of a man who did not take part in this festival and remained aloof. There was difference of views about the time when the utsava was to be celebrated. Vide HV II p. 368, and VP (folios 91–92), which place it in Jy. kr. 1 to 15 (by pūrnimānta reckoning)

Uddālakavrata—Vide Vas. Dh. S XI. 76–77; it was prescribed for one who was patitasāvitrika. See H. of Dh. vol II pp. 376–377. In HV II p. 932 (from Brah.), it is described as subsisting on āmiksā and boiled milk for two months each, eight days on curds, three days on ghee and total fast for one day.

Udyāpana—Vide pp. 120–21 above It is said in KTV 95 that in some vratas like Krsnajanmāstamī to be observed throughout one's life there is no udyāpana.

Unmīlanīvrata—Ekādaśī mixed with dvādaśī. Vide p 119 above; Pad. VI. 37–29 ff. and SmK 250–2.

Upacāras—(items in worship of images) Vide pp 34–37 above.

Upavāsavrata—See under Ekādaśī pp 97–100, vide Vi Dh. I. 59. 3–5 for rewards of fast on week-days from Monday, *ibid* I. 59. 6–15 for fasts on naksatras and I. 59 15–20 for fasts on tithis from 1 to 15 No upavāsa beyond a month was allowed. Vide S Pr folio 300, HV II 776–783.

Upākarma—Vide H of Dh. vol. II. pp 807–815.

Upāngalalitā—Āśv. śu. 5: tithi; Lalitādevī (i.e. Pārvatī); prevalent in the Deccan; story of brāhmana Gautama from Broach, KTV 218 (ff); SmK 343–352, PC 99, VR 206–219 (from Skanda).

Ubhayadvādasī—Begin on Mārg. Kr 12, then P. śu. 12 and so on for one year on all 24 dvādasīs; tithi; the 24 forms of

Ubhayaikādaśī—Begin on 11th in Märg.; tithi; one year (in each paksa); Visnu; different names (such as Keśava, Nārāyana) in dark half and other names of Krsna in śu. paksa Vratārka folios 233b–237a. It notes that among Gurjaras it is called 'Ubhayā' simply.

Umācaturthī—M. śu. 4; tithi; Umā; KKN 437–438, SPr (folio 47b), KR 503; Men and specially women should worship with *kunda* flowers and should observe fast.

Umāmaheśvaravrata—(1) Begin on Bh pūrnimā; sankalpa on 14th; tithi; worship of golden or silver images of Umā and Śiva; Vratārka folios 336a–343b (from Śivarahasya); well-known in Karnātaka; (2) begin on pūrnimā, amāvāsyā, 14th or 8th tithi; one year; Umā and Śiva to be worshipped; *nakta* with *havisyānna* on those tithis; HV II 395 (from Śivadharma); (3) on 8th and 14th tithis; one is to fast for one year on those two tithis; HV II. 396 (from Śivadharmottara; (4) begin on first tithi of Märg.; tithi; one year; same deities; Linga, purvārdha 84 23–72; (5) Begin on Märg. śu. 3; tithi; one year; same deities as above; Bhav U 23 1–28, Linga, pūrvardha 84; (6) HV. II. 691–693 (from Devipurāna), KKV 414–416.

Umādhipūjā—Cai. śu. 2; tithi; worship of Umā, Śiva and Agni; SmK 8, PO 83

Ulkānavamī—9th tithi of Āśv. śu.; tithi; one year; worship of Mahisāsuramardinī with mantra 'Mahisaghni Mahāmāye' HV I. 895 (from Bhav U.). Another variety is; HV I. 897–9 and VP folio 187a (from Saurapurāna);

mantra is the same as in first variety. The vrata is so called because the man appears to his enemies like ulkā (fire-brand) and the woman performer to her co-wives just like ulkā.

Usahkāla—The period of five ghatis before sunrise, or 55 ghatis after the preceding sunrise is so called 'Pañca-pañca usahkālah saptapañcārunodayah | astapañca bhavet prātah śesah sūryodayo matah ||' KSS 52 (from Devībhāgavata).

Rtuvratas—HV II. 858–861; mentions five seasonal vratas which are entered at the proper places in this list; vide also VKK 237–240, SmK pp. 548–552.

Rsipañcamī—Vide pp. 149–151 above.

Ekānangāpūjā—on K. śu. 4th, 8th, 9th or 14th; on the last women worship Ekānangā under a tree bearing fruit and ask a hawk or other bird to carry to Bhagavatī the excellent morsel of food that they offer and on this day the wife takes her food first and serves it to her husband afterwards, KR 413–414 (from Brah)

Aiśvaryatrtiyā—on 3rd tithi worship Brahmā, Visnu or Śiva and the three worlds with mantras addressed to them separately; secures great prosperity; HV I. 498 (from Vi. Dh.).

Kajjalī—Bh Kr 3 (by pūrnimānta reckoning); tithi; Visnu-pūjā; NS 123, AK (folio 274a, says it is on Śr. Kr. 3) NS says it is well-known in Madhyadeśa

Katadānotsava—This festival was performed on Bh. śu 11 and 12 or 15 when Visnu was supposed to change the side on which he slept for two months; HV II 813, SmK 153.

Kadalīvrata—on 14th of Bh. śu., tithi; plantain plant to be worshipped for health, beauty, progeny &c, HV II 132–133 (from Bhav U) Vratārka says that among Gurjaras it is performed on the Full moon of K, M or Vai. and all upacāras are offered with Paurānic mantras and Udyāpana is performed on the same tithis in those months or in any sacred month. If no kadali available, worship golden image (folio 292a–296a). Vide also AK (folio 611a).

Kapardīśvara-Vināyakavrata—4th tithi of Śr śu; tithi; worship of Ganeśa; Vratārka folios 78b–84a (from Skanda), VR 160–168; both refer to Vikramārkapura and say Vikramāditya performed it.

Kapilāsasthī-vrata—on Bh. Kr. (by amānta reckoning) or Āśvina kr by (pūrnimānta) 6th, conjoined to Tuesday, Vyatīpāta-yoga, Rohinī-naksatra acc to HV I 578 (Prosthapadāsite pakse sasthī Bhaumena samyutā | Vyatīpātena Rohinyā sā sasthī kapilā smrtā ||). If in addition to the above the Sun is in Hasta naksatra then the results are greater still; worship of Bhāskara; gift of a kapilā cow. HV I 577-78 (from Skanda), NS 152, PC 102, VR 221-231. Some works refer it to Āśv.; but when Bh is mentioned it must be taken to be *amānta* as the concurrence of Rohinī is possible on that supposition alone The conjunction of so many items is rare, generally found once in 60 years. For reference to Kapilāsasthī, vide I A vol 25 p 345 where a Canarese inscription of Vijayanagar king Krsnarāya (in Bh Kr. 6 of *śake* 1435 corresponding to Tuesday, 20-9-1513) refers to it

Kumbhaparva—It occurs once in twelve years. The Sun and Moon should be in Makara rāśi, Jupiter in Taurus (Vṛsabha), there is amāvāsyā; this is called Kumbhayoga. Bath at Prayāga on this yoga is deemed to be more meritorious than a thousand Aśvamedhas, a hundred Vājapeyas and a lakh of pradakṣiṇās round the earth. Bath at Prayāga and the large concourse of *sādhus* are the two predominant objects of those who gather there in thousands and sometimes millions. It is in three parts, first is Makarasankrānti, the 2nd (the chief one and called Pūrnakumbha) is *amāvāsyā* and 3rd is Vasantapañcamī. In 1954 A. D. the three dates were 14th January, 3rd February and 7th February. Some hold that the three days are Makarasankrānti, Pausa Pūrnimā and Amāvāsyā. There are other Kumbha-yogas viz at Haridvāra when Jupiter is in Kumbharāśi and Sun enters Mesa, at Nasik when Jupiter is in Simha and Sun and Moon in Karkata, at Ujjain when Sun is in Tulā and Jupiter in Vṛścika.

Dhvajavrata—Garuḍa (eagle), Tāla tree (from which intoxicating liquor is made, Balarāma being fond of wine is called Tālāṅka in Amarakośa), Makara (a mythical animal like crocodile), and deer are the banners respectively of Vāsudeva, Saṅkarṣaṇa, Pradyumna and Aniruddha; the colours of their garments and flags are respectively yellow, blue, white and red, in Cai., Vai., Jy., and Ās. every day in each month worship respectively of Garuḍa &c. with appropriately coloured garments, flowers, at end of four months brāhmaṇas to be honoured and appropriately coloured garments to be donated; three turns of four months in the same way; different worlds are reached acc to the length of time, if performed for twelve years the performer attains *sāyujya* with Viṣṇu; this is a Caturmūrtivrata in Vi Dh. III. 146. 1-14 and HV II. pp 829-831.

Naktacaturthī—begin on Mārg. śu. 4; Vināyaka deity; performer to subsist on nakta food and pāraṇa with food mixed with *sesame*; one year, HV I. 522-536 (from Skanda).

Naktavrata—This is a *divārātrivrata* and therefore has to be performed on a tithi that covers both day and night (NA 16-17). For the meaning of *nakta* vide pp. 101-102 above. It consists in eating nothing by day and taking food only at night Naktavrata may extend over a month, or four months or a year Vide KR pp. 222, 255, 301-303, 406, 445, 477, 491-492 for Naktavrata on the months from Śr. to M; Liṅga (I. 83. 3-54) for naktavrata for one year. Vide also Nār. II. 43. 11-23.

Nakṣatratithi-vāra-graha-yoga-vratāni—HV II. 588-590 (from Kālottara) deals summarily with certain (about 16) special pūjās to be performed on the conjunction of certain nakṣatras with certain tithis and week-days. A few examples are given here. when on a Sunday there is 14th tithi and Revatī nakṣatra or when Aṣṭamī and Maghā-nakṣatra are joined, one should worship Śiva and partake of sesame food and this is Ādityavrata that yields health to the performer

and his sons and relatives. When there is conjunction of Rohinī and the Moon on 14th tithi, or of Astamī and the Moon, that is Candravrata in which Śiva may be worshipped and *naivedya* of milk and curds be offered and one may subsist on milk and secure fame, health and prosperity. When Revatī, Thursday and 14th tithi or Astamī and Pusya are joined, that is Guruvrata, on which one should subsist on the milk of a *kapilā* cow mixed with the fluid extracted from Brāhmī plants; the person becomes master of speech. The Visnudharmasūtra (chap. 90. 1–15) deals with what is to be done when the Full Moon days of Mārg. to K. are in conjunction with the naksatra which gives the name to the month and the rewards of the observances thereon; vide Dānasāgara pp. 622–626, where V. Dh. is quoted and explained.

Naksatrapurusasamata—begin in Cai; worship of the image of Vāsudeva; several naksatras such as Mūla, Rohinī, Aśvinī are to be honoured in connection with the feet, the legs, the knees respectively (and so on with the naksatras and limbs specified). The ten avatāras and their limbs are to be respectively associated with Āślesā, Jyesthā, Śravana, Pusya, Svātī and so on; at end of vrata golden image of Hari placed in a jar filled with jaggery is to be donated to a worthy brāhmana as also bed-stead and its gear; he should pray for the continuous life of his wife and on all the days should partake of food without oil and salt. Mat. 54. 3–30 q. by KKV 400–404, HV II. 699–703, KR 87–91; vide Br. S. chap. 104.

Naksatra-pūjā-vidhi—worship of gods as lords of naksatras with the fruits reaped, such as of Aśvins, Yama, Agni (as lords of Aśvinī, Bharanī, Krttikā in order), that leads respectively to long life, freedom from accidental death, prosperity: Vā. 80. 1–39, HV II 594–597 (from Bhav.) = KR 557–560. These relate the lords of naksatras to the flowers or substances with which they are to be worshipped and the rewards thereof Vide H. of Dh vol II p 247 n. 563 for the lords of Naksatras in Vedic times and Vi. Dh. I 83. 13–21.

Naksatravisese padārthavisesa-nisedhah—(prohibition of doing certain things on certain naksatras). A few examples may be given here. VKK 87–88, TT 28 quote a verse 'one should give up the use of sesame oil on the naksatras Citrā, Hasta,

and Śravana, shaving on Viśākhā and Abhijit, flesh on Mūla, Mrgaśiras and Bhādrapadā, sexual intercourse on Maghā, Krttikā and Uttarā'. This is Vā. 14. 50–51 (with some variations).

Naksatravidhi-vrata—begin on Mrgaśiras; worship of Pārvatī, identifying her feet with Mūla, her lap with Rohinī, Aśvinī with her knees and so on with other limbs; on each naksatra he fasts and at end of that naksatra there is pāranā; he offers different food to the brāhmanas on each naksatra; the flowers and naivedya offered to the deity are different on each naksatra; the reward is beauty and *saubhāgya*; KKV 411–414, HV II. 696–698 (from Devīpurāna).

Naksatravratāni—Agni 196, KKV 399–417, HV II. 593–706. KKV deals with only ten, while HV speaks of 33 Vratas connected with the naksatras from Aśvinī onwards are set out in HV. HK 126–128 and KN 327–328, NA 18 deal with question as to what should be done when a fast is to be observed in a vrata which is concerned with both tithi and naksatra. The rule is that the naksatra for fast must be existing at the time of sunset or at the time when there is a conjunction of the Moon with midnight (i. e. there is the required naksatra at midnight). The first of these two is the principal matter, the 2nd is only *next best* (anukalpa). Vide Vi. Dh. I. 60. 26–27 for this rule q. by KN 327, HK 126, VKK 8.

Naksatrahomavidhi—HV (II. 684–688) quotes Garga in prose for the procedure of offering worship and *homa* to 27 naksatras from Aśvinī to Revatī detailing how many days an illness or danger will last, the deity to be worshipped, the flowers, naivedya, dhūpa, the tree of which fuel sticks are to be offered to Agni, the pūjā mantra, the main material to be offered into fire. One illustrative example is given here. In the case of Rohinī, eight days, Prajāpati is devatā, the naivedya is rice boiled in milk, lotus flowers, dhūpa is the one extracted from the Sarala tree (a kind of pine), the pūjā mantra is 'namo brahmane' (Tai Ār. II. 13, quoted in H. of Dh. II. p. 703 n 681); all *dhānyas* may be offered in fire. The āhutis are to be 108; the reward is ārogya (health).

Naksatrārthavrata—same as Naksatravidhi-vrata above.

Nadītrirātravrata—When a river is full of flood in Ās, a person should collect the water in a dark jar, take it home, then next morning he should bathe in the river and worship the jar, observe fast for three days or one or only ekabhakta, keep a lamp continuously burning, take the name of the river and Varuna, offer arghya, fruits, naivedya &c. and pray to Govinda; this vrata for three years; then donate cow etc.; he secures progeny and saubhāgya Pad. VI. 71.

Nadīvrata—(1) begin on Cāi. śu; for seven days he should subsist in the nakta method and worship the seven rivers Hrādinī (or Nalinī, v. l.), Hlādinī, Pāvanī, Sītā, Iksu, Sindhu, Bhāgīrathī; this to be continued for seven days in every month for a year; offer milk in water and make gifts of water pots filled with milk; at end of year donate to brāhmanas one *pala* of silver in Phā.; HV. II. 462 quoting Vi. Dh. III. 163 1-7; vide Mat 121 40-41, Vāyu 47. 38-39 for the seven streams of the Ganges; (2) HV I. 792 (quoting one verse from Vi Dh.); by worshipping Sarasvatī one secures seven kinds of knowledge.

Āp. Dh S. II. 8. 20. 3-9 and sūtras 10-22 lay down certain restrictive rules of conduct. This is q. and explained by KKV 399-400, HV II. 628.

Pusyasnāna—is a śānti described in HV II. 600-628, Br. S 47. 1-87, Kālikāpurāna 89. The Ratnamālā (VI. 70) says 'As the lion is the most powerful among quadrupeds, so is Pusya most powerful of all naksatras and all undertakings begun on it succeed even though the moon be unfavourable.

Pusyadvādaśī—When Pusya naksatra occurs on Dvādaśī, the moon and Jupiter are in conjunction and the Sun is in the sign of Kumbha (Aquarius), one should offer worship to Brahmā, Hari and Śiva or Vāsudeva alone RM verses 1375-1377, folio 80b (vide ABORI vol. 36 p 333 for these).

Pusyābhiṣeka—is one of the twelve yātrās of Purusottama performed every year when in P. the Full Moon tithi has Pusya naksatra, GK 189.

Pusyārkadvādaśī—when the Sun is in Pusya-naksatra on a dvādaśī, worship Janārdana, this removes all sins, even if Pusya-naksatra is not there on 12th tithi, the procedure should be followed; fast on 11th and donate a vessel *full*

of ghee on 12th; KKV 351, HV I. 1176–77, S. Pr. folio 22a (all quote Devīpurāna).

Pūrṇāhuti—to be offered standing (and never sitting) with the mantra 'Mūrdhānam divo' (Rg. VI. 701, V. S. 7.24, Tai. S. I 4. 13. 1). Vide TT 100 and Kṛtyakalpataru (on Śāntika, folio 8a).

Pūjā—vide above pp. 34–36 for the upacāras; in most vratas five upacāras are enjoined viz gandha, puspa, dhūpa, dīpa and naivedya. There are many rules about certain flowers &c. not being employed in the worship of certain gods and goddesses such as no dūrvā in worship of Durgā, no bilva leaves for the Sun. In mahābhiseka water should be poured with a conch except in the worship of Śiva and Sūrya. For general pūjāvidhi common to all vratas, vide VR 47–49.

Pūrnimāvrata—(1) all pūrnimās should be honoured with flowers, sandalwood paste, dhūpa &c. and the house-wife should take a meal only at night; if unable to observe the vrata on all pūrnimās, it should be done at least on K. śu. 15th; Umā to be worshipped, HV II 243 (from Vi. Dh.); (2) on Śr. Full Moon one should fast, control senses and go through a hundred prānāyāmas; one becomes free from all sins, HV II. 244, (3) on K. Full Moon a woman should draw on the house or park wall Umā and Śiva, worship of these two with *gandha* &c. and offer particularly sugarcane or products of sugarcane juice, she should eat in nakta way without sesame oil; she would enjoy *saubhāgya*; HV II. 244 (from Visnudharma). 'Pūrnimā' is derived by Ksīrasvāmin as 'pūranam pūrnih, pūrnim mimīte pūrnimā.' Vide HK 311 quoting Mat and Br. for derivation.

Pūrnimāvratas—Vide under Paurnamāsīvratas

Pūrvāhna—Vide p. 267 under 'ahan' for what should be done oñ it and Manu IV. 152, Anuśāsana 104. 23 (almost same as Manu), Visnupurāna III. 11. 22.

Pṛthivīvrata—worship of Earth as goddess; HV. I. 574 (only one verse).

Paurandaravrata—on 5th a person should make the figure of an elephant from sesame cake, deck it with gold and also a rider with a goad, cover elephant with red garments and rest its tusk on a copper vessel or kunda and donate it to a brāhmaṇa and his wife with garlands and ornaments, ear-

rings and unsullied garments; the person would long dwell in Indraloka; HV 567-568 (from Bhav. U)

Paurnapratipad-vrata—begin on Cai śu 1st tithi, tithi-vrata; the performer standing in holy water should contemplate on Visnu, should offer worship with *gandha* and the rest and recite Purusasūkta (Rg X. 90 1-16), for a year on both *paksas*; HV I. 344 (from Vi Dh. III. 128. 1-7).

Paurnamāsī—Many grants on the Full Moon days of M., K., Jy, and Ās; vide E I vol VII, Appendix Nos 26-28, 30, 32, 33, 36 from *śake* 608 to 635 (686 to 723 A D.). The word 'paurnamāsī' is derived as 'pūrno māh ('mās' means 'moon') pūrnamāh, tatra bhavā paurnamāsī (tithih)' or 'pūrno māso vartate asyām-iti paurnamāsī'; HV II. 160 says 'pūrnamāso bhaved yasyām pūrnamāsī tatah smrtā' (quoting Bhav. U.) Vide above p 66 (pūrnamāsad-an &c.). When the Moon and Jupiter are seen together (in the same naksatra) on a Full Moon day, that Paurnamāsī is called great (Mahā), gifts and fasts on such a paurnamāsī yield inexhaustible merit (V. Dh. 49. 9-10 q by KR pp. 430-431 and KKN 373); vide KV 346-347, HK 640, VKK 77 and Vi Dh I. 60. 21 for a similar verse. Such a paurnamāsī is called mahā-caitrī, mahā-kārtikī, mahā-pausī &c Vide Cintra praśasti of Sārangadeva (of 20-1-1287 A D) for provision made for festival of Caitra full Moon and Bhādrapada Full Moon, in E I. vol. I p. 271 at p. 279 When Paurnamāsī or Amāvāsyā is *viddhā* the tithi mixed with 1st tithi is to be accepted except in case of Vatasāvitrī; KN 300-301, KTV 59-61, PC 281.

Paurnamāsī-kriya—Vide KN 300-307, VKK 77-81, TT 133, SM 104-116, SmK 270-71.

Paurnamāsī-vratas—Vide Agni 194, KKV 374-385 (only five), HV II. 160-245 (about 38), SmK 432-439, PC 311-314, VR 587-645. Some unimportant matters about Full Moon tithi are mentioned here. On Ās pūrnimā, ascetics (*yatis*) are to shave their heads and not to shave during *cāturmāsya*, they are to stay in one place for four or two months from Āsādhī and perform Vyāsapūjā (PC 284), on Śr. pūrnimā *Upākarma*, on Bh. Full Moon śrāddha to be performed for *Nāndīmukha* pitrs, on M pūrnimā donate sesame, in Phā. theft of firewood allowed to boys from śu 5th to 15th and fire is to be set to such wood on 15th (PC 309), V. Dh. (90.

3–5) provides that if on Full Moon of P. there is Pusya-naksatra and a man bathes Vāsudeva image in ghee and himself applies white mustard paste to his body and bathes with water mixed with *sarvausadhi* and fragrant things and worships the image with mantras of Visnu, Indra and Brhaspati he prospers (q by KR 484).

Pausavratas—KR 474–486, VKK 487–490, NS 211–12, SmK 432–439; some matters are briefly mentioned here Stream of clarified butter in P. on Śiva (linga) from a vessel with song, dance and instrumental music and with illuminations makes the performer free from all sins and takes him to Śivaloka (KR 478), on P. śu. 8th with Wednesday, bath, japa, homa, feeding brāhmanas in worship of Śiva yields merit thousands of times (NS 211); fast on P. 9th of both *paksas* and worship of Durgā thrice in the day, nakta for whole month and bathing Durgā image in ghee, feeding eight maidens and worship of Durgā image made of flour, lead a man to Durgā-loka (KR 477 from Bhav.).

Paustika—Br S. 2 enumerates among the qualifications of the sāmvatsara (astrologer) that he should be well-versed in the śāntika and paustike rites. The difference between the two is: Paustika rites are homa and the like performed for longevity, while Śāntika rites are homa and the like performed for averting threatened evil influence of planets and danger foreboded by unusual occurrences like comets, meteor showers &c; NA 48. KKN 254 states that Śānti means the removal of worldly calamities by means of acts in accordance with Dharma (or Dharmaśāstra).

Prakirnaka—(miscellaneous) vratas—Vide KKV 452–468, H V II, 868–1002, KR 540–593, KN 326–358, VKK 533–564 Most of these will be dealt with separately.

Prakrtipurusa-vrata—on Cai. śu 1 fast, on 2nd worship of Agni with Purusasūkta (Rg X. 90) with *gandha* &c; Purusa and Prakrti are identical with Agni and Soma and the same are Vāsudeva and Laksmī, worship Laksmī with Śrīsūkta, gifts of gold, silver and copper, performer to subsist on milk and ghee; for a year, secures all desires and the road to *moksa*; HV I. pp. 391–92 (from Vi. Dh. III. 129. 1–6).

Prajāpativrata—in the Śānkhāyana Br VI. 6 it is said 'he should not see the Sun rising or setting'. These rules are called Prajāpativrata by Śabara on Jai IV. I. 3 and he

declares that they are 'purusārtha' and not 'kratvartha'. (2) In the Praśnopanisad I. 13 and 15 it is said 'day is the prāna and the night the food of Prajāpati and those who have sexual intercourse by day attack prāna while those that have it by night are observing brahmacarya, that those who observe the Prajāpati-vrata produce children (a son and a daughter).' In Praśna I 15 Prajāpativrata means indulging in sexual intercourse only at night; this meaning is different from that given by Śabara.

Pratipad-vratas—Agni 176 (only two vratas), KKV 35-40, HV I 335-365, KN 140-149, PC 56-81, VR 49-78, HK 614 (quoting Bhav.) say the 1st tithis of Cai., K. and Āśv are the holiest (also HV II. 350). If Pratipad is *viddhā* all dānas should be performed on 1st mixed with 2nd (KN 140).

Pratimāvrata—begin on 14th of K. śu; tithi, for one year, Umā and Śiva deities; images should be made of rice flour; hundreds of lighted lamps, saffron to be applied to the images, dhūpa to be *guggulu*; 108 offerings of milk and ghee; HV II. 57-58 (from Kālottara)

Prathamāstamī—This is the first of the 14 yātrās of Bhuvaneśvara; on Märg. kr. 8, for increase of the life of the first child, Ganeśa and Varuna are worshipped and then bowing to Bhuvaneśvara; GK 115-116, 191.

Pradīptanavamī—on 9th of Āśv. śu., tithivrata, for a year, worship Devī with mantra of 16 syllables (om mahā-bhagavatyai Mahisāsuramardinyai hum phat) and worship Śiva by offering in fire a lump of guggulu, one should take on that day as much food as can be eaten while a grass fire-brand, only one cubit in length held between the thumb and forefinger being lighted, does not go out; HV I. 899-900 (from Devīpurāna)

Pradoṣa—Vide p. 102 above on Nakta

Pradosavrata—in the first quarter of the night of 13th tithi, he who sees (image of) Śiva with an offering (or present) becomes free from all sins. HV II. 19 (from Bhav, one verse).

Prapūdāna—begin on Cai. Śu. 1, distribute to all for four months water, pitrs become satiated, PC 57, SmK 89 (quoting Aparārka).

Prabodha—rising of Visnu and other gods from sleep in K. Vide pp. 109-111 above.

Prabhā-vrata—one who fasts for a half month and then donates two Kapilā cows goes to Brahmaloka and is honoured by gods, Mat. 101. 54 q. by KKV 447, HV II. 884–85 (from Pad.). This is 33rd Sastivrata in KKV.

Prātah-snāna—(bath in early morning) BB (p 350 verse 1530) and RM (verse 1361, ABORI vol. 36 p. 33) state that one should always bathe early morning when the Sun is in Tulā (Balance), Makara (Capricorn) and Mesa (Ram). This is quoted by KR 149 from RM and by VKK 240 (from Bhav.); V. Dh. 64. 8 directs that one who undertakes prātah-snāna must bathe when he sees eastern quarter suffused with the rays of Aruna.

Prājāpatyavrata—one who at the end of Krochra penance donates a cow and feeds brāhmanas acc. to ability goes to the place of Śankara; Mat. 101 66 q. by KKV 448, HV II. 883 (from Pad.) This is 44th Sastivrata in KKV.

Prāptivrata—one who follows ekabhakta way for a year and then donates a jar full of water and food goes to Sivaloka for the period of a *Kalpa*, Mat. 101. 55 q. by KKV 447 (34th Sastivrata); HV II. 866 (from Pad.).

Prāvaranasasthī—on Mārg śu. 6, one should offer to gods and brāhmanas some thing (such as a blanket) as protection against cold, GK 84.

Prāvaranotsava—one of the twelve yātrās of Purusottama on Mārg. śu. 6; GK 189.

Pritivrata—one who omits taking oil bath for four months from Āsādha and then donates food with condiments goes to Visnuloka; Mat 101. 6 q. by KKV 40.

Pretacaturdasī—on 14 of K. kr, the vrata is begun to be performed at night; if in addition there is Tuesday and Citrā naksatra, the merit is far greater; Śiva is deity; if 14th is viddhā, the day on which 14th exists at night is to be preferred; fast on 14th and worship of Śiva and dinner to devotees of Śiva and gifts; by bath in Ganges on this tithi, one becomes free from all sins, one should whirl over one's head a twig of apāmārga plant and engage in tarpana of Yama uttering his names (14 in all), one should light rows of lamps on a river, in temples of Brahmā, Visnu and Śiva, houses where four roads meet; the performer reaches Śivaloka together with 21 generations of his family; on this tithi

firebrands are lighted for persons of the family that died by wounds from arms and for others on amāvāsyā, the performer listens to the story called Pretopākhyāna (of five *pretas* which a brāhmaṇa met in a desert) set out from Saṃvatsarapradīpa (in VKK 461–467) which was narrated by Bhīṣma to Yudhiṣṭhira about the actions by which a man is reduced to the condition of a *preta* (a disembodied spirit, a ghost), and the actions which relieve him from that condition; the performer should also partake of 14 vegetables that are enumerated in Kṛtyacintāmaṇi set out in Introduction (p. XIII) to Vivāda-cintāmaṇi (G. O. S); RM 1338–1345, ABORI vol 36 pp. 328–329, VKK 459–467 (which quotes on p. 460 two verses viz. 1343–1344 from RM), KT 474, SM 100, SmK 371, PC 242–243, TT p 124 and KT 45, set out the fourteen vegetables This was probably named Pretacaturdaśī because Pretopākhyāna was to be recited on it.

Phalārtiyā—begin on 3rd tithi of śu; for one year, Devī (Durgā) is deity; for all, but mostly for women; donate fruits, while performer gives up fruits and follows nakta method and mostly partakes of wheat and several kinds of pulse (such as gram, *mudga*, māsa, &c.), result no lack of wealth and foodgrains and no ill-luck, HV I. 500 (from Pad. Prabhāsakhaṇḍa)

Phalatyāga-vrata—Begin in Mārg. śu. on 3rd, 8th, 12th, or 14th tithi for a year, Śiva deity; performer to avoid taking all fruits a year except 18 dhānyas, should prepare golden image of Rudra with his bull and of Dharmarāja; should make golden replicas of 16 kinds of fruits (such as kūṣmāṇḍa, mango, badara, banana), 16 silver ones of other smaller ones (such as āmalaka, udumbara, cardamom), 16 copper ones of other fruits (such as tamarind, inguda); should place on a heap of *dhānya* two jars full of water covered with cloth and prepare a bed-stead, all these together with a cow should be donated to a brāhmaṇa and his wife at year's end, if unable to give all he may donate only the metal fruits, the jars and golden images of Śiva and Dharma, performer remains in Rudraloka for thousands of yugas, Mat. 96. 1–25 (q. by HV II. 906–909, KKV 436–439)

Phalavrata—(1) give up partaking of big fruits (like jack fruit and kūṣmāṇḍa) for four months from Ās and donate in K. same fruits made of gold with a pair of cows, Sun

deity; performer is honoured in the world of Sun; Mat 101. 62 (one of the Saptivratas) q. by KKV 448, HV II. 818 (from Pad., one half verse being different from Mat.), (2) KN 140 quotes Brah (2½ verses); on Bh. śu. 1 the performer observing silence should cook three kinds of fruits (16 in each group) and offer them to god and donate to a brāhmana.

Phalasasthīvrata—begin observing niyamas on 5th of Mārg. śu.; on 6th prepare a golden lotus and one golden fruit, on 6th at midday he should place the lotus and fruit with sugar on a vessel of clay or copper and offer worship with flowers &c. and observe fast; on 7th all these should be donated with the words 'May the Sun be pleased with me'; he should give up one fruit till the next 5th of dark half, this should be repeated for a year (viz. gift of golden lotus and fruit and giving up one fruit till kr. 5th); in each month on 7th one of twelve names of the Sun to be repeated; performer is freed from all sins and is honoured in Sun's world; HV I. 602–604 (from Bhav. U. 39. 1–12).

Phalasaṅkrāntivrata—on a sankrānti day worship after bath the Sun with flowers &c. and donate to a brāhmana a vessel filled with sugar and eight fruits; then worship a golden image of the Sun placed on a jar with flowers &c.; HV II. 736 (from Skanda).

Phalasaptamī—(1) on Bh. śu. 7th fast and worship of the Sun; on 8th morning worship the Sun and donate to brāhmanas dates, cocoanut fruits and *mātuluṅga* fruits and say 'May the sun be pleased', performer to eat (on 8th) one small fruit with the mantra 'May all my desires be fulfilled' and he may eat only fruits to his heart's content but nothing else; this to be done for a year; the vrata endows performer with sons and grandsons; KKV 204–205, HV I. 701–702 (both quote Bhav. I. 215. 24–27), (2) on Bh. śu. 4th, 5th and 6th the performer should respectively observe ayācita, ekabhakta and fast, worship Sun with gandha &c. and should sleep at night in front of the altar on which sun image is placed; on 7th after sun worship offer naivedya of fruits, feed brāhmanas and eat food himself; if unable to procure fruits he should cook flour of rice or wheat mixed with ghee and jaggery and nutmeg bark and nāgakesara as naivedya; this to be carried on for a year; at end he may,

if able, donate golden fruits, a cow with calf, a field, a mansion, clothes, copper vessel and coral; if poor feed brāhmaṇas on fruits and powdered sesame and donate silver fruits; performer is freed from poverty and hardship and goes to world of Sun; KKV 117-121, HV I. 731-734 (from Bhav. I. 64. 36-61; (3) on Mārg śu. 5 observe niyamas, on 6th fast, donate a golden lotus and a fruit with sugar with 'may the Sun be pleased with me'; on 7th feed brāhmaṇas on meal with milk; he should give one kind of fruit from this day to kr. 5th, do this for a year using different names of Sun in each month; at year's end honour a brāhmaṇa and his wife with clothes, jar, sugar, golden lotus and fruit, performer becomes free from sins and goes to sūryaloka, Mat. 76. 1-13 q in KKV 213-214 (without name), HV I 743-44 (from Pad. V. 21. 249-262)

Phalāhāraḥ priyavrata—Vi. Dh III. 149. 1-10 (This is a caturmūrtivrata); begin fast for three days on Viṣuva day in Vasanta and worship Vāsudeva; for three months Vāsudevapūjā every day; then for three months subsist on fruits; then in śarad Viṣuva fast for three months, and Pradyumna worship; subsist on yāvaka, at end of year gifts to brāhmaṇas; goes to Viṣṇuloka

Phālguna-kṛtya—HV II. 797-799, KR 515-531; VKK 506-517; NS 222-229, SmK 513-519.

It may be noted that generally all the grand annual festivals in big and small temples in South India are celebrated in Phālguna.

A few minor matters are noted here; On Phā. śu. 8 worship of Lakṣmī and Sītā with gandha &c. (KKN 441-443, KR 527, quoting Brah.) On Phā pūrnimā if there be Phalgunī-nakṣatra one should donate a bedstead with good coverlets and thereby one secures a beautiful wife that brings a fortune (V. Dh. 90.), as Aryaman was born of Aditi and Kaśyapa and the Moon from Atri and Anasūyā on Phā pūrnimā, both the Sun and Moon should be worshipped at moonrise and songs, dance and music should be indulged in, KR 530, quoting Brah. and KKN 443; on this pūrnimā a temple festival is held in South India called Uttira.

Phālgunaśravanadvādaśī—when Dvādaśī has śravana-nakṣatra, fast and worship Hari; NM p. 53, verses 626-627.

Bakapañcaka—The five days from K. śu. 11 when Viṣnu rises from sleep up to K. pūrnimā are so called and it is stated that even a crane would not eat a fish in these days; therefore men should abstain from meat-eating during these days; KV 338, KR 425, VKK 479, KT 454.

Bakulāmāvāsyā—on P. amāvāsyā, the pitṛs are to be satiated with bakula flowers and milk boiled with rice grains and sugar; GK 446.

Balipratipad—vide pp 201–204 above The Junagad Inscription of Skanda-gupta refers to Viṣnu's bringing back Laksmi for Indra from Bali (vide Gupta Inscriptions pp 59,62).

Balipratipad-rathayātrā-vrata—on K. śu. 1; fast on preceding amāvāsyā, Agni and Brahmā are the deities; on a ratha (car) Agni should be worshipped, the ratha should be drawn by learned brāhmanas at the instance of a brāhmana performer and should be taken round the town; to the right side of Brahmā image of Sāvitrī; car should be stopped at different places and waving of lights should be done; all those who take part in this yātrā, who draw the car, who light lamps, who look at it with devotion—all reach the highest place; K. śu 1 is Balipratipad and so this rathayātrā is so called; HV I. 345–347 (from Bhav.)

Bastatrirātra-vrata—In Cai offer to the sun for three days three white lotuses on each day and observe nakta every day for three days; donate five milk-yielding she-goats with some gold to a brāhmana; this removes all diseases and the performer is not born again; HV II 323 (from Bhav. U.).

Bahulā—Bh. kr. 4 is so called in Central India; cows to be honoured and one should partake of cooked yavas; NS 123, VKD 67.

Bālavrata—giving a bull and kūsmānda, gold and garment; Pad, III. 5 14 and 31–32; man or woman that killed a child in a former life or did not save a child though able becomes childless and should donate a kūsmānḍa with garments and a bull with gold.

Bālenduvrata or *Bālendudvitīyā-vrata*—on Cai. śu. 2; bath in evening in a river, draw a figure to represent the moon's crescent, worship it with white flowers and *naivedya* of best food and products of sugarcane juice; after worship performer himself to eat food; he should give up food fried in oil; one

year; he secures blessedness and goes to heaven; HV I. 380–82 (quoting Vi. Dh. III. 131. 1–7), SmK 90.

Bilvatrirātravrata—on Jy. pūrnimā with Jyesthā-naksatra one should bathe with water mixed with mustard seeds, then sprinkle water on bilva tree and worship it with *gandha* &c.; for one year one should subsist by ekabhakta way; at year's end one should approach bilva tree with bamboo vessel full of sand or full of barley, rice, sesame &c and worship images of Umā and Maheśvara with flowers &c., address bilva tree with a mantra praying for absence of widowhood and for wealth, health, sons &c; homa with a thousand bilva leaves, make a bilva tree of silver with golden fruits, *jāgara* for three days from 13th to pūrnimā with fast; bath next morning and honouring the ācārya with garments, ornaments &c and feeding 16, 8 or 4 householders with their wives; by this vrata Umā, Laksmī, Śacī, Sāvitrī and Sītā respectively secured as husbands Śiva, Krsna, Indra, Brahmā and Rāma; HV II. 308–312 (from Skanda), SmK 123–124 (simply copies HV).

Bilvarotaka-vrata—see Rotakavrata.

Bilvalaksavrata—a man or a woman may begin in Śr, Vai., M. or K. and burn every day three thousand bilva wicks (wicks of cotton thread spun by the woman herself and dipped in ghee or sesame oil) placed in a copper vessel in honour of Śiva in a temple or on the Ganges or in cowpen or near a brāhmana; a *lakh* or crore of wicks may be prepared; all may be burnt in a single day if possible; *Udyāpana* on a pūrnimā; VKD 398–403.

Bilvaśākhāpūjā—on Āśv śu. 7; SM 23 and VR 248; vide p. 160 under Durgotsava

Buddhajanmamahotsava—on Vai śu when the Moon is in Pusya-naksatra an image should be established with texts uttered by Śākya and the temple should be white-washed; for three days *naivedya* and gifts to poor people, NM pp 66–67, verses 809–816. It should be noted that in NM also Buddha is declared to be an avatāra of Visnu in Kaliyuga. Buddha's Parinirvāna took place in Kārtika according Sarvāstivādins and in Vaiśākha according to Ceylonese tradition. Vide Bajaur casket inscription of Menander's reign in E I. vol. 24 p. 6.

Buddhadvādaśi—in Śr. śu 12; tithi; worship of golden image of Buddha with *gandha* &c; donate it to a brāhmana; Śuddhodana did this vrata and so Visnu himself was born to him as Buddha; KKV 331–332, HV I. 1037–1038 (as a Dharanī-vrata from Var.), KR 247–248. The printed Var. (47.1–24) which contains only the first half verse occurring in KKV and HV narrates the story of Nrga In Var. 55. 37 reference is made to avatāras from Nrsimha to Rāma and it proceeds 'namostu te Buddha Kalkin varesa'. Vide Buddhapūrnimā Vai. śu. 15 and Br. S. 57. 44 for directions as to image of Buddha.

Budhavrata—When planet Budha (Mercury) comes to Viśākhā naksatra one should observe for seven days nakta way; a golden image of Budha should be placed in a bell metal vessel with white garlands and *gandha* &c. and donated to a brāhmana; Budha sharpens intellect and conveys real knowledge; HV II. 578 (from Bhav. U.)

Bhānusaptamī—when 7th tithi falls on a Sunday it is so called; GK 610.

Bhārabhūteśvara-yātrā—on Ās. pūrnimā; worship of Bhārabhūteśvara in Kāśī; PC 284.

Bhāskarapūjā—It is said that the sun should be worshipped as a form of Visnu and that the sun is the right eye of Visnu, that the sun should be worshipped in a mandala resembling a chariot wheel and that the flowers offered to a sun image and later removed should not be worn by a person on his own body; TT 36, PC 104; Br. S. (57. 31-57) gives directions as to how the images of certain gods were to be made and verses 46-48 describe the image of Sūrya, one characteristic being that the body from the feet to chest should not be shown but covered with a jacket.

Bhāskaraprīyā-saptamī—when the sun passes from one Zodiacal sign into another on śu. 7, then it is called mahājayā, is very dear to the Sun and bath, gifts, *tapas*, homa, worship of gods and pitrs performed on that tithi yield merit a crore of times; KV 416, VKK 35 (from Bhav.), TT 145 (from Brah.).

Bhāskaravrata—fast on 6th (of kr. ?) and on 7th śrāddha with the words 'may the Sun be pleased'; tithivrata, Sun deity; performer freed from diseases and goes to heaven; HV I. 788 (from Bhav.).

Bhīmadvādaśī—(1) It was first imparted to Bhīma, one of the Pāndavas, by Vāsudeva and came to be known by his name; this was formerly called Kalyāninī. It is elaborately described in Mat. 69. 19-65 (which also occur in Pad. V. 23), most of which are q by KKV 354-359 (from Mat) and HV I. 1044-1049 (from Pad.); on 10th of M śu bath with ghee applied to the body and worship of Visnu with the words (namo Nārāyanāya), the various limbs of Visnu being honoured with different names (Krsna, Dāmodara &c), worship of Garuda, of Śiva, Ganeśa; total fast on 11th; on 12th bathe in a river and raise mandapa in front of house, hang a jar full of water from a *toraṇa* with a small hole at the bottom and take the drops on one's hand the whole night; *homa* through four priests learned in Rgveda, Rudra-japa by four Yajurvedins and *sāmans* to be sung by Sāmavedins; these twelve priests to be honoured with rings, garments &c., on next tithi donate 13 cows;

after priests go he should say 'May Keśava be pleased, and Viṣṇu is the heart of Śiva and Śiva is the heart of Viṣṇu'; should listen to *itihāsa* and *purāṇa*; vide Gar. I. 127 for this, (2) on M. śu. 12; this was imparted by Pulastya to Bhīma, king of Vidarbha and father of Damayantī wife of Nala: arrangements as in the preceding; performer freed from all sins; this vrata is superior to Vājapeya and Atirātra &c. HV. 1049–1056 (from Bhav. U.).

Bhīmavrata—one who having fasted for a month donates at end a fine cow reaches the world of Viṣṇu; Mat. 101. 51 q by KKV 446, HV II. 884 (from Pad).

Bhīmaikādaśī—M. śu. 11th joined with Puṣya or without it is very sacred and dear to Viṣṇu. Dhaumya describes to Bhīma in Pad. VI 239 28 ff.

Bhīṣmapañcaka—For five days from 11th tithi of K. śu.; performer bathes three times applying pañcāmṛta, pañcagavya and water mixed with sandalwood paste; *tarpana* of pitṛs with yava, rice and sesame; 108 times repeat the mantra 'om namo Vāsudevāyā' at worship and when performing homa offer sesame, yava and rice mixed with ghee with mantra of six letters 'om namo Viṣṇave'; this procedure to be followed for five days, on the 1st to 5th day the feet, knees, navel, shoulders and head of Hari should respectively be worshipped with lotuses, bilva leaves, bhṛṅgāraka, (on 4th day) *bāṇa, bilva* and Jayā, Mālatī; on 11th to 14th he should respectively partake of cow-dung, cow urine, milk and curds for purifying the body; then on 5th day performer to feast brāhmaṇas and give gifts; the performer's sins are all wiped out; HV II. 336–341 (from Nār. and Bhav. U, the first saying that Bhīṣma learnt it from Kṛṣṇa, while the latter makes Kṛṣṇa declare that he learnt it from Bhīṣma when the veteran hero was lying on his bed of arrows); Bhav. U. allows the performer to eat vegetables and the food of ascetics KV 324 cites the last verse occurring in HV II. 34 from Bhav. U. Later medieval works like NS 204, SM 158–159, SmK 386 add (from Pad.) that *arghya* and water should be offered to Bhīṣma by men of all varṇas and the tarpaṇa mantra is note-worthy 'Vaiyāghra-padya-gotrāya Sāṅkṛtyapravarāya ca। Gaṅgā-putrāya Bhīṣmāya pradāsyeham tilodakam ॥ aputrāya dadāmyetat salilam Bhīṣmavarmaṇe।'. These occur in BB p. 364 verses 1714–15 and the verse 'Vaiyāghra' occurs in RM (vide ABORI

vol. 36 p. 332) and in HK 628 By doing this a man becomes free from sins Vide Agni 205 1-9, Gar I. 123. 3-11, Pad. VI. 125 29-82 that contain a very elaborate description of this vrata.

Bhismāstamī—on M. śu. 8; offer water and śrāddha every year to Bhisma who died a bachelor, he who does so becomes free from sins committed in one year and secures progeny; HK 628-29, VKK 503, TT 58, NS 221, SM 61 One whose father is alive also can offer water to Bhisma (*SM 61*). *This tithi is probably based on Anuśāsanaparva 167. 28 (Māghoyam samanuprāpto .. tribhāgaśesah paksoyam śukio bhavitumarhati*). With great respect to Prof. P. C SenGupta I must say that his interpretation of 'samanuprāpta' as 'samanupravista' is quite wrong and unwarranted and it is not possible to accept his conclusion that Bhisma died on 8th of dark half of Māgha and not on 8th of bright half. Vide his paper in JASB vol. XX No. 1 (Letters) pp 39-41 (1954). The Bhujabalambandha p 364 has two verses, which are quoted in TT, NS and other works 'अष्टम्यां तु माघस्य दद्याद् भीष्माय यो जलम्। संवत्सरकृतं पापं तत्क्षणादेव नश्यति ॥ वैयाघ्रपद्यगोत्राय सांकृतिप्रवराय च। अपुत्राय ददाम्येतत्सलिलं भीष्मवर्मणे ॥'. Even brāhmanas were called upon to offer water to the noble ksatriya warrior Bhisma.

Bhuvaneśvara-yātrās—The fourteen *yātrās* of Bhuvaneśvara are enumerated and described (such as Prathamāstamī, Prāvārasasthī, Pusyasnāna, Ājyakambala) in GK 190-194.

Bhūtacaturdaśī—Same as Pretacaturdaśī pp 351-52 above; vide KT 450-451.

Bhūtamahotsava—The same as Udasevikā pp 275-76 above; HV II. 359-365 (*from* Skanda).

Bhūtamātrutsava—From 1st to pūrnimā of Jy , HV II. 365-370. Same as Udasevikā. The Sarasvatīkanthābharana of Bhoja (V. 94) on Poetics mentions it among *krīdās* Bhrātrbhāndā, Bhūtamātā and Udasevikā are three names of one utsava (HV II. 367).

Bhūbhājanavrata—It is a sāmvatsara vrata; the man who for one year takes his food on bare ground (not in a plate or on a leaf like that of plantain) after presenting it to pitrs becomes sole ruler of earth, HV II. 687 (from Pad.)

Bhūmivrata—on śu. 14th; worship of Sun acc. to procedure of Lingavrata and fast in honour of Śiva; offer saffron,

flowers, pāyasa with ghee and gifts of land to a devotee of Śiva; performer secures position of king; this vrata should be performed by a king; HV II. 63–64 (from Kālottara).

Bhṛguvrata—begin on Mārg kr. 12; tithi; worship of twelve gods called Bhṛgus to whom *yajña* is offered (names set out are somewhat peculiar and unusual), for one year (on each kr. 12); at end donate a cow; Vi. Dh. III. 180. 1–5 q. by HV I. 1172.

Bhaimī-ekādaśī—when on M. śu. 11 there is Moon in Mṛgaśīrsa-naksatra, one should observe fast and on 12th the performer should be *ṣaṭtilī* i e. he should bathe with water mixed with sesame, rub sesame paste on his body, offer sesame in fire, drink water mixed with sesame, make gift of sesame and eat them; if a person fasts on this ekādaśī called 'Bhīma-tithi' he reaches Visnuloka; Ekādaśītattva p. 101, TT 113–114, VKK 504.

Bhairavajayanti—K. kr. 8 is known as Kālāstamī; fast on that tithi and jāgara; worship of Bhairava for four praharas of the night and jāgara in listening to and narrating legends about Śiva; the performer becomes free from sins and becomes a good devotee of Śiva, this is obligatory on persons dwelling in Kāśī; SM 60–61, SMK 427–429, PC 138.

Bhogasaṅkrāntivrata—on Sankrānti day call together women and give them saffron, lampblack collyrium, vermilion, flowers, scents, *tāmbūla* and camphor, fruits and also to their husbands; feed them and present pair of garments; on each sankrānti for one year, at end worship the Sun and donate a cow to brāhmana who has a wife; performer secures happiness; HV II. 733 (from Skanda).

Bhogāvāptivrata—worship Hari for three days from the 1st tithi after Jy. pūrnimā and donate a bedstead; performer enjoys pleasures and goes to heaven; Vi. Dh. III. 212. 1–3 q. by HV II. 752.

Bhaumavāravrata—Mars is the son of the Earth and fine in appearance; on each Tuesday one should donate a copper vessel filled with jaggery for one year; at end donate a cow; performer secures beauty and wealth; HV II. 567.

Bhaumavrata—(1) when Tuesday has Svāti-naksatra a man should eat by nakta way; this is to be repeated seven times; he should place in a copper vessel golden image of Mars covered

with red cloth and saffron used as unguent; offer flowers and naivedya and donate to a brāhmana householder with a mantra 'though you are *Kujanmā* still the wise call you *Mangala*'. There is a pun on Kujanmā that has two senses (1) 'born on an inauspicious day', (2) 'born of the earth'. As Mars is red in appearance, copper, red cloth and saffron are used to match his colour; HV II. 567 (from Bhav. U.); (2) worship Mars on Tuesday; repeat in the morning the several names of Mars (21 in all, such as Mangala, Kuja, Lohita, favouring Sāmavedins, Yama); draw a triangular figure with a hole in the middle and draw three names (Ara, Vakra, Kuja) with saffron and red sandalwood paste on each angle; Mars was born in Ujjayinī in a Bhāradvāja family and rides a ram, if a man performs this vrata throughout life he becomes prosperous, has sons and grandsons and reaches the world of the planets; HV II. 568-574 (from Pad.); VKD 443-451 has a far more elaborate procedure of Bhaumavāra-vratapūjā

Bhrātrdvitīyā—on K. śu 2; it is also called Yamadvitīyā because in ancient times Yamunā treated her brother Yama to a dinner on this day; some works like KT 453, Vratārka, VR 98-101 combine the two viz. worship of Yama and dining at one's sister's house. Vide pp 209-210 above for the latter.

Mangala—Acc. to Ātharvanaparisista q by HV II. 626 brāhmana, cow, fire, land, mustard, clarified butter, śamī, grains of rice and barley are eight auspicious things Dronaparva 127. 14 speaks of eight mangalas; Drona 82, 20-22 contains a much longer list. Vā 14 36-37 enumerate several things as auspicious which should be touched when going out of one's house viz. dūrvā, clarified butter, curds, jar full of water, cow with calf, bull, gold, clay, cowdung, svastika, aksata grains, oil, honey, brāhmana maidens, white flowers, śamī, fire, Sun's disc, sandalwood and aśvattha tree (q by Sm C. I. p. 168) Vide Parāśara XII 47, Visnudharmottara II. 163. 18 ff. for other lists of mangala objects.

Mangala-candikāpūjā—VKK (552-558) gives an elaborate procedure; Mangalacandikā is called Lalitakāntā; the mantra (i.e Lalitā-gāyatrī) for her worship is Nārāyanyai vidmahe tvām Candikāyai tu dhīmahi | tan-no Lalitakānteti tatah paścāt pracodayāt ||); worship on 8th and 9th tithis; she may be worshipped on a piece of cloth or as an

image or on a jar; whoever worships her on Tuesday secures desired objects. Vide TT 41 also.

Maṅgalacandī—on Tuesday; worship of Caṇḍī who was first worshipped by Śiva, then by Mars, by king Maṅgala and by beautiful women on Tuesday and then by all men desiring good fortune; Brahmavaivarta, Prakṛti-khaṇḍa 44. 1–41 (specially 32, 37–38).

Maṅgalavrata—begin on kr. 8th of Āśv., M., Cai., or Śr. and carry it on till next śu. 8th; on 8th ekabhakta, dinner to maidens and devotees of Devī, nakta on 9th, ayācita on 10th, fast on 11th; repeat this; every day gifts, homa, japa, pūjā and dinner to maidens; sacrificing a *paśu*; jāgara with dance and drama; japa of 18 names of her; HV II. 332–335 (from Devī-purāṇa).

Maṅgalāgaurīvrata—on all Tuesdays in Śr. by married girls for five years after marriage; prevalent in Mahārāstra; the worshipping women take noon dinner silently; 16 kinds of flowers; 16 suvāsinīs are required; *nīrājana* of Devī with 16 lamps; *jāgara*; Gaurī is deity; prayer to Maṅgalā for freedom from widowhood, for sons and for fulfilment af all desires; leave is taken of Gaurī next mornning; VR 787–795 (from Bhav.)

Maṅgalāstaka—The eight substances to be distributed to women when invited in a vrata like Saubhāgyasundarī are saffron, salt, jaggery, cocoanut, tāmbūla leaf, dūrvā, vermillion, collyrium; VR p. 119.

Maṅgalyasaptamī or Maṅgalya-vrata—on 7th; on square mandala Hari and Lakṣmī should be invoked and worshipped with flowers &c, four vessels of clay, copper, silver and gold should be got ready and four clay jars covered with cloth and full of salt, sesame, turmeric powder; eight young chaste women whose husbands are alive and who have sons should be honoured and given dakṣinā and in their presence performer should pray to Hari for 'mangalya' (auspicious life); then the women should be dismissed; on the 8th again worship Hari and *pārana* with honouring eight young women and feeding brāhmaṇas; every one, male or female, prince or peasant, secures his desired objects; HV I. 768–770 (from Gar.).

Manthānasasthī—on Bh. śu 6; vide VK No. 397.

Mandārasasthī—on 6th of M. śu, on 5th the performer takes a light meal; on 6th he fasts and makes a prayer to the Mandāra tree; next day he should apply saffron to Mandāra

(the coral tree) and prepare a lotus of eight petals on a copper vessel with dark sesame, and worship the sun with Mandāra flowers in the eight directions from the east under different names and worship Hari in the pericarp; for a year in each month on 7th śu. same procedure; at end donate a jar on which a golden image is placed; HV I. 606–608 (from Bhav U. 40. 1–15). Mandāra is one of the five trees of paradise, the others being Pārijātaka, Santāna, Kalpavrksa and Haricandana

Mandārasaptamī—on 7th of M. śu; on 5th light meal, on 6th fast; on night eat Mandāra flowers; next day make brāhmanas partake of eight Mandāra flowers; Sun deity; the rest as in the preceding vrata; HV I 650–652 (from Pad. V. 21. 292–306), KKV 219–221; Mat. 79. 1–15 are the same as Pad

Manvādi—there are fourteen Manvantaras; the four Yugas make one Mahāyuga of 4320000 years; one thousand Mahāyugas are equal to a *kalpa* which is a day of Brahmā and the night of Brahmā is also of the same duration. As there are 14 Manvantaras in a Kalpa, each Manvantara is a little over 71 Mahāyugas; Visnupurāna III. 2. 50–51, Mat. 144. 102–3, 145. 1, Brah chap 5; Nār. (I. 56. 149–152) sets out the tithis on which each Manvantara started and that are therefore called Manvādi-tithis; these tithis are sacred and śrāddhas are to be offered on them. Vide H of Dh. vol. IV. p. 375 for the Manvādi tithis and Vi Dh. I. chap. 176–189 for names and descriptions of the 14 Manvantaras.

Maricasaptamī—on Cai śu. 7 worship the Sun, feed brāhmanas and make them partake of 100 maricas (pepper) with the mantra 'om khakholkāya svāhā'; the performer has not to undergo separation from those dear to him; Rāma and Sītā, Nala and Damayantī performed this vrata; HV I. 696 (from Bhav. I. 214 40–47.)

Marud-vrata—on Cai śu. 7; fast on 6th, worship of seasons on 7th; performer should arrange seven rows, each row to have seven mandalas drawn with sandalwood paste; in the first row he should put down seven names from Ekajyotih to Saptajyotih; different names in each of the seven rows; 49 lamps to be lighted; *homa* of ghee and feeding of brāhmanas for one year; at end gift of new garment and cow; this vrata gives health, wealth, sons, learning and heaven; HV

I 775-777 from Vi. Dh (III 166 1-22) The Maruts are said to be seven or seven times seven Vide Ṛg V 52 17 (sapta me sapta śākina), Tai S II. 2 11. 1 (saptagaṇā vai marutah).

Mulamāsakṛtya—for actions to be done in intercalary month and forbidden therein, vide 'adhimāsa' and the next section on Kāla &c

Malladvādasī—on Mārg śu 12, on the banks of Yamunā Krsna sported at the foot of Bhāndīravaṭa on Govardhana hill in the midst of cowherds (who were wrestlers) and *Gopis*, the wrestlers worshipped him with flowers, with milk, curds and edibles; for one year on each 12th, the mantra is 'may Krsna be pleased with me'; this was also called *Aranyadvādaśī* since cowherds and wrestlers gave edibles to each other in a forest; reward is health, strength, prosperity and Visnuloka; HV I. 1115-1117 from Bhav. U.

Mallārimahotsava—on Mārg. śu 6; the wife of Mallāri is Mhālasā (probably a corrupt form of Madālasā), in worship of Mallāri the principal ingredient is turmeric powder, which is called *Bhaṇḍārā* in Mahārāṣṭra, the worship is either on each Sunday or Saturday or on each 6th. the procedure of the worship is taken from Brahmānda, Mallāri-māhātmya of Ksetrakhanda, AK folio 421.

Mahattamavrata—on Bh. śu 1, tithi, worship of golden or silver image of Śiva with three eyes, matted hair and five faces by placing it on a jar; bathing it with pañcāmrta, offering flowers &c.; performer to observe silence; 16 fruits to be offered at end gift of cow, performer secures long life, kingdom &c, SmK p 201 (quoting Skanda from Madanaratna), NA calls it Maunvrata, but that is wrong

Mahākārtiki—See p. 284 under Kārtika Vide I. A. vol. III. 305 and vol. VI. 363 (inscription of the 12th year of Calukya king Mangalesvara in *Saka* 500, 578 A D.) that mention that the king made a Mahānga dhūpa described in KKV 172, HV I 730 (quoting Bhav I. 105) and to be employed in Kāmadā saptamī, *Mahādāna* to brāhmanas on Mahākārtika-paurnamāsi

Mahācaturthī—Bh. su. 4 falling on a Sunday or Tuesday is so called; by worshipping Ganeśa on it, man secures his desires, SmK 210.

Mahācaitrī—Cai. Pūrnimā with Jupiter in conjunction with Moon and Citrā-naksatra, PC 313, GK 599.

Mahājayāsaptamī—When the Sun enters a Zodiacal sign on śu. 7th that tithi is called Mahājayāsaptamī, bath, japa, homa, worship of gods and Manes yield rewards a crore of times, if the image of the sun is bathed on that tithi with ghee or milk, the man goes to Sūryaloka, if a man fasts on it he goes to heaven; KKV 135-136 = HV I. 669 (from Bhav. I. 199. 1-7) KKV is, as often, silent about the source HK 414 quotes all these from Brah., TT 145 does the same.

Mahājyaisthī—If Jy Pūrnimā has Jyesthā-naksatra and the Moon and Jupiter are in conjunction and the Sun is in Rohinī it is so called and *dāna*, japa &c. yield great reward; PC 313, GK 600.

Mahātapovratāni—numerous little actions are dealt with under this head in several works on vratas. They are not separately entered in this list. Vide KKV 453-469, HV II. 917-931, KR 540 ff, VKK 533 ff.

Mahātrtīyā—on 3rd tithi in M. or Cai.; Gaurī is deity: one should offer *guḍadhenu* and himself abstain from eating jaggery: it causes great happiness and leads to Gaurī-loka; HV I. 484 (from Pad.). For a detailed description of Guḍadhenu, vide Mat 82 and H. of Dh. vol. II. 880.

Mahādvādaśī—the 12th tithi of Bh. śu. with Śravana-naksatra is so called; fast on it and worship of Visnu leads to great rewards; KR 286-287. Vide Vi. Dh I. 161. 1-8 in one verse of which it is stated that if Bh. śu. 12 falls on a Wednesday and has Śravana naksatra, it is 'atyanta-mahatī' (greater than great) Vi. Dh. I. 162 (1-71) dilates upon the *māhātmya* of Śravana-dvādaśī. Besides this there are eight very holy dvādaśīs for which see p. 119 above.

Mahānandānavamī—9th of M. śu is called Mahānandā; tithi-vrata, for a year, Durgā is deity; year divided into three periods of four months; in each period flowers, *dhūpa*, naivedya and the names of the goddess are different; performer secures all desires and Brahma-loka; KKV 306-307, HV I. 955-56 (from Bhav.).

Mahānavamī—(1) This is the same as Durgapūjā-utsava, for which see pp 174-175 above and Krtya-kalpataru (on Rājadharma) pp. 191-195 and RNP pp. 439-444 (both quoting

Devīpurāṇa), HV I. 903–920, NS 161–185, KR 349–364, (2) begin on 9th of Āśv śu or K śu. or Mārg śu., tithi-vrata, Durgā deity; for one year; flowers, dhūpa, material for bath different in several months, dinner to maidens; performer goes to Deviloka, KKV 296–299, HV I. 937–939 (calls it Durgānavamī and quotes Bhav.), PC 134, HK p 107 quotes Skanda, Prabhāsakhanda, that Mahānavamī is 8th tithi in Āśv śu with Mūlanakṣatra or the same tithi with Mūla when the Sun is in the sign of Kanyā (Virgo) and Gar. I chap 133 3–18 and chap 134, Kālikāpurāṇa (chap 62) speaks of Mahānavamī and pūjā thereof; and also Gar I 133 3–18 and chap 134, E I p 260 mentions a grant by Pulakeśi Mahārāja of 300 nivartanas of land on Kārtika-Mahānavamī on Thursday.

Mahaniśā—Vide p 117 n. 302 above for the meaning

Mahāphaladvādaśī—On P. kr. 11th with Viśākhā-nakṣatra; Viṣnu deity; for a year, use certain things for purification of the body in the several months and donate on *dvādaśī* each month one out of the several things in order, such as ghee, sesame, rice; on death reaches Viṣnuloka, HV I. 1095–96 (from Viṣnurahasya).

Mahāphalavrata—for a *pakṣa*, four months or a year; the performer has to subsist on certain things only from the first to the 15th tithi in the following order, milk, flowers, all food except salt, sesame, milk, flowers, vegetables, bilva fruit, flour, uncooked food, fast, ghee, milk boiled with rice grains and sugar, *yavas*, cow's urine and water in which kuśas are dipped. On all these days a certain procedure has to be followed, on day previous to vrata three times bath, fast, japa of Vedic hymns and of Gāyatrī &c; various rewards promised and ultimately he goes to Sūrya-loka, HV II. 393–394 (from Bhav.)

Mahāphala-saptamī—When on Sunday there is 7th tithi and Revatī-nakṣatra worship Durgā with Aśoka buds and eat the latter; PC 105.

Mahāphālgunī—Vide rule under Kārtika about prefixing 'Mahā'; GK 599, PC 314.

Mahābhadrāstamī—P. śu '8 when falling on Wednesday is called Mahābhadrā and is very holy; Śiva deity; SmK 438, GK 605–606, PC 138.

Mahābhādrī—Vide under Kārtika for rule about 'Mahā'.

Mahāmāghī—When the Sun is in Śravana naksatra and the Moon in Maghā it is called Mahāmāghī, acc to R. M. 1366 (vide ABORI. vol. 36 p 331 for three verses on Māghīsnāna) and it adds that in Māgha waters exclaim when the Sun is just risen 'what great sinner, whether a drinker of *surā* or murderer of a brāhmana, shall we purify'. This verse is q by VKK 490 from Bhav and by SmK 439 (from Pad), PC (313–314) says that when Saturn is in Mesa (Ram), the Moon and Jupiter in Simha (Lion) and the Sun is in Śravana-naksatra then it is Mahāmāghī. Vide NS 221 for other views. This verse emphasizes the importance of Māghasnāna at Prayāga and other holy rivers and in holy tanks in early morning for the removal of sins. Vide H. of Dh vol IV p 617 for Māghasnāna In Tamil country 'Makha' is an annual temple festival and Mahāmakha occurs once in twelve years, when a great *melā* is held at Kumbhakonam for a bath in a tank there called mahāmagha tank, the melā being comparable to the Kumbhamelā at Prayāga. This festival is popularly known as 'Mamangam' and takes place when the Full Moon is in Maghānaksatra and Jupiter is in Maghā or in the sign of Lion. It fell on 25th February in 1955 according to south Indian Almanacs It is reported that about a million people took a bath this year in eight to ten hours from 2 A. M. in the Mahāmakham tank at Kumbhakonam from which muddy water was pumped out and in which fresh water from the Kāverī river was made to flow.

It is surprising that hardly any medieval digest refers either to the Mahāmakham festival or the Kumbhamelā The great emperor Harsa used to hold once every five years a great melā at Prayāga on the great sandy plain to the west of the *sangam* on the site where the Kumbhamelā is held in modern times and distributed the accumulations in his treasury.

Mahāmārgasīrsī—Vide above under Kārtika for prefixing 'Mahā'.

Mahārājavrata—When 14th tithi (of su. or kr) falls on Ārdrā-naksatra or when it is joined to Pūrvābhādrapadā and Uttarābhādrapadā or both, that tithi gives pleasure to Śiva; sankalpa on preceding 13th, on 14th bath one after another with sesame, cow's urine and dung, clay, pañcagavya and then with pure water; then *japa* 1000 times of Śivasankalpa mantra ('Yaj-jāgrato dūram', Śivasankalpo-panisad, 8) for three varnas and 'om namah Śivāya' for śūdras; bath of images of Śiva and Umā with pañcāmrta, pañcagavya, sugarcane juice and applying to the images unguents like musk, saffron &c, rows of lamps; *homa* with thousands of bilva leaves while repeating Śivasankalpa or the mantra 'Tryambakam yajāmahe' (Rg VIII. 59 12, T. S. I. 8 6 2), arghya to Śiva with mantras (set out), jāgara whole night; gift of five or two cows or one, after partaking of pañcagavya the performer should dine in silence; all obstacles are removed and he reaches highest goal; HV II. 1039–1047 (from Skanda)

Mahālakṣmīpūjā—There are varying views about this vrata. KSS p. 19 and A. K (folio 535b–539b) say—begin on Bh. śu 8 and finish on Aś kr. 8 (by Pūrnimānta reckoning) and that it is to last for 16 days, on each of which Mahālaksmi was to be worshipped and stories about her were to be listened to Vide N S pp 153–154, where a similar period is prescribed but it is said that one should, if beginning this vrata for the first time, avoid four *dosas*, viz there should not be avamadina, the tithi should not be tryahasprk, should not be mixed with 9th tithi, nor should the Sun be in the half of Hasta naksatra In Mahārāstra the pūjā of Mahālaksmi is performed on Aś śu 8th by young married women at noon and at night all married women join in worship and hold big empty jars in their hands, breathe into them and bend their bodies in various ways, P C (pp 129-132) has a long discussion on this. According to it, this vrata is for both men and women.

Mahālaksmīvrata—begin on Bh śu. 8 before the Sun passes into Kanyā sign (Virgo) the worship of Mahālaksmi and finish it on 8th tithi (following) while the Sun is in the first half of Kanyā (i e in 16 days), begin if possible when the Moon is in Jyesthā-naksatra; for 16 years, for men and women number 16 is predominant here as to flowers and fruits &c; the performer should wear on his right hand a

doraka with 16 threads and 16 knots; Laksmī never leaves the performer for three lives, he secures long life, health &c.; HV II. 495–499, NS 153–154, SmK 231–239, PC 129–132, VR 300–315.

Mahālaya—latter half (dark half) of Bh. is so calld and pārvana śrāddha is to be performed on all or one of these tithis; TT 166, VKD 80; vide H. of Dh. IV p. 532.

Mahāvaiśākhī—Vide under Kārtika for rule about 'Mahā' being prefixed to a tithi. The Khanapur plate of Mādhavavarman records the grant of villages in Satara District on Mahāvaiśākhī; vide E I. vol 27 p. 312 (Prof. Mirashi infers that it was between 510–560 A.D.).

Mahāvrata—(1) In M. or Cai. a person may donate *guḍadhenu* and should subsist only on jaggery on 3rd tithi; he reaches *goloka*; Mat. 101. 53 q by KKV 446 (32nd Sastivrata), KR 118; for *Gudadhenu* vide Mat. 82 and H. of Dh. II. 880; (2) begin with fast on 14th or 8th śu., when in conjunction with Śravana-naksatra; tithivrata, Śiva deity; to be performed by kings; HV I. 864–865 (from Kālottara); (3) on K. amāvāsyā or pūrnimā a person should take up niyamas, eat by *nakta* way pāyasa with ghee, use sandalwood and sugarcane juice; on following *pratipad* he should fast and invite eight or sixteen Śaiva brāhmanas (for dinner); Śiva deity, should bathe Śiva image with pañcagavya, ghee, honey and other things and lastly with warm water; offer naivedya, donate to ācārya and brāhmanas with their wives gold, garments &c ; this vrata to be performed for 16 years with some different arrangements of nakta and upavāsas on different tithis acc. to the year, it confers long life, beauty, saubhāgya on male or female performer; HV II. 377–391 (from Kālikā-purāna); (4) fast on each paurnamāsī and worship Hari as *sakala* Brahma and on amāvāsyā as *niskala* (partless) Brahma; for one year; all sins are destroyed and he reaches heaven, if performed for 12 years, reaches Visnuloka; Vi. Dh III. 198 1–7, q by HV II. 461, 'Sakala' means 'sāvayava' (with parts) i. e. in an anthropomorphic form (such as Visnu with four arms), while 'niskala' Brahma would be without parts as described in Mundakopanisad II 2 9; (5) on 8th or 14th tithi in both fortnights observe nakta way and worship Śiva; one year; reaches the highest goal, HV II. 398 (from Lin.).

Mahāśvetāpriyavidhi—on a Sunday if there is a solar eclipse, one should worship Mahāśvetā (and the Sun) after observing ekabhakta or nakta or fast; he reaches the highest place; KKV 21-23, HV II. 527-528 Mahāśvetā is the mantra 'Hrīm Hrīm sah' (KKV 9 and HV II 521)

Mahāsasthī—When on K śu 6 the Sun is in Vṛścika (Scorpion) and there is Tuesday that is called Mahāsasthī, a person should fast the previous day, worship Agni on 6th and celebrate *mahotsava* of Agni and feed brāhmanas; all sins are destroyed, SmK 378, PC 102.

Mahiṣaghnīpūjā—on Ās śu 8; tithi; Durgā deity, bathe the image of Durgā that killed Mahiṣāsura with water mixed with turmeric powder, apply sandalwood paste and camphor, feed maidens and brāhmanas and give dakṣinā, illuminations, all one's desires are fulfilled, PC 109-110, SmK 138.

Mahendra-kṛcchra—from K śu 6 subsisting on milk alone and worship of Dāmodara; HV II. 769-770.

Maheśvaravrata—(1) begin on Phā śu 14, fast on that day and worship of Śiva; at end of vrata donate a cow, if carried on for a year he gets the fruit of Paundarika sacrifice, if he performs for a year this vrata on the two caturdaśis of every month, he secures all desires; HV II 152, (2) one should offer to Dakṣinā-mūrti every day for a year pāyasa and ghee, at end a fast, *jāgara*, gift of land, cow and bedstead, performer attains the position of Nandin (the Bull of Śiva); HV I 867 (from Skanda) Dakṣināmūrti is a form of Śiva and there is a Dakṣinā-mūrtistotra ascribed to Śankarācārya in 19 verses

Maheśvarāṣṭamī—begin from Mārg. śu. 8.; worship Śiva in Linga form or image or on lotus and bathe it with ghee and milk; give cow at end, if done for a year he secures the same rewards as an Aśvamedha and goes to Śivaloka; HV I. 747-748 (from Vi Dh.)

Mahotsava vrata – on 14th of Cai. śu every year worship Śiva by bathing image with milk &c. and applying unguents, offering damanaka, bilva leaves; wave before image lighted lamps made of rice flour; *naivedya* of various edibles; drums to be beaten, rathayātrā of Śiva, performer should say 'may Śiva be pleased' and observe nakta; HV II. 148–149 (from Skanda).

Mahodadhi-amāvāsyā—by bathing anywhere in the sea on Mārg. amāvāsyā mixed with 14th one reaps rewards of Aśvamedha; GK 603.

Mākarī-saptamī—7th tithi, while sun is in the Makara-rāśi; VKK 500–501, VK p. 203, No. 902.

Māgha-kṛtya—KR 487–514, VKK 490–514, NS 213–221, SmK 439–513, GK 37–41 There are several important vratas in Māgha such as Tilacaturthī, Rathasaptamī, Bhīsmāstamī which would be separately mentioned in this list. A few small matters may be briefly disposed off here. M. śu 4 is called Umācaturthī because Gaurī is to be worshipped by men and specially by women with Kunda and other flowers, with offerings of jaggery, salt, *yāvaka* and one should honour women who are not widows, brāhmanas and cows (KKN 437–38, KR 503); on M kṛ 12th Yama produced sesame and Daśaratha brought them to the earth and sowed them and Visnu was made lord of sesame by the gods, hence one should fast on that day and worship Hari with sesame, offer homa with sesame, donate them and eat them (V. Dh. 90 19, KKN 435–6, KR 495–96); on M. amāvāsyā, if it is present on Monday morning, men and particularly women in Tamil country circumbulate the *aśvattha* tree and make gifts

Māghasaptamī—on M. śu. 7; one should bathe at *arunodaya* in a river or other running water after placing on his head seven leaves of the *badara* tree and seven of the *arka* plant, then offer arghya to the Sun with water mixed with seven *badara* fruit, *arka* leaves, rice, sesame, dūrvā, *akṣatas* and sandalwood, bow to Saptamī as Devī, then to the Sun. Some held that this snāna and Māghasnāna were not separate, while others held that the two were quite separate; KR 509, VKK 499–502, KT 459, RM (ABORI vol 36 p 332, three verses).

Māghasnāna—bath in Māgha in the Ganges or in any other fine stream in the early morning is highly eulogised from

early times The best time is dawn when the naksatras are still visible, next best is the time when stars are visible but the Sun is not actually risen and the inferior time is after the Sun rises The beginning for the month's bathing should be made on the 11th of P śu or on P. pūrnimā (according to the pūrnimānta reckoning) and the vrata (for one month) is to be finished on the 12th of M. śu or pūrnimā; some bring it in line with the *Saura* reckoning by providing that bath when the Sun is in Makara (Capricorn) in Māgha in the morning leads sinners to heaven (VKK 491 quoting Pad), all men and women are entitled to engage in it. The most meritorious Māghasnāna is at the confluence of the Gangā and Yamunā. Vide for details, Pad VI (in which about 2800 verses are devoted from chap 219 to 250 to the māhātmya of Māghasnāna), HV II 789–794, VKK 490–91, RM 1368 (ABORI vol 36 p. 332), NS 213–216, SmK 439–441 and H of Dh vol IV 617; Pad VI. 237 49–59 and KT 455–57 describe the procedure of the gifts and *niyamas* V Dh 90 last verse eulogises morning bath in M and Phā Vide I. A. vol XI p. 88 on 'Māghamelā'.

Mātrvrata—(1) on 8th, tithi; Mātrs (mother goddesses) are the deity, one should fast on this day and ask their pardon with devotion; they bestow welfare and health, HV I. 876 (from Vai.), (2) on Āśv. 9th a king and members of all castes should worship the Mātrs (many enumerated) and attain success; a woman whose children don't live or who has a single child is blessed with progeny, HV I 951–52.

Mārgapāli-bandhana—on K śu. 1, vide p 205 above.

Mārgaśīrsakrtya—Vide KR 442–474, VKK 482–487, NS 209–211, SmK 427–432 The whole of the month is held sacred in the Tamil country and *bhajan* parties go round the whole morning, the Gītā (X 35) avers that Märg. is the best among months and identifies it with Lord Krsna Some of the less important matters may be noted here In Krtayuga the gods began the year on the first tithi of Märg and the sage Kāśyapa created the beautiful Kāsmīra country, therefore celebration should be held on it (KR 452); Märg śu 12– a person should fast on the 12th tithi on each dvādaśi for a year from Märg to K and should on each dvādaśī dwell on one of the twelve names of Visnu from Keśava to Dāmodara and offer worship; he becomes *jātismara* (one

who recollects actions of previous lives) and reaches that place from which there is no return to this mortal world (Anuśāsana, chap. 109, Br. S. 104. 14–16); on Mārg pūrnimā the Moon should be specially worshipped as the Moon was sprinkled with nectar on that day, cows should be given salt, one's mother, sister, daughter and female relatives in one's family should be honoured with a pair of new garments, a festival with dance and songs should be held, those who drink wine should taste fresh wine that day; KKN 432–33, KR 471–72 For Dattātreyajayantī on Mārg Full Moon, vide above p. 310.

Mārtandasaptamī—begin on P śu. 7; fast on that day, worship of the Sun and muttering the word 'Mārtanda'; performer to partake for purifying himself of cow's urine or dung or curds or milk; on next day worship of the Sun under the name 'Ravi'; in this way for a year he should proceed for two days each month and give grass and the like for feeding a cow one day; he reaches the world of the Sun; Bhav. I. 109. 1–13 q by HV I 754–55, KKN 147–148.

Māsavrata—during the 12 months from Mārg. to K. the performer should respectively donate the following; salt, ghee, sesame, seven dhānyas, coloured or charming garments, wheat, jar full of water, sandalwood paste with camphor, butter, umbrella, *laḍḍukas* enriched with sugar or jaggery, lamps, at end of year donate a cow and worship Durgā, Brahmā, the Sun, or Visnu, HV II. 853–54 (from Devīpurāna), KR 442–443.

Māsavratāni—Vide Agni 198, KKV 418–432, HV II 744–799, Dānasāgara 589–621.

Māsopavāsavratas—This is the greatest among all vratas. This is a very ancient vrata Inscriptions in Nāneghāt mention that queen Nāyanika (Nāganikā) in the 2nd century B C had performed it, vide ASWI. vol. V p 60. This is described by Agni (204 1–18), Gar. (I. 122. 1–7), Pad VI 121 15–54. Agni being the briefest is summarised here The performer should have performed all Vaisnava vratas (such as dvādāśī), take the permission of his *guru*; considering his own strength should begin on 11th of Āśv. śu. and make a *sankalpa* to carry it on for 30 days; a forest hermit or a *yati* or a widow should enter upon it (but not a householder); he should offer worship to Visnu thrice in the day with flowers &c.; should sing hymns of praise of Visnu and

contemplate on Viṣṇu, should avoid all idle talk, give up desire for wealth, should not touch any one who does not observe *niyamas*, he should stay in a temple for 30 days; on the 12th after 30 days he should feed brāhmaṇas, give them dakṣiṇā and perform *pāraṇa* by inviting thirteen brāhmaṇas, donate pairs of garments, *āsana* (seat), vessels, umbrella, pair of sandals, worship golden image of Viṣṇu on a bed and his own image should be given garments &c., donate the bedstead to his guru, the spot where the performer stays becomes holy; he takes himself and members of his family to Viṣṇuloka; if the performer faints during the vrata, he should be made to drink milk, clarified butter and fruit juice, the partaking of these with the consent of brāhmaṇas does not nullify the vrata; vide HV II. 776–783 (from Viṣṇurahasya).

Māsakṣapaurṇamāsī-vrata—Begin on K. su 15th, performer to subsist by *nakta* way, on a circle made with salt and pasted with sandalwood paste, he should worship the Moon along with ten nakṣatras i. e in K when combined with Kṛttikā and Rohiṇī, in Mārg with Mṛgaśiras and Ārdrā and so on up to Āśv., women whose husbands are alive should be honoured by giving them jaggery, rich food, ghee, milk &c ; then he should himself eat *haviṣya* food, at end he should donate garment coloured with gold; Vi Dh. III. 192 1–15, NM p 47 (verses 573–579).

Mitrasaptamī—the 7th of Mārg. śu. is so called, tithivrata, Mitra (Sun) deity , on 6th image of Mitra should be bathed in the way in which Viṣṇu is bathed on K. śu. 11th; fast on 7th (fruits may be eaten), jāgara at night, worship of Sun with various flowers, edibles of flour, feed brāhmaṇas, the poor and helpless, on 8th distribute money among dancers and actors; NM pp 46–47 (verses 564–569), KR 460–461, KKN 432, VKK 483, PC 104

Muktābharanavrata—on Bh śu 7th; tithivrata, Śiva and Umā deities; place a doraka (string of threads) before Śiva image; worship Śiva with 16 upacāras from āvāhana, the seat is to be of gold studded with pearls and precious stones, after upacāras tie the doraka on the wrist; donate 1100 mandakas (Marathi 'mānde') and vestakas (Marathi 'jilebi'); secures long-lived sons; NS 134, VR 241–247.

Muktidvāra-saptamī—When 7th tithi has Hasta nakṣatra on it or Puṣya nakṣatra, this vrata should be undertaken; he

Ratantī-caturdaśī—on M kr. 14; tithi; Yama; one should bathe while it is *arunodaya* and offer *tarpana* to Yama under fourteen names (m. in KT 450); VKK 497, KT 457, GK 157–158, vide Pretacaturdaśī above pp. 351–52.

Ratnasasthī—m in Mrcchakatika Act III. and in Cārudatta Act III. p. 65 (attributed to Bhāsa) where we have the words 'nanu sasthīm-upvasāmi'. But it is difficult to say whether it is Ratnasasthī or any other.

Ratnāni—(jewels or precious things)—for five *ratnas* vide under 'pañcaratnas' p. 337 above. VR 15 (quoting Vi. Dh) mentions nine viz pearls, gold, vaidūrya (cat's eye gem), padmarāga (ruby), pusparāga (topaz), gomeda (gem brought from Himālaya), sapphire, gārutmata (emerald) and coral.

Rathanavamī—on 9th tithi of Āśv. śu. (acc to KKV) or kr. (acc. to HV); tithi; Durgā; fast on that day and worship of Durgā; on a car decked with mirrors, *chowries*, clothes, umbrella, garlands from flagstaffs place a golden image of Durgā seated on a buffalo; the car to be drawn over the public road and taken to a temple of Durgā, illuminations; *jāgara* with dance and drama; next morning the image is to be bathed and the car to be presented to Devī, rewards of presenting a fine bedstead, a bull, a cow about to deliver; KKV 294–298 = HV I 946–948 (from Bhav.).

Rathayātrā—(car procession of a deity)—HV II 420–424 (quoting Devīpurāna) describes the Rathayātrā of Durgā accompanied by crowds of men and women; KR (259–264) describes the same from a different source, Bhav. (I 18. 3–17) deals with the Rathayātrā of Brahmā which is quoted by KR 438–439 and Pūjāprakāśa 293–307; the twelve rathayātrās of Purusottama and fourteen of Bhuvaneśvara are respectively described in GK pp 183–190 and 190–194; HV II. 424–440 (quoting Bhav.) describe at length the *rathayātrotsava* of the Sun and state (p 425) that the latter is equal to Indradhvajotsava and that both the festivals are carried on every year in several countries for averting evil (*śāntihetoḥ*), for the happiness and health of the people and that it should be begun on Mārg. śu. Vide Var. 177 55–56 for Rathayātrā of Sāmbapuradeva in Mathurā In Bhav. U. 134. 40–71 there is a description as to how a car is to be made, how procession is to be arranged and how images are to be placed on the car.

Rathasaptamī—on M. śu. 7; tithi; Sun is deity; on night of 6th *sankalpa* and submitting to *niyamas*, on 7th fast; performer to prepare a golden or silver car with horses and charioteer; to recite a hymn to the Sun, and at midday he should place that car in a *mandapa* surrounded by (or made of) cloth, worship the car with saffron, flowers &c. and place in the car an image (golden or otherwise) of the Sun; worship the Sun together with the car and charioteer and address mantras to the Sun and in his prayer state the desired object; jāgara at night with songs and music, and performer should not close his eyes that night; after bath the next morning he should make gifts, donate the car to the *guru*; HV I. 652–658 (quoting Bhav. U.) Here Krsna tells Yudhisthira the story of king Yaśodharma of Kāmbhoja

country that had in his old age a son suffering from all diseases who became free from all diseases and a *cakravartin* (emperor) by performing this vrata. KV 101 and HK 624 quote Mat to the effect that as on this tithi in the beginning of Manvantara Sun secured a chariot this tithi is called Rathasaptamī. The same quotation from Mat. in HK 624 shows that it was also called Mahāsaptamī Vide TT 39, PC 104–105, VR 249–253. Vide I. A. vol XI. at p 112 the Sāmangad plate of Rāstrakūta king Dantidurga dated *śake* 675 (753–54 A. D.) where the phrase 'Māghamāsa-rathasaptamīm' occurs. For Rathasaptamī-māhātmya, vide Bhav. I. 50

Rathānkasaptamī—on 6th of M. śu fast and worship of Sun with *gandha*, flowers &c.; sleep before sun image that day; on 7th worship the Sun and give brāhmaṇas a sumptuous meal; carry this on in all months and at end of year have car procession of the Sun. HV I. 656 (from Bhav.); HV I. pp. 657–658 dilate upon a variation of the above procedure. This is called Rathasaptamī by KKV 114–117 and also in Bhav. I. 59. 1–26.

Rathāṅgasaptamī—on M. śu. 5th, 6th and 7th observe respectively ekabhakta, nakta, and fast; some hold that fast on 6th and pāranā on 7th; this is called Mahāsaptamī (for which see above) by HV I. 659–660 and the printed Bhav. (I. 51. 1–16) also calls it so.

Rathotsava—on 2nd of Ās. śu.; when it is joined to Puṣya, car festival of Kṛṣṇa, Balarāma and Subhadrā, the utsava should be performed even if there is no Puṣya naksatra: TT 29, NS 107, SmK 137.

Rambhātṛtīyā—(1) on Jy. śu. 3rd, one was to sit facing the east in the midst of five fires viz Gārhapatya, Dakṣināgni, Sabhya and Āhavanīya and the Sun above; face Brahmā and Devī identified with Mahākālī, Mahālakṣmī, Mahāmāyā, Sarasvatī, homa in all directions by brāhmaṇas; worship of Devī and eight substances called Saubhāgyāstaka be placed before Devī; in the evening Rudrāṇī should be addressed with prayer for a charming home; then performer (*male or female*) should honour a householder and his wife and naivedya placed in śūrpa (winnowing basket) should be presented to women whose husbands are alive: HV I. 426–430 (from Bhav. U. 18. 1–36), KN 176, TT 30–31; this vrata is meant mostly for women; (2) This was so called because

Rambhā formerly performed it for blessed womanhood; on Mārg. śu. 3rd; tithi; Pārvatī deity, for a year, every month Devī to be worshipped under a different name (e. g Pārvatī in Mārg., Girijā in P. &c.) and different gifts to be made, different substances to be eaten; HV I pp 430–435 (from Bhav. U 24. 1–36); Gar. I 120 also describes this vrata. If 3rd is mixed with 2nd and 4th tithis, this vrata has to be performed on 3rd mixed with 2nd (KN 174), vide under 'Tṛtīyāvratas' above p 307.

Rambhātṛtīyā vrata—begin on Jy. śu. 13th, tithi; for three days; first after bath a woman should pour plenty of water at the root of plantain plant and surround it with threads, make a silver image of the plant with golden fruit and worship it, observe nakta on 13th, *ayācita* on 14th and fast on 15th, water the same plant for a year, worship also Umā and Śiva and Kṛṣṇa and Rukmiṇī; homa with 13, 14, 15 āhutis respectively on the three days from 13th; this vrata confers sons, beauty, freedom from widowhood &c.; HV II. 283–288 (from Skanda), VKK 11; *Rambhā* also means 'kadalī' (plantain plant) and hence the name.

Ravivāra vrata—nakta or fast on Sunday, japa of Ādityahṛdaya or Mahāśvetā mantra; they secure their desires; Vāravrata; Sun deity; SmK 556–557, VKD (423–436) gives a very elaborate procedure.

U. 38. 1–7); KKV (211–212) gives these very verses as Viśokasaptamī

Viśokasankrānti—When on an Ayana day or Visuva day there is Vyatīpātayoga the performer should bathe in water mixed with *tilas* and observe ekabhakta; he should bathe a golden image of the Sun with pañcagavya and offer *gandha* and flowers, clothe it in two red garments and place it in a copper vessel and worship the Sun (image) from feet to head with different names of Sun, and offer arghya; one year; at end worship Sun, offer homa with mantras addressed to the Sun, donate twelve kapilā cows or one cow if poor; secures long life, health and prosperity; this is a sankrānti vrata; HV II. 742–743 (from Skanda)

Viśokasaptamī—HV I. 746–47 quotes from Bhav. thirteen verses on this which are the same as Mat 75 1–12 (=Pad. V. 21. 235–248) and which are the same as the verses under Viśokasasthī.

Viśvarūpavrata—on śu. 8th or 14th when it falls on Saturday and Revatī naksatra: Śiva is deity; the linga should be bathed in mahāsnāna, camphor as unguent, white lotuses and many ornaments to be placed on linga, burn camphor as incense, naivedya of pāyasa and ghee; gift to ācārya of a horse or elephant; performer gets whatever he desires (son, kingdom, pleasures &c.), hence vrata is called Viśvarūpa (lit. having all forms); drink at night water mixed with kuśas and observe jāgara; HV I. 865–866 (from Kālottara).

Viśvavrata—(1) Ekabhakta on 10th of every month; tithivrata for a year, at end donate ten cows and golden or silver images of the ten directions with a trough full of sesame; performer becomes an emperor and all his sins are destroyed, KKV. 451, HV I. 983 (from Pad.); Mat. 101. 83 mentions this; (2) Viśvedevas to be worshipped on ekādaśī; images of them to be placed on lotus petals; tithivrata; Viśvedevas deity, offer stream of ghee and fuel sticks, curds, milk, honey; HV I. 1148 (from Bhav.) This vrata is like Vaiśvānara-pratipad.

Viśvedeva-daśamī-pūjā—from K. śu. 10, tithi; ten Viśvedevas enumerated in Vi. Dh. III. 176. 1 that are manifestations of Keśava are deity; worship them in mandalas or as images; one year; at end donate gold; reaches Viśvedevaloka. Vi. Dh III. 176. 1–5.

Vistivrata or *Vistibhadrā*—The *karanas* will be described in the section on Kāla They are of two classes, *cara* (moveable) and *sthira* (fixed). The first are seven of which Visti is one. Vide Br S. 99. 1. Visti is half of a tithi. The works on astrology raised it to the status of an ill-formed malignant demoness Visti comprised 30 ghatikās which were distributed unevenly in her mouth, throat, heart, navel, waist and tail (respectively 5, 1, 11, 4, 6, 3 ghatikās); HV II. 719–724 (from Bhav. U), KN 330, SmK 565–566 describe her as the daughter of the Sun and sister of Saturn, she has the mouth of an ass, three feet &c Visti was generally destructive and was to be avoided for any auspicious undertaking, but it was a favourable time for destroying enemies or poisoning them (Br. S 99 4); fast on the day that has Visti; but if Visti occurs at night then ekabhakta may be resorted to on two days; worship gods and pitrs and then image of Visti made of *darbhas* with flowers &c., naivedya is of *krśara*

(dish of rice and peas and spices, *Marathi khicadī*); gift of dark garment, dark cow and dark blanket Vṛṣṭi and Bhadrā mean the same thing Vide HV II 719–724, KN 330, SmK 565–566.

Viṣṇu—Vi. Dh III 123 lays down what names of Viṣṇu should be taken on certain occasions, such as crossing a river (when one is to remember Matsya, Kūrma and Varāha), or when the planets or nakṣatras are unfavourable or when one is in danger from robbers and tigers &c (remember name Nṛsiṃha); Vi Dh. III. 124 sets out the names of Viṣṇu to be uttered in months from Cai, or on weekdays, nakṣatras, tithis; chap. 125 deals with the names to be taken when visiting certain holy places, countries &c.

Viṣṇutrimūrtivrata—Viṣṇu has three forms or manifestations viz. Vāyu, the Moon and the Sun; these protect all the three worlds; they are also inside the bodies of men as *vāta, pitta* (bile) and *kapha* (phlegm); in this way Viṣṇu has three palpable forms; worship Him on Jy. śu 3 observing a fast; in early morning worship Vāyu, offer at midday homa in Agni with yavas and sesame, at sunset worship the Moon in water; for a year (on each 3rd of śu.); worshipper reaches heaven; if he performs for three years, he is in heaven for 5000 years; Vi. Dh. III. 136. 1–26

Viṣṇutrirātravrata—on K. śu 9th; make a golden image of Hari and of Tulasī and worship for three days and celebrate marriage of Tulasī with Hari, NS 204.

Viṣṇudevakīvrata—begin on 1st tithi of K.; for a year; bathe with pañcagavya and partake of it; worship of Vāsudeva with bāna flowers, sandalwood paste and sumptuous naivedya; resolve to abstain for a month from harming any living being (even animal), from telling an untruth, from theft, flesh and honey; engage in constant thought on Viṣṇu, no reviling of śāstra, sacrifice or *devatās*; partake of naivedya with silence every day; same procedure in Mārg, P and M. and other months except that flowers, incense and naivedya are different; HV II. 636–638 (from Vi Dh). It is worthy of note that this vrata was imparted to Devakī, mother of Kṛṣṇa, who wanted a good son and she was asked to worship Vāsudeva who is no other than her own son.

Viṣṇupañcaka—the last five days of K. are so called, worship Hari and Rādhā during those five days with five upacāras

viz gandha &c ; all sins being destroyed he goes to Visnuloka; various ways of service are described viz worship on 11th, drinking cow's urine on 12th, milk on 13th, curds on 14th, worship Keśava on 15th and drink pañcagavya in evening, or worship Hari with Tulasī leaves, Pad. III. 23. 1–33.

Viṣnupada or *Viṣnupadī*—name of the four zodiacal signs of Vrsabha, Simha, Vrścika and Kumbha; vide KN 332 and under Sankrānti above p. 213.

Viṣnupadavrata—begin on Pūrvāsādhā-naksatra in Āsādha; worship the three steps of Visnu placed in milk or ghee; performer to subsist on sacrificial food (*havisya*) at night alone, in Srāvana on Uttarāsādhā worship of Govinda and Visnu's three steps, gift and food being different; in Bh. on Pūrvāsādhā, in Phā. on Pūrvāphalgunī and in Cai. on Uttaraphalgunī similar worship; performer secures health, prosperity and goes to Visnuloka; HV II. 665–667 (from Vi. Dh.).

Viṣnuprabodha—Rising of Visnu from sleep in K. Vide pp. 109–110 above and HK 903–4, KR 421–425.

Viṣnuprāptivrata—fast on dvādaśī, arghya to the Sun with the words 'Namo Nārāyanāya'; worship of Visnu image with white flowers with the mantra 'O, best among gods! O support of earth! having accepted with a gracious mind these flowers may the Lord Visnu be pleased with me'; he should subsist on śyāmāka (millet) or corn that ripens in sixty days from sowing with condiments, rice or barley or *nīvāra* (wild rice); then pārana; performer reaches Visnuloka; KKV 343–344, HV I. 1203–4 (from Bhav.).

Viṣnulakṣavartivrata—cleanse cotton of dust and pieces of grass &c. on an auspicious tithi and *lagna* and spin threads therefrom four finger-breadths in length and five such threads would make a wick; one hundred thousand of such wicks immersed in ghee placed in a vessel of silver or bell-metal should be kindled before Visnu image; the proper time for kindling is either K., M., or Vai, the last being the best; every day a thousand or two thousand lighted wicks should be waved before Visnu; finish the vrata on pūrnimā of one of the above three months; then *udyāpana*; nowadays this is done in the Deccan by women only; VKD 383–398.

Viṣṇuvrata—(1) worship of Viṣnu image drawn on a lotus; this vrata has the same procedure as Vaiśvānaravrata; HV I 1177 (from Bhav.); (2) fast on twelve dvādaśīs (in a year) and gift of cow, calf and gold; performer secures highest goal; HV I. 1202 (from Pad.), VKK 70, (3) begin on 2nd tithi of P. śu.; for a year divided into two periods of six months each; the performer bathes on the four days from 2nd tithi with water respectively mixed with mustard, sesame, *vacā* (plant with aromatic root) and *sarvauṣadhis*; the names to be worshipped on those four days are respectively Kṛṣṇa, Acyuta, Hṛṣīkeśa and Keśava; arghya to be offered to the crescent of the moon on the four tithis respectively as Śaśin, Candra, Śaśāṅka and Niśāpati; performer to eat once at night while moonlight lasts; dakṣinā to be given on 5th, this was performed by ancient kings (Dilīpa, Dusyanta), sages (Marīci, Cyavana) and high-born ladies (Devakī, Sāvitrī, Subhadrā); result-removal of sins and securing desired objects, Agni 177. 15–20, HV II. 458–460 (from Vi. Dh.); (4) early morning bath for four months from Ās, gift on K. pūrnimā of a cow and dinner to brāhmaṇas; reaches Viṣnuloka, KKV 444 (quoting Mat. 101 37), KR 219; (5) on Cai. śu 4th observe fast and worship the several groups of four forms in which Hari appears, viz Nara, Nārāyaṇa, Haya and Haṃsa, or as Mitra, Varuṇa, Indra and Viṣnu, the first two being Sādhyas and the latter two siddhas; perform for twelve years; he finds the way to *mokṣa* and becomes equal to the Highest, Vi. Dh. III. 151. 1–8

Viṣnuśankaravrata—This is to follow the procedure of Umāmaheśvaravrata (p 277 above). It is to be performed in Bh. or Āsv. on Mṛgaśiras, Ārdrā, Pūrvāphalgunī, Anurādhā or Jyesthā; the only differences are that garments for Viṣnu image should be yellow, the dakṣinās for Viṣnu and Śaṅkara were respectively to be gold and pearls; HV II. 593–594 (calls it Śaṅkara-Nārāyaṇa-vrata), KR 282–283 (both quote Devīpurāṇa).

Viṣnuśayanotsava—The festival on the sleeping of Viṣnu either on the 11th or 12th of Ās śu.; NS 102; vide above pp. 109–110 for Viṣnuśayana. This is not to be performed in intercalary month.

Viṣnuśrnkhala-yoga—when dvādaśī is mixed up with ekādaśī and dvādaśī has also Śravaṇa-nakṣatra on it, it is called

Viṣnuśṛnkhala; by fasting thereon one's sins are wiped out and one secures *sāyujya* (absorption) into Viṣnu; HV 295, KV 464, PC 216-219.

Vīrapratipadā—same as Balipratipadā above p. 201-203.

Vīravrata—on 9th tithi a person should observe ekabhakta, treat to dinner maidens and donate a golden jar, two garments and gold; for a year (on each 9th dinner to maidens), in each life he becomes handsome and is not subdued by enemies and reaches Śiva's capital, the deity appears to be Śiva or Umā or both; Mat. 101. 27-28 q. by KKV 443, HV I. 958 (from Pad), VKK 41.

Vīrāsana—a posture required in all Krcchras; HV I. 322 (quoting Gar.) and II. 932 and also in Aghamarsanavrata (Śankhasmṛti 18. 2) It removes all sins. Vide H. of Dh. IV. p 148 note 342. For another meaning (in Yoga system), vide H. of Dh. vol. II. p. 957 note 2127a.

Vṛksotsavavidhi—Great importance was attached to the planting of trees Mat 59 (verses 1-20 same as Pad. V. 24. 192-211) contains the procedure of tree festival. It is briefly as follows:-trees in a garden should be sprinkled with *sarvausadhi* water, decked with fragrant powder and flowers and cloth should be wound round them; the trees should be pierced with a golden needle (imitating karnavedha) and collyrium applied to them with a golden pencil; on the platforms of trees seven or eight golden fruits should be placed, jars containing pieces of gold should be established under the trees homa to be offered to Indra, Lokapālas and Vanaspati; a milch cow covered with white cloth decked with gold ornaments and having horns tipped with gold should be let loose from the midst of trees; the performer (owner of the trees) should honour all priests with gifts of cows, golden chains, rings, clothes &c. and feed brāhmanas with a dinner full of milk for four days; *homa* with yavas, black sesame and mustard and *palāśa* fuel sticks and festival on 4th day; performer reaps all desires Mat 154 512 states that a son is equal to ten deep reservoirs of water and a tree planted is equal to ten sons It is said by Var. (172 36-37) that just as a good son saves his family, so a tree laden with flowers and fruits saves its owner from falling into hell, and that one who plants five mango trees does not go to Hell; Vi Dh. (*III. 297. 13*) remarks about trees ' a single tree nurtured by

a man performs what a son would do in that it gratifies gods with its flowers, travellers with its shade, men with its fruits; there is no fall in hell for the planter of a tree.'

Vṛntāka-tyāga-vidhi—it involves the abstention from eating vṛntāka (fruit of egg-plant) for a life-time or a year or six or three months; fast on Bharaṇī or Maghā naksatra for one night, invoke the presence of Yama, Kāla, Citragupta, Mṛtyu and Prajāpati on an altar and worship with *gandha* &c; homa with sesame and ghee with svāhā to Yama, Nīla, Nīlakantha, Yamarāja, Citragupta, Vaivasvata, 108 *āhutis*, gift of a vṛntāka made of gold, dark cow and bull, finger rings, ear-rings, umbrella, sandals, a pair of dark garments and dark blanket, dinner to brāhmaṇas who pronounce blessings; he who gives up vṛntāka for life goes to Viṣṇu-loka; one who performs this for a year or a month even does not see the city of Yama, it is a *prakīrnaka* vrata, HV II 909-910 (from Bhav U.).

Vṛndāvanadvādaśī—on K śu. 12 observed in Tamil lands.

Vṛsabhavrata—(1) fast on 7th śu., on 8th gift of a bull covered with two white garments and decked with ornaments (bell &c); tithivrata, Śiva deity, the performer reaches Śivaloka and thereafter becomes king, HV I. 882 (from Bhav U); (2) worship of bulls on Jy. Amāvāsyā, manufacture wooden bulls the previous day and establish them in one's own house and worship with *gandha* &c, prayer to bulls calling them Dharma. Dharma is often spoken of as vṛsa as in Manu VIII. 16 (= Śāntiparva 90 15.

Vṛsaṇa'a—(1) the same as Viṣṇuvrata (2) above; KKV 448 quoting Mat 101. 64, (3) on K pūrṇimā let loose a bull and observe nakta, tithi; Śiva deity, performer reaches Śivaloka, HV II. 242 (from Pad one verse)

Vṛsotsarga—(letting loose a bull) on pūrṇimā of Cai or K once in three years on Revatī naksatra, bull to be three years old and accompanied by four or eight cows three years old; KR 432-433 (from Brah.) The most frequent letting loose of a bull takes place on the 11th day after the death of a person For treatment thereof, vide H of Dh. IV pp 539-542 The same subject is treated at length in HV II. 983-997, SmK 390-405.

Vedavrata—This is a Caturmūrtivrata; from Cai one should worship Ṛgveda and should subsist by nakta way and listen

to its recitation and on last day of Jy. donate two garments, gold, cow, bell-metal vessel full of ghee; in Ās, Śr, Bh. he should observe Yajurveda vrata, in Āśv, K. and Mārg. Sāmaveda vrata and in P., M, Phā. for all vedas; this is really worship of Vāsudeva who is the soul of the Vedas; perform for twelve years; becomes free from all trouble and goes to Visnuloka; HV II. 827–28 (from Vi. Dh. III. 141. 1–7).

Veśyāvrata—HV II. pp. 541–548 (quoting Bhav. U.) deals with this vrata and contains the startling story narrated by Krsna to Yudhisthira that the former cursed his 16000 wives, when he noticed their erotic emotion roused by the charms of his son Sāmba, that after his death *dasyus* would kidnap them and the story of a prior curse pronounced by sage Nārada on Apsarases who proudly did not bow to him that they would have Nārāyana as their husband but that ultimately they would be kidnapped by robbers and become Veśyās (prostitutes). The long and short of this story is that they were advised to follow the profession in palaces and temples, that they should not love any male who has no wealth, but that they should have as their sole object wealth, whether the man who approached them was handsome or ugly. It is further stated that they should make gifts of cows, fields, gold to brāhmanas, should bathe with *sarvausadhi* water when on a Sunday there is Hasta, Pusya or Punarvasu naksatra and offer worship to Kāmadeva from the feet to the head, that they should worship Cupid as Visnu, honour a brāhmana learned in the Veda with gift of a *prastha* of husked rice grains and render their person to him on Sunday as above for a year and in the 13th month make a gift of bedstead, gold chain and an image of Kāmadeva, this is the vrata for all Veśyās, this is vāravrata; Ananga (god of love) is devatā, KKV (27–31) has this vrata and calls it Veśyādityavārānangadāna-vrata

Vaikunthacaturdaśī—(1) K. śu. 14 is called Vaikuntha; if worship of Visnu is to be done it should take place at night; NS 206; (2) on K śu. 14 in the cyclic year Hemalamba at the time of Arunodaya and on Brāhma *muhūrta* Lord Viśveśvara himself is said to have bathed in Manikarnikā at Banaras, performed Pāśupatavrata and together with Umā worshipped Viśveśvara and established Viśveśvara; NS 206, SmK 388–389, PC 246–247.

Vaitaranīvrata—Marg. kr 11th tithi is called Vaitaranī; one should undertake *niyamas* (restrictions) for this vrata on that tithi, at night he should worship a dark cow from its front foot to its tail; apply sandalwood paste to its body, wash its feet and horns with water scented with sandalwood paste and worship its limbs with Paurāṇika *mantras*; since one crosses the Vaitaranī river of the nether world by means of a cow, so this ekādaśī on which cow is honoured is so called; this vrata is for one year in three periods of four months, in which naivedya of boiled rice, of cooked barley and of pāyasa is offered respectively in 4 months from Mārg, in four months from Cai and in 4 months from Śr., one third of each naivedya is to be given to the cow, to the priest and to the performer, at end of one year gift of bedstead and a golden cow to the priest and one *drona* of iron; HV I. 1110–1112 (from Bhav. U.), Vratārka 230a–231b (notes that it is well-known in Gurjara-deśa). Pad. (VI. 68. 28 ff) describes this but says that Mārg. kr. 12th is Vaitaranī.

Vaināyaka-vrata—on every 4th tithi practise nakta for a year; at end of year donate an elephant; tithivrata; Ganeśa deity; leads to Śivaloka; Mat. 101. 61 quoted (with variations) by KKV 448 and HV I. 532 (from Pad).

Vaiśākha-kṛtya—Vide HV II. 748–750, KR 145–179, VKK 240–259, KT 423–430, NS 90–97, SmK 108–117, GK 15–23. Some of the vratas in Vaiśākha, such as Akṣayyatṛtīyā have been separately mentioned. Other small matters are briefly dealt with here. In this month morning bath, particularly in holy rivers, is specially commended along with baths when the Sun is in Tulā (Balance) or Makara (Capricorn). Vide RM (ABORI vol. 36 p 331 'Tulāmakara' &c), KR 149 (quoting 'Tulāmakaramesesu prātaḥsnānam vidhiyate), KV 423–424, SmK 106, 108 The *prātaḥsnāna* may be begun on Caitra Full Moon or on the ekādaśī or Full Moon of Vaiśākha (NS 90); for *māhātmya* of Vaiśākha-snāna, vide Pad. IV. 85. 41–70 saying that early morning bath in Vai. is equal to Aśvamedha; on śu 7 the worship of the Ganges, as it was let off on this *tithi* from his right ear by Jahnu who drank it up in anger (KKN 387, Pad. IV. 85 41–42, NS 95, SmK 112); on Vai. śu. 7 Buddha was born and his image should be worshipped for three days from that tithi, especially when it has Puṣya

naksatra (KKN 388, KR 160). On śu. 8 worship of Durgā called Aparājitā after bathing image with water containing camphor and Jatāmāṁsī and the performer himself should bathe with the juice of mangoes (NA 56, SmK 113); on Vai. pūrnimā, white and dark sesame were produced by Brahmā, therefore one should bathe with water mixed with them, offer in fire sesame, donate sesame and *madhu* (honey) and vessels full of sesame (KKN 388, HV II. 167–171, KR 163–164, SmK 115–116, NS 97); vide V. Dh. 90. 10 for a similar provision. The Vaiśākha-pūjā of Buddha was started in Ceylon under Duttha-gāmanī (about 100–77 B. C.); vide 'Buddhism in Ceylon' by Walpola Rāhula (Colombo; 1956) p. 80.

Vaiśvānara-vrata—(1) On 1st tithi worship Agni and offer into fire ghee and all kinds of corn; Agni the lord of 1st should be drawn in the midst of a lotus; the main mantras would be 'Om Agnaye namah' in worship and 'om Agnaye svāhā' (in *homa*) with grains anointed with ghee and then with a stream of ghee, fuel sticks &c ; HV I. 354–355 (from Bhav.); (2) to donate fuel sticks to a brāhmana in the four seasons beginning from the rainy season and at end to donate *ghṛta-dhenu* is Vaiśvānaravrata destroying all sins; this is *ṛtu-vrata*; Mat. 101. 57 ą by KKV 447, HV II. 360 (from Pad.).

Vaisnavavrata—In this a person takes an early morning bath every day for four months from Āṣ.; at end feeds a brāhmana and donates a cow and a jar of ghee; *māsavrata*; Visnu deity; HV II. 818 (from Pad.)

Vyatīpātavrata—Vyatīpāta is one of the 27 Yogas (Viskambha, Prīti &c) enumerated in Bhujabala p. 37 verses 136–138. It is variously defined. Vide H. of Dh II. p. 852 note 2010 for one definition and VKK 242 for another. More will be said under Kāla.

For Vyatīpātavratas, vide HV II. 708–717, Vratārka folios 391a–395a On Vyatīpāta day one should bathe with pañcagavya in a great river; a golden figure of Vyatīpāta with 18 arms should be placed on a golden lotus and should be worshipped with *gandha* &c ; fast on that day; one year, on the 13th Vyatīpāta *udyāpana*; hundred *āhutis* of ghee, milk and sesame with fuel sticks of trees that exude milky juice with the words 'Vyatīpātāya svāhā'. Vyatīpāta is said to be the son of the Sun and Moon Vide I. A. vol. 23 p. 117

No 27 Inscription dated *saka* 1199 (1277 A D.), where there is a mention of 'Vyatīpāta-punya' (language is Canarese). Vide I. A. 20 pp 292–293 for several meanings of Vyatīpāta.

Vyūsapūjā—on Āṣ pūrnimā; particularly by ascetics (sannyāsins); SmK 144–145, PC 284 In Tamil country it is done on Jy su 15 (Mithuna)

Vyāhṛtivrata—beginning from Cai. su 1st, one should, after a bath outside the house (in a river &c), respectively drink and observe on the seven days cow's urine, cow's dung, milk, curds, clarified butter, water with kuśas dipped therein and fast; every day homa of sesame to the accompaniment of the Mahāvyāhṛtis (bhūḥ, bhuvaḥ, svaḥ, mahaḥ, janaḥ, tapaḥ, satya); every month this be done for a year; at end donate dakṣinā, unused garment, gold, bell-metal vessel, milch cow; the performer becomes an emperor; Vi. Dh. III. 162 1–7. For Vyāhṛtis and Mahāvyāhṛtis, vide H. of Dh. vol. II. 301 note 713.

Vyomavrata—the sky should be made with white sandalwood paste of the length of thumb joint and placed before the Sun; worship of the Sun with Karavīra flowers, to the east, south, west and north of the figure of sky apply saffron, *aguru*, white sandalwood and *caturḥsama* respectively and red sandalwood in the middle; the mantra is 'Khakholkāya namaḥ'; Sun deity, HV II. 904–5 (from Bhav.)

Vyomaṣaṣṭhī—worship of the Sun in the sky (and not of an image) and also of the sky (*vyoma*), offering to the Sun of ghee and honey contained in a vessel of the capacity of a *prastha*, one prastha of sesame and three prasthas of rice grains; worship of the Sun in the evening of the tithi, reaches Sūryaloka; HV I. 616–17 (from Bhav).

Vratarājatṛtīyāvrata—on su 3rd tithi draw on two pieces of cloth figures of *Umā and Śiva* with *rocanā*, camphor and indigo and worship them with necklaces of gold and jewels and utter two (Paurāṇika) mantras separately addressed to them; homa; this vrata leads to non-separation from husband, son, brother &c, particularly for women; HV I. 484–85 (from Devīpurāna)

Vratasaṣṭhī—Mat 101 and Pad. V 20. 43–144 set out 60 vratas (almost in identical words) all of which find place in KKV pp 439–451.

Śakradhvajamahotsava—Same as Indradhvajotthānotsava above p 274. Vide Vi Dh II 154–157 for detailed description. Sarasvatīkanthābharana of Bhoja (on Poetics) V. 95 mentions Śakrārcā festival.

Śakravrata—(1) from Āśv. śu. 5; HV I. 1204; (2) on Āśv. pūrnimā fast and worship Indra, his wife Śacī, Airāvana, Vajra (thunderbolt), Mātulinga (Mātali?) with gandha &c., for a year; at end donate gold; reaches Indra-loka; HV II. 237 (from Vi Dh. III. 196. 1–3); (3) one should eat food in the open; for a year; at end donate a cow; reaches Śakraloka; HV II. 866 (from Pad.).

Śaṅkara-nārāyaṇa-vrata—same as Viṣnu-Śankara-vrata above p. 414, KKV 416–17, HV II. 693–94 (from Devīpurāna).

Śankarārkavrata—on 8th falling on Sunday; worship of the Sun who is the right eye of Śankara; in the half moon figure a circular spot be made by applying saffron and red sandal-wood paste and in the circular spot place a ruby fixed in gold; this would be eye (Sun) of Śankara; tithivrata; Arka (Sun) as Śankara's eye is deity; KKV 271–72, HV I. 831–32 (from Kālikā). Śrāvaṇa-kṛtya—KKN 395–397, KR 218–254, VKK 292, KT 437–438, NS 109–122, SmK 148–200, PC 215–22.

There are several important vratas in Śrāvaṇa such as Nāgapañcamī, Aśūnyaśayanavrata, Kṛṣṇajanmāṣṭamī, which have already been described or have been included separately in this list. A few small matters are briefly mentioned here. A notion prevailed that all rivers except those that fall directly into the sea are *rajasvalā* ('muddy' or with a pun 'in monthly course') when the Sun is in the middle of the signs of Cancer and Lion and therefore one was not to bathe in them for holiness and that streams that are not 1008 *dhanus* in length are not to be called 'nadīs' (rivers) but they are merely holes or canals (gartā). Vide Gobhilasmṛti I. 141–142 (Māsadvayam Śrāvaṇādi &c), NS 109–110; vide H. of Dh. vol. IV. 590 note 1337 for the length of *dhanus* (as 4 hastas). In Śr. the several deities had on different

tithis the *pavitrāropanavrata* (for which vide pp 339-340 above); on Mondays in Śr. one should either fast or take only one meal at night (SmK 139); on 9th of both fortnights worship Durgā under the name of Kaumārī (KR 244, SmK 200); on Śr. kr 1 all Vaidika brāhmaṇas have to engage in japa of Gāyatrī for 1008 times in Tamil lands as their almanac shows Śrāvaṇa amāvāsyā is called *kuśotpāṭinī* as kuśas are gathered then (KR 316, SmK 252). On this amāvāsyā childless women or women whose children die in infancy perform a vrata for getting a child viz they observe fast, establish eight *kalaśas* (jars) for images of Brahmāṇī and other Mother Goddesses

Śrāvaṇakūṇḍa—on 8th and 14th of Mārg. śu., after bath at mid-day performer should invite several maidens or one maiden (if he be poor) or chaste brāhmaṇa sagotra women and one learned and well-conducted brāhmaṇa, wash the latter's feet and give *arghya* and honour with gandha &c. and a sumptuous dinner, he should place twelve water vessels covered with threads and garlands before the maidens and should place one vessel on his own head and contemplate on Keśava and pray that he may be freed from all his debts to *pitṛs*, gods and men; the women should reply 'so be it', tithivrata; deities are goddesses called Śrāvaṇyaḥ who report to Brahmā whatever good or evil a man utters, HV II 134-139 (from Bhav. U.).

Śrīpañcamī—(1) on 5th of Mārg śu. one should make a golden, silver, copper, wooden or clay image of Lakṣmī or draw her figure on a piece of cloth and worship it with flowers and offer worship to the limbs from feet to head, chaste married women should be honoured with saffron and flowers and dinner and salutations; donate a *prastha* of rice grains with a vessel full of ghee with the words 'may Lakṣmī be pleased with me', this should be carried on for a year taking a different name of Lakṣmī in each month, at end worship Lakṣmī image in a maṇḍapa and donate it and a cow and pray to Śrī to give him success, result-prosperity for 21 generations, HV I. 537-543 (from Bhav. U. chap 37 1-58 with some variations). (2) Another vrata for success to be begun on śu. 5th with Śravaṇa-nakṣatra or with Uttarāphalgunī and Monday, on 4th ekabhakta, next day worship of bilva tree, under which eight *kalaśas* to be arranged in eight directions, holy

water, ratnas, *dūrvā*, white lotuses &c. should be cast in those kalaśas; Laksmī to be worshipped and prayed to; invoke Nārāyana in the middle kalaśa and worship Nārāyana image · for one year or as long as success is not effected, HV I. 546–552 (from Gar.); (3) on M. śu. 5, worship Laksmī in jar full of water or on Śālagrāma stone since she came to this world at Visnu's command on that day, Bhujabala-nibandha (p. 363 Ms) says that worship was with kunda flowers; KT 457, 458; PC 98 says Laksmī was to be worshipped on M. śu. 5, while SmK 479 provides that Kāma and Rati (Cupid's wife) were to be worshipped and a great festival (called Vasantotsava was to be held, (4) on Cai. śu. 5 Laksmī was to be worshipped; the performer throughout his life is endowed with prosperity; NM p. 62 verses 766-768, SmK 92.

Śrīprāptivrata—(1) HV I. 575 (quoting one verse from Vi. Dh.) says he who worships Laksmī (image) placed in a lotus with flowers reaps the reward of a yajña; (2) begin on the 1st tithi after Vai. pūrnimā, worship of Nārāyana and Laksmī every day for a month with flowers, fruits &c.; homa with whole rice grains and bilva (fruit); feed brāhmanas with milk and its products; fast for three days in Jyestha; donate gold and two garments; HV II. 751 (quoting Vi. Dh. III. 211. 1–5).

Śrīvrkṣa-navamī—on Bh. śu. 9 worship bilva tree seven times when the Sun has just risen with sesame, food made with flour, wheat and flowers &c., pray to the tree and bow to it; performer to eat that day on bare ground food not cooked by fire (such as curds, fruits &c) without oil and salt; tithivrata; Bilva as the residence of Laksmī is deity; result is freedom from pain and obtaining of wealth; HV I. 887–888 (quoting Bhav. U. 60 1–10).

Śrīvrata—(1) by worshipping Laksmī on Cai. śu. 5th tithi only once one obtains all results that could be obtained in a year; HV I 575 (one verse from Vi. Dh.), (2) on Cai. śu 3rd tithi subsist on boiled rice and ghee and sleep on the ground that night; on 4th bathe outside the house (in a river &c.); on 5th worship of Laksmī on lotus whether natural or artificial and with lamp fed with ghee; homa in fire with Śrīsūkta of lotus and its petals and bilva leaves; dinner to brāhmanas with plenty of milk and ghee; eat *havisya* food;

for a year; secures strength, beauty and health; HV II. 466–468 (from Vi. Dh. III. 154 1–15)

Sat-tilā-dvādasī—on Phā kr. 12th when there is Śravana-naksatra worship gods with sesame, perform homa with sesame, light lamps with sesame oil in temples, donate sesame, offer water mixed with sesame to pitrs and eat sesame, Visnu is said to have observed fast on this tithi and offered sesame and pindas to his ancestors, KR 519.

Sat-tilī—one who fasts on 11th of M su when the Moon is in Mrgaśiras naksatra and performs on 12th the six actions relating to sesame becomes free from sins; VKK 505, TT 113–114, GK 151 The six actions are· rubbing sesame on body, bath in water with sesame, homa with sesame, gift of sesame, offering to pitrs water mixed with sesame and eating sesame, compare KR 519.

Sadaksara-mantra—Mahāsvetā mantra has six letters (HV II. 521); another is 'Khakholkāya namah ' KKV 9.

Sanmūla-vrata—Begin worship of six seasons on su. 6 of Cai. Rtuvrata; seasons deities, the six rtus are to be honoured respectively with fruits and flowers, astringent things (in Grisma), sweet ones in (rains), food and salt in Śarad, bitter and sour (in Hemanta), pungent things in (Śisira); on each su. 6th he fasts or subsists by nakta way and omits five rasas (taking only one appropriate to that season); for one year; HV II. 858–859 (from Vi Dh III. 156. 1–7)

Sastivratas—Sixty vratas occur in Mat 101. 1–83 (q by KKV 439–451) All these are said to have been narrated by Rudra to his spouse

Sasthīdevī—BRV II (chap 43 3–72) says that Sasthi, Mangala-candi and Manasā are portions of Prakrti, that Sasthi is the presiding goddess over children, that she is called Devasenā among Mātrs, she is wife of Skanda, protects children and gives them long life and narrates a story about worship of that goddess on the 6th day after birth in the lying-in chamber On the worship of Sūtikā-sasthi, vide KT 471–475, where Bhoja in quoted on p 473

Sasthvra'a—(1) fast on 5th tithi; worship of the Sun on 6th or 7th; performer gets the same fruit as Aśvamedha; HV I. 627 (from Brah); (2) on 6th tithi of su. when it falls on Tuesday; perform vrata on different months; reaps inexhaustible merit; HV I. 627–628 (from Vi Dh.)

Sasthīvratas—Bhav I. 39–46, Bhav. U chap 38–42, KKV 98–103 (only three), HV I 577–629 (twenty-one vratas), HK 622–624, KN 189–192, TT 34–35, SM 42–43, PC 100–103, VR 220–236.

When the sixth is mixed up with 5th or 7th the general rule is that in the case of vratas and fasts sixth mixed with the 7th is to be chosen except in the case of Skandasasthī where sixth mixed with 5th is to be preferred (KN 190, NA 48, SM 42, PC 100–101), the sixth tithi is dear to Kārtikeya (or Skanda) who was born on it and became the commander-in-chief of the gods on it; Bhav. I. 39. 1–13, HK 622 (quoting Brah.), KKN 382–383

One or two special matters may be noted. Skanda is the lord of 6th tithi and is to be worshipped on every 6th tithi with fragrant flowers, lamps, garments, crows as toys, bell, *chowries* and mirror, Kārtikeya is specially to be always worshipped by kings with campaka flowers and no other god (KR 276); 6th of Mārg śu is called Mahāsasthī (HK 623–624). Vide Nār I. 45. 1–51 for Ṣasthīvrata in the twelve months of the year.

Samvatsaravrata—begin on 5th of Cai. śu. in the year called Samvatsara and go on for five days Agni, the Sun, Soma, Prajāpati and Maheśvara are identified with the five years of a Yuga viz. Samvatsara, Parivatsara, Istāpūrta (Idāvatsara?), Anuvatsara and Udvatsara; they should be established in a maṇḍala each in order with blue, white, red, white-yellow and dark flowers; worship and homa with sesame, rice, barley, ghee, white mustard respectively; for five days *nakta*; at end donate five suvarnas, this is a pañcamūrtivrata; HV II 419–420 (from Vi Dh.). The names of the five years that constitute a yuga are variously named in vedic literature; vide Atharva VI. 55 3, Tai S V. 5. 7. 2–3, Tai. Br. I 4. 10. 1.

Saṁvatsaravratas—Vi. Dh I. 82. 8–20 (gives the names of the sixty years, Prabhava, Vibhava &c.), KKV 435–451, HV II. 862–867.

Saṁatsarārambhavidhi—HV I. 360–365. Vide above under Caitra-pratipad pp. 82–84

Sankastacaturthī—on Śr kr. 4th on moonrise (i e. about eight ghatikās after sunset) worship Ganeśa image, establish a

jar, 16 upacāras to be offered, *modakas* (1008, 108, 28 or 8) to be prepared, fast the whole day or no food to be taken till moon-rise, for life or 21 years or one year; gift to ācārya, dinner to 21 brāhmanas, SmK 171–177, VR 130–137, VKD 68, D S 74, the vrata may be observed throughout life or for 21 years; it is narrated that even Śiva did it when he wanted to vanquish demon Tāraka

Saṅkastahara-ganapativrata—on M kr. 4; tithivrata at moonrise; Ganeśa deity; VR (176–188) sets out a very elaborate procedure, in which Ṛg X 63 3, IV. 50. 6, the Purusasūkta (Ṛg. X 90), Nār and numerous Paurānika mantras are relied upon and 16 upacāras offered, Ganeśa is worshipped with 21 names and the same number of *dūrvā* tendrils, leaves of plants (such as *Bhṛngarāja*, *bilva*, badarī, dhattūra, śamī and flowers (red), there is also worship with 108 names of Ganapati; at end five *modakas* to be offered to the priest and dakṣinā; it is said that Vyāsa narrated this vrata to Yudhisthira. Sankasta appears to mean distress or calamity. 'Kasta' means 'kleśa' and the prefixing of 'sam' makes it a little more emphatic.

Saṅkrāntivratas—Vide HV 727–743 (16 in all), HK 407–438, KR 613–621, KN 331–346, VKK 204–231, SmK 531–545, VR 729–738, PC 357–366.

Saṅkrāntisnāna—Vide under Saṅkrānti above pp. 211–12 for bath on a saṅkrānti and HV II 728–730 (from Devīpurāna for results of bathing on the twelve saṅkrāntis with certain substances put in water for bath.

Satkulāvāptivrata—begin on Mārg. śu. 1st; worship of Viṣnu with three flowers of three different colours, three unguents; offering of *trimadhura*, three lamps, homa with yava and

sesame; donate three metals (gold, silver, copper); Vi. Dh III. 201. 1–5.

Satya-nārāyanavrata—very popular in Bengal and Mahārāṣṭra: described in Bhavisya (Pratisargaparva) chap. 24–29; M. M. Hara Prasad Shastri in cat. of mss in the Asiatic Society's Library, Calcutta, vol. V. preface p. LXV says that the worship of Satyanārāyana (ms. No. 3370) has a Mahomedan origin. It was originally (and even now in many places) called 'Satyapīrer pūjā'. It occurs in the Revākhanda of the Skandapurāna (Vangavāsi ed) but does not occur in the Venk. Press edition. Vide also JBORS vol. XVI. at p. 328 where the same scholar says that the Mahomedan custom of offering 'Sirni' to Satyapīr was adopted by Bengal Hindus as worship of Satyanārāyana. This is a vrata very popular among lower middle-class people and women. Vide I. A. vol. 3 pp. 83–85 for stories current in Bengal about this vrata. It is said that Nārada was told about this vrata by Visnu himself. On any day a man worships Satyanārāyana and offers naivedya of 1½ quantity (such as 1½ *ser* or *maund*) of plantains, ghee, milk and wheat flour (or rice flour), jaggery or sugar; all these to be mixed up for naivedya; performer should listen to the stories and partake of the *prasāda*; jāgara with songs, music, dance; then people go to their houses; this yields all desired objects; stories about a brāhmaṇa who performed this vrata every month, of a vendor of wood, of a trader named Sādhu with a ship full of merchandise and costly things and his daughter Kalāvatī. In these stories Satyanārāyana is represented as very jealous and vindictive. The stories are said to have been taken from Skandapurāna, Revā-khaṇḍa.

Sadūnata—otherwise called 'annadānamāhātmya'. HV II. 469–475 quoting Bhav. U. wherein Krsna narrates to Yudhisthira the importance of giving food to others and refers to the words of Rāma to Laksmana that they suffered exile in a forest because of not feeding brāhmaṇas, that king Śveta suffered pangs of hunger even when in heaven and was told by Brahmā that his plight was due to his not having fed hungry persons. The word literally means 'vrata (i e. giving food) always'. In modern times it is often pronounced and written as 'Sadāvarta' or 'Sadābarta' or 'Sadāvarat', vide *Muraryi* v. *Nenbai* I. L. R 17. Bom. 351 for a bequest of rents for establishing a 'sadāvarat'. HV II.

471 quotes a verse saying that 'food is the very life of beings, it is their vigour, strength and happiness and therefore the donor of food is declared to be the giver of every thing'. The importance of giving food is stressed in the exordium 'atithidevo bhava' in Tai Up. I 11. 2; vide also Atharva IX 6 ff and Kathopanisad I. 1. 7.

Santānadvādaśī-vrata—tithivrata; he gives his or another's daughter in marriage on K Full Moon, observes a fast on the confluence of rivers, reaches a happy goal HV II. 238 (from Bhav. U.).

Sandhyā (twilight)—is the period of three *ghaṭikās* (72 minutes) before sunrise and after sunset and it was provided that one should not engage in four actions in that period, viz eating, sexual intercourse, sleep, Vedic study; HK 694–97, PC 46; Utpala on Brhaj-jātaka VII 1 quotes Varāha that it is the time after half the sun's disc has gone down till appearance of stars and morning twilight is from the east having light till half the sun's disc appears.

Saptadvīpa-vrata—begin on Cai. śu. 1st and worship for seven days in order the seven *dvīpas* (continents), viz. Jambū, Śāka (of the Śakas), Kuśa, Krauñca, Śālmali, Gomeda and Puskara; *homa* with ghee and donate seven dhānyas; observe nakta and sleep on the ground; one year; donate a figure of dvīpas made of silver; goes to heaven till end of Kalpa; Vi Dh. III. 159. 1–7.

Saptamī-nirṇaya—If 7th is mixed with 6th and 8th tithis a vrata for 7th tithi is to be performed on that day where 7th is mixed with 6th, but if for any reason 7th mixed with 6th cannot be accepted, the 7th mixed with 8th may be accepted, KN 193–194, TT 35–36, PC 103–104.

Saptamīlokavrata—worship seven *lokas* on 7th tithi; one would secure great intellect and unequalled position. HV I. 793 (one verse from Vi. Dh.)

Saptamī-vratas—Mat. chap. 74–80 = Pad V. 21. 215–321, Bhav. U. 43–53, Nār. I. 116. 1–72, KKV 103–225 (sets out more vratas of 7th tithi than of any other tithi, 44 in all), HV I.

632–810 (about 62 vratas), VKK 35–38, TT 36–40, VR 231–255 For eulogy of the worship of Saptamī, vide Vi. Dh. III. 169. 1–7.

Saptamīsnapana—Mat (68 1–42) describes this at length; HV (I. 763–768) quotes from Bhav. U. almost the same verses as those in Mat It is said to be an antidote against disease, ill-luck or distress or the death of infants It should be performed in the 7th month after a child is born to a woman who lost an infant child or on a 7th tithi in śu, but tithi of the birth should be avoided; offer to the Sun and Rudra and the Mātṛs specially oblations of rice with milk, repeat hymn to the Sun (Rg. I. 50) and offer homa to Rudra with Rg I. 43; the fuel sticks are to be of arka and palāśa and 108 āhutis of *yava*, dark sesame, and ghee; four jars in four corner directions and a fifth in their midst; and various things (five *ratnas*, *sarvauṣadhis*, clay from several places named) were to be cast in all jars; seven married women should sprinkle water over the woman whose child died and invoke the Sun, Moon and the gods to save the child that is born; golden image of Yama to be donated to ācārya (priest), worship of the Sun and the kapilā cow; performer to eat remnants of food offered to gods.

Saptamūrti-vratas—Vide Vi. Dh. III. 157–166.

Saptarṣi-vrata—(1) worship of seven sages makes one reach them and confers sagehood; HV I 791 (from Vi Dh.); (2) begin from Cai. śu. and for 7 days therefrom worship each of the seven sages viz Marīci, Atri, Angiras, Pulastya, Pulaha, Kratu and Vasiṣtha, with fruits, flowers and cow's milk, subsist in nakta way on those days; homa with sesame and with Mahāvyāhṛtis, for one year; at end donate a black deer hide to an Agnihotrin; performer secures the way to moksa; HV II. 508 (from Vi. Dh. III. 165. 1–7)

Saptavāra-vratas—(vratas of the seven week-days), KKV 25-27, HV II. 520–592, KR 593–604.

Saptamyarka-vrata—RM (verses 1172–73; vide ABORI vol. 36. p 314).

Saptasaptamīkalpa—to be undertaken on a Sunday in bright half after the Sun starts on his (apparent) northward passage and on a nakṣatra with male name; he should observe celibacy and subsist in nakta way on all the seven saptamīs

called Arkasamputa, Marica, Nimba, Phala, Anodanā, Vijayā, Kāmikī; observe ekabhakta on 5th and avoid sexual intercourse on 6th and give up honey and meat on that tithi; after writing the seven names on leaves he should cast them in an unused jar and should ask a child (who does not know the meanings of the seven names) to take out one and he observes that particular 7th accordingly; for a year; performer gets all his desired objects and reaches Sūryaloka, KKV 189–191, HV I. 687–689 quoting verses (from Bhav I. 208 2–32) Male naksatras have been stated above

Saptasāgara-vrata or *saptasamudra-vrata*—begin from Cai śu. 1st; worship Suprabhā, Kāñcanāksā, Viśālā, Mānasodbhavā, Meghanādā, Suvenu and Vimalodakā for seven days in order; homa in their names of curds add dinner full of curds to brāhmanas, and himself partake at night of boiled rice and ghee; for a year, donate seven garments to a brāhmana at a holy place, this is also called Sārasvatavrata; HV II. 507 (from Vi. Dh) The above seven appear to be the names or branches of river Sarasvatī and therefore Sārasvata appears to be the proper name and not 'Saptasāgaravrata'. Vide Vi. Dh. III. 164 1–7 for these seven rivers and this vrata being called Sārasvata

Saptasundarala-vrata—worship of Pārvatī under seven names, viz. Kumudā, Mādhavī, Gaurī, Bhavānī, Pārvatī, Umā, Ambikā; dinner for seven days for seven maidens (about 8 years old); every day one of the 7 names to be used in the form 'may goddess Kumudā be pleased' and so on for six days; on the 7th all seven to be invoked and honoured with gandha &c and tāmbūla, vermilion and cocoanut, after worship a mirror should be presented before each of the seven; this secures beauty, *saubhāgya* and destroys sins, HV II 886–87 (from Bhav. U.).

Samudra-vrata—begin from Cai. su 1st, every day for seven days, worship with salt, milk, ghee, whey, wine mixed with water, sugarcane juice and sweet curds, performer to eat at night *havisya* food; homa with ghee, for a year; at end donate a milch cow; king becomes supreme on the whole earth; one secures also health, wealth and heaven. HV II. 464–65 (from Vi. Dh III. 160 1–7) The oceans are sometimes said to be seven, as in Vāyu 49. 123, Kūrma I 45. 4,

water, ratnas, *dūrvā*, white lotuses &c. should be cast in those kalaśas; Laksmī to be worshipped and prayed to; invoke Nārāyana in the middle kalaśa and worship Nārāyana image for one year or as long as success is not effected, HV I. 546–552 (from Gar.); (3) on M. śu. 5, worship Laksmī in jar full of water or on Śālagrāma stone since she came to this world at Visnu's command on that day; Bhujabala-nibandha (p. 363 Ms) says that worship was with kunda flowers; KT 457, 458; PC 98 says Laksmī was to be worshipped on M śu 5, while SmK 479 provides that Kāma and Rati (Cupid's wife) were to be worshipped and a great festival (called Vasantotsava was to be held; (4) on Cai śu. 5 Laksmī was to be worshipped; the performer throughout his life is endowed with prosperity; NM p. 62 verses 766-768, SmK 92.
